Before using the phone, please read the following user's guide first.

Charge Battery

The battery in your phone hasn't been charged yet. While your phone is charging, it's important that you do not remove the battery pack. Doing so can damage your phone. Also, please don't try to take your phone apart. (If you do, it may invalidate your warranty.)

Knowing About Privacy Laws

Some countries have strict laws about how and when you can record phone conversations. For example, you may need to tell the person you're speaking to before you start recording. It's a good idea to find out what the laws are where you live before you use your phone's recording feature.

Important Reminding

Most application software in phone needs continuous network connection. Strongly suggest you to lessee the wireless network financing scheme to the network service provider, if you not do, long time connect to the network that can make data online costs to increase dramatically. Thus before starting using the phone, you must to check your financing scheme to the network provider.

CONTENT

1.Basic Message

1.1 Inside the Box

You will find the following inside the box:

- Phone
- USB cable
- AC adapter
- 3.5mm stereo headset
- Battery
- Micro SD card

1.2 Your Phone

Front panel
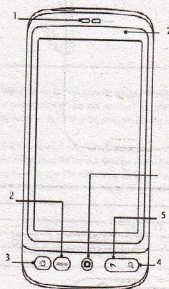

1. Headphone
   Receive incoming call.
2. Menu
   Press to open a list of actions that you can do on the current screen.
3. Main screen
   - ❖ In any application or picture interface, press the key to return standby screen.
   - ❖ In main screen press the key can display main screen shortcut.
   - ❖ Press and hold the key can open recent executed application program window.
4. Search
   - ❖ Press the key can open quick search box.

See "Searching your phone and the Web" in this chapter for more details.

5. Return

Press to go back to the previous screen, or to close a dialog box, options menu, the Notifications panel, or onscreen keyboard.

6. Touch screen

Back Panel
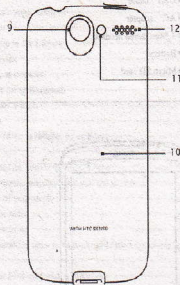

9. 5 megapixel camera

10. Back cover

11. LED flash light

12. Loudspeaker

Top panel
13. 3.5mm audio jack

Connect a 3.5mm stereo headset for hands-free conversation or for listening to music.

14. Battery

❖ When the phone is off, press to turn on the phone.

❖ When the phone is on and the screen is unlocked, press to turn off or on the phone display.

❖ With the screen unlocked, press and hold to open the phone options menu that lets you turn off the phone, switch your phone to silent mode, vibration mode, or airplane mode, and turn on/off the data connection.

Left panel

15. Increase volume

❖ During calling, press the key can increase headphone volume.

❖ While not in calling, press the key can increase ring volume.

❖ While seeing movie or hear FM radio, press the key can increase volume.

16. Decrease volume

❖ During calling, press the key can decrease headphone volume.

❖ While not in calling, press the key can decrease ring volume.

❖ While seeing movie or hear FM radio, press the key can decrease volume.

Bottom panel
17. Microphone

18. USE cable

❖ Connect battery adaptor, to charge battery.

❖ Connect the enclosed USB cable, to transmit the files in PC to phone, or use phone sync in computer.

1.3 Before Using

Back cover

Removing the back cover

Remove the back cover to access the battery compartment, SIM card slot, and storage card slot.

1. With the phone turned off, hold your phone securely with the front facing

down.

2. With your thumb or finger, lift up the top of the back cover from the small opening near the POWER button.
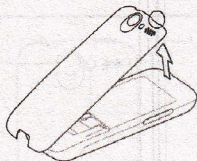

Replacing the back cover

1. Secure and press the bottom part of the back cover first by aligning into the two openings located at the bottom part of the back of the phone.

2. Press the sides and the top part of the back cover down to lock the cover into place. You will hear a click when the back cover is locked in place.
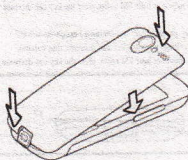

SIM card

SIM card has your phone number, detail service message and phonebook/message memo. The phone can supports both 1.8v and 3v SIM cards.

Some legacy SIM cards may not function with your phone. You should consult with your mobile operator for a replacement SIM card. There may be fees for this service.

Insert SIM card

SIM card bag is under the battery box.

1. Remove the back cover. Refer to "Removing the back cover."

2. If the battery is installed, remove the battery. Refer to "Removing the battery."

3. Insert the SIM card with its gold contacts facing down and its cut-off corner facing out.

4. Push the SIM card all the way in.
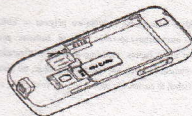

Removing the SIM card

1. Remove the back cover. Refer to "Removing the back cover."

2. If the battery is installed, remove the battery. Refer to "Removing the battery."

3. Push the SIM card out from the back of the slot, and then slide the SIM card out.

Memo card

Store your pictures, music, and applications in the microSD card.

Insert Memo card

Take off the cover. Please see 'take off the cover'

1. Remove the back cover. Refer to "Removing the back cover."

2. If the battery is installed, remove the battery. Refer to "Removing the battery."

3. Insert the microSD card into the slot with its gold contacts facing down and push it in until it clicks into place.
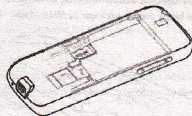

Remove Memo card

1. Remove the back cover. Refer to "Removing the back cover."

2. If the battery is installed, remove the battery. Refer to "Removing the battery."

3. Push the storage card in to eject it from its slot.

Remove the memo card when the phone is on.

When you need to remove the storage card while the phone is on, unmount the storage card first to prevent corrupting or damaging the files in the storage card.

1. Press HOME > MENU, and then tap **Settings**.

2. Scroll down the screen, and then tap **SD card & phone storage.**

3. Tap **Unmount SD card**.

4. Remove the storage card by following the instructions in "Removing the storage card."

Battery

Your phone comes with a rechargeable Lithium-ion polymer or Lithium-ion battery and is designed to use only manufacturer-specified original batteries and accessories. Battery performance depends on many factors, including network configuration, signal strength, the temperature of the environment in which you operate your phone, the features and/or settings you select and use, items attached to connecting ports, and your voice, data, and other program usage patterns.

Insert battery

1. Remove the back cover. Refer to "Removing the back cover."
2. Insert the contacts side of the battery first and then gently push the battery into place.
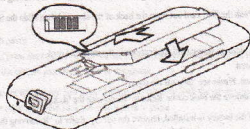

Removing the battery

1. Remove the back cover. Refer to "Removing the back cover."
2. Lift out the battery from the notch near the SIM card slot.
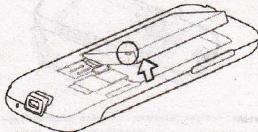

Charging the battery

The battery is partially charged when shipped. Before you turn on and start using your phone, it is recommended that you charge the battery. Some batteries perform best after several full charge/discharge cycles.

1. Attach the power plug to the AC adapter.
2. Connect one end of the USB cable to the sync connector on your phone.
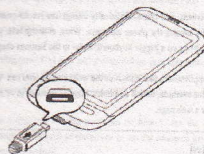

3. Connect the other end of the USB cable to the USB port of the AC adapter.
4. Plug in the AC adapter to an electrical outlet to start charging the battery.

As the battery is being charged, the notification LED shows a solid red light when the battery is being charged. The light turns to solid green when the phone is fully charged.

When you charge the battery while the phone is on, the charging battery icon ( ) is displayed in the status bar of the Home screen. After the battery has been fully charged, a full battery icon ( ) will be displayed in the status bar of the Home screen.

- Only the AC adapter and USB sync cable provided with your phone must be used to charge the battery.
- Do not remove the battery from the phone while you are charging it using the AC or car adapter.
- As a safety precaution, the battery stops charging when it overheats.

Finger gestures

Tap

When you want to type using the keyboard, select items onscreen such as application and settings icons, or press onscreen buttons, simply tap them with your finger.

Press and hold

To open the available options for an item (e.g. contact or link in a web page), simply press and hold the item.

Swipe or slide

To swipe or slide means to quickly drag your finger vertically or horizontally across the screen or optical trackball.

Drag

Press and hold your finger with some pressure before you start to drag. While dragging, do not release your finger until you have reached the target position.

Flick

Flicking the screen is similar to swiping, except that you need to swipe your finger in light, quicker strokes. This finger gesture is always in a vertical direction, such as when flicking the contacts or message list.

Rotate

For most screens, you can automatically change the screen orientation from portrait to landscape by turning the phone sideways. When entering text, you can turn the phone sideways to bring up a bigger keyboard. Refer to the Settings chapter for more details.

Pinch

For some applications, like Photos or the web browser, you can "pinch" the screen using 2 fingers (for example, thumb and index fingers) to zoom in or zoom out when viewing a picture or a web page.

2.Getting Started

Once you've installed your SIM card and battery, you can turn on your phone and start using it.

Turning on your phone

Press the POWER button.

When you turn on the phone for the first time, you will be prompted to set up your phone. For more information on how to set up your phone for the first time, see "Setting up your phone for the first time."

Input PIN code

If your SIM card is preset with a PIN (personal identification number), you will be prompted to enter the PIN to proceed. Enter the SIM PIN, then tap OK.

To learn how to enable or disable the SIM PIN, see "Protecting Your Phone" in the Security chapter.

Most SIM cards are preset with a PIN (personal identification number) that is provided by your mobile operator. When prompted, enter the preset PIN, then tap Enter. If you enter the wrong PIN three times, the SIM card is blocked. If this happens, you can unblock it with the PUK (PIN Unblocking Key) obtained from your mobile operator.

Turning off your phone

If you do not need to use your phone, you can turn the phone off to save battery life.

1. If the display is off, press the POWER button to turn the display back on.
2. Unlock your phone if the Lock screen is displayed. See "Unlocking the screen" in this chapter for details.
3. Press and hold the POWER button for a few seconds.
4. When the Phone options options menu appears, tap Power off.
5. Tap OK when prompted to turn off the phone.

Setting up your phone for the first time

When you turn on your phone for the first time, your phone displays tutorials and guides you to set up your email accounts and favorite social networks such as Facebook®, YouTube™, and Twitter™. You can follow the onscreen instructions to complete the setup, or skip the setup and do it at another time.

1. Choose the phone language you want to use, and then tap Next.
2. Your phone first sets up GPRS/3G, MMS, and WAP connections automatically based on your SIM card.

If you did not insert your SIM card and you turned on your phone for the first time, your phone displays a tutorial showing how to install the SIM card and battery. Turn off your phone and insert your SIM card before proceeding to use the phone.

3. Your phone walks you through a tutorial on how to use the onscreen keyboard. Follow through the tutorial to learn how to use the onscreen keyboard. Tap Skip to not go through the tutorial.
4. On the Internet connection screen, select how you want to connect to the Internet, then tap Next.
5. Select if you want to automatically or manually synchronize data such as your email, contacts, weather and some other data, and then tap Next.
6. If there are Wi-Fi networks in range, you will be asked if you want to connect to a Wi-Fi network. Tap Next and then tap the wireless network that you want, or clear the Connect to Wi-Fi network checkbox, and then tap Next to set up your Wi-Fi connection at a later time.
7. Some phone features such as Weather and Footprints require Google's location service to automatically determine your current location. On the Location consent screen, you can choose whether to allow Google's location service to collect information about your location. Clear or select the checkbox, and then tap Next.

This service may incur additional data transfer fees from your provider. You can enable or disable this service later in your phone's location settings.

8. On the Set up accounts screen, choose the type of account you want to set up and follow the onscreen instructions to complete the setup. Tap Skip to set up accounts at a later time.
   - To set up your Google Account, tap Google account > Next > Sign in, enter your Google Account details, and then tap Sign in.
   - To learn how to set up POP3 and Microsoft Exchange ActiveSync accounts, see the Accounts and sync and Email chapters to learn how to set up these accounts.

   After setting up an account, you will be taken back to the Set up accounts screen so you can set up more accounts. When you are done setting up your accounts, tap Next.

9. On the Set up social networks screen, choose the type of social network account such as Facebook and Twitter that you want to access from your phone. Follow the onscreen instructions to log in to your social network account. Tap Skip to set up social network accounts at a later time. See the Social chapter for more information about Facebook.

   When you are done setting up your accounts, tap Next on the Set up social networks screen.

10. Some data and settings are automatically backed up to the storage card. Clear the check box if you do not want to automatically back up data and settings to the storage card, and then tap OK. See the Backup, update, and reset chapter to learn what items are backed up to the storage card.

11. The final screen shows you where you can learn more about using your phone. Tap Finish.

Sleep mode:

Sleep mode suspends your phone to a low power state while the display is off in order to save battery power. You will still be able to receive messages and calls while the phone is in Sleep mode.

💡 For information on how to adjust the time before the screen turns off, see "Adjusting the time before the screen turns off" in the Settings chapter.

Switching to Sleep mode

Briefly press the POWER button to turn off the display temporarily and switch your phone to Sleep mode. Your phone also automatically goes into Sleep mode when you leave the phone idle after a certain period of time. Switching to Sleep mode also prevents accidental button or touch screen presses when the phone is in your bag or pocket.

Waking up from Sleep mode

Your phone wakes up automatically when you have an incoming call. To wake up your phone manually, press the POWER button. You will then see that the phone has locked the screen. To find out how to unlock the screen, see "Unlocking the screen."

Unlocking the screen

Press the bar on the lock screen and then slide your finger down to unlock the screen or to answer an incoming call.

💡 You can also press MENU while on the lock screen to unlock the screen.

🔍 If you have set up a screen unlock pattern, you will be prompted to draw the pattern on the screen before it unlocks. For more information on how to create and enable the screen unlock pattern, see "Protecting your phone with a screen lock" in the Security

14

Home screen

The Home screen provides you with a weather clock that shows the time and weather of your current location. Tap the respective item to open the associated application.

The Home screen also lets you add the items you want and need on the Home screen. Add items like application icons, shortcuts, folders, and widgets to give you instant access to information and applications. To learn how to personalize your Home screen, see the Personalizing chapter.

Extended Home screen

The Home screen extends beyond the screen width to provide more space for adding icons, widgets, and more. There are 6 "additional" screens apart from the main Home screen.

🔍 You cannot add more screens

Navigating the Home screen

You can go to the extended Home screen by sliding your finger horizontally across the screen to go to the left or right side of the Home screen. While on an extended Home screen, press HOME to return to the main Home screen.

Directly going to a particular screen using Leap view

1. On any Home screen, pinch the screen to show the Leap view that shows all 7 screens as thumbnails.

💡 On the main Home screen, you can press HOME to show the Leap view.

2. Tap the screen you want to open.

15

Phone status icons

These are the icons that may appear on the phone status area of the status bar:

G	GPRS connected
G	GPRS in use
E	EDGE connected
E	EDGE in use
3G	3G connected
3G	3G in use
H	HSPA connected
H	HSPA in use
	Connected to a Wi-Fi network
	Bluetooth is on
	Connected to a Bluetooth device
	Airplane mode
	Alarm is set
	Speakerphone on
	Data synchronizing
	Signal strength
	Roaming
	No signal
	No SIM card installed
	Vibrate mode

	Phone speaker is mute
	Microphone is mute
	Battery is very low (10% remaining)
	Battery is low (20% remaining)
	Battery is full
	Battery is charging
	Wired microphone headset connected
	Wired headset connected

Notification icons

These are the icons that may appear on the notifications area of the status bar:

	New Gmail message
	New Microsoft Exchange ActiveSync or POP3/IMAP email
	New SMS/MMS
	Problem with SMS/MMS delivery
	New Google Talk instant message
	New voicemail
	Upcoming event
	Song is playing
	General notification (for example, Phone connected to computer via USB cable.)
	Storage card is low on free space
	Wi-Fi is on and wireless networks are available
	Data synchronizing or connected to phone Sync

	New tweet
	FM Radio application in use
	More (not displayed) notifications
	Call in progress
	Missed call
	Call on hold
	Call forwarding on
	Compass needs orientation
	Uploading data (animated)
	Downloading data (animated)
	Waiting to upload
	Downloaded Android Market application installed successfully
	Update available for an application downloaded from Android Market
	Storage card is safe to remove or storage card is being prepared
	No storage card installed on the phone

Checking notifications

Notification icons on the status bar report the arrival of new messages, calendar events, alarms set and ongoing settings such as when call forwarding is on or the current call status. You can open the Notifications panel to open the message, reminder, or event notification and see the mobile operator name.

Opening the Notifications panel

When a new notification icon displays in the status bar, press and hold the status bar, then slide your finger downward to open the Notifications panel.

If you have several notifications, you can scroll down the screen to view more notifications.

You can also open the Notifications panel on the Home screen by pressing MENU and then tapping Notifications.

Closing the Notifications panel

Do one of the following:

- Press and hold the bottom bar of the Notifications panel, then slide your finger up the screen.
- Press BACK.

2.3 Adjusting the volume

Adjusting the ringer volume changes the volume level of the phone ring tone, whereas adjusting the media volume changes the volume level of sound notifications, music or video playback. The ringer volume and media volume can be separately adjusted.

Adjusting the ringer volume

Press the VOLUME UP or VOLUME DOWN buttons on the left panel of the phone to adjust the ringer volume to your desired level. The Ringer volume window appears on the screen to display the volume levels. While in the lowest ringer volume level (Silent mode), press VOLUME DOWN once to set your phone to Vibrate mode. The phone vibrates and the vibrate mode icon ( ) appears on the status bar.

While in Vibrate mode, press VOLUME UP once to switch to silent mode. The speaker mute icon ( ) displays on the status bar.

> To quickly switch your phone to silent mode, press and hold the POWER button, and then tap Silent mode on the options menu.

Adjusting the media volume

When playing music or watching video, press the VOLUME UP or VOLUME DOWN buttons on the left panel of the phone to adjust the media volume. The Music/video volume window appears on the screen to display the volume level.

You can also adjust the media volume on the Settings screen.

1. Press HOME > MENU, and then tap Settings > Sound & display > Media volume.
2. When the Media volume window appears, drag the slider to the left to lower the volume or to the right to increase the volume.
3. Tap OK to close the window.

2.4 Connecting your phone to a computer

Whenever you connect your phone to a computer using the USB cable, the Connect to PC dialog box displays and prompts you to choose the type of USB connection. Select one of the following choices, and then tap Done:

Charge only

Select this mode if you only want to charge the phone's battery using your computer.

Phone Sync

When selected, the phone automatically uses Phone Sync when connected to your computer and lets you synchronize Outlook and Windows Address Book (Outlook Express), contacts and calendar events between your computer and your phone. For more information, see "Using Phone Sync" in the Accounts and sync chapter.

Disk drive

This mode is available only when you have installed a microSD card on your phone. Select this mode when you want to use your storage card as a USB thumb drive, and copy files between your phone's storage card and your computer.

When Disk Drive mode is enabled while your phone is connected to the computer, you will not be able to run applications that use the storage card, such as Music or Photos.

For more information, see "Copying files to and from the storage card" in this chapter.

Internet sharing

When you do not have Internet connection on your computer, you can select this mode to share your phone's mobile data connection with your computer. For more information, see "Using Your Phone as a Modem" in the Internet chapter.

