Overview of Bluetooth Phone Adapter

The Bluetooth phone adapter connects to your traditional non-Bluetooth telephone line and allows you to answer PSTN calls using your remote Bluetooth device (Bluetooth headset). Moreover your Bluetooth headset. You can enjoy the comfort and convenience of hands-free communication.

Packing List

- Bluetooth phone adapter
- Extension cord
- Power adapter
- User manual

Features

1. LED indicator
2. Pair button
3. Ringer (ON/OFF) switch
4. Mini USB DC jack
5. TELEPHONE jack
6. Telephone Jack

Getting Started

Connecting the phone adapter with your telephone

1. Plug one end of the telephone cord into the "LINE" jack of the phone Adapter and the other end into the wall jack.
2. Plug one end of the extension cord into the "TELEPHONE" jack of the phone adapter and the other end into your telephone itself.

Powering on the phone adapter

1. Connect one end of the power adapter to the mini USB DC jack of the phone adapter.
2. Connect the other end of the power adapter to a wall outlet (wall socket).

Pairing the phone adapter and your Bluetooth headset

For the first time when you want the phone adapter to work with your Bluetooth headset, you must pair them. The phone adapter has four default PINs: 0000, . To know what PIN your Bluetooth headset adopts, please refer to its user guide.

If the PIN of your Bluetooth headset is one of the four defaults, do as follows:

1. Put your Bluetooth headset into the pairing mode by following the instructions in its user guide.
2. Press and hold the Pair button of the phone adapter for 3 seconds, until you see the LED indicator flashes quickly. The phone adapter attempts to pair and connect with your Bluetooth headset automatically.

Note: In some circumstances the pairing process can take up to 2 minutes.

3. When the two devices are successfully connected, the LED indicator on the phone adapter long light. If pairing fails, repeat the steps above.

Using the phone adapter for PSTN calls

Once the phone adapter is connected to your Bluetooth headset, you can use the Bluetooth headset by pressing its Talk button to receive or end a PSTN call.

Note: 1. You can also use your telephone to receive and answer PSTN calls as usual.

2. You may adjust the "Ringer" switch to let the phone adapter ring or not according to your interest.

LED indicator chart

LED indicator	Phone adapter status
Flashing slow	Idle mode (Powered on)
Flashing soon	Pairing mode
Long light	Connected mode
Flashing five times every one second	A call incoming
Flashing once every one second	Call active mode

Paired link to additional devices

Your phone adapter can store pairing information for up to eight different headsets equipped with Bluetooth wireless technology. If you want to pair the phone adapter and more than one headset, please follow the pairing process to pair them one by one.

Headset information is stored in a "Paired Device List" in memory in chronological order. When an attempt to pair with more than eight headsets is made, the oldest paired headset will be removed from the list.

Any of the eight paired headsets can initiate a paired connection to the phone adapter while the phone adapter is in the idle mode.

The phone adapter will automatically initiate a paired connection (when powered on) with the last headset it was connected to.

When there is an incoming call, the phone adapter can also connect the latest connected headset automatically while the phone adapter is in the idle mode.

Note: In case the connection is lost, you can manually connect the phone adapter to the headset by pressing the Enter button.
