ON & OFF: Power switch to power on & off the monitor

DC 9V: Connect to the charger to recharge the battery inside the monitor

## Installation of the Float, Fishhook and Monitor

### Float

Firstly use a fishing line to fasten the float across the hole on top of it, the length of the fishing line is according to your own choice. And then select an appropriate place on the wire of the camera to fasten the float. See picture as below

### Fishhook

1.Connection in series: Normally fix 2pcs or at most 3pcs fishhook on the fishing line in a line, and each at 5cm distance, which can make sure all are clear when show on screen. The distance of the Lead can be a little longer than the last fishhook on the line. See picture as below

2.Connection in parallel: normally fix 2pcs fishhook just under the camera, the length of the fishing line is according to the clarity of the water. Lock the metal ring on the groove part of the camera body, and make sure to fix one fishhook on the loop to avoid the mixing with another one. See picture as below

3.Notice: DO NOT fix the fishing line of the fishhook on the wire of the camera, which can destroy it. Make sure to fix the fishingline on the groove part at the end of the camera body. See picture as below

## Monitor

Firstly fix the metal strip onto the fishing rod as picture 1 shows, and then install the holder together with the monitor onto the metal strip & fix it, as picture 2 shows. Adjust the monitor to an appropriate position to enjoy the fishing delight.