> If you do not want to show the Connect to PC dialog box every time you connect the phone to the computer, clear the Ask me checkbox in the Connect to PC dialog box. The default connection type will be used when you connect the phone to the computer.
> To check or change the default connection type and to show or hide the Connect to PC dialog box, press HOME > MENU, and then tap Settings > Connect to PC.

2.5 Copying files to and from the storage card

1. Connect the phone to your computer using the supplied USB cable.
2. When the Connect to PC dialog box appears, tap Disk drive, and then tap Done.
3. On your computer, the connected phone is recognized as a removable disk. Navigate to this removable disk and open it.
4. Do one of the following:
   - Copy the files from the computer to the phone's storage card's root folder.
   - Copy the files from the phone's storage card to a folder in your computer or computer desktop.
5. After copying the files, unmount the removable disk (that is, the connected phone) as required by your computer's operating system to safely remove your phone.
6. Do one of the following:
   - Disconnect the phone from the computer.
   - If you want to keep the phone connected to the computer but want the phone to be able to access the storage card, open the Notifications panel, tap Disk drive, select an option except Disk drive, and then tap Done. See "Opening the Notifications panel" in this chapter to learn how to open the Notifications panel.

2.6 Searching your phone and the Web

You can search for information on your phone and on the Web by using the Quick Search Box. Some applications, such as People or Mail, have their own search box, which you can use to search within those applications (the application's icon is at the left of the search box.)

Setting Web and Quick Search Box options

1. Press HOME > MENU, and then tap Settings.
2. Scroll down the screen, and then tap Search.
3. Tap Google search settings, and then do the following:
   - Select Show web suggestions if you want to include suggestions from Google when doing a search.
   - Select Search history to enable personalized search history. You need to sign in to your Google Account to use this feature. The Show web suggestion check box needs to be selected for this option to be enabled.

Press BACK when you are done.

4. Tap Searchable items, and then select the items you want included when doing a search

Searching the Web and your phone using the Quick Search Box

1. Press HOME > SEARCH.

If you are in an application such as Mail, press the SEARCH button to toggle between doing a search in the application only and searching your phone and the Web.

2. Enter the search item in the Quick Search Box. As you type, matching items on your phone and suggestions from Google web search are shown as a list.

The suggested items that appear will depend on the options that you have selected in the search settings. See "Setting Web and Quick Search Box options" for details.

3. Do one of the following:
   - If what you're searching for is in the list of suggestions, tap it in the list. The item opens in the appropriate application.
   - If what you're searching for is not in the list, tap   to search the Web. The web browser opens, displaying results of a Google search on the Web.

Making your phone truly yours

Make your phone look and sound just the way you want it. Personalize your phone with a different wallpaper, ringtone, and notification sound for events such as incoming text, email, calendar reminders, and more.

Your phone's Home screen is highly customizable and extends beyond the screen width, giving you plenty of space to add the information that matters most in your daily life and phone features that make communication quicker and easier. You have up to seven screens that extend to the left and right sides of your display as your Home screen, on which you can add elements such as widgets, program icons, shortcuts to information, and more.

To find out how to set notification sounds for events, see "Changing sound settings".

Changing the ringtone

Choose from the available selections of ringtones on your phone.

1. Press HOME > MENU, and then tap Settings.
2. Tap Personalize > Default ringtone. The Phone ringtone selection menu then opens.
3. Scroll through the available ringtones and tap the ringtone you want to use. The ringtone briefly plays when selected.
4. Tap OK.

You can also download or copy ringtones or songs to your phone's storage card. To find out how you can copy files to your storage card, see "Copying files to and from the storage card".

Ringtones or songs downloaded or copied to your storage card are not automatically added to the ringtone selection menu. You need to go to the Music application and set a ringtone or song in your storage card as your ringtone. To find out how to set a ringtone using the Music application.

See "Setting a song as ringtone" in the Music chapter.

Personalizing your phone with scenes

Your phone becomes multiple phones in one when you use scenes. Scenes are personalized Home screen layouts that you can quickly apply to your phone. By switching between scenes, you instantly turn your phone into your perfect weekend phone, travel phone, work phone, or pure play phone.

Using a preset scene

Your phone features preset scenes, each preconfigured with a different wallpaper and collection of widgets that reflect different moments in your life. You can choose a scene that is suitable for work, play, travel, or your social life.

1. Press HOME > MENU, and then tap Scenes.
2. In the Choose a scene menu, select a preset scene and then tap Done.

Default   Work   Play

Customizing and saving a scene

After selecting a preset scene, you can add widgets and other elements, arrange the layout, change the wallpaper, and save the whole Home screen as your personalized scene.

1. Press HOME > MENU, and then tap Scenes.
2. In the Choose a scene menu, select a preset scene that already has some widgets, or select Clean Slate if you want to design your own Home screen.
3. Add widgets and other elements that you want.
4. Arrange the layout of your Home screen according to your preference.
5. Change the Home screen wallpaper. You can also change the lock screen wallpaper.
6. When you are done designing your Home screen, press HOME > MENU and then tap Scenes again.
7. Under My scenes, make sure the Current (unsaved) option is selected and then tap Save.
8. Enter a new scene name for your Home screen and then tap Done. Or, if you already created a scene, enter the same scene name, tap Done and then tap Replace.

Renaming or deleting a scene

You can rename or delete a personalized scene that you created. Preset scenes cannot be renamed or deleted.

1. Press HOME > MENU and then tap Settings > Personalize > Scenes.
2. Under My scenes, press and hold a scene and choose whether to rename or delete it.

3.3 Changing your wallpaper

Personalizing your Home screen wallpaper with your favorite photo is a quick and easy way to change the feel of your phone and give it a fresh look. Browse the collection of wallpapers included in your phone or choose from photos that you have taken with the camera. You can also change your Home screen to use an animated wallpaper.

The wallpaper that you choose for the Home screen will also be used as the lock screen wallpaper.

1. Press HOME > MENU, and then tap Wallpaper.
2. Do one of the following:
   - Tap Live wallpapers to choose from preset animated wallpapers.
   - Tap My photos to select a photo that you have taken using the camera or copied to your

storage card. Crop the photo and then tap Save.
- Choose from preset wallpapers.

After changing the wallpaper, remember to save it to the scene that you created or save it into a new scene. To find out how to save a scene, see "Customizing and saving a scene".

Personalizing your Home screen with widgets

Widgets put at-a-glance important information and media content up front on your Home screen. Some widgets are already added to your Home screen for your convenience. You can add more from the available selections of widgets, or download more widgets.

Adding a widget to your Home screen

A wide selection of widgets is available for you to choose from, such as Calendar, Music, Photo Album, Friend Stream, Twitter, and more.

1. Press HOME. Go to the part of the Home screen where there's space to add a new widget. To find out how, see "Navigating the Home screen" in the Basics chapter.
2. Tap ▉ or press and hold on the Home screen to open the Add to Home options menu.
3. Tap Widget and then select a widget that you want.
4. Most phone widgets are available in a variety of designs and sizes to suit your needs. Tap the right or left arrow button at the bottom of the screen to view the different styles, and then tap Select to choose one.

You can also add widgets that allow you to quickly switch on or off certain settings of your phone, such as Wi-Fi, Mobile Network, Bluetooth, and more. Scroll down the widgets list, tap Settings, and then tap the widget that you want.

Downloading phone widgets

A selection of fun and useful widgets are also available for download.

1. Press HOME. Go to the part of the Home screen where there's space to add a new widget. To find out how, see "Navigating the Home screen" in the Basics chapter.
2. Tap ▉ or press and hold on the Home screen to open the Add to Home options menu.

3. Tap Widget and then tap Get more widgets.
4. Tap to select a widget.
5. Tap Details to see a short description about the widget. After reading, press BACK.
6. When you're ready to download and add the widget to your Home screen, tap Download.

3.5 Adding application icons and other shortcuts on your Home screen

Place application icons on your Home screen to open applications quicker. You can also add shortcuts to settings and specific information such as a bookmarked webpage, someone's phone number, a music playlist, route directions, and many other items, to your Home screen.

The shortcuts available depend on the applications that are installed on your phone.

1. Press HOME. Go to the part of the Home screen where there's space to add a new shortcut. To find out how, see "Navigating the Home screen" in the Basics chapter.

2. Tap [+] or press and hold on the Home screen to open the Add to Home options menu.

3. Do one of the following:
   ■ To add an application icon, tap Program and then select an application.
   ■ To add a shortcut to a setting or information, tap Shortcut then select the type of information or setting.
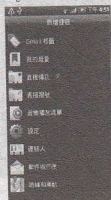

To add an application icon on the Home screen, you can also press HOME, tap [ ] then press and hold an application icon. Without lifting your finger, drag the icon to an empty area on the Home screen, and then release it.

3.6 Adding folders on your Home screen

Use folders to group related applications and other shortcuts to keep your Home screen tidy and organized.

You can also add information folders that show up-to-date information such as Bluetooth received files, your Facebook phonebook, and more.

Creating a new folder and adding items to it

1. Press HOME. Go to the part of the Home screen where there's space to add a new folder. To find out how, see "Navigating the Home screen".

2. Tap [ ] or press and hold on the Home screen to open the Add to Home options menu.

3. Tap Folder and then tap New Folder.

4. Press and hold an application icon or a shortcut that you want to move to the folder. The phone then vibrates. Don't lift your finger.

5. Drag application icon or shortcut and drop it on top of the folder.

Simply tap the folder to open it so you can access the applications and shortcuts inside the folder.

Renaming a folder

1. Tap the folder to open it.
2. Press and hold the folder window's title bar.
3. Enter a new folder name and then tap OK.

3.7 Rearranging or removing widgets and icons on your Home screen

Rearrange the widgets and icons on your Home screen to give room for adding more items to the Home screen. You can also remove widgets and icons that you don't frequently use.

Moving a widget or icon

1. Press and hold the widget or icon you want to move.
   The phone vibrates and you'll see a green box around the widget or icon. Don't release your finger.

2. Drag the widget or icon to a new location on the screen.
   Pause at the left or right edge of the screen to drag the widget or icon onto another Home screen panel.

3. When the widget or icon is where you want it, release your finger.

   If you've released your finger but a message shows that there's no space to place the widget or icon, drag it right or left again to another Home screen panel.

Removing a widget or icon

   1. Press and hold the widget or icon you want to remove.

      The phone vibrates and you'll see a green box around the widget or icon. Don't release your finger.

   2. Drag the widget or icon to the Phone button. The Phone button then changes into a Remove button and turns red.

   3. When the widget or icon also turns red, release your finger.

Making calls

There are several convenient methods to make a call from your phone.

Most SIM cards are preset with a PIN (personal identification number) that is provided by your mobile operator. When prompted, enter the preset PIN, then tap Enter. If you enter the wrong PIN three times, the SIM card is blocked. If this happens, you can unblock it with the PUK (PIN Unblocking Key) obtained from your mobile operator. See "Restoring a SIM card that has been locked out" in the Security chapter for details.

The two prongs underneath the bottom cover act as the antenna for your phone. It is recommended that you secure the bottom cover to the phone to ensure that you get the best radio reception for your phone. To learn how to secure the bottom cover, see "Replacing the bottom cover" in the Basics chapter.

Calling somebody using your phone

You can either dial a number directly, or you can use the Smart Dial (see Smart Dial) feature to search and call a contact in your contacts list or a number from call history.

   1. Press HOME, and then tap Phone.

   2. Begin entering the first few digits or characters by tapping the keys on the phone keypad. As you enter digits or letters, the panel displays numbers and names that match the keys you tapped.

      If you enter a wrong digit, tap ⌫ to erase that digit. To erase the entire number, press and hold ⌫.

   3. Tap ▦ to close the phone keypad and to see if there are more matching numbers or contacts. To browse through the filtered list, flick through the list or slide your finger up or down the list slowly.

   4. To place a call, do one of the following:

      • If there are no matching contacts in the list, after entering the number, tap Call.

      • Tap the phone number or contact from the list.

      • To call a different phone number associated with the contact, tap ▤ at the right side of the contact name. On the contact details screen, tap the number you want to call.

Smart Dial

The phone dialer's Smart Dial feature makes it quick and easy for you to place a call. Simply enter the phone number or first few letters of the person you want to call. Smart Dial automatically searches and filters your contacts list (stored on your phone and SIM card) and the phone numbers from the call history.

Calling a speed dial number

   1. Press HOME, and then tap Phone.

   2. On 12 keypad, press and hold the number that is associated with the contact you want to call.

The number 1 on 12 keypad is generally reserved for your voicemail. Press and hold this button to call voicemail and retrieve your voicemail messages.

Adding a contact to speed dial
1. Press HOME, and then tap Phone.
2. Press MENU, and then tap Speed dial > Add new.
3. Enter the name of the contact you want to add. When the name comes up in the list, tap the name.
4. On the Speed dial screen, select the phone number of the contact to use, and the keypad assignment. Tap Save.

Calling a phone number in a text message
1. Press HOME, tap Messages, and then tap the message with the phone number.
2. In the message thread, tap the message with the phone number.
3. On the Select link screen, tap the number you want to call.
4. Edit the phone number if needed, and then tap Call.

💡 To call the message sender, in the All messages list, press and hold the message, and then tap Call on the options menu.

For more information about text messages, see the Messages chapter.

Calling a phone number in an email
1. Press HOME, and then tap Mail.
2. Open the email account where the email with the number is located.
3. In the email account's inbox, tap the email to open it.
4. In the email body, tap the phone number. The phone dialer screen opens with the phone number already entered. The phone will recognize a number as a phone number if the number has a minimum of 5 digits and have at least one of the following:
   ■ Numbers preceded by a "+" in front. For example, +1-97-54-321 or +19754321.
   ■ Numbers enclosed in parenthesis in front. For example, (02)9754321 or (02)97-54-321.
   ■ Numbers separated by dashes. For example, (02)-97-54-321 or 097-54-321.
5. Tap Call.
   For more information about email, see the Email chapter.

Making an emergency call
You can make emergency calls from your phone even if you don't have a SIM card installed or your SIM card has been blocked.
1. Press HOME, and then tap Phone.
2. Dial the international emergency number for your locale (for example, 000), and then tap Call.

🔍 Additional emergency numbers may be included in your SIM card. Contact your mobile operator for details.

If you enabled the unlock screen pattern and/or the SIM lock, and you forgot the unlock pattern or SIM PIN, you can still make emergency calls by tapping Emergency call on the screen.

Incoming calls
When you receive a phone call from a contact, the Incoming call screen appears and displays the caller ID icon, name, and phone number of the calling party. When you receive a phone call from someone who is not stored in People, only the default caller ID icon and phone number appear on the Incoming call screen.

Answering an incoming call
Depending if the display is on or off, you need to:
■ If the display is on, tap Answer.
■ If the display is off, the display will turn on showing the Lock screen. Drag the bar down to answer the call.

Ben Carter

Muting the ringing sound without rejecting the call
Do one of the following:
■ Press the VOLUME DOWN button.
■ Place the phone face down on a leveled surface.

🔍 If the phone is already facing down, the phone will still ring when there are subsequent incoming calls.

Automatically scaling down the ring volume when picking up the phone
You can set your phone to automatically scale down the ring volume when you pick up the phone to answer calls.
1. Press HOME, and then tap Settings > Sound & display.
2. Scroll down the screen, and then select the Quiet ring on pickup check box.
3. Press BACK.

Rejecting an incoming call
Depending if the display is on or off, you need to:
1. If the display is on, tap Decline to reject and send the call to your voice mail.
2. If the display is off, the display will turn on showing the Lock screen. While the Lock screen is showing, drag the bar up to reject and send the call to your voicemail.

3. If the display is off, the display will turn on showing the Lock screen. While the Lock screen is showing, press MENU, and then tap Decline to reject and send the call to your voicemail.

4. Press the POWER button to reject and send the call to your voicemail.

Rejecting a call and sending a text message

You can automatically send a default text message to the caller and reject the incoming call. To reject and send a message when you receive an incoming call, press MENU, and then tap Send message.

Editing the default message

You can change the message that is sent out.

1. Press HOME, and then tap Phone.
2. Press MENU, and then tap Phone settings > Edit default message.
3. Enter the new message, and then tap OK.

4.3 Using in-call options

When a call is in progress, use the buttons onscreen to mute or unmute the microphone, to turn on or off the speakerphone. You can also press MENU to open the call options, let you add a call, place the call on hold, mute the microphone, and more.

Handling multiple calls

Your phone notifies you when you have another incoming call, and gives you the option of rejecting or accepting the call. If you are already on a call and accept the new call, you can choose to switch between the two callers.

1. When you receive another call, tap Answer to accept the second call, and to put the first call on hold.

2. To switch between callers, tap the person you want to talk to on the screen.

To end the current call and return to the other call, tap End call.

You can start a conference call between all parties by merging the calls. To merge the call, tap [icon] at the bottom right of the screen.

Setting up a conference call

Make a call to the first conference call participant.

When connected, press MENU, tap Add call, and then dial the number of the second participant. The first participant is put on hold when you dial the second participant.

When connected to the second participant, tap [icon] (merge).

To add another participant to the conference call, tap [icon] on the conference call screen, and then dial the number of the contact you want to invite to the conference call.

When connected, tap [icon] to add the participant to the conference call.

When you want to talk to a person in the conference call in private, tap [icon], and then select Private call on the options menu.

When finished, tap End call.

Not all mobile networks support conference calling. Contact your mobile operator for details.

Putting a call on hold

Press MENU and then tap Hold to put the call on hold. When you put a call on hold, the Hold call icon ([icon]) appears in the status bar. Press MENU, and then tap Unhold to resume the call.

Muting the microphone during a call

On the screen, tap [icon] to toggle between turning the microphone on or off. When the microphone is turned off, the Mute icon ([icon]) appears in the status bar.

Turning the speakerphone on or off during a call

On the screen, tap [icon] to toggle between turning the speakerphone on or off.

The speakerphone icon ([icon]) appears in the status bar when the speakerphone is on.

To avoid damage to your hearing, do not hold your phone against your ear when the speakerphone is turned on.

Muting a call

Do one of the following to end the call:

- On the screen, tap End call.

If the phone display is off, press POWER to turn on the screen so you can tap End call

- If you are using the provided wired headset, press the button to end the call.
  If the phone number of the person who called is not in your contacts list, you can
  choose to save the number to your contacts list after you hang up.

4.4 Using call history

When you miss a call, the missed call icon ( ) appears in the title bar. Use the Call
history tab in the People application to check who the caller was or view all your dialed
numbers and received calls.

1. Press HOME, and then tap Phone.

2. Tap at the bottom-right corner of the screen.

3. Do one of the following:

   - Tap the name or number in the list to call.

   - Press and hold a name or number in the list to display the options menu where you
     canselect to view the contact information (if the number is stored in your contacts
     list),edit the number before you redial, send a text message, or delete from call
     history.

   - Tap to show the call history for that particular contact.

You can also access call history from the People application. See the People chapter for
more information.

Adding a new phone number to your contacts from call history

1. Press HOME, and then tap Phone.

---

2. Tap the bottom-right corner of the screen.

3. Press and hold the received call, number that is not in your contacts list, that you want
   to save to your contacts list, and then tap Save to contacts.

