Only the 18650 Li-ion battery can be used in Cigar power. Please pay attention to the positive and negative protect from contrary connecting or circuit. Wrong connecting would lead to serious damage and this damage is irreversible or could not be saved. The correct assembly method must be strictly observed.

There are two kinds of 18650 Li-ion battery: the positive battery terminal is pointy or flat. Suggest use the pointed battery. The right install way is shown below.

INSTRUCTIONS

Torch using: plug in the pluggable LED lamp, push the button, turn on the torch. Keep pushing button for 2 seconds, turn off the torch. Different battery capacity support different lighting time.

CAUTION: When using torch, the LED chip generates enormous amounts of thermal energy and the shell can get hot, please use with care and prevent burns.

Powerbank using: unplug the LED lamp, connect the various output devices, push the button, turn on the powerbank. Keep pushing button for 2 seconds, turn off the powerbank. Different battery capacity support different charge ability.

CAPACITY DISPLAY

There are four power indicators and display rule description was followed.
Discharge mode: means recharging devices such as mobile phones or turn on the torch.

Operation method:

- LED will go off after 3 seconds and go into power saving functions until press the key again. It's cycle process.
- If no device can be detected by automated systems in 180 seconds, automatic shutdown function is running.
