Connect Your Smartphone to Camera

1 Download ThiEYE App.

Please scan the QR code below to download ThiEYE App, or download it from our official website www.thieye.com.

2 Hold UP/Wi-Fi Button for 2-3s, the LCD will show 'Waiting for WiFi Connection...'. 3 Connect your smartphone to Wi-Fi Network (Name: ThiEYE*i60, Password: 1234567890), then open the App and click the "Connect" button.

4 View and control your camera on smartphone via App.

Basic Operation

1 Charge the camera

Connect the camera with power plug or PC via USB cable, the charging indicator remains red while the battery is charging, and the charging indicator will turn off when the battery is fully charged.

2 Insert Micro SD card

Insert a Micro SD card. (Class 10 or UHS-I required, sold separately.)

3 Turn on/off the camera

Hold the Power/Mode Button "  " for 2-3s to power on/off the camera.

4 Mode Switching

Repeatedly press Power/Mode Button "  " to switch mode, there will be modes: Video Recording, Photo, File, Video Settings, Photo Settings, System Settings.

5 Video and Photo

Video Recording: Choose Video Recording mode, press Shutter/Select Button "  " to turn on/off. There will be a red dot flashing on the camera screen, and the status indicator will flash during recording. (*When you record videos via App control, the screen will automatically turn off)

Take Photos: Choose Photo mode, press Shutter/Select Button "  " .

6 Video Recording Mode

Timelapse: To take continuous photos at the interval of 3/5/10/30/60s of a changing

scene, then form into a time lapse video when play at normal video speed.

Slow Motion: Make a slow motion footage at 1080P 60fps or 720P 120fps/60fps when selecting Slow Motion Mode

Quick Shooting: Automatically start recording videos when turn on the camera.

Looping Record: Record and save videos every 1/3/5min, the latest video will overwrite the oldest video when Micro SD card is full.

7 Photo Mode

Self-Timer: Support self-timer at 3/5/10s setting.

Photo Burst: Support photos to 3/5/10 frames per time, press-and-hold for continuous shot.

Timelapse Photo: Support photos at the interval of 3/5/10/30/60s.

8 Car Mode

With the camera off and automotive charger connecting, when the car is started or a crash happened the camera will turn on and record automatically.