4. In the blank contact record that appears, enter the contact name and other
   information. The phone number is automatically added to the Mobile field in the Phone
   section.To store it as another type of number, for example a home number, tap the
   Mobile button.

5. Scroll down the screen and tap Save.

To learn how to add new contacts or edit the contact information, see the People chapter.

Checking a missed call

You will see the missed call icon in the status bar when you miss a call.

1. Press HOME, and then tap Phone.

2. Tap the bottom-right corner of the screen.

3. In the call history list, missed calls are indicated by the missed call icon ( ).

You can also press and hold the status bar, and then slide your finger downward on the
screen to open the Notifications panel. The missed call number or contact name is
displayed.

Clearing the call history list

1. Press HOME, and then tap Phone.

2. Tap at the bottom-right corner of the screen.

3. Do one of the following:

   - To remove one name or number from the list, press and hold the name or number,
     and then tap Delete from call history.
   - To clear the entire list, press MENU, and then tap Delete all.

4.5 Call services

Your phone can directly link to the mobile phone network, and enable you to access and
change the settings of various phone services for your phone. Call services may include
call forwarding, call waiting, voicemail, and more. Contact your mobile operator to find
out about the availability of call services for your phone.

To open call services, press HOME > MENU, and then tap Settings > Call.

Fixed Dialing Numbers

Restrict outgoing calls to a fixed set of numbers. To enable this feature, you must know
your SIM card's PIN2 code.

Voicemail service

Shows the current voicemail service being used.

Voicemail settings

Specify another voice mail number aside from the voice mail number on your SIM card.

Clear voicemail notification

If you have a notification of a new voicemail, you can clear the notification with this option.

Phone settings

Edit the call reject message, choose whether to open the message editor when you reject a call with a message, and choose whether to allow automatic saving of an unknown contact number when a call with that number ends.

Cell broadcast

Enable or disable receipt of cell broadcast messages from your service provider.

Cell broadcast settings

Configure channels and language for cell broadcast messages.

Call forwarding

Select how you want your phone to handle busy, unanswered, and unreachable calls. You can also set the call forwarding option for all incoming calls.

Call barring settings

Choose whether to block various categories of incoming and outgoing call.

Additional call settings

Enable or disable operator services such as caller ID and call waiting.

4.6 Turning Airplane mode on or off

In many countries, you are required by law to turn off the phone while on board an aircraft. A way to turn off the phone function is to switch your phone to Airplane mode. When you enable Airplane mode, all wireless radios on your phone are turned off, including the call function, data services, Bluetooth, and Wi-Fi.

1. Press HOME > MENU, and then tap Settings > Wireless & networks.
2. Select or clear the Airplane mode check box to enable or disable Airplane mode.When enabled, the Airplane mode icon (✈) is displayed in the status bar.

When you disable Airplane mode, the call function is turned back on and the previous state of Bluetooth and Wi-Fi is restored.

---

5 People

5.1 About People

In People, you can easily manage your communications with contacts via phone, messaging, and email. You can also view updates on their Facebook and Flickr accounts. If you are synchronizing contacts with your Google account, with your PC, and/or with an Exchange Server, any contacts stored in those accounts are displayed in People. You can also synchronize contacts from your Facebook account in People. For more information on synchronizing accounts, see "Ways of getting contacts into your phone" in this chapter.

5.2 Ways of getting contacts into your phone

You can add contacts to your phone from:

- **Gmail contacts** Gmail contacts are imported to your phone after you set up a Google Account. For details, see "Using Gmail" in the Email chapter.
- **Phone contacts** See "Adding a new contact" in this chapter for details.
- **Exchange ActiveSync Server** See "Synchronizing with a Microsoft Exchange ActiveSync account" in the Accounts and sync chapter for details.
- **Contacts on your computer** See "Using HTC Sync" in the Accounts and sync chapter for details.
- **SIM card** See "Importing contacts from your SIM card" in this chapter for details.
- **Facebook** See "Adding a social network account" in the Accounts and sync chapter for details.

5.3 People screen

The People screen gives you easy access to all your contacts, as well as even faster access to the people and groups of people you contact most often.

The People screen has the following tabs:

1 All tab

Gives you access to all contacts on your phone, including Google contacts, Exchange ActiveSync contacts, Phone contacts, contacts stored on your SIM card, and Facebook contacts. You can also use this tab to open or update My contact card. For more information, see "Setting up My contact card" in this chapter.

2 Groups tab

Lets you assign contacts to groups so you can easily send an SMS, MMS, or email message to a whole group. For more information, see "Contact groups" in this chapter.

3 Online directories tab

Search for contacts on your online directories such as your Exchange ActiveSync or

Facebook account to copy to your phone.

4 Call history tab

Lists all your dialed numbers and received and missed calls. See "Using call history" in the Phone calls chapter.

Setting up My contact card

My contact card provides a convenient way to store your personal contact information so that you can easily send it via SMS, MMS, email, or Bluetooth.

1. Press HOME, and then tap > People.
2. On the All tab of the People screen, tap Me, and then tap Tap here to edit contact.

> If you are logged in to your Facebook account through Facebook for HTC Sense, instead of Me, you will see your the name you use in Facebook.

3. Enter your name and contact details.
4. Tap Save.

Your contacts list

The All tab of the People screen shows all your contacts, including Google contacts, Exchange ActiveSync contacts, Phone contacts, contacts stored on your SIM card, and Facebook contacts.

> If you signed in to your Google Account and Facebook account when you first set up the phone, your contacts from those accounts will appear in the contacts list when you open People.
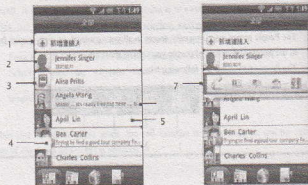

1 Create a new contact.

2 Tap to edit your My contact card.

3 SIM card contact

4 This icon appears when the contact:

- Has sent you a new text or email message, or tried to call you but you missed the call.
- Has updated his or her Facebook profile or has added photos on Flickr or Facebook.
- Has upcoming Facebook events.

- Tap to open the contact details screen for that contact.
- This appears when the contact is a Facebook contact or you link the contact to his or her Facebook account.
- Tap the phone or icon to open a menu where you can quickly choose how to communicate with the contact. Depending on the contact information stored, you can call, send a message or email, see the contact's Facebook profile, and map his/her address in Google Maps.

> To view only contacts of a particular type, for example Google contacts or Facebook contacts, press MENU, tap View, and select the contact types.

Adding a new contact

1. Press HOME, and then tap > People.
2. On the All tab, tap Add contact at the top of the screen.
3. Select the Contact account, for example Google or Microsoft Exchange ActiveSync. This determines which account the contact will sync with. For more information, see "Ways of getting contacts into your phone" in this chapter.
4. Do one of the following:
   - For Google, Exchange or Phone contact type, tap the Name field, enter the first and last name of the contact, and choose the order in which to display the names. Tap OK.
   - For SIM contact type, tap the Name field, and then enter the name.
5. Enter the contact information in the fields provided.
6. Scroll to the bottom of the screen, and then tap Save.

Importing contacts from your SIM card

You can copy all your SIM contacts to your phone. You can import them as Phone contacts, Google contacts, or Exchange ActiveSync contacts, if you have set up the relevant accounts.

1. Press HOME, and then tap > People.
2. On the All tab, press MENU, and then tap Import/Export > Import from SIM card.
3. If you have Google or Exchange ActiveSync accounts set up on your phone, tap the type for the imported contacts.
4. Do one of the following:
   - To import all contacts, press MENU, and then tap Import all.
   - To import a contact, tap the contact on the screen.

Importing contacts from an Exchange ActiveSync account

Access contacts from your Exchange ActiveSync account, and then copy them to the phone. You need to have your Exchange ActiveSync account set up on your phone.

1. Press HOME, and then tap > People.
2. On the Online directories tab, tap Company directory.

3. Enter the name, and then tap ⊙ .

4. In the list, tap the name of the contact you want to copy to your phone.

5. Tap Save to People.

Merging contact information

Merge duplicated contacts on your phone to avoid clutter and confusion. If you have the same contact appear in your Phone, Google, and Facebook accounts, you can merge the contact information into one contact.

The phone automatically merges contacts that it finds to have similar data. If you need to manually merge contacts or break the link between contacts, follow the procedures below.

Manually merging contact information

1. Press HOME, and then tap ⊙ > People.

2. On the All tab, tap the name of the contact (not the icon or photo) you want to merge with another contact on your phone.

3. At the upper right corner of the screen, tap ⊙ or ⊙ (if there are suggested links.)

4. On the screen, you can:
   - If there are suggested links, tap ⊙ to link the contact to the selected account.
   - Tap one of the options available in the Add contact section.

5. Tap Done.

Breaking the contact information link between contacts

1. Press HOME, and then tap ⊙ > People.

2. On the All tab, tap the name of the contact (not the icon or photo) whose contact information link you want to break.

3. On the upper right corner of the screen, tap ⊙ .

4. On the Linked contacts section, tap ⊙ beside the name of the contact to break the link.

5. Tap Done.

Editing a contact's information

1. Press HOME, and then tap ⊙ > People.

2. On the All tab, press and hold the contact, and then tap Edit contact.

3. Enter the new information for the contact.

4. Scroll to the bottom of the screen, and then tap Save.

Searching for a contact

1. Press HOME, and then tap ⊙ > People.

2. Press the SEARCH button on the phone.

3. In the search bar, enter the first few letters of the first or last name of the contact you are looking for. Matching contacts are displayed.

💡 If the list of matching contacts is long, you can view more results by tapping ⊙ to hide

40

---

the onscreen keyboard.

4. Tap the contact to open his or her contact details screen. See "Contact information and conversations" in this chapter for details.

Backing up your contacts to the storage card

1. Press HOME, and then tap ⊙ > People.

2. Press MENU, and then tap Import/Export > Export to SD card.

3. When asked to confirm, tap OK.

Importing contacts from the storage card

1. Press HOME, and then tap ⊙ > People.

2. Press MENU, and then tap Import/Export > Import from SD card.

You can only import contacts that were exported to the storage card using the Export to SD card feature on the phone. See "Backing up your contacts to the storage card."

💡 If you have Google or Exchange ActiveSync accounts set up on your phone, tap the type for the imported contacts.

🖐 Press BACK to stop importing contacts from the storage card.

Deleting contacts

1. Press HOME, and then tap ⊙ > People.

2. On the All tab, press MENU, and then tap Delete contacts.

3. Select the contacts you want to delete, and then tap Delete.

4. When prompted, tap OK.

Sending contact information as a vCard via MMS

1. Press HOME, and then tap ⊙ > People.

2. On the All tab, press and hold the name of the contact (not the icon or photo) whose contact information you want to send, and then tap Send contact as vCard.

3. Select the type of information you want to send, and then tap Send.

4. Enter the recipient's number or email address, and then tap Send.

🖐 You cannot send a vCard using SMS.

🖐 You can also send the vCard via Bluetooth. To learn how to send files through Bluetooth, see the Bluetooth chapter.

Sending your contact information as a vCard via MMS

1. Press HOME, and then tap ⊙ > People.

2. On the All tab, tap [Your name] My contact card.

3. Press MENU, and then tap Send my contact info.

4. Select the type of information you want to send, and then tap Send.

5. Enter the recipient's number or email address, and then tap Send.

🖐 You cannot send a vCard using SMS.

41

You can also send your contact vCard via Bluetooth. To learn how to send files through Bluetooth, see the Bluetooth chapter.

5.4 Contact groups

On the Groups tab, you can assign contacts to groups so you can easily send an SMS, MMS, or email message to a whole group. You can also sync groups on your phone with the groups in your Google account, accessible via your computer's web browser.

Creating a group and adding contacts

1. Press HOME, and then tap [icon] > People.
2. On the Groups tab, at the top of the screen, tap Add group.
3. Enter a name for the group, and then tap Add contact to group.
4. Select the contacts you want to add to the group, and then tap Save.

💡 If your contacts list is long, you can use the search bar to search for contacts quickly, or tap [icon] to hide the onscreen keyboard and scroll through the list.

5. Tap to add a group from photo.
6. Tap Save.

Deleting a group

1. Press HOME, and then tap [icon] > People.
2. On the Groups tab, press and hold the group you want to delete, and then tap Delete group.

✍ You can only delete groups that you have created.

Adding or removing contacts from a group

1. Press HOME, and then tap [icon] > People.
2. On the Groups tab, press and hold the group, and then tap Edit group.
3. You can:
   - Tap the group name to change the name. You can only change the name for groups that you have created.
   - Tap the icon to the left of the group name to change or remove the group photo.
   - To add contacts to the group, tap Add contact to group, select the contacts you want to add, and then tap Save.
   - To remove a contact from the group, tap at the right side of the contact name, and then tap Save.

Sending an SMS/MMS message or email to a group

1. Press HOME, and then tap [icon] > People.
2. On the Groups tab, tap the group you want to send an SMS/MMS message or email to.
3. Go to the Group action tab, and then do one of the following:
   - Tap Send group message to send an SMS/MMS message to the group. For

information about composing and sending messages, see the Messages chapter.

You will be charged by your mobile provider for each message sent. For example, if you send a message to a group of five people, you will be charged for five messages.

- Tap Send group mail to send an email to the group. For information on composing and sending email, see the Email chapter.

Contact information and conversations

When you tap a contact on the People screen, the contact details screen opens, showing you the information stored for that contact, exchanged messages and phone calls with that contact, Facebook notifications, and more.

The contact details screen has the following tabs:

1   2   3   4   5   6

Details tab

Shows the information you have stored for the contact, and allows you to get in touch with the contact directly by tapping any of the displayed methods. For example, if the contact has a stored work phone number, tap Call Work to call that number.

You can also add one of the contact's phone numbers as a speed dial number. For information, see "Adding a contact to speed dial" in the Phone calls chapter.

Messages tab

Shows your exchanged SMS messages with the contact. Tap a message to view it. To send a new message, press MENU and tap Send message. For more information about messages, see the Messages chapter.

Mail tab

Shows email messages you have received from the contact. Tap an email message to view it. To send a new email message, press MENU and tap New mail. For more information about email, see the Email chapter.

Updates and events tab

Shows the contact's Facebook status, updates, and events, and shows when he or she uploads new photos to Flickr. When there is a notification of the contact's birthday, you can tap the notification to call the contact directly or send a message greeting.

You need to be logged in to your Facebook account to see the updates and events. If you are not logged in, tap Link to Facebook.

Photos tab

Shows the contact's Facebook and Flickr photo albums. Tap an album to look at the photos in the album.

You need to be logged in to your Facebook and Flickr accounts to see the photo albums. If you are not logged in, tap Link to Facebook and/or Link to Flickr.

Call history tab

Lists all your incoming, outgoing, and missed calls to and from the contact. Tap a list item to call the contact using the displayed number.

5.6 People widget

Put the group of people you contact most right on the Home screen of your phone by adding them as the People widget. Using the People widget, you can instantly place a call, send a message, or view details of a favorite contact with a single tap.

Adding the People widget

Slide your finger left or right on the Home screen to find the People widget. If you don't find the People widget on the Home screen, follow this procedure to add the widget to the Home screen.

1. Press HOME, and then tap ![icon] > Widget > People.
2. Choose the widget style, and then tap Select.
3. Select the group you want to add as a widget.
4. Drag the widget to a blank space on a Home screen, and then release.

Setting the default communication method

1. Press HOME, and then go to the People widget.
2. Tap a contact on the widget.
3. On the Select default action screen, tap the communication method you want for the contact.

Changing the default communication method

If you want to change the default action for communicating with a contact on the People widget, you must first remove this contact from the group. Add this contact back to the group, and then choose the new communication method.

1. Remove the contact from the group. See "Adding or removing contacts from a group" for details.
2. Add the contact back to the group. See "Adding or removing contacts from a group" for details.
3. Choose the default communication method See "Setting the default communication method" for details.

Getting in touch with a contact

1. Press HOME, and then go to the People widget.
2. Tap a contact (photo not the name) on the widget. The default communication method will be performed.

💡 Tap the name of the contact to open the contact details screen for that contact.

If you have not set a default communication method, the Select default action screen will open. See "Setting the default communication method" in this chapter for details.

Using the onscreen keyboard

When you start a program or select a field that requires text or numbers, the onscreen keyboard becomes available.

Using the landscape onscreen keyboard

When entering text, you can choose to use the landscape orientation of the onscreen keyboard. Turn the phone sideways to use a larger keyboard that lets you type easily using two thumbs.

- The Orientation check box in HOME > MENU > Settings > Sound & display needs to be selected for the screen orientation to automatically change.
- The landscape orientation keyboard is not supported in all applications.

Switching between English and Chinese keyboard layouts

Do one of the following:

- On the QWERTY keyboard, tap ![icon] or ![icon].
- On the Phone Keypad, tap ![icon].
- On a Chinese keyboard layout, tap ![icon] or ![icon].

Changing the English onscreen keyboard layout

You can choose from 2 different English keyboard layouts to suit your typing style:

1. On the onscreen keyboard, do one of the following:

- Press and hold ![icon], ![icon], or ![icon] until you see ![icon], and then release your finger.
- Tap ![icon].

The key you will see depends on the keyboard layout that is currently selected.

2. On the Input method options menu, tap Touch Input Chinese, and then select the keyboard layout that you want to use. Choose from the following:

- QWERTY. This layout is similar to a desktop computer keyboard.
- Phone Keypad. This layout resembles the traditional mobile phone keypad

Changing the Chinese onscreen keyboard layout

1. On the onscreen keyboard, do one of the following:

   - Press and hold ⌨ , ⌨ , or ⌨ until you see ⌨ , and then release your finger.
   - Tap ⌨ .

   ⟨ The key you will see depends on the keyboard layout that is currently selected.

2. On the Input method options menu, select the keyboard layout that you want to use. Choose from the following:

   - **Handwriting.** This layout lets you use your finger (by sliding it onscreen) to write Chinese characters. Slide your finger to write and then lift your finger to enter the character and show candidate characters based on the strokes you have made.
   - **ZhuYin.** This layout lets you use Mandarin Phonetic Symbols to enter Chinese characters.
   - **CangJie.** This layout lets you use CangJie to enter Chinese characters.
   - **PinYin.** This layout lets you use the Roman Alphabet to enter Chinese characters.

   ⟨ The available Chinese keyboard layouts depend on the country where you bought your phone.

Entering text

Use the following keys while entering text using the onscreen keyboard:

A	Press and hold keys with gray characters at the top to enter numbers, symbols, or accented letters. The gray character displayed on the key is the character that will be inserted when you press and hold that key. Some keys have multiple characters or accents associated with them.
↑	This is the Shift key. Tap to enter an uppercase letter. The next letter you type will be uppercase. Tap twice to turn on caps lock.
12#	Tap to switch to the numeric and symbol keyboard.
↵	This is the Enter key. Tap to create a new line.
←	This is the Backspace key. Tap to delete the previous character.
⌨	Tap to hide the onscreen keyboard.

The appearance of the key depends on the current keyboard layout.
   - Tap to toggle between the English and Chinese keyboard layouts.
   - Press and hold to open a menu where you can change the keyboard layout and adjust input settings. See "Adjusting Text Input and Keyboard Settings" for details.

