

前言

随着经济的发展，汽车的保有量也急剧增长，人们再享受汽车给生活带来的便捷与品质提高的同时，却很少注意到车内空气的污染。根据 WHO（世界卫生组织）的权威发布，车内被认定为有害气体的种类超过一百多种。车内有害气体的主要来源是汽车地毯、塑料配件、座椅及粘合胶水等，同时有人喜欢在车内抽烟或者加装饰品等都会造成有害气体的二次产生，主要含有甲醛、乙醛、苯、甲苯、二甲苯、乙苯、丙烯醛、苯乙烯及微细物质等，这些车内污染物有的可能致癌，有的则可能会对神经系统、免疫系统、内分泌系统及生殖系统产生影响，另外霉菌在汽车通风系统内长年存在，这个问题在潮湿气候条件下运行的空调尤为突出，有的霉菌会造成哮喘、呼吸困难、记忆力及听力丧失，肺部出血等。

With the development of economy, more and more people own the cars. People enjoy the convenience and quality of life bringing by the car, but seldom of them will pay attention to the air pollution which is also caused by the car. According to WHO (World Health Organization), the car was identified as having more than 100 kinds of harmful gases. The main sources of harmful gases in the automotive vehicle to blankets, plastic parts, seats and bonding glue, etc., while some people like to smoke in the car or put some decorations in the car will cause secondary harmful gases, mainly containing formaldehyde, acetaldehyde, benzene, toluene, xylene, ethylbenzene, acrolein, styrene and fine substances, some of these pollutants may cause cancer, while others may lead to nervous system, immune system, endocrine system and the reproductive system affect. Besides, mold in the car ventilation systems and if it exist for years, then might cause asthma, breathing difficulties, memory ,hearing loss, lung bleeding and other diseases.

我们知道车内空气污染的严重与危害性，那么除了多开窗户通风外，我们将为您带来全新的车内空气净化解决方案

——移动车载空气净化器

Now we know that it's serious to handle the problem of air pollution from vehicle, besides open the window frequently, our product will bring you a new car air purification solutions.

移动车载空气净化器拥有多项专利技术，结合使用 HEPA 高效过滤网、椰壳多孔活性炭、低频生态负离子群等净化技术，采用独特无死角气流循环风道，双涡轮高速驱动，实现更快速、有效车厢空气净化，为您带来森林般的自然空气！

Car air purifier has a number of patented technologies, it uses some high purification technology such as HEPA high effect filters, coconut shell charcoal porous, low-ecological anion group, using special air circulation duct which is no dead ,

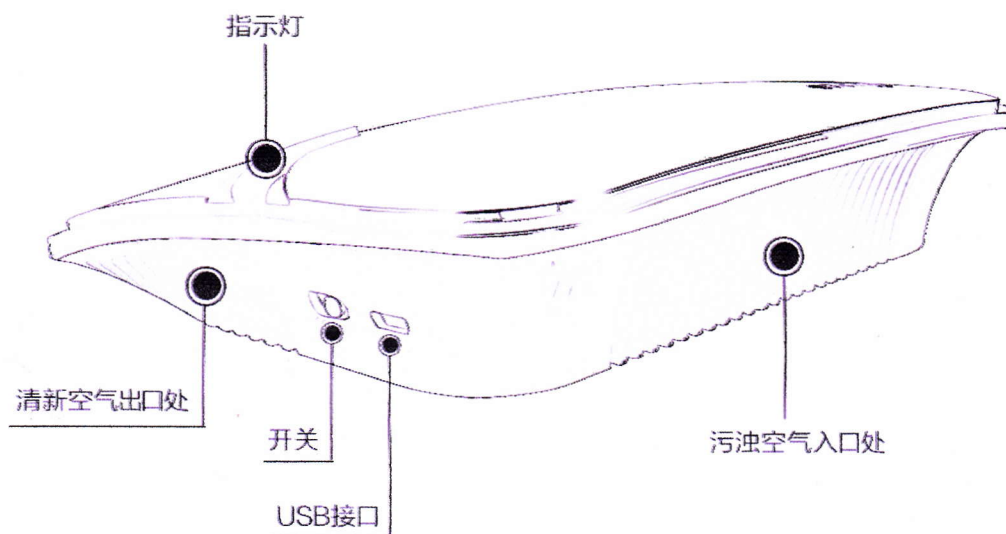

twin-turbo high-speed driving, to make it work more rapid and effective, to bring you a natural forest-like air!

