## User's Manual

Model No. JN-1005  
Product Name: Bluetooth Speaker

## II ] Production Introduction

JN-1005 Bluetooth Speaker is designed in a mixture of modern stylish and reliable techniques. Supporting loud conversation volume and stereo music quality, the shape design is humanized. It is perfect for in car and indoor use. This product has adopted the standard features of Bluetooth 3.0+EDR (A2DP) and offers you the wireless convenience when you use it. You can enjoy freely within the operating range of the Bluetooth A2DP①/source, such as live stereo music of MP3, PC or PDA.

Moreover, this product is interchangeable for use of music or telephone, so far as your cell phone supports the functions of Bluetooth②. Therefore, you may pick up or dial a call and switch back to the music just in a few seconds③.

### Notes:

- ① The connected broadcast installation or Bluetooth transmitter which is required to be Bluetooth A2DP supportive.

4

- ② Cell-phone is required to support the Bluetooth headset or hands-free function with Bluetooth A2DP.

- ③ Some cell-phone may not be able to release the connection of Bluetooth automatically, thus disabling the speaker from the interchange.