46

Tap to open a menu where you can change the keyboard layout and adjust input settings. See "Adjusting Text Input and Keyboard Settings" for details.

Tap to switch to the English or Chinese keyboard layout.

Tap to toggle between Multitap and XT9 predictive modes when using the Phone keypad layout. For more information, see "Entering words with predictive text" below.

Entering words with predictive text

The onscreen keyboard has predictive text to help you type quickly and accurately. Predictive text input is enabled by default, and word suggestions are displayed as you type.

> | browse | browsy | browsing | ✓ |
> | The quick brown | | | ABC |

To enter a word in predictive mode, do any of the following:

- If you see the word you want highlighted in green or orange, you can simply tap the space bar to insert the word into your text.
- If you see the word you want shown in the suggestions before you have finished typing the entire word, tap the word to insert it into your text.
- If an arrow is shown to the right of the suggestion list, tap the arrow to see more suggestions.

Adding a word to the predictive text dictionary

Your phone comes with a list of words that it references for predictive text suggestions. Sometimes you may need to add a word to the predictive text dictionary, for example a name or a specialized technical word.

While entering text using the QWERTY keyboard layout, if you tap any word on the suggestion list, it is automatically added to the predictive text dictionary if it was not in the dictionary already.

Adjusting input settings

1. On the onscreen keyboard, do one of the following:

   - Press and hold ⌨ , ⌨ , or ⌨ until you see ⌨ , and then release your finger.
   - Tap ⌨ .

   The key you will see depends on the keyboard layout that is currently selected.

2. On the Input method options menu, tap Touch Input Chinese.

   You can also access the input settings by pressing HOME > MENU and then tapping Settings > Language & keyboard > Touch Input Chinese.

47

Touch Input Chinese

QWERTY keyboard or Phone keypad

Select the keyboard layout to use.

Select Chinese input

Tap to select the Chinese input method to use. See "Changing the Chinese ▨▨▨▨ keyboard layout" in this chapter for details.

Chinese input settings

Tap to adjust the settings for the currently selected Chinese input method. (Available settings depend on the selected Chinese input method.)

- **Chinese mode** Select to recognize only Traditional or Simplified, or both.
- **Full width** Toggle between recognizing Full width or Half width for symbols and numbers.
- **Pen color** Touch to change the color of the pen stroke.
- **Pen width** Touch to adjust the thickness of the pen stroke.
- **Recognize waiting** Touch to set the wait time for Handwriting to recognize ▨▨▨▨ when entering one character. Drag the slider to the right to increase the wait time, drag to the left to decrease the wait time.
- **Support Fuzzy** Select the check box to enable error correction when using Zhuyin. This helps in suggesting the correct character even when you mistyped a Mandarin Phonetic Symbol.

English input settings

Tap to adjust the settings for the currently selected English input method.

- **Prediction** Select to enable the word prediction feature when using the QWERTY keyboard.
- **Spell correction** Select to correct typographical errors by selecting from a list of possible words that reflect the characters of the keys you have tapped as well as characters of nearby keys.
- **Word completion** When using the Phone keypad, enabling this option lets you select from a list of possible combinations based on the characters that appear on the keys that you tapped.

Sound feedback

Select to make a clicking sound whenever you tap a key on the keyboard or an item on the menu.

Vibrate when typing

Select to enable vibration feedback whenever you tap a key on the keyboard or an item on the menu.

Tutorial

Tap to show the guided tutorial for using the onscreen keyboard.

Messages

▨▨▨▨ Messages

▨▨▨▨ lets you compose and send text (SMS) and multimedia messages (MMS) to ▨▨▨ mobile phones.

▨▨▨▨ your message inbox, press HOME, and then tap ▨▨ > Messages.

▨▨▨▨ all messages does not fit on the screen, you can scroll down to view more ▨▨▨▨ swiping your finger on the screen or the optical trackball.

▨▨ **bold text** indicates unread messages in the thread.

▨ Tap to open the message or message thread and read the text or view the ▨▨▨▨ message.

▨▨▨▨ text and multimedia messages

▨▨▨ short text messages (SMS) and multimedia messages (MMS) to other mobile phones.

▨ you exceed the limit on the number of characters for a single text message, your text message will be delivered as one but will be billed as more than one message. These are ▨▨▨ concatenated messages.

Multimedia messages can contain text and a picture, a recorded voice, an audio or video ▨▨, a picture slideshow, contact card (vCard), or appointment (vCalendar).

▨ The Messages application automatically converts a text message into a multimedia message when you enter an email address in the To field, add a message subject, attach an ▨▨▨, or compose a very long message.

▨▨▨▨ a text message

1. Press HOME, and then tap ▨▨ > Messages.
2. On the All messages screen, tap Compose message. The Compose screen opens.

3. Fill in one or more recipients. You can:

- Enter phone numbers directly in the To field. If you're sending the message to several phone numbers, separate the phone numbers with a comma.

  As you enter information, any matching phone numbers from your contacts list are displayed. Tap a match to enter that number or address directly.

- Tap the icon ⬛, and then select the phone numbers of the contacts to whom you want to send the message. You can also select contact groups as recipients. When you have selected all the message recipients, tap Done.

4. Tap the text box that contains the text "Tap to compose", and then start composing your message.
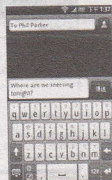

5. When done, tap Send to send the text message.

To receive delivery reports and know when a text message is received, in the All messages screen, press MENU and then tap Settings. In the SMS settings section, select the Delivery reports check box.

Sending a multimedia (MMS) message

1. Press HOME, and then tap [ ] > Messages.

2. On the All messages screen, tap Compose message. The Compose screen opens.

3. Fill in one or more recipients. You can:

- Enter phone numbers or email addresses directly in the To field. If you're sending the message to several recipients, separate the phone numbers or email addresses with a comma.

  As you enter information, any matching phone numbers or addresses from your contacts list are displayed. Tap a match to enter that number or address directly.

- Tap ⬛ the icon, and then select the contacts to whom you want to send the message. You can also select contact groups as recipients. When you have selected all the message recipients, tap Done.

You can add a subject line by pressing MENU and then tapping Add subject.

4. Tap the text box that contains the text "Tap to compose", and then start composing your message.

5. Press MENU and then tap Attach.

6. In the Attach window, select from the following file attachments:

- Picture. Select Camera to take a photo and attach it, or Pictures to attach a photo from your storage card.

- Video. Select Camcorder to capture a video and attach it, or Videos to attach a video from your storage card.

- Audio. Select Voice Recorder to make a voice recording and attach it, or Music & sounds to attach a music file or voice recording from your storage card.

- Location. You can attach location information. Send your current location (requires GPS to be turned on), a location stored in Footprints, or a location you pick on a map. For more information about GPS, maps, and Footprints, see the Maps and location chapter.

- Contact (vCard). Select a contact from your phone, and then select which contact information you want to attach.

- Appointment (vCalendar). Select the calendar event you want to attach.

- Slideshow. Opens the Edit slideshow screen. Tap Add slide to create a new slide. Tap the created slide (for example, Slide 1), tap Insert picture, and then select the picture you want to add to the slide. You can also navigate to the text box and enter a caption for the picture. When finished, tap Done to attach the slideshow to your message.
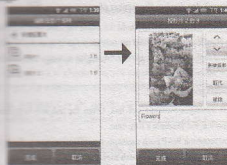

- When editing multiple slides, tap to edit the next slide or tap to return to the previous slide.

- While editing the slideshow, press MENU to let you preview the slideshow, add music or video to a slide, remove a slide, and more.

7. When you have finished composing the multimedia message, tap Send.

To receive delivery reports and know when a picture message is received, in the All messages screen, press MENU, and then tap Settings. Select the Delivery reports check

box in the MMS settings section.

Saving and resuming a draft message

While composing a text or multimedia message, press BACK to automatically save your message as a draft. To resume composing the message:

1. On the All messages screen, press MENU, and then tap Drafts.
2. Tap the message to resume editing it.
3. When you finish editing the message, tap Send.

7.2 New message notifications

Depending on your notification settings, the phone will play a ring tone, vibrate, or display the message briefly in the status bar when you receive a new text or multimedia message. To change the notification for new text and multimedia messages, see "Setting text and multimedia message options" later in this chapter.

A new message icon ⬜ also appears in the notifications area of the status bar to notify you of a new text or multimedia message. The Messages application icon (if shown on the Home screen) also displays the number of new messages ⬜.

To open the message, press and hold the status bar, and then slide the status bar down to open the Notifications panel. Tap the new message to open and read it. For information on reading and replying to messages see "Managing message conversations" in this chapter.

7.3 WAP push messages

WAP push messages contain a web link. Often, the link will be to download a file that you have requested, for example a ring tone.

When you receive a WAP push message, a notification icon is displayed in the status bar.

Opening the link contained in a WAP push message

1. Press and hold the status bar, and then slide the status bar down to open the Notifications panel.
2. Tap the new message.
3. Tap Visit website.

Viewing all your WAP push messages

1. Press HOME, and then tap ⬜ > Messages.
2. Press MENU, and then tap Push messages.

7.4 Managing message conversations

Text and multimedia messages that are sent to and received from a contact (or a number)

---

are grouped into conversations or message threads in the All messages screen. Threaded text or multimedia messages let you see exchanged messages (similar to a chat program) with a contact on the screen.

Reading a text message

Do any of the following:

- On the All messages screen, tap the text message or message thread to open and read it.
- If you have a new message notification, press and hold the status bar, and then slide the status bar down to open the Notifications panel. Tap the new message to open and read it.
- To return to the All messages screen from a text message thread, press MENU and then tap All messages.

- To view the details of a particular message, in the message thread, press and hold the message to open the options menu, and then tap View message details.
- If a message contains a link to a web page, tap the message and then tap the link to open it in the web browser.
- If a message contains a phone number, tap the message and then tap the phone number to dial the number or add it to your contacts.

Viewing a multimedia message

1. Press HOME, and then tap ⬜ > Messages.
2. On the All messages screen, tap a multimedia message or message thread to open it.
3. Tap the attachment to open it.

- If the attachment is a vCard contact, it is imported to your Phone contacts list. For information about contacts, see the People chapter.
- If the attachment is a vCalendar file, you can choose the calendar where you want to save the event. For information on using Calendar, see the Calendar chapter.
- To save the attachment to the storage card, press and hold the sender's name or number, and then tap Save [attachment type] on the options menu.

- When Auto-retrieve in MMS settings is disabled, only the message header is downloaded. To download the entire message, tap the Download button at the right side of the message. For details, see "Setting text and multimedia message options" later in this chapter.
- If you are concerned about the size of your data downloads, check the multimedia message size before you download it.

Replying to a text or multimedia message

1. Press HOME, and then tap ⬜ > Messages.
2. On the All messages screen, tap a text or multimedia message thread to open it.
3. Tap the text box at the bottom of the screen, enter your reply message, and then tap Send.

To reply to a text message with a multimedia message, open the text message, press MENU and then tap More > Add subject, or Attach. The text message is automatically converted into a multimedia message.

Protecting a message from deletion

You can lock a message so that it will not be deleted even if you delete the other messages in the conversation.

1. Press HOME, and then tap [ ] > Messages.
2. On the All messages screen, tap a message thread..
3. Press and hold the message that you want to lock
4. Tap Lock message on the options menu.

A lock icon 🔒 is displayed at the right hand side of the message.

Deleting a message thread

1. Press HOME, and then tap [ ] > Messages.
2. On the All messages screen, tap the message thread that you want to delete.
3. Press MENU, and then tap Delete.
4. When prompted to confirm, tap OK.

Any locked messages in the thread will not be deleted unless you select the Delete locked messages check box.

Deleting several message threads

1. Press HOME, and then tap [ ] > Messages.
2. On the All messages screen, press MENU, and then tap Delete.
3. Select the message threads you want to delete.
4. Tap Delete. Any locked messages will not be deleted.

Deleting a single message

1. While viewing a message thread, press and hold the message that you want to delete.
2. If the message is locked, tap Unlock message on the options menu, and then press and hold the message to display the option menu again.
3. Tap Delete message on the options menu.
4. When prompted to confirm, tap OK.

Viewing contact details and communicating with a contact

When you have received a message from someone in your stored contacts, you can tap the contact's photo or icon in the message thread to open a menu of options. Depending on the stored contact information, you can view the contact details, phone or send an email message to the contact, and more.

7.5 Setting text and multimedia message options

Press HOME, and then tap [ ] > Messages. On the All messages screen, press MENU and then tap Settings to set the text or multimedia message options. You can set

---

Viewing

Storage settings

Delete old messages

Select this option to automatically delete older messages when the limits below are reached. Locked messages are not deleted. For information on locking messages, see "Protecting a message from deletion" in this chapter.

Text message limit

Choose the maximum number of text messages to store in each message thread (this does not include locked messages).

Multimedia message limit

Choose the maximum number of MMS messages to store in each message thread (this does not include locked messages).

SMS settings

Delivery reports

Select this option to receive a report on the delivery status of your message.

Service Center

Displays the message service center number used. Tap to change the number. It is recommended that you do not change the number here for it may cause problems in receiving and sending messages.

Manage SIM card messages

Tap to view text messages stored on your SIM card. You can also delete or copy these messages to your phone's memory.

MMS settings

Delivery reports

Select this option to receive a report on the delivery status of your message.

Read reports

Select this option if you want to receive a report whether each recipient has read or has deleted the message without reading it.

Auto-retrieve

Select this option to automatically retrieve all your MMS messages completely. When selected, the MMS message header plus the message body and attachments will automatically download to your phone. If you clear this check box, only the MMS message header will be retrieved and shown in your All messages screen.

Roaming auto-retrieve

Select this option to automatically retrieve all your MMS messages completely when roaming. This may incur significant phone charges.

Priority setting

Set the message priority of MMS messages sent.

Maximum message size

Set the maximum file size of an MMS message. The MMS message will not be sent out if it exceeds the file size set here.

Received messages

Received notification

Select this option if you want to receive a notification in the status bar when a new text or

multimedia message arrives.

Play notification sound

If you want the phone to ring when a new message arrives, select this option.

Notification sound

Select a ring tone that is specific to new text and multimedia messages. Note that the [tone] tone briefly plays when selected.

Vibrate

Select this option if you want the phone to vibrate when a new text or multi[media] message arrives.

Sent messages

Sent notification

Select this option if you want to receive a notification in the status bar when a message[s] sent successfully.

Failure notification

Select this option if you want to receive a notification in the status bar when a message[s] not sent successfully.

Play notification sound

If you want the phone to ring when a sent or failure notification is received, select [this] option.

Notification sound

Select a ring tone that is specific to sent or failure notifications. Note that the ring [tone] briefly plays when selected.

Vibrate

Select this option if you want the phone to vibrate when a new text or multimedia message arrives.

[Account] and sync

[Synchronizing] with online accounts

[Your phone] can sync information and receive updates from your Google™ and [Microsoft] Exchange ActiveSync® accounts as well as popular online services such as [Facebook], Twitter™, and Flickr™.

[These are] some of the types of information you can sync:

- [Gmail]™ and Exchange ActiveSync email.
- [Google] and Exchange ActiveSync contacts, as well as your Facebook friends' [contact] information. For information on contacts, see the People chapter.
- [Calendar] events from your primary Google Account and from Exchange ActiveSync. [For information] on using Calendar, see the Calendar chapter.
- [Status] updates and links shared by your friends and yourself on social networks such [as Facebook] and Twitter. For details, see the Social chapter.
- [Flickr] and Facebook photo uploads. For information on viewing photos, see the [Photos] chapter.

[Adding] a social network account

[You can] sync with your accounts on popular online services such as Facebook, Twitter, [and Flickr].

1. Press HOME > MENU, and then tap Settings > Accounts & sync.
2. Tap Add account, and then tap the account type you want to add.
3. Follow the onscreen instructions to enter the account information.

[When you] have finished, the account is added to the list on the Accounts & sync screen. [Depending] on how you configured the account, the new information may start [synchronizing] with your phone.

[Synchronizing] with a Google Account

[Signing in] to your Google Account lets you synchronize Gmail and your Google contacts [and] calendars between your phone and the web. You also need to sign in to a Google [Account] to use Google applications such as Google Talk™ and Android Market.

[You can] add more than one Google Account on your phone. However, subsequent Google [Accounts] can only synchronize Gmail and contacts. Other Google services use the first [Google] Account you added.

1. Press HOME > MENU, and then tap Settings > Accounts & sync.
2. Tap Add account > Google.
3. Follow the onscreen instructions to sign in to an account or create a new account.

[Synchronizing] with a Microsoft Exchange ActiveSync account

[You can] only add one Microsoft Exchange ActiveSync account on your phone. You can [sync] with Microsoft Exchange Server 2003 Service Pack 2 (SP2) or later.

1. Press HOME > MENU, and then tap Settings > Accounts & sync.
2. Tap Add account > Exchange ActiveSync.
3. Enter the Exchange ActiveSync account details, and then tap Next.

Your corporate Exchange Server must support auto-detect for the phone to automatically

set up the Exchange ActiveSync account. If your corporate Exchange Server [does not] support auto-detect, you will need to enter your Exchange Server settings after [you tap] Next. Ask your Exchange Server administrator for details.

4. Select the types of information you want to synchronize, and then tap Finish setup.

Managing your accounts

Changing general sync settings

1. Press HOME > MENU, and then tap Settings > Accounts & sync.
2. Select or clear the following:
   - **Background data.** If this is selected, applications can send and receive [online] account information even if you are not currently using them.
   - **Auto-sync.** If this is selected, applications can use the sync schedule defined in the account settings. If this is cleared, you will need to sync accounts manually. For instructions on doing this, see "Synchronizing an account manually" below.

Changing account settings

You can change settings such as the sync frequency and the types of information synchronized, the kinds of notification you receive, and the way that account information is displayed.

1. Press HOME > MENU, and then tap Settings > Accounts & sync.
2. Tap the account that you want to edit.
3. Edit the account settings.

Synchronizing an account manually

1. Press HOME > MENU, and then tap Settings > Accounts & sync.
2. Tap the account that you want to sync.
3. Tap Sync now.

Removing an account

You can remove an account to delete it and all information associated with it from your phone, for example messages, contacts, or settings. Removing an account does not delete information from the online service itself.

You cannot remove some accounts, such the first Google Account you signed into on the phone, except by deleting all personal information from your phone with a hard reset. For instructions on doing this, see "Performing a hard/factory reset" in the Backup, update and reset chapter.

1. Press HOME > MENU, and then tap Settings > Accounts & sync.
2. Tap the account that you want to remove.
3. Tap Remove account, and then confirm that you want to remove the account.

Facebook for HTC Sense and Facebook for Android application

View your Facebook® updates in supported applications on the phone. By signing in to Facebook, your Facebook contacts and their contact details are downloaded to People, you can browse through Facebook photo albums in Photos, and read Facebook status updates in Friend Stream. To learn how to sign in to Facebook for HTC Sense, see the People chapter.

