

SOLAR MOSQUITO ELLIMINATOR

This product is a solar powered mosquito eliminator. It uses its build-in blue LED light source to attract mosquito to fly over and kill them by the high voltage metal net around the light. Solar cell on top of the product generate electricity to charge the built-in battery which then power the LED and the high voltage metal net. This unit can be placed anywhere where normal power supply is not available, such as tent, yard, shed..... Different stands are available for using this product both outdoor and indoor.

Specification

- Solar Cell: 1 piece of 70X152mm amorphous type solar cell
- Battery: 2 X 1.2V/900mAh Ni-Mh rechargeable battery
- Output voltage on the metal net: 1000VDC Min.

How to use it

- When charging, please put this unit at a place that can have direct contact with sunlight, and make sure that no shadow is cast onto the solar cell. The amount of charging from solar cell changes according to the strength of sunlight.
- Stand, base and hanger is available to mount this product in different places, such as indoor, outdoor, or under a roof.
- Move the switch at bottom of the head piece to "ON", the LED will then light up
- Place this product at where you want to kill the mosquito

Note

- Always keep out of reach of Children. And do not try to touch the metal net. Danger of electric shock, and might cause damage to small electronic devices like a pace maker
- This unit is not waterproof, do not try to use it in rain or where water could access onto the unit.
- Keep the solar cell clean. Wipe them periodically with a damp cloth, dirt on the glass will reduce output from solar cell
- Best charge the unit for one full sunny day before the first use.
- It's not suitable for use in barns, stables and silimar locations.
- It is not to be used in locations where flammable vapour or explosive dust is likely to exist.
