Preparing For Using

► Parts Of The Camcorder

1. Power/Shutter/OK Button
2. Working/Charging Indicator Light
3. Mode Button
4. Microphone
5. Lens
6. HDMI Out Jack
7. Reset
8. USB Jack
9. TF Card Slot
10. WiFi/Down Button
11. Speaker
12. LCD Screen
13. Tripod Slot

25

► Charging The Battery

The camcorder has an internal lithium battery. Please follow below steps to charge the battery correctly when in first use or in low power.

1. Long press the power button to turn the camcorder off.
2. Connect the camcorder to the computer or a charger through the USB cable for battery charging.
3. When charging, the power indicator light will turn red and flicker.
4. Once the charging completed, the indicator light will keep red. Please unplug the USB cable.

Notice: The camcorder body may get warmer after using for long time. This is normal.

► Inserting The Memory Card

This camcorder is not equipped with an internal memory card. For normal operation, please prepare a TF card (at least class 4) first and follow below steps to insert the card.

26

1. Turn the camcorder off.

2. Find the TF card slot at the side of camcorder, then insert the card in correct direction. You will hear a "click" sound if the memory card has been inserted into the camcorder successfully.

Notice	<ol style="list-style-type: none">1. Must use Class 4 (at least) or higher speed rate TF card. Please use above Class 10 TF card when recording video in 4K/1080p@30fps.2. Please format the TF card before using. Make sure the camcorder is turned off before inserting or removing the card.3. Using poor quality or counterfeit memory card will lead to many problems such as crashing, can not take photo or video, damaging the files and so on. Suggest to use brand memory card for improving the stability of camcorder. It has higher requirement for TF card when in moving or long-time continuous shooting.4. It is important to keep TF card clean. Do not adhere any liquid, dust and particles on the surface of card.