People   Friend Stream   Photos

Facebook for Android application

The Facebook application on your phone lets you keep up and stay close with your friends in Facebook. It offers most of the features that you are familiar with when using Facebook on your computer.

If you have more than one Facebook account, you can sign in to the Facebook application using your other Facebook account.

Using the Facebook application

1. Press HOME, and then tap [ ] > Facebook.
2. If this is your first time to use Facebook, follow the onscreen instructions to sign in to your Facebook account.
3. On the News Feed screen, press MENU, and then tap Home to access the other functions.
   - While on the Facebook home screen, press MENU, and then tap Settings to set refresh and notification options.
   - On some Facebook screens, you can press and hold an item to open an options menu.

With the Facebook application, you can:

- Share your thoughts and check other people's status updates.
- View your friends list and write on someone's wall.
- Comment on and like a friend's post.
- View someone's personal information, including photo albums.
- Check your Facebook notifications.

- Take a photo and upload it straight to your Facebook account.

Adding the Facebook widget

Add the Facebook widget to the Home screen to let you quickly share your thoughts and view your friends' status updates.

The widget will only link to the Facebook account that you logged into on the Facebook application.

1. Press HOME, and then tap [icon] > Widget > Facebook.
2. Drag the widget to a blank space on the Home screen, and then release.

Differences between Facebook and Facebook for Android application

- Facebook is not a standalone application. It is integrated into People, Friend Stream, and Photos to give you up-to-date information about your Facebook contacts (their status updates and new photos) in these applications.
- The Facebook for Android application is a standalone application. Use this application to do most of the things that you would do when you're using your computer's web browser to access your Facebook account, such as adding a friend and adding captions to photos you upload.
- The two do not share the same login credentials. Signing in to Facebook does not sign you in to the Facebook application and vice versa. If you want to use the same Facebook account for both, you'll have to sign in to both using the same login credentials.

9.2 Twittering on your phone

Peep is a Twitter™ client that lets you enjoy "twittering" on your phone. Send out tweets, read and receive tweets from people, search for new Twitter users to follow, all from your phone.

1. Press HOME, and then tap [icon] > Peep.
2. If you did not sign in to your Twitter account when you first turned on the phone, follow the onscreen instructions to sign in to your Twitter account.
3. Peep opens in the All Tweets tab. Slide your finger on the bottom row to go to the tab you want.

Peep Screen
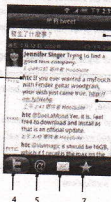

[faded line] the Twitter user's profile. This also shows you all tweets from this Twitter user.

[faded line] to send out.

[faded line] to open the options menu to let you reply, send a direct message, retweet, [faded] and view the profile.

[faded line] from people you follow and tweets that you have sent out.

[faded line] that mentions your username using the "@[your username]" convention.

[faded line] direct messages that you have received or sent out.

[faded line] that were marked as favorites.

Sending a tweet

1. Press HOME, and then tap [icon] > Peep.
2. On the All Tweets tab, tap the text field with the words "What's happening?".
3. Enter your tweet, and then tap Update. Before tapping Update, you can:
   - Tap to post a picture from Photos or Camera to your default photo hosting site and add the link to the picture into the tweet.
   - Tap [icon] to insert your location into the tweet. You can choose to add a map link, insert your location name, or insert your position coordinates.

Searching for Twitter users to follow

1. Press HOME, and then tap [icon] > Peep.
2. While on the Peep screen, press the SEARCH button.
3. Tap the text field with the words "Search Twitter", enter the search criteria, and then tap [icon].
4. On the Search result screen, scroll through the list, and then tap the twitter user you want to follow.

The search results will also list down tweets that contain the search word.

5. Press MENU, and then tap Follow.

Unfollowing a Twitter user

1. Press HOME, and then tap [icon] > Peep.
2. On the All Tweets tab, tap Twitter user you want to stop following.
3. Press MENU, and then tap Unfollow.

Sending a direct message

You can only send a direct message to someone who is following you.

1. Press HOME, and then tap [icon] > Peep.
2. Press MENU, and then tap New message.

You can also send a direct message from the All Tweets or Direct Message tab. On the All Tweets or Direct Message tab, press and hold the person you want to send the direct

message to, and then tap Send direct message on the options menu.

3. Tap the To field, and then enter the name. As you enter characters, the names of Twitter users that match the characters you enter will appear. Tap the name when you see it.

4. Enter your message, and then tap Update.

Setting Peep options

1. Press HOME, and then tap [icon] > Peep.

2. Press MENU, and then tap More > Settings. You can set these options:

Account settings

Sign out of your Twitter account.

General settings

Choose whether to show the screen name or the real name of the people you follow.

Send & receive

Set the frequency to check for new tweets and set the number of tweets to download.

Services

Set your photo hosting site, photo quality, location options, and URL shortening host.

Notification settings

Select when to be notified and how you want to be notified.

Adding the Twitter widget

Add the Twitter widget to let you send and follow your tweets right on the Home screen.

1. Press HOME, and then tap [icon] > Widget > Twitter.

2. Choose the widget style, and then tap Select.

3. Drag the widget to a blank space on the Home screen, and then release.

9.3 Chatting in Google Talk

Google Talk is Google's instant messaging program. It lets you communicate with other people that also use Google Talk.

Signing in to Google Talk

If you signed in to your Google Account when you first set up the phone, you are already signed in to Google Talk.

1. Press HOME, and then tap [icon] > Talk > Next > Sign in.

2. Enter your Google Account username and password, and then tap Sign in.

When you are signed in to Google Talk, your online status in Google Talk will also appear in other Google Apps such as Gmail and Google Maps.

Signing out of Google Talk

If you are not going to use Google Talk for an extended period of time, we recommend that you sign out of Google Talk to save battery power.

1. Press HOME, and then tap [icon] > Talk.

2. In the Friends list, press MENU, and then tap More > Sign out.

[Adding your friends]

[Inviting a friend]

Press HOME, and then tap [icon] > Talk.

[Tap a friend in the Friends list.]

[Chat with your friend by entering text in the text box at the bottom of the screen.]

[To insert a smiley], press MENU, and then tap More > Insert smiley. Tap a smiley to insert [it into your message.]

[After entering your message, tap Send.]

Accepting an invitation to chat

[When a friend sends you a Google Talk message, you receive a notification. Their entry in the Friends list turns white and displays the message.]

Do one of the following:

- [In the Friends list, tap the friend who sent you the invitation to chat.]

- Open the Notifications panel, and then tap the chat notification. See "Opening the Notifications panel" in the Basic chapter to learn how to open the Notifications panel.

Returning to the Friends list

[While on a chat screen, press MENU, and then tap Friends list.]

Switching between active chats

[You can switch between chats if you have more than one chat going.]

- While on a chat screen, press MENU, and then tap Switch chats.

- On the screen that opens, tap the friend you want to chat with.

Inviting a friend to join a group chat

- While on a chat screen, press MENU, and then tap Add chat.

- Tap the friend you want to invite. The friend you invited and the current participants receive an invitation to a group chat. Each one who accepts the invitation joins the group chat.

Chatting on or off the record

Your Google Talk messages are stored, so you can review them later and even search for them in the Chats folder in Gmail. But, if you'd rather not store the messages in a chat, you can go off the record.

- On a chat screen, press MENU, and then tap Chat off record.

To resume saving the messages in the chat, press MENU, and then tap Chat on record.

Ending a chat

Do one of the following:

- In the Friends list, press and hold the friend you want to stop chatting with, and then in the menu that opens, tap End chat.

- While on a chat screen, press MENU, and then tap End chat.

Changing your online status and picture

Changing your online status

1. Press HOME, and then tap [icon] > Talk.

2. In the Friends list, tap the online status icon (🔲) beside your name, and then tap
   the status you want on the options menu.

In addition to the standard status settings described in the table, you can [...]
message that you've entered previously. Or tap Clear custom messages to [...]
start over.

Your status and any message appear in your contact's Friends lists and in [...]
where your status or status message are displayed.

Changing your status message

1. Press HOME, and then tap 🔲 > Talk.

2. In the Friends list, tap the text box to the left of your online status icon, [...]
   enter your status message.

3. On the onscreen keyboard, tap 🔲 .

Changing your picture

1. Press HOME, and then tap 🔲 > Talk.

2. In the Friends list, tap the picture to the left of your status message.

3. In the Select an album screen, tap the album where the picture you want is
   located.

4. Tap the picture you want to use.

5. Drag the green box to select the portion of the picture to crop, and then tap [...]

Managing your Friends list

Adding a friend

You can invite anyone with a Google Account to become your friend in Google Talk,
you can chat with each other and view each others' online status.

1. Press HOME, and then tap 🔲 > Talk.

2. In the Friends list, press MENU and then tap Add friend.

3. Enter the Google Talk instant messaging ID or Google email address of the [...]
   you want to add.

Accepting an invitation to become a friend

When a contact invites you to become a friend in Google Talk, you receive a notification
in the Status bar and the invitation appears in your Friends list.

1. Press HOME, and then tap 🔲 > Talk.

2. In the Friends list, tap Chat invitation.

3. Do one of the following:
   - Tap Accept in the menu that opens to accept the invitation.
   - Tap Cancel if you don't want to chat with and share your Google Talk status with
     the sender.

Viewing the list of pending invitations to friends

1. Press HOME, and then tap 🔲 > Talk.

[...] Friends list, press MENU, and then tap Invites. All the friends to whom you've
[...] invitations to become friends on Google Talk appear in the list until they
[...] or cancel your invitation.

[...] pending invitation, and then tap Accept or Decline.

[...] friends or only those most popular with you

[...] only the friends that you frequently chat with — the most popular — are
[...] the Friends list. But you can view all friends instead.

[...] HOME, and then tap 🔲 > Talk.

[...] the Friends list, press MENU, and then tap All friends. To switch back to just the
[...] with whom you chat most frequently, tap Most popular in the menu.

[...] a friend popular

[...] HOME, and then tap 🔲 > Talk.

[...] the Friends list, press and hold a friend's name.

[...] cannot see the friend, press MENU, and then tap All friends.

[...] the options menu, tap Always show friend.

[...] a friend

[...] can block a friend from sending you messages. When blocked, your friend is also
[...] from your Friends list.

[...] Press HOME, and then tap 🔲 > Talk.

[...] In the Friends list, press and hold the friend's name you want to block.

[...] cannot see the friend, press MENU, and then tap All friends.

[...] the options menu, tap Always show friend. Your friend is removed from your
[...] friends list and is added to the blocked friends list.

[...] unblock a friend, in the Friends list, press MENU and then tap Blocked. In the Blocked
[...] friends list, tap the name of the friend you want to unblock, and then tap OK when
[...] prompted.

[...] Google Talk settings

[...] notifications for new Google Talk messages

[...] can set the phone to play a sound, vibrate, or display a notification icon in the status
[...] each time you receive a new instant message.

[...] Press HOME, and then tap 🔲 > Talk.

[...] In the Friends list, press MENU and then tap More > Settings.

[...] Select the IM notifications check box to receive a notification (🔲) in the status bar

when a new instant message arrives.

4. Do of the following:
   - Tap Select ringtone to select the ring tone to use when a new instant message arrives. The ring tone briefly plays when selected. If you don't want a ringtone to play when you receive a new Google Talk message, select Silent.
   - Select the Vibrate check box to vibrate your phone when you receive a Google Talk message.

Showing or hiding the mobile indicator to friends

You can check what type of device your friend is using to chat in Google Talk's friends list, check the image that appears to the right of your friend's name.

1. Press HOME, and then tap > Talk.

2. In the Friends list, press MENU, and then tap More > Settings.

3. Select the Mobile indicator option.

Indicates that the friend is
using an Android phone.

Setting whether you sign into Google Talk automatically

You can sign in to your Google Talk account automatically every time you turn on your phone.

1. Press HOME, and then tap > Talk.

2. In the Friends list, press MENU, and tap More > Settings.

3. Select the Automatically sign in check box.

Using Gmail

Gmail is Google's web-based email service. Gmail is configured when you first set up your phone. Depending on your synchronization settings, Gmail on your phone is automatically synchronized with one or more Gmail accounts on the web. For more information about synchronization, see "Synchronizing with a Google Account" in the Accounts and sync chapter.

Viewing your Gmail inbox

The Inbox conversations list is your default Gmail view. All your received emails are delivered to your Inbox.

Gmail groups each message you send with all the responses you receive. This conversation list continues to grow as new replies arrive, so you can always see your messages in context. A new message or a change to the subject of a current message will begin a new conversation.

1. Press HOME, and then tap > Gmail.

2. To scroll through the conversation list, swipe your finger up/down on the screen or the optical trackball.
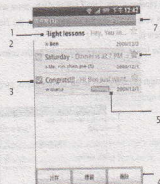

| 1 Folder (or Label) and number of unread email messages. |
| 2 Unread messages are displayed in bold. |
| 3 Checked email. Select one or more emails to apply an action. |
| Note: Batch operations needs to be enabled. |
| 4 Actions for checked email(s). This will not show if there is no item selected in the inbox. |
| 5 Message label. |
| 6 Starred message. Tap to add or remove the star. For more information, see "Starring a message" in this chapter. |
| 7 The Google Account you are currently viewing. To view another account, see "Switching to another Google Account" below. |

Switching to another Google Account

If you have set up more than one Google Account on your phone, you can switch between accounts in Gmail. For more information on setting up Google Accounts, see "Synchronizing with a Google Account" in the Accounts and sync chapter.

1. While viewing the Inbox, press MENU, and then tap Accounts.
2. Tap the account to switch to.

Reading your messages

Depending on your notification settings, the phone plays a ring tone, vibrates, or displays the email message briefly in the status bar when you receive a new email. A new email message icon ▣ also appears on the notifications area of the status bar to notify you of a new email. For more information on email notification settings, refer to "Changing Gmail settings" later in this chapter.

For information on automatic email synchronization, see "Changing Gmail synchronization settings" in this chapter.

💡 To refresh your inbox manually, press MENU and then tap Refresh.

1. Do one of the following:
   - When you receive a new email notification, press and hold the status bar, and then slide down your finger on the screen to open the Notifications panel. Tap the new email to view it.
   - While in the Inbox, tap the unread email or the conversation with the unread email to view it.
2. To scroll through the messages in the conversation, swipe your finger up/down on the screen or the optical trackball.
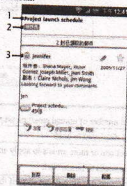

| 1 Message subject. |
| 2 Message label. |
| 3 Online status. Appears when the contact is a Google Talk friend and you are signed in to Google Talk. |

---

3. To manage the email message or conversation, do any of the following:
   - Tap Archive to remove the conversation from your Inbox while still keeping it stored in your Google Account.

   💡 To display your archived messages, in the Inbox, press MENU and then tap View labels > All Mail.

   - Tap Delete to delete the conversation from your Google Account. If you delete the conversation accidentally, you can tap Undo in the yellow bar at the top of the screen to undelete it.
   - Tap Older to see the previous conversation in your Inbox.
   - Press MENU to see more options.

Replying to or forwarding an email message

1. In the message thread, scroll down to the end of the conversation.
2. Tap Reply, Reply to all, or Forward.
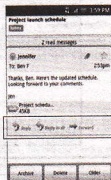

3. Do one of the following:
   - If you selected Reply or Reply to all, enter your reply message.
   - If you selected Forward, specify the message recipients.
4. Tap Send.

Muting a conversation

If you're part of a long message conversation that isn't relevant, you can 'mute' the conversation to keep all future additions out of your Inbox.

While viewing the message thread, press MENU and then tap More > Mute.

Reporting a conversation as spam

The Gmail webmail service works hard to prevent spam (unwanted and unsolicited "junk" mail) from reaching your Inbox. But when spam makes it through, you can help improve the service by reporting the conversation as spam.

While viewing the message thread, press MENU, and then tap More > Report spam.

Sending a message

1. Press HOME, and then tap ▢ > Gmail.

2. In the Inbox, press MENU and then tap Compose.
3. Enter the message recipient's email address in the To field. If you are sending the email to several recipients, separate the email addresses with a comma. You can add as many message recipients as you want.

As you enter email addresses, any matching addresses from your contacts list are displayed. Tap a match to enter that address directly.

> If you want to send a carbon copy (Cc) or a blind carbon copy (Bcc) of the email to other recipients, press MENU and then tap Add Cc/Bcc.

4. Enter the email subject, and then compose your email.
5. If you want to add a picture attachment, press MENU and then tap Attach. Navigate to the picture you want to attach, and then tap the picture.
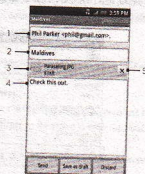

| 1 Recipient. |
| 2 Subject. |
| 3 Attachment. |
| 4 Enter your message here. |
| 5 Tap to remove the attachment. |

6. After composing your message, tap Send.

> While composing the message, tap Save as draft or press the BACK button to save it as a draft. To view your draft email messages, in the Inbox, press MENU and then tap View labels > Drafts.

Adding a signature to your messages

You can add a signature to email messages that you send.
1. In the Inbox, press MENU and then tap Settings > Signature.
2. Enter your signature in the text box, and then tap OK.

> You can create a signature consisting of multiple lines of text. At the end of each line of text, tap ▣on the onscreen keyboard to create another line.

Viewing your sent messages

In the Inbox, press MENU and then tap View labels > Sent.

70

Viewing conversations and messages

Searching for messages

You can search for messages that contain one or more words in their contents or in their addresses, subjects, labels, and so on. When you search for messages, all of the messages in your Gmail account on the web are included (except those labeled Trash or Spam), not just those that you've synchronized onto your phone.

1. In the Inbox, press SEARCH.
2. Enter the word or words to search for.
3. Tap ▣, or tap the Enter key on the onscreen keyboard.

A conversation list opens, displaying all of the conversations with messages that contain the words you searched for. The words searched for are displayed in the title bar. You work with the conversations in this list just as you would with the conversations in your Inbox or any other conversation list.

Starring a message

You can star an important message so that you can easily find it again. Conversations with starred messages are displayed with a star in your Inbox and other conversation lists. To view just conversations with starred messages, see "Viewing conversations by label" in this chapter.

Do one of the following:
* While reading a message, touch the star in its header.
* When viewing a conversation, touch its star to start the newest message in the conversation.

To unstar a message, touch its star again. You can also touch a star in a conversation list to unstar all messages in the conversation.

Labeling a conversation

You can organize conversations by labeling them. Gmail has several preset labels you can use, and you can also add your own labels, using Gmail on the web.
1. While viewing the messages in a conversation, press MENU and then touch Change labels.
2. Select the labels that you want to assign to the conversation, and then tap OK.

Viewing conversations by label

You can view a list of the conversations that have the same label.
1. When viewing your Inbox or another conversation list, press MENU, and then touch View Labels.
2. Touch a label to view a list of conversations with that label.

The conversation list resembles your Inbox, but the label replaces "Inbox" in the title bar. You work with labeled conversations lists in the same way as with your Inbox.

Changing Gmail synchronization settings

1. Press HOME, and then tap ▣ > Gmail.
2. Press MENU, and then tap Settings > Labels.
3. To set the number of days to synchronize, tap Number of days to sync.
4. To set synchronization for a particular label, tap the label. You can select to

71

synchronize the default number of days, or you can sync all or none of the messages.

