# Synchronization

---

## Time Synchronization

If the Synchronous Switch on the watch is turned on by default (Settings – Clock – Time Synchronization), then after successful connection with the Bluetooth on the phone, the time and date on the watch will successfully synchronize with the current time and date on the phone and update accordingly.

## SMS

1. If the Reminder on the phone is turned on (Generally in the Settings menu, depending on the different design of the phone with different platform), when the SIM card on the phone receives SMS, the status bar on the phone will display the reminder relating to the SMS and now the watch will also receive the reminder. All the information (except the facial sign) will display normally by clicking View.

2. Click into the SMS menu on the watch to preview all the information in the inbox. You can select any SMS to view, and make quick reply and call to the sender after viewing.

## Dialing

Enter the number on the dialing interface of the watch and the phone respectively to dial, then the watch will immediately synchronize with the phone.

## Call

During the Bluetooth call, the interfaces of the watch and the phone will immediately synchronize with each other. While talking through the watch, you can adjust the volume, display the dial screen, mute and unmute, and end the call, etc.

## Call Record

Click into the call log to view all the call records on the SIM card of your phone. Select and click any number to make Bluetooth call.

## Contacts

Click into the address book to view all the contact number on the phone. Select and click any number to view and make Bluetooth call. (You can choose to synchronize with your phone for instant synchronization)

## Bluetooth Music

Go to the Music menu and click Play to successfully play the music on your phone, thus controlling the music player. Click  to reduce the volume, Click  to increase the volume, Click  to pause or Resume, Click  to play the previous song, Click  to play the next song.

## QQ

If the QQ Message Reminder on the phone is turned on (Generally in the Settings menu, depending on the different design of the phone with different platform), when the phone receives QQ messages, they will immediately be synchronized to the watch. You can view the content of these QQ messages in the Notification menu on your watch.

## Webchat

If the Webchat Message Reminder on the phone is turned on (Generally in the Settings menu, depending on the different design of the phone with different platform), when the phone receives Webchat messages, they will immediately be synchronized to the watch. You can view the content of these Webchat messages in the Notification menu on your watch.

## Remote Camera (IOS does not support)

When the phone is unlocked, you can click Remote Camera on the watch to preview pictures.
