

## Notes:

- When charging the battery case with phone attached, the phone battery will be charged first. After the phone battery is fully charged, charging of the battery case will begin.

### LED Power Indicator

Up to 4 LED lights illuminate, depending on the level of power remaining in the battery case. The corresponding power levels are indicated in the chart below:

### Warnings

- Read all instructions and warnings prior to using this product. Improper use of this product may result in product damage, excess heat, toxic fumes, fire or explosion, for which damages you instead of the Manufacturer will be responsible.
- All battery cases have gone through a thorough quality assurance inspection. If you find that your battery is excessively hot, is emitting odor, is deformed, abraded, cut, or is experiencing or demonstrating any abnormal phenomenon, immediately stop all battery use and contact Manufacturer.
- Do not expose this battery case to moisture or submerge it in liquid. Keep battery dry all the time.
- Do not attempt to charge battery case using any method, apparatus, or connection other than the device's USB connector.
- Do not attempt to replace any part of this battery.
- Due to the high output power, when charging the battery case's surface gradually becomes warm. This is normal.
- Due to the classic ultra-thin design, when using the battery case, please remove the phone's other protected case.

# POWER CASE

## Specifications&User Manual

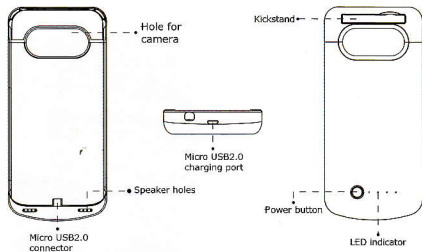

Made for **S7**

## Specifications

Battery:Li-polymer battery	Charging Time:~5hours
Output Voltage:5V	Compatibility: S7
Output Current:2A(Max)	Dimension:153.5*71*17.7mm
Input Voltage:5V	Weight:Approx.110g
Input Current:1A(Max)	

## Product Structure

## Package Contents

- 1.Rechargeable External Battery Case ×1
- 2.User Manual ×1

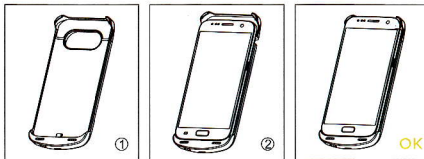

It is possible that there may be slight differences in the contents of your package, as this product is sold worldwide. If you have any questions regarding the contents of your package, please contact us.

## How to use

To charge the phone with the battery case:

- Attach the battery case to your phone, and then press the power button. The battery case will begin charging your phone.
- Press the power button once to check the battery level. The illuminated LED will show the battery level.

**Assembly:** First pull out the top cover. Slide your phone gently into the battery case, and make sure the phone is well connected to micro USB2.0 connector of the battery case.

To charge the battery case:

Connect the charging cable to the battery case's USB input interface, and then connect the cable to a USB charger. Press the power button once to charge the phone and battery case simultaneously. The battery case is fully charged when all four LED indicator lights are illuminated and stop flashing.
