Before Using Scanner

To use with iPhone: Open the Apple store on your iPhone and download the iPhotojet app.

To use with Galaxy S: Open the play store on your Galaxy S and download the iPhotojet app.

Hardware Features

1.	Power button	2.	Smartphone Cradle Exchange
3.	Smartphone Camera Hole	4.	Battery Power
5.	USB Power	6.	Slide/Negative Holder Insert
7.	Photo Holder Insert		

Using Smartphone Scanner

1. Power on Smartphone Scanner. (Make sure to power from either the battery or USB.)
2. Place Smartphone in the appropriate Smartphone Cradle with the screen facing up. Place Cradle on top of the Smartphone Cradle Exchange of the main scanner unit.
3. Place the slide, negative, or phone into the appropriate holder
4. Insert the holder into the scanner. (Make sure only one holder is inserted at one time.)
5. Open the iPhotojet app. Touch to select one of the scan type to proceed.
6. Touch **Camera** icon [icon] to capture. While on the preview screen, touch **Use** [icon] to continue to the next step or **Retake** [icon] for another shot.
7. On the screen message pop-up: "Would you like to further adjust EV/color performance", touch **YES** [icon] to enter the settings. (Touch **Brightness** [icon] or **Color** [icon] icon to switch between the two settings, Once ready, touch **Do** [icon] to exit to main screen). Touch **No** [icon] to exit to main screen.
8. While the captured image is on the main screen, by touching: **Save** [icon] to keep it in your Smartphone Album; **Email** [icon] to e-mail out to someone; **Facebook** [icon] to upload in to Facebook . (Please note that selecting Email or Facebook will not save it to your Smartphone Album.)
9. Touch the **Cross** [icon] sign to complete the capture. Continue the next shot or exit the app.