特点(M-21)

- 1: 名师设计, 流线型专利外观, 极致品味!
- 2: HEPA 高效微小粒过滤网, 过滤效率高达 99.7%
- 3: 3D 多孔蜂窝椰壳活性炭, 吸附分解各种异味及有害气体
- 4: 低频生态负离子, 小粒径传播更远, 活性高, 易吸收
- 5: 静音双涡轮设计, 驱动力更强, 净化更快
- 6: 植物香薰系统, 更清新舒适

1. Designed by the master, streamlined appearance shows the taste.
2. HEPA high efficiency particulate filters, filtration efficiency up to 99.7%
3. 3D porous honeycomb coconut shell activated carbon can adsorb a variety of odors and harmful gases
4. Low-ecological anion, small particle size but spread farther, high activity, easily absorbed
5. Quiet twin-turbo design with a strong drive, cleanup faster
6. Plant aromatherapy system, more fresh and comfortable

使用说明

使用注意事项

过滤网组件的更换：根据时间使用环境污染程度不同，
更换过滤网组件，通常建议 6 个月左右更换一次！

关于香薰说明：产品内置天然植物香薰片，首次使用如果觉得味道偏浓，可以拿掉机子过滤网，放置通风处工作一些时间后即可！植物香薰气味淡雅舒适，气味正常可以持续 6-12 个月左右，如果没有香味可以到官方平台购买香薰片放置过滤网后面的空隙位置，无需拆机更换！

Replacement the filter assembly: according to the using time and the different level of environmental pollution,

We recommend to replace the filter assembly every six months!

Description about Aroma: Made of natural plant essential piece, if you feel the smell is too strong when first time using, you can remove the filter machine, place the Aroma to a well-ventilated place for some time

Plant aroma smell soft and comfortable, normally the odor can last 6-12 months. Once the fragrance is run out, you can go visit the official website. And it's no need to disassemble replaced for changing the fragrance.

机身保养

1: 清洁产品前，请先将产品电源断开

2: 请定期用软棉布擦拭产品机身，擦洗前务必将棉布拧干，切勿将水渗进产品内部。请不要使用含有汽油、稀释剂等挥发性有机溶剂擦拭本产品

1. Before cleaning the product, turn the product power off

2: Wipe regularly with a soft cotton products, be sure to scrub the cotton wring before wiping the body of machine. Never penetrate water inside the product. Do not use volatile organic solvents containing gas, thinner etc for wipe.

产品参数

产品名称: 移动微森林 Name of product

额定电压: DC5V Rated voltage

工作电流: 1-2(A) Working current

产品尺寸: M-21: 200*140*42(mm) dimension of product

计划面积: 10-20(m³) Plan area

生态负离子浓度: 75-150(万) Ecological anion concentration

PM2.5 净化率: ≥99.7% Purification rate of PM2.5

甲醛去除率: ≥98.5% Formaldehyde removal rate

*产品参数如有变更，恕不另行通知，本公司拥有最终解释权。

Product specifications are subject to change without notice, the company has the final say.

警告

1 : 切不可将净化器放置在安全气囊标示的位置，确保安全气囊能够正常工作！

2 : 为了您的安全，切勿在行车过程中试图关闭或者操作空气净化器，勿使用附件品，如点烟器电源、添加香料等！

Warns:

1.Purifier can't be placed in the position indicated airbags, airbag ensure normal work!

2: For your safety, do not attempt to shut down or operate the air purifier when driving, either use accessory products, such as light the cigarette power, add spices!

使用注意事项:

- 1: 保持车窗处于关闭状态。
- 2: 保持车内空调系统在低风速水平。
- 3: 过滤网组件注意正确安装。

Caution:

- 1: Keep windows closed.
- 2: Keep the car air-conditioning systems in low wind levels.
- 3: filter assembly should be installed properly.