Working with conversations in batches

You can archive, label, delete, or perform other actions on a batch of conversations at once, in your Inbox or in another labeled list of conversations.

1. In the Inbox or other conversation list, select the check boxes for the conversations you want to work with as a batch. When you select a check box, the Archive, Labels, and Delete buttons are displayed at the bottom of the screen.
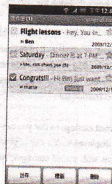

2. Tap the Archive, Labels, or Delete button to perform one of those actions on the batch of conversations, or press MENU for more options.

Changing Gmail settings

1. Press HOME, and then tap 🔘 > Gmail.
2. In the Inbox, press MENU and then tap Settings.
3. Set the following options:
   - Signature. Tap to enter a signature that is appended at the end of your emails.
   - Confirm delete. Select the check box to show a confirmation box when you delete a conversation.
   - Batch operations. When selected, this adds a check box to the left of each conversation so you can add it to a batch. See "Working with conversations in batches" above.
   - Clear search history. Remove the searches you have performed.
   - Labels. Tap to select how many days and which Gmail labels to synchronize.
   - Email notifications. Select the check box to show a notification icon on the status bar when you receive a new email.
   - Tap Select ringtone if you want your phone to play a notification sound when a new email message arrives. On the ring tone menu, select a ring tone specific to new email messages. The ring tone plays briefly when selected. If you don't want a ring tone to play when you receive a new email message, tap Silent. To confirm your ring tone selection, tap OK.
   - Select Vibrate if you want your phone to vibrate when you receive a new email message.

The Mail application lets you send and receive email from your webmail or other accounts, using POP3 or IMAP.

It also lets you access your Exchange ActiveSync email and other features on your phone. For information on this, see "Exchange ActiveSync email" in this chapter.

POP3/IMAP email account

1. Press HOME, and then tap 🔘 > Mail.
2. Do one of the following:
   - If this is your first time to add an email account in Mail, tap Other (POP3/IMAP) on the Choose a mail provider screen.
   - If you have already added an email account in Mail, tap ☑ on the upper-right corner, and then tap New Account. If the Choose a mail provider screen is displayed, tap Other (POP3/IMAP).
3. Enter the Email address and Password for the email account and then tap Next.
   If the account type you want to set up is not in the phone database, you will be asked to enter more details.
4. Enter the Account name and Your name and then tap Finish setup.

Viewing your email inbox

1. Press HOME, and then tap 🔘 > Mail.
2. Tap a tab at the bottom of the screen to filter the inbox.
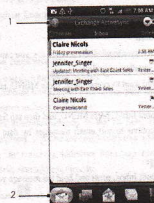

| 1 Number of unread email messages. |
| 2 Filter tabs. See "Inbox filter tabs" for details. |
| 3 Marked (Exchange ActiveSync only) |
| 4 Meeting invitation (Exchange ActiveSync only) |
| 5 Tap to view a different email account or add a new email account. |

Inbox filter tabs

Received

Displays email messages as individual items.

Conversations

Displays messages as conversations, grouped according to the subject line. Tap a subject in the list to show the email conversation.

VIP group

Displays messages from contacts in your VIP group. To add contacts to the VIP group from this tab, tap Add contact to group, select the contacts you want to add, and then tap Save. For more information on contact groups, see "Contact groups" in the People chapter.

Unread

Displays unread messages.

Marked (Exchange ActiveSync only)

Displays all flagged messages.

Meeting invitations (Exchange ActiveSync only)

Displays meeting invitations which you have not yet accepted or declined.

Attachments

Displays all messages that have attachments.

Refreshing an email account

Whatever your automatic synchronization settings are, you can also synchronize your sent and received emails manually at any time.

While in the account you want to synchronize, press MENU, and then tap Refresh.

Sorting email messages

1. On the email account Inbox, press MENU, and then tap Sort.
2. Select from the options to sort email messages by date received, priority, subject, Sender, or size.

Deleting an email message

1. On the email account Inbox, press and hold the message you want to delete.
2. On the options menu, tap Delete.

Deleting multiple email messages

1. On the email account Inbox, press MENU and then tap Delete.
2. Select the messages you want to delete, and then tap Delete.

Exchange ActiveSync email

If you synchronize your phone with your work Exchange ActiveSync account, you can read, manage, and send email in the same easy way as with a POP3/IMAP account. However, you can also access some powerful Exchange features.

74

For information on setting up an Exchange ActiveSync account, see "Synchronizing with Microsoft Exchange ActiveSync account" in the Accounts and sync chapter.

Setting out of the office status

You can set your Out of Office status and auto-reply message right from your phone.

1. Press HOME, and then tap ▓ > Mail.
2. Switch to the Exchange ActiveSync account.
3. Press MENU and then tap More > Out of the office.
4. Tap the field below I am currently, and then select Out of the office.
5. Set the dates and times for the period when you will be out of the office.
6. Enter the auto-reply message.
7. Tap Save.

Sending a meeting request

1. Press HOME, and then tap ▓ > Mail.
2. Switch to the Exchange ActiveSync account.
3. Press MENU and then tap More > New meeting invitation.
4. Enter the meeting details, and then tap Send.

Setting the priority for an email message

You can set the priority for an email message you send with your Exchange ActiveSync account.

1. While composing the message, press MENU.
2. Tap Priority.
3. Select the priority for the message.

If you selected High or Low priority, the priority appears below the subject line of the message.

Composing and sending an email message

1. Press HOME, and then tap ▓ > Mail.
2. On the email account Inbox, press MENU and then tap Compose.
3. Fill in one or more recipients. You can:
   - Enter email addresses directly in the To field. If you're sending the email to several recipients, separate the email addresses with a comma. As you enter email addresses, any matching addresses from your contacts list are displayed. Tap a match to enter that address directly.

   - Tap the icon ▓, and then select the contacts to whom you want to send the message. You can also select contact groups as recipients, or add contacts from the company directory if you have set up an Exchange ActiveSync account on your phone. When you have selected all the message recipients, tap Done.

   If you want to send a carbon copy (Cc) or a blind carbon copy (Bcc) of the email to other recipients, press MENU, and then tap Show Cc/Bcc.

4. Enter the subject, and then compose your message.
5. To add an attachment, press MENU, tap Add attachment, and choose from the following options:

75

- **Picture.** Select Camera to take a photo and attach it, or Picture to attach a photo from your storage card.
- **Video.** Select Camcorder to capture a video and attach it, or Video to attach a video from your storage card.
- **Audio.** Select Voice Recorder to make a voice recording and attach it, or Music & sounds to attach a music file or voice recording from your storage card.
- **Location.** You can attach location information. Send your current location (requires GPS to be turned on), a location stored in Footprints, or a location you pick on a map. For more information about GPS, maps, and Footprints, see the Maps and location chapter.
- **Document.** Attach a PDF file or an Office document such as a text file or a spreadsheet.

6. Tap Send to send the message immediately, or tap Save as draft if you want to send it later.

To open a draft email, in the email account Inbox, press MENU, and then tap Folders > Drafts.

Viewing and replying to an email message

1. Press HOME, and then tap [ ] > Mail.
2. On the email account Inbox, tap the email you want to view.
3. Tap Reply or Reply all to reply to the email.

For an Exchange ActiveSync account, you can mark an email. To mark an email when viewing an email, tap the white flag [ ] on the upper-right corner of the screen. The flag turns red [ ] when you mark the message.

You can copy, look up, translate, or share text from an email message. For information on how to do this, see "Copying text, looking up information, and sharing" in the Internet chapter.

Editing email account settings

1. Press HOME, and then tap [ ] > Mail.
2. Switch to the email account you want to edit.
3. Press MENU and then tap More > Settings.
4. Select from the following settings:

   Account settings
   Change the email account settings such as the name, email address, password, and description.

   General settings
   Set the font size when reading emails, enable, disable or set the signature, set the account as the default email account, and set where to save email attachments.

   Send & receive
   Set the maximum email file size limit when receiving and frequency to check for

---

new emails and how many to check for. You can also set to have emails that you send bcc'd to yourself.

Notification settings
Set email notification settings.

Delete account
Tap to delete the email account.

- Press BACK to save your changes.

Deleting an email account

1. Press HOME, and then tap [ ] > Mail.
2. Switch to the email account you want to delete.
3. Press MENU, and then tap More > Settings > Delete account.

Adding the Mail widget

Add the Mail widget to let you view your POP3/IMAP or Exchange ActiveSync emails on the Home screen. To learn how to add widgets, refer to "Adding a widget to your Home screen" in the Personalizing chapter.

11. Calendar

11.1 About Calendar

Use your phone's Calendar to create and manage your events, meetings, and appointments. You can also set up your phone to stay in sync with the following types of calendar.

- On your phone, sign in to your Google Account so you'll be able to sync your phone's Calendar with your Google Calendar online. If you have not signed in to your Google Account yet, see the Accounts and sync chapter to find out how to sign in.

  You can create multiple Google Calendars only in Google Calendar on the Web. After creating them in Google Calendar on the Web, you'll be able to see them in the Calendar application on your phone.

  For more information about creating and managing multiple Google Calendars, visit the Google website at the following URL: http://calendar.google.com.

- If you're using Microsoft Outlook on your computer, you can set up Phone Sync on your computer to sync your Outlook Calendar with your phone's Calendar. See "Using Phone Sync" for details.

- If you have a Microsoft Exchange ActiveSync account and you have added it on your phone, you can sync your phone's Calendar with your Exchange ActiveSync calendar events. See the Email and Accounts and sync chapters for details.

11.2 Creating a calendar event

You can create events that appear on your phone only, as well as events that sync with your Google Calendar, your computer's Outlook Calendar, or Exchange ActiveSync calendar.

1. Press HOME, then tap [ ], and then tap Calendar.

2. On any Calendar view, press MENU and then tap New event.

   When you are in the Month or Agenda view, you can also tap at the bottom-right of the screen to create a new event.

3. If you have more than one calendar, select a calendar in which to add the event:
   - Select My Calendar to create an event that will appear only on your phone.
   - Select your Google Account to create a Google Calendar event. If you have several Google Calendars on the Web, select one in which to add your event.
   - Select PC Sync to create an Outlook Calendar event to sync with your computer.
   - Select Exchange to create an Exchange ActiveSync calendar event.

4. Enter a name for the event.

5. To specify the date and time of the event, do one of the following:
   - If there is a time frame for the event, tap the From and To date and time to set them.
   - If it is a special occasion such as a birthday or a whole-day event, set the From and To date, then select the All day check box.

6. Enter the event location and description.

7. Set the reminder time.

You can add another reminder time in a Google Calendar event. Press MENU and then tap Add reminder.

8. If the event occurs on a regular basis, tap the Repetition box and then choose how often the event occurs.

9. Scroll to the bottom of the screen and then tap Add.

Inviting guests to your event (Google Account only)

If you want to invite guests to your event, you need to create and add the event in your Google Calendar. An invitation email will be sent to your guests using your Google Account.

1. Open Calendar and create a new event. Tap the Calendar field and then select your Google Account (or one of your other Google Calendars). For the steps, see "Creating a calendar event".

2. Add details about the event, such as date and time, location, and more.

3. In the Guests field, enter the email addresses of everyone you want to invite to the event. Separate multiple addresses with commas (,).

   If the people to whom you send invitations use Google Calendar, they'll receive an invitation in Calendar and by email.

4. Tap Add to add the event to your Google Calendar.

Sending a meeting request using Calendar (Exchange ActiveSync only)

If you have an Exchange ActiveSync account set up on your phone, you can use Calendar to create a meeting appointment and send a meeting request email to the people you want to invite to your meeting.

1. Open Calendar and create a new event. Tap the Calendar field and then select Exchange. For the steps, see "Creating a calendar event".

2. Add details about the meeting, such as date and time, location, and more.

3. Press MENU and then tap Meeting Invitation.

4. Tap [ ] and choose attendees from your contacts or Company Directory.

5. Enter your message and then tap Send.

6. Tap Add to add the meeting appointment to your Exchange ActiveSync Calendar.

11.3 Changing calendar views

When you open Calendar, it displays the Month view by default. You can also display the Calendar in Agenda, Day, or Week view. To change between calendar views, press MENU, and then choose the type of view that you want.

Month view

In Month view, you'll see markers on days that have events.

When in Month view:

- Tap on the bottom left of the screen to switch to Agenda view. Tap on the bottom right to create a new event.
- Tap a day to view the events of that day.
- Press and hold a day to open an options menu from which you can also choose to create an event or switch to either Day or Agenda view.
- Slide your finger up or down the screen to view earlier or later months.

Day and Agenda views

Day view displays a list of the events of one day and also shows weather information at the bottom of the screen when you're viewing events of the current day. Agenda view shows a list of all your events in chronological order.

The color bars on the left side of the events indicate the type of calendar in which the event is part of. To find out what each color represents, press MENU and then tap More > Calendars.

When in Day view, slide left or right across the screen to view earlier or later days.

- In Day view, the weather information appears only if the event is within the five-day forecast of the Weather application.
- Weather information does not appear in Day view when you change Day view to display as a time list. See "Changing Calendar settings" for details.

Week view

Week view displays a chart of the events of one week.
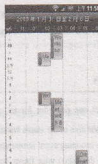

When in Week view:

- You can press and hold on a time slot to create a new event at that time.
- Tap an event to view its details.
- Slide left or right across the screen to view earlier or later weeks.

In a crowded Week view, it may be easier to select an event by using the optical trackball. Then press the optical trackball to view details about the selected event.

Viewing, editing or deleting an event

You can view, edit, or delete events you created. You can also view event invitations that other people sent to you.

Viewing and editing an event

1. Press HOME, then tap , and then tap Calendar.
2. In Month view, tap the day when the event takes place, and then tap the event to open it. The Event details screen then opens and shows the summary of the event.
3. When viewing the event summary, you can do the following:
   - Find the event's location in Maps.
   - If it's a Google Calendar or Exchange ActiveSync calendar event, check the participants of the event.
   - Change the reminder time.
   - If it's a Google Calendar event, respond whether you'll attend the event.
   - Press the BACK button on your phone to save changes you made on the Event details screen.
4. To edit more details about the event, press MENU while you're on the Event details screen and then tap Edit event.
5. Make your changes to the event.
6. When you're done editing, scroll down to the bottom of the screen and then tap Save.

Deleting an event

There are a number of ways to delete an event.

- While viewing the summary of an event on the Event details screen, press MENU and then tap Delete event.
- In Day, Agenda or Week view, press and hold an event and then tap Delete event.
- When editing an event, scroll down to the bottom of screen and then tap Delete.

- If the event repeats, you'll be asked whether you want to delete just this occurrence, this and all future occurrences, or all past and future occurrences of your Calendar.

11.5 Calendar event reminders

If you have set at least one reminder for an event, the upcoming event icon will appear in the notifications area of the status bar to remind you of the upcoming event. Viewing, dismissing, or snoozing event reminders

1. Tap the status bar, then slide your finger down the screen to open the Notifications panel.
2. Do one of the following:
    - Tap Clear to dismiss event reminders and all other notifications. Other types of notifications such as new messages and missed calls will also be deleted.
    - After sliding open the Notifications panel, tap the calendar event reminder. You'll then see a list of all pending event reminders. Tap Snooze all to snooze all event reminders for five minutes, or tap Dismiss all to dismiss all event reminders.
    - Press BACK to keep the reminders pending in the notifications area of the status bar.

11.6 Displaying and synchronizing calendars

You can select which calendars to show or hide on your phone's Calendar, and which ones to keep synchronized.

Showing or hiding calendars

In any Calendar view, press MENU , tap More > Calendars, and then select or clear a calendar to show or hide it. Tap All calendars to display all calendars.

The calendars are kept synchronized on your phone, whether or not you hide them.

Choosing which Google Calendars are synchronized on your phone

You can choose which Google Calendars to keep synchronized on your phone or which ones to stop synchronizing.

Stop synchronizing a Google Calendar

1. In any Calendar view, press MENU and then tap More > Calendars.
2. Press MENU again and then tap Remove calendars.
3. Select a Google Calendar to remove from your calendars list, and then tap OK.
4. Press BACK to update Calendar with the new changes and return to the Calendar view you were viewing.

The calendars that you remove from your calendars list will no longer be synchronized on your phone, but you remain subscribed to them and can work with them in Google Calendar on the Web.

Adding a Google Calendar to sync with

Only the calendars that you've created or subscribed to on the Web, but previously removed from your calendars list, are shown in the list of calendars that you can add.

1. In any Calendar view, press MENU and then tap More > Calendars.

82

---

2. Press MENU again and then tap Add calendars.
3. Select a Google Calendar to add to your calendars list, and then tap OK.
4. Press BACK to update Calendar with the new changes and return to the Calendar view you were viewing.

Changing Calendar settings

You can change Calendar's settings to specify how it displays events and how it notifies you of upcoming events. In any Calendar view, press MENU and then tap More > Settings to access Calendar's settings.

Reminder settings
Choose how you want Calendar to issue event reminders when there are upcoming events.

All calendars
Select this check box to use the same event reminder settings for all types of calendars. If you clear this check box, you can set different reminder settings for each calendar.

Reminders & notifications
Configure event reminders to open an alert, send you a notification, or turn off event notifications on your phone.

Default reminder time
Choose how soon before an event you want to be notified.

Select ringtone
Choose a ringtone to sound when you receive an event reminder.

Vibrate
Choose whether you want your phone to vibrate when you receive an event notification.

Hide declined events
Choose whether to show or hide events to which you've declined invitations.

Calendar view settings
Choose what appears in Calendar when opened and what's shown in Day, Week, and Month views.

Start in
Choose the default Calendar view that is displayed when you open Calendar.

Day views
Choose whether to display Day view in the form of an event list or time list.

First day of week
Set the Month and Week views to start on a Sunday or Monday.

Include weather
Make sure this check box is selected so that weather information is shown in Day view's event list.

City
By default, Day view displays your current location's weather. You can change it to display the weather of another city.

11.7 Sending a vCalendar

You can send a calendar event as a vCalendar to someone's phone or your computer using Bluetooth. You can also send it as a file attachment with your message.

83

1. Press HOME, tap [icon], and then tap Calendar.
2. In Month view, tap the day when the event takes place.
3. Press and hold the calendar event you want to send, and then tap Share vCalendar.
4. Choose whether to send the event using Bluetooth or send it by email.
5. If you chose to send using Bluetooth, in the next few steps, you'll be asked to turn on Bluetooth on your phone and connect to the receiving Bluetooth device so the vCalendar can be sent. Follow the steps in "Sending information from your phone to another device" in the Bluetooth chapter.

   If you chose to send by email, a new message window opens and automatically includes the vCalendar as an attachment. Your default email account that's selected in the Mail application will be used to send. For more information about using the Mail application, see the Email chapter.

💡 You can also choose to send the vCalendar in a multimedia message. For more information about sending a multimedia message, see the Messages chapter.

11.9 About the Calendar widget

There's a Calendar widget available that you can add to your Home screen, and it comes in different calendar views. Tapping a day or event on the widget brings you to the Calendar application.

