Connecting the future

EC316 S

This product is Android Based Smart Watch, so you can install many APPs just using an ordinary smartphone. Meanwhile, considering watch phone's special features:

Direct contact to human body / Easy to read & check

we will mainly concentrate in developing special apps in the following areas:

1. Scientific exercise management

Exercise amount and Intensity monitoring, Speed monitoring

2. Convenient outdoor activities

Temperature, Humidity, Altitude, Barometric pressure,
UV radiation, Noise, Light intensity, Wind speed,
Compass and Walkie talkie function

3. Health management

Heart rate, Pulse, Temperature, Blood pressure etc monitoring,
Furthermore we can consider to connect device to the medical
care center.

4. Your safety management

GPS positioning, Falling-sensor and SOS alarm,
Movement tracing records, GEO- fencing etc.

5. For other smart life

RFID, PayWave, Smart household applications

As you can see, it is no longer an ordinary mobile phone, it's an intelligent device that associates with you closely.

Note: The product you're holding in your hand may not support above all functions, because some functions may need backup from product hardware. We will continuously release many new products for you to choose from.
Please stay tuned!
