## How to Use

1

Set the phone to split-screen display mode (you can scan the QR code found on the packaging box to download the 3D app or you can download it yourself)

Insert phone

2

Adjust the object distance according to the adjustment scale on both sides. Use Velcro to fasten (Remember the number to be reused next time)

Adjust object distance

3

Adjust the head strap according to personal requirements

4

Wear the equipment correctly,  
and experience now!

## Material Information

Nanomaterials, EU approved environmentally friendly silicone

## Common Problems

1. How do I wear the product if I am myopic?

A: Adjust the product until it is at a suitable position based on the object distance adjustment scale on the both side, and then use Velcro to fasten.

2. I have adjusted the object distance according to the scale, but the display is still unclear, why is this happening?

A: The object distance adjustment scale is only for reference, you can make adjustments based on your own eyesight. Remember the scale position so that you can use it again the next time.

3. Why doesn't my phone fit in?

A: This product uses an elastic clamp to fasten the phone, first take off the phone's casing and place it in with the screen facing inwards.

4. What should I do if the lens is blurry?

A: This product uses Fresnel lenses, please use a microfiber lens cloth to gently wipe the lens with a bit of alcohol until it is clean again. Afterwards, make sure to store the product properly to avoid dust build-up.

5. Why is the display unclear after I wear the product? And why are there no 3D effects?

A: Before inserting your phone, configure your phone to split-screen mode.

6. Why am I always worried that the product will drop after I wear it?

A: The product uses a single piece nanomaterial strap, we suggest you adjust the length according to personal needs and then fasten with Velcro. You can even pull the strap from the middle of the glasses towards the back of your head before fastening it.