To find out how you can add a widget, see "Personalizing your Home screen with widgets" in the Personalizing chapter.

Clock and Weather

About the Clock widget

The Clock widget that's by default added on the Home screen shows your current date, time, and location. You can tap the weather image on this widget to open the Weather application and check for more weather forecasts. See "Checking weather" for details

The Clock widget comes in a variety of looks and designs. You can add another clock widget to the extended Home screen, if you want to have another clock that shows the time of another city. To find out how you can add a widget, see "Personalizing your Home screen with widgets" in the Personalizing chapter.

About the Clock application

The Clock application is more than just a regular date and time clock. It functions as a desk clock that shows the date, time, and weather information, and it can turn into a night clock or screensaver. It has a world clock that shows you the current time in several locations across the globe. There's also an alarm clock, stopwatch, and countdown timer.

To open the Clock application:

* Press HOME and then tap the Clock widget on the Home screen.

* You can also press HOME, tap [icon], and then tap Clock.

Tap the tabs at the bottom row or slide your finger across the tabs to switch between the different functions of the Clock application.

| 1 Desk Clock tab |
| 2 World Clock tab |
| 3 Alarm Clock tab |
| 4 Stopwatch tab |
| 5 Timer tab |

12.3 Using Desk Clock

Opening the Clock application brings you directly to the Desk Clock screen.
The Desk Clock displays the current date, time, and weather, an alarm clock indicator, and a battery charging indicator. You can dim the screen to show only the time and date on the Desk Clock.
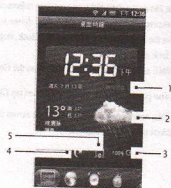

The alarm clock indicator shows whether the alarm clock is on or off. To find out how to turn on or off the alarm clock, see "Setting the alarm clock".

Below the date and time, you'll see the weather information of your current location. Tapping the weather information brings you to the Weather application where you can see weather forecasts of the next few days. See "Checking weather" for more information about the Weather application.

The battery charging indicator shows the battery charge level. You'll see it only when your phone is plugged with the power adapter or connected to your computer.

Tap the button to dim the screen and display only the time and date on the Desk Clock. To light up the screen again, tap anywhere on the screen or press the BACK button on your phone.

Tap the button to dim the screen and go into screensaver mode. When in screensaver mode, the time and date will change position on the screen after every few minutes. To light up the screen again, tap anywhere on the screen or press the BACK button on your phone.

You can change the Desk Clock screen to display the date and time of another time zone. To find out how to select a different time zone, see "Setting the time zone, date, and time".

Using World Clock

Use the Clock application's World Clock screen to check the current time in several places around the globe simultaneously. You can also set your home time city, add more cities to the world clock list, and manually set your time zone, date, and time.

Setting your home city

1. Press HOME and then tap the Clock widget on the Home screen.
2. Tap the World Clock tab.
3. Press MENU and then tap Home settings.
4. Enter your home city's name. As you enter letters, the list is filtered to show matching cities and countries.
5. Scroll through the list and tap your home city.

Setting the time zone, date, and time

To set the time zone, date, and time on your phone manually, you need to turn off auto time synchronization first.

1. Press HOME and then tap the HTC Clock widget on the Home screen.
2. Tap the World Clock tab.
3. Press MENU and then tap Local time settings to open the Date & time settings screen.
4. Clear the Automatic check box.
5. Tap Select time zone. Scroll through the list and then tap the time zone you want.
6. To change the date, tap Set date. Adjust the date by rolling the day, month and year scroll wheels onscreen and then tap Done.
7. To change the time, tap Set time. Adjust the time by rolling the hour and minute scroll wheels onscreen and then tap Done.
8. Tap the Use 24-hour format check box to toggle between using a 12-hour or 24-hour time format.
9. Tap Select date format then select how you want dates to be displayed. (The selected date format also applies to the date displayed in the alarm clock.)

💡 You can also press HOME > MENU and then tap Settings > Date & time to open the Date & time settings screen.

Adding a city to the World Clock screen

Add more cities to the World Clock screen so you can instantly check the date and time in these cities. In addition to the current and home cities, the World Clock screen can show up to 15 cities.

1. Press HOME and then tap the Clock widget on the Home screen.
2. Tap the World Clock tab.
3. Tap Add city. Enter the city name you want to add. As you enter letters, the list is filtered to show matching cities and countries.
4. Scroll through the matching list and tap the city that you want to add.

12.5 Setting the alarm clock

You can use the Clock application's Alarms screen to set up one or more wake-up alarms.

Setting an alarm
1. Press HOME and then tap the Clock widget on the Home screen.

---

1. Tap the Alarms tab.
2. Select the check box of an alarm, and then tap that alarm.
3. On the Set alarm screen, drag your finger up or down to roll the time scroll wheels and set the alarm time.
4. Scroll through the Set alarms screen to see all the available alarm options. You can:
   - Enter the alarm Description and choose the Alarm sound to use.
   - Tap Repeat. Select what days of the week to sound the alarm and then tap OK.
   - Select the Vibrate check box if you want your phone to also vibrate when the alarm goes off.
5. When you've finished setting the alarm, tap Done.

💡 To turn off an alarm, clear the check box (by tapping it) of that alarm.
💡 If you need to set more than three alarms, press MENU while you're on the Alarms screen and then tap Add alarm.

Deleting an alarm
1. Press HOME and then tap the Clock widget on the Home screen.
2. Tap the Alarms tab.
3. On the Alarms screen, press MENU and then tap Delete.
4. Select the alarms you want to delete and then tap Delete.

Changing alarm sound settings

If you've set one or more alarms, you can change their settings such as the alarm volume, how long to snooze the alarm, and more.

1. Press HOME and then tap the HTC Clock widget on the Home screen.
2. Tap the Alarms tab.
3. On the Alarms screen, press MENU and then tap Settings. You can change the following settings:

Alarm in silent mode

This option is selected by default, which allows the alarm to sound even when your phone's volume is set to silent mode. Clear this check box if you want to silence the alarm when the volume is in silent mode.

Alarm volume

Set the volume level that you want for the alarm.

Snooze duration

Set how long to snooze between alarms.

Side button behavior

Choose what happens to the alarm when pressing the side button (VOLUME UP/DOWN) of your phone. You can set the button to snooze, dismiss the alarm, or disable the button. The side button works only when the phone's screen is not locked. While on the lock screen, tap the onscreen Snooze button to snooze, or slide down the screen to dismiss the alarm.

12.6 Checking weather

If you consented to turn location service on when you were setting up your phone for the first time, you'll see the weather of your current location right on the Clock widget of your Home screen.

You can also use the Weather application to check the current weather and weather forecasts for the next four days of the week. In addition to your current location's weather, this application also displays the weather forecasts of other cities around the globe.

💡 If you declined to turn location service on during first-time setup of your phone, turn location service on in your phone's settings so that you'll be able to check your current location's weather on the Clock widget, Weather application, and the Weather widget. Press HOME > MENU, tap Settings > Location, and then select the Use wireless networks check box.

1. Connect to the Internet using your phone's Wi-Fi or data connection. To find out how, see the Internet chapter.

2. Press HOME, tap 🔘, and then tap Weather.

3. On the Weather screen, you'll first see your current location's weather. To check the weather in other cities, swipe your finger up or down the screen.

13°
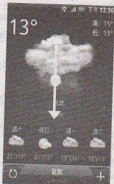

4. The Weather application automatically downloads and displays the latest weather updates. You can also download the most recent weather anytime by tapping 🔄

5. To see more weather details on the Web, tap Weather at the bottom center of the Weather screen.

Adding a city to the Weather screen

Add more cities to the Weather screen so you can instantly check the weather forecasts of these cities. In addition to your current location, the Weather screen can display up to 15 cities.

1. Press HOME, tap 🔘, and then tap Weather.

2. On the Weather screen, tap ➕ .

3. Enter the location you want to add on the text field. As you enter text, the list is filtered to show the possible locations based on the letters you entered.

4. Tap the desired city to select it.

Changing the order of cities on the Weather screen

1. Press HOME, tap 🔘, and then tap Weather.

□ On the Weather screen, press MENU and then tap Rearrange.

□ Press and hold at the end of the item you want to move. When the row is highlighted in green, drag it to its new position, then release.

□ Tap Done.

Removing a city from the Weather screen

□ Press HOME, tap 🔘 , and then tap Weather.

□ On the Weather screen, press MENU and then tap Delete.

□ Select the cities you want to remove and then tap Delete.

Changing weather options

□ Press HOME, tap 🔘 , and then tap Weather.

□ On the Weather screen, press MENU and then tap Settings.

□ You can change the following weather settings:

- Select or clear the Update automatically check box, depending on whether you want your phone to automatically download weather updates.

- To set an auto update schedule, tap Update frequency and choose a schedule.

- Tap Temperature scale to choose whether to display weather in Celsius or Fahrenheit.

About the Weather widget

Use the Weather widget to instantly check weather forecasts of your current location and other cities without having to open the Weather application.

The Weather widget comes in different looks and styles. You can add this widget to the Home screen, if it's not yet added. To find out how you can add a widget, see "Personalizing your Home screen with widgets" in the Personalizing chapter.

13.Internet

13.1 Data connection

Your phone will be automatically configured to use your mobile operator's connection when you turn on your phone (if the SIM card is inserted) for the first time.

Checking the data connection you are using

1. Press HOME > MENU and then tap Settings > Wireless & networks.
2. Tap Mobile networks > Network operators or Access Point Names.

Turning the data connection on or off

Turning your data connection off can help optimize your battery life. It can also save money on data charges. However, when your data connection is turned off, you will not always receive automatic updates to your email, social network accounts, and other synchronized information.

1. Press HOME > MENU and then tap Settings > Wireless & networks.
2. Select the Mobile networks check box to turn on the data connection; clear the check box to turn off the data connection.

Creating a new access point

When you need to add another data connection on your phone, obtain the access point name and settings (including username and password if required) from your mobile operator.

1. Press HOME > MENU and then tap Settings > Wireless & networks.
2. Tap Mobile networks > Access Point Names.
3. On the APNs screen, press MENU and then tap New APN.
4. In the Edit access point screen, enter the APN settings. Tap the APN setting item to edit it.
5. Press MENU and then tap Save when you finish setting up the new APN.

Enabling data roaming

Data roaming lets you connect to your mobile operator's partner networks and access services when you are out of your mobile operator's coverage area.

1. Press HOME > MENU and then tap Settings > Wireless & networks.
2. Tap Mobile networks and then select the Data roaming check box.

> Accessing data services while roaming may incur significant charges. Inquire about the data roaming tariffs with your mobile operator before enabling data roaming.

13.2 Wi-Fi

Wi-Fi provides wireless Internet access over distances of up to 300 feet (100 meters). To use Wi-Fi on your phone, you need access to a wireless access point or "hotspot".

> The availability and range of the Wi-Fi signal depends on the number, infrastructure, and other objects through which the signal passes.

Turning Wi-Fi on and connecting to a wireless network

1. Press HOME > MENU, and then tap Settings > Wireless controls.

2. Select the Wi-Fi check box to turn Wi-Fi on. The phone will scan for available wireless networks.
3. Tap Wi-Fi settings. The network names and security settings of detected Wi-Fi networks are displayed in the Wi-Fi networks section.
4. Tap a Wi-Fi network to connect. If you selected an open network, you will be automatically connected to the network. If you selected a network that is secured with WEP, enter the key and then tap Connect.

Depending on the network type and its security settings, you may also need to enter more information or choose a security certificate.

When your phone is connected to a wireless network, the Wi-Fi icon [icon] appears in the status bar and tells you the approximate signal strength (number of bands that light up). If network notification in Wi-Fi settings is enabled, this icon [icon] appears in the status bar whenever the phone detects an available wireless network within range.

The next time your phone connects to a previously accessed secured wireless network, you will not be prompted to enter the key or other security information again, unless you reset your phone to its factory default settings.

Connecting to a Wi-Fi network with EAP-TLS security

You may need to install a network certificate (.p12) to your phone before you can connect to a Wi-Fi network with EAP-TLS authentication protocol.

1. Save the certificate file to the root folder of the storage card.
2. Press HOME > MENU, and then tap Settings > Security.
3. Tap Install from SD card.
4. Select the network certificate needed to connect to the EAP-TLS network.
5. Follow the steps in the previous section to connect to the Wi-Fi network.

Checking the wireless network status

1. Press HOME > MENU and then tap Settings > Wireless & networks.
2. On the Wireless & networks screen, tap Wi-Fi settings, and then tap the wireless network that the phone is currently connected to.

A message box is then displayed showing the Wi-Fi network name, status, speed, signal strength, and more.

> If you want to remove the wireless network settings on your phone, tap Forget on this window. You need to enter the settings again if you want to connect to this wireless network.

Connecting to another Wi-Fi network

1. On the Wireless controls screen, tap Wi-Fi settings. Detected Wi-Fi networks are displayed in the Wi-Fi networks section. To manually scan for available Wi-Fi networks, on the Wi-Fi settings screen, press MENU and then tap Scan.
2. Tap another Wi-Fi network to connect to it.

If the wireless network you want to connect to is not in the list of detected networks, scroll down the screen, then tap Add Wi-Fi network. Enter the wireless network settings and then tap Save.

13.3 Adding the Data connection and Wi-Fi widgets

Add the Data connection and/or Wi-Fi widget to the Home screen to make it faster for you to turn on or off these connections. Tap the widget to turn on or off the connection.

To learn how to add widgets, refer to "Adding a widget to your Home screen" in the Personalizing chapter.

13.4 Connecting to a virtual private network (VPN)

From your phone, you can add, set up, and manage virtual private networks (VPNs) that allow you to connect and access resources inside a secured local network, such as your corporate network.

Preparing your phone for VPN connection

Depending on the type of VPN you are using at work, you may be required to enter your login credentials and/or install security certificates before you can connect to your company's local network. You can get this information from your network administrator.

Also, your phone must first establish a Wi-Fi or data connection before you can initiate a VPN connection. For information about setting up and using these connections on your phone, see "Data connection" and "Wi-Fi" in this chapter.

Setting up secure credential storage

If your network administrator instructs you to download and install security certificates, you must first set up the phone's secure credential storage.

1. Press HOME > MENU, tap Settings > Security, and then tap Set password.
2. Enter a new password (at least 8 characters without any spaces) for the credential storage, scroll down and confirm the password, and then tap OK.
3. Select the Use secure credentials check box.

You can then download and install the certificates needed to access your local network. Your network administrator can tell you how to do this.

Adding a VPN connection

1. Press HOME > MENU, and then tap Settings > Wireless & networks > VPN settings.

94

---

2. Tap Add VPN, and then tap the type of VPN you want to add.
3. Tap the VPN settings and set them up according to the security details you have obtained from your network administrator.
4. When finished, press MENU, and then tap Save.

The VPN is then added to the VPNs section of the VPN settings screen.

Connecting to a VPN

1. Press HOME > MENU, and then tap Settings > Wireless & networks > VPN settings.
2. In the VPNs section, tap the VPN that you want to connect to.
3. When prompted, enter your log in credentials, and then tap Connect.

When you are connected, the VPN connected icon ![icon] appears in the notification area of the title bar.

Open the web browser to access resources such as intranet sites on your corporate network. See "Using your phone's web browser" for more information.

Disconnecting from a VPN

1. Press and hold the title bar, and then slide down your finger to open the Notifications panel.
2. Tap the VPN connection to return to the VPN settings screen, and then tap the VPN connection to disconnect from it.

When your phone has disconnected from the VPN, the VPN disconnected icon ![icon] is displayed in the notification area of the title bar.

Using your phone's web browser

Open the web browser to start surfing the web. The browser is fully optimized and comes with advanced features that let you enjoy Internet browsing on your phone.

You must have an active data connection or Wi-Fi connection to access the Internet.

Opening the browser

Do one of the following:
* Press HOME, and then tap Internet.
* Press HOME, and then tap ![icon] > Internet.

Going to a web page

1. On the browser screen, press MENU and then tap the URL field on top of the screen.
2. Enter the web page address using the keyboard. As you enter the address, matching web page addresses will appear on the screen. Tap an address to go directly to that web page or continue entering the web page address.

95

3. Tap the Enter key on the onscreen keyboard.

Setting your home page

1. Press HOME, and then tap > Internet.

2. Press MENU, and then tap More > Settings > Set home page.

3. On the Set home page screen, select the home page you want to use.

Changing the screen orientation

The phone automatically changes the screen orientation depending on how you are holding your phone.

The Orientation check box in HOME> MENU > Settings > Sound & display must be selected for the screen orientation to automatically change.

Browsing full versions of all web sites

Some web sites display a mobile version of their pages to phone web browsers. You can choose to view the full version of all pages, even for these sites.

1. Press HOME, and then tap > Internet.

2. Press MENU, tap More > Settings, and then clear the Mobile view check box.

Navigating on a web page

You can swipe your finger on the screen or the optical trackball to navigate and view other areas of the web page.

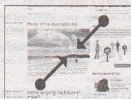

Zooming in or out on a web page

Tap the screen twice quickly to zoom in, then tap the screen twice quickly again to zoom out. You can also use your fingers to pinch or spread the screen to zoom in and out. Use your thumb and index fingers to 'spread' the web page to zoom in.

Photo of the (Australia) day

Use your thumb and index fingers to 'pinch' the web page to zoom out.

Opening a link in a web page

You can tap a link with your finger to open it, or press and hold a link for more options.

Link	What to do
Web page	• Tap the link to open the web page.
Address (URLs)	• Press and hold the link to open a menu that allows you to open, bookmark, copy to the clipboard, or share the link via email.
Email address	• Tap to send an email message to the email address.
	• Press and hold, then tap Copy on the menu to copy the email address to the clipboard. You can paste the email address later when creating a new contact or sending a new email message.

The browser also recognizes some phone numbers and addresses that allow you to call the phone number or locate the address in Google Maps™. When you navigate to a recognized phone number or address, it ishighlighted.

Link	What to do
Location address	Tap the address to open Google Maps and locate the address.
Phone number	Tap to open the Phone dialer to call the phone number.

You can also navigate to a link on a web page and select it using the optical trackball. This is particularly useful when viewing text and links at a small size. Links are enclosed in a colored box when selected.
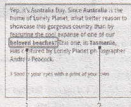

1 Link is selected.
2 Link is not selected.

After selecting a link with the optical trackball, you can press the optical trackball to open the link, or press and hold the optical trackball for more options.

Opening a new browser window

Open multiple browser windows to make it easier for you to switch from one web site to

another. You can open up to 4 browser windows.

1. While viewing a web page, press MENU and then tap Windows.
2. Tap the "+" button.

A new browser window opens and goes to the home page that is set.

Switching between browser windows

1. While viewing a web page, press MENU and then tap Windows.
2. Select the browser window you want to view by sliding your finger from right to left.

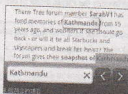

| 1 Tap to close the web page. |
| 2 Tap to display the web page in full screen. |

Finding text within a web page

1. While viewing a web page, press MENU and then tap More > Find on page.
2. Enter the search item. As you enter characters, matching characters are highlighted in green. Tap the left or right arrow to go to the previous or next matching item.

Downloading applications from the web

Before you can download applications from the web, you must first enable downloads from the phone settings.

1. Press HOME > MENU, and then tap Settings > Applications.
2. Select the Unknown sources check box.
3. When the Attention dialog box opens, tap OK.

All downloaded applications are saved to the storage card. Before you download an application from the web, make sure that you have installed a storage card on your phone. For information on how to install a storage card, refer to the Basics chapter.

Applications downloaded from the web can be from unknown sources. To protect your phone and personal data, download applications only from trusted sources such as Android Market. Refer to "Finding and installing apps from Android Market" in the Nav.

98

---

apps chapter for details.

Viewing your downloads

While viewing a web page, press MENU and then tap More > Downloads.

Copying text, looking up information, and sharing

You can select text and then:

- Copy it.
- Look it up on Wikipedia or Google Dictionary.
- Get a translation of the text from Google Translate.
- Share the text in a new email, text, or multimedia message or in your status update on a social network.

Selecting text

1. Press and hold on a word.

To select text in a link, press and hold the link, and then tap Copy text.

2. Drag the start and end markers to highlight the surrounding text you want to select.

| 1 Tap to copy, search/translate, or share the text. |
| 2 Start and end markers. Drag to increase or decrease the text selection area. |

When you select a larger block of text, the appearance of the markers changes. You can drag these markers up or down to select multiple paragraphs of text.

Copying and pasting text

1. After you have selected the text you want to copy, tap 📋. The selected text is then

99

copied to the clipboard.

2. In a text entry field (for example while composing a message), press and hold the point where you want to paste the text.

3. Tap Paste.

Searching or translating text

1. After you have selected the text you want to search or translate, tap 🔍

2. Tap one of the following tabs:

🔲 **Wikipedia**. Look for related information on Wikipedia, based on the text that you selected.

🔲 **Google Translate**. Translate the text to another language.

🔲 **Google Dictionary**. Look up the selected text in the dictionary.

Pasting text in a new message or social network status update

1. After you have selected the text you want to share, tap 🔴

2. Select an option to paste the selected text in a new email, text or multimedia message, or in your status update on a social network such as Twitter. See the Email, Messages, and Social chapters for more information on using these features.

Viewing bookmarks and previously visited pages

You can store as many bookmarks as you want on your phone. You can also access a convenient History list of the sites you have visited, or quickly view the pages that you access most often.

Bookmarking a web page

1. While viewing a web page, press MENU, and then tap Add bookmark. The New bookmark screen opens.

2. Edit the bookmark name if needed, and then tap Done.

Opening a bookmark

1. Press HOME, and then tap 🔵 > Internet.

2. Press MENU, and then tap Bookmarks.

3. On the Bookmarks tab 🔲 , navigate to the bookmark you want to open, and then tap it.

Editing a bookmark

1. Press HOME, and then tap 🔵 > Internet.

2. Press MENU, and then tap Bookmarks.

3. On the Bookmarks tab 🔲 , press MENU and then tap Edit.

4. Tap the bookmark you want to edit.

5. Enter your changes, and then tap Done.

Viewing a previously visited page

1. Press HOME, and then tap 🔵 > Internet.

2. Press MENU, and then tap Bookmarks.

3. On the History tab 🔲 , navigate to the page you want to view and then tap the page.

Clearing the list of previously visited pages

1. Press HOME, and then tap 🔵 > Internet.

2. Press MENU, and then tap Bookmarks.

3. On the History tab 🔲 , press MENU, and then tap Clear history.

Viewing a page that you often visit

1. Press HOME, and then tap 🔵 > Internet.

2. Press MENU, and then tap Bookmarks.

3. On the Most Visited tab 🔲 , navigate to the page you want to view, and then tap the page.

Clearing the list of most visited pages

1. Press HOME, and then tap 🔵 > Internet.

2. Press MENU, and then tap Bookmarks.

3. On the Most Visited tab 🔲 , press MENU, and then tap Clear all.

Changing the view of bookmarks or most visited pages

1. Press HOME, and then tap 🔵 > Internet.

2. Press MENU, and then tap Bookmarks.

3. On the Bookmarks tab 🔲 or the Most visited tab 🔲 , press MENU, and then tap Thumbnails, List, or Grid to change the view. For example, if you are in Thumbnails view and you want to view bookmarks in a grid, press MENU > List, and then press MENU > Grid.

Setting browser options

Customize the web browser to suit your browsing lifestyle. Set display, privacy, and security options when using the web browser.

1. Press HOME, and then tap 🔵 > Internet.

2. Press MENU, and then tap More > Settings.

13.6 Using your phone as a modem (tethering)

Get online with your notebook or desktop computer at any time, using your phone's data connection. For information on setting up and using the data connection, see "Data connection" earlier in this chapter.

✳ ▪ You need to install phone Sync before you can use your phone as a modem. Refer to "Using phone Sync" in the Sync chapter for details.

▪ You need a SIM card installed on your phone to use it as a modem for your computer.

1. Make sure your phone's data connection is turned on. See "Turning the data connection on or off" earlier in this chapter to learn how to turn on the phone's data

connection.

2. Connect the phone to the computer using the provided USB cable.
3. On the Connect to PC screen, select Internet sharing, and then tap Done.

When you are using your phone as a modem, the USB mass storage feature is disabled and you are also not able to use phone Sync.

Bluetooth

Turning Bluetooth

Bluetooth is a short-range wireless communications technology that allows devices to exchange information over a distance of about eight meters without requiring a physical connection.

Turn off Bluetooth when not in use to conserve battery power, or in places where using a wireless device is prohibited, such as on board an aircraft and in hospitals.

Turning Bluetooth on or off

1. Press HOME > MENU, and then tap Settings > Wireless & networks.
2. Select or clear the Bluetooth check box.

An even easier way to turn Bluetooth on or off is with the Bluetooth widget on the Home screen. For instructions on adding a widget to the Home screen, see "Adding a widget to your Home screen" in the Personalizing chapter.

Changing the phone name

The phone name identifies your phone to other devices.

1. Press HOME > MENU, and then tap Settings > Wireless & networks.
2. If the Bluetooth check box is not selected, select it to turn Bluetooth on.
3. Tap Bluetooth settings > Device name.
4. Enter the name for your phone in the dialog box, and then tap OK.

Connecting a Bluetooth headset or car kit

You can listen to music over an Bluetooth stereo headset, or have hands-free conversations using a compatible Bluetooth headset or car kit. It's the same procedure to set up stereo audio and hands-free.

For you to listen to music with your headset or car kit, the headset or car kit must support the A2DP Bluetooth profile.

1. Press HOME > MENU, and then tap Settings > Wireless & networks > Bluetooth settings.
2. If Bluetooth is not switched on, tap the Bluetooth check box to switch it on.
3. Make sure that the headset is discoverable, so that your phone can find the headset. Refer to the instructions that came with the headset to find out how to set it in discoverable mode.
4. Tap Scan for devices. Your phone will start to scan for Bluetooth devices within range.
5. When you see the name of your headset displayed in the Bluetooth devices section, tap the name. Your phone then automatically tries to pair with the headset.
6. If automatic pairing fails, enter the passcode supplied with your headset.

The pairing and connection status is displayed below the hands-free headset or car kit name in the Bluetooth devices section. When the Bluetooth headset or car kit is connected to your phone, the Bluetooth connected icon 🔵 is displayed in the status bar. Depending on the type of headset or car kit you have connected, you can then start using the headset or car kit to listen to music and/or make and receive phone calls.

Reconnecting a headset or car kit

When you have paired a headset with your phone, you should be able to ___
automatically by turning on Bluetooth on your phone, and then turning on the ___
However, sometimes you will need to reconnect manually, for example if you ___
using your headset with another Bluetooth device.

1. Press HOME > MENU, and then tap Settings > Wireless & networks > ___
   settings.
2. If Bluetooth is not switched on, tap the Bluetooth check box to switch it on.
3. Make sure that the headset is discoverable.
4. Tap the headset's name in the Bluetooth devices section.
5. If prompted to enter a passcode, try 0000 or 1234, or consult the headset ___
   documentation to find the passcode.

If you still cannot reconnect to the headset or car kit, follow the instructions in "___
from a Bluetooth device" in this chapter, and then follow the instructions ___
"Connecting a Bluetooth headset or car kit" above.

14.3 Disconnecting or unpairing from a Bluetooth device

Disconnecting a Bluetooth device

1. Press HOME > MENU, and then tap Settings > Wireless & networks > ___
   settings.
2. In the Bluetooth devices section, press and hold the device to disconnect.
3. Tap Disconnect.

Unpairing from a Bluetooth device

You can make your phone forget its pairing connection with another Bluetooth device. To
connect to the other device again, you may need to enter or confirm a passcode again.

1. Press HOME > MENU, and then tap Settings > Wireless & networks > ___
   settings.
2. In the Bluetooth devices section, press and hold the device to unpair.
3. Tap Unpair.

14.4 Sending and receiving information using Bluetooth

You can use Bluetooth to transfer information between your phone and another ___
Bluetooth-enabled device such as a phone or notebook computer. The first time you ___
transfer information between your phone and another device, you need to enter or confirm ___
a security passcode. After that, your phone and the other device are paired, and you will ___
not need to exchange passcodes to transfer information in the future.

Sending information from your phone to another device

You can send the following types of information, depending on the device you are ___
sending to:

- Images and videos
- Calendar events
- Contacts
- Audio files

1. Set the receiving device to discoverable mode. You may also need to set it to ___

"Receive Beams" or "Receive Files". Refer to the device's documentation for
instructions on receiving information over Bluetooth.
2. On the phone, open the application that contains the information or file you want to
send. For example, if you want to transfer a photo, press HOME, and then tap [ ]
> Photos.
3. Follow the steps for the type of item you want to send:
   - Photo or video (in Camera). After capturing a photo, on the preview screen, tap
     the Share button [ ], and then tap Bluetooth.
   - Photos and videos (in Photos). On the Albums tab [ ], tap an album. Tap the
     Share button [ ], tap Bluetooth, select the items you want to share, and then tap
     Next.
   - Calendar event. In the Calendar's Day view, Agenda view, or Week view, press
     and hold the event, and then tap Share vCalendar > Bluetooth.
   - Contact. On the People screen's All tab [ ], press and hold the contact, and
     then tap Send contact as vCard. Tap the down arrow icon, and then select
     Bluetooth from the displayed list.
   - Music track. With the track displayed on the Now playing screen, press MENU,
     and then tap Share > Bluetooth.
   - Voice recording. On the main Voice Recorder screen, tap the Share button [ ],
     and then tap Bluetooth.
4. If you are prompted to turn on Bluetooth, tap Yes.
5. Tap the name of the receiving device.
6. If prompted, accept the connection on the receiving device, and enter the same
   passcode on both your phone and the other device, or confirm the auto-generated
   passcode.
7. On the receiving device, accept the file.

The location where the information is saved depends on the type of information and the
receiving device:

- If you send a calendar event or contact, it is normally added directly to the
  corresponding application on the receiving device. For example, if you send a
  calendar event to a compatible phone, the event is shown in that phone's calendar
  application.
- If you send another file type to a Windows computer, it is normally saved in the
  Bluetooth Exchange folder within your personal document folders.
  On Windows XP, the path may be: C:\Documents and Settings\[your username]\My
  Documents\Bluetooth Exchange
  On Windows Vista, the path may be: C:\Users\[your username]\Documents

- If you send a file to another device, the saved location may depend on the file type. For example, if you send an image file to another mobile phone, it may be saved in a folder named "Images".

Receiving information from another device

Your device is capable of receiving a wide variety of file types with Bluetooth, including photos, music tracks, and documents such as PDFs.

To receive files from another device, you need to have an SD card installed in your phone.

1. Press HOME > MENU , and then tap Settings > Wireless & networks > Bluetooth settings.
2. If Bluetooth is not switched on, tap the Bluetooth check box to switch it on.
3. Tap the Discoverable check box.
4. On the sending device, send one or more files to your phone. Refer to the documentation for instructions on sending information over Bluetooth.
5. If prompted, enter the same passcode on both your phone and the other device, or confirm the auto-generated passcode. A Bluetooth authorization request is displayed on your phone.
6. If you want to automatically receive files from the sending device in future, select the Always trust device check box.
7. Tap OK.
8. When your phone receives a file transfer request notification, slide down the notifications panel, and then tap Accept.
9. When a file is transferred, a notification is displayed. To open the file immediately, slide down the notifications panel, and then tap the relevant notification.

When you open a received file, what happens next depends on the file type:

- Media files and documents are usually opened directly in a compatible application. For example, if you open a music track, it starts playing in the Music application.
- For a vCalendar file, select the calendar where you want to save the event, and then tap Import. The vCalendar is added to your Calendar events. For information on using Calendar, see the Calendar chapter.
- For a vCard contact file, if there are multiple vCard files on your storage card, you can choose to import one, several, or all of those contacts to your contacts list.

Adding the Bluetooth received folder to the Home screen

You can add a folder to the Home screen that shows all files you have received with Bluetooth.

1. Press HOME, and then tap ▮.
2. On the Add to Home screen, tap Folder > Bluetooth received.
3. Press and hold the Bluetooth received folder icon, and drag it to the Home screen position you want.

To view the folder contents, tap the folder icon. To open a file, tap the file name.

Camera

Camera basics

Whether traveling for business or fun, enjoy taking photos and videos of your trip and encounters with your phone's camera.

Be sure to plug in your microSD card before you use your phone's camera. Photos and videos captured with the camera will be stored onto your microSD card.

If you have not yet inserted your microSD card to your phone, follow the steps in "Inserting the storage card" in the Basics chapter to insert it.

- To open the camera in photo mode and take photos, press HOME and then tap Camera.
- To open the camera directly in video mode so you can immediately start capturing videos, press HOME, tap ▮, and then tap Camcorder.

Viewfinder screen

The camera displays in landscape view only. You'll find the following controls on the Viewfinder screen:

1 ▮ Menu tab

Tap to open the menu panel and change camera settings.
See "Changing camera settings" for details.

2 ▮ View button

Tap to open the Photos application so you can browse through and view the photos and videos in your storage card.
See the Photos chapter for details.

3 ▮ Auto-focus indicator

Whenever you point the camera at a different subject or location, the screen shows the auto-focus indicator at the center as the camera automatically focuses on the center of the screen.

When you tap another area on the screen, the indicator will move to where you tapped and the camera will automatically focus on that area.

4 ▮ Zoom button

Tap to display or hide the onscreen zoom bar.

See "Zooming" for details.

5 🔆 Flash button

Tap to switch between the different camera flash modes

Using the optical trackball as the shutter release

The optical trackball works as the shutter release for the camera. Press the optical trackball to take a photo or begin capturing video. Press it again to stop capturing video.

Review screen

After capturing a photo or video, the Review screen will display the photo or the starting image of the video that you have just captured. You can tap the onscreen buttons to delete the photo or video, view it in the Photos application, or share it.

🔙 Back

Return to the Viewfinder screen.

🗑 Delete

Delete the captured image or video.

📤 Share

Send the captured photo or video to another phone or your computer using Bluetooth, send it by email, or select a social network where you want to upload it to.

▶ View

Open and use the Photos application to view the captured photo or video, rotate your captured photo, and more. See the Photos chapter for details.

15.2 Zooming

Before taking a photo or video, you can first use the onscreen zoom bar to zoom in or out of your subject.

1. To display the onscreen zoom bar, tap the Zoom button 🔍. You can also slide your finger up or down the Viewfinder screen.

   While the zoom bar is shown on the Viewfinder screen, you will also see the remaining photo shots or remaining video recording duration on the upper-right side of the screen.

2. You can do the following:
   - To slowly zoom in or out, slide your finger up or down the Viewfinder screen. You can also drag your finger across the zoom bar.
   - Tap 🔍 to zoom in to the highest magnification.
   - Tap 🔍 to zoom out to the actual size.

3. After you're done, wait for a few seconds for the zoom bar to automatically disappear.

---

from the screen. You can also tap the Zoom button again or tap the Viewfinder screen to hide it.

Taking a photo

1. Press HOME and then tap Camera.
2. Before taking the photo, you can zoom in first on your subject. See "Zooming" to find out how to use the onscreen zoom bar.
3. On the Viewfinder screen, tap the Flash button repeatedly to select a camera flash mode depending on your lighting conditions:
   - Flash on
   - Flash off
4. Frame your subject on the Viewfinder screen.
5. Let the camera auto focus on the center of the screen, or you can touch another area on the screen that you want to focus on.
6. Press the optical trackball to take the photo.
7. Choose what you want to do with the photo you've just taken. See "Review screen" for details.

┌───┐
Camera flash doesn't turn on?

Using the flash eats up much battery power. To save battery power, the camera disables the flash (even when you have set the camera flash mode to Auto flash or Flash on) when one of the following occurs:

You have an incoming call
The flash will be disabled temporarily when you have an incoming call. After the call ends, you'll be able to use the flash again.
If you have set the flash mode to Flash on, it turns back on after you answer and end the call.

Your phone's battery level reaches 15% or lower
Recharge the battery so that the camera can have enough battery power to use the flash.
Cold weather may lower battery performance which affects the flash
To make sure the camera has enough battery life to power up the flash, keep your phone warm. When not in use, put the phone inside your jacket to keep it warm, and try to avoid sudden temperature changes that may affect battery performance.
└───┘

Face detection

When you're auto focusing the phone's camera to take photos of people, the camera can automatically recognize faces and adjust the focus.

Face detection does not work in video mode.

15.4 Capturing a video

1. Press HOME, tap [ ], and then tap Camcorder.
2. Before capturing video, you can zoom in first on your subject. See "Zooming" to find out how to use the onscreen zoom bar.
3. Frame your subject on the screen.
4. Let the camera auto focus on the center of the screen, or you can touch another area on the screen that you want to focus on.
5. Press the optical trackball to start capturing video.

6. To stop capturing, press the optical trackball again.
7. Choose what you want to do with the video you've just captured. See "Review screen" for details.

15.5 Camera settings

Open the menu panel to change basic camera settings and access more camera settings. You can also switch between photo and video modes from the menu panel.

Changing basic settings

1. On the Viewfinder screen, tap [ ] to open the menu panel.

110

2. To change basic camera settings, tap one of these icons in the menu panel:

[ ] Exposure

There's a Brightness bar that allows you to adjust the brightness level. Slide your finger up or down the Brightness bar to increase or decrease brightness.

[ ] Image properties

Slide your finger across each of the slider bars to adjust the contrast, saturation, and sharpness.

[ ] Effect

You can apply a special effect to photos and videos that you will capture. Scroll through the Effect menu and choose from effects such as sepia, solarize, posterize, and more.

Changing advanced settings

1. On the Viewfinder screen, tap [ ] to open the menu panel.

2. Tap [ ] in the menu panel to display the Settings menu and access more camera settings. The following are settings that you can change from the Settings menu:

White balance

White balance enables the camera to capture colors more accurately by adjusting to your current lighting environment. White balance settings include: Auto, Incandescent, Fluorescent, Daylight, and Cloudy.

ISO (photo mode only)

You can choose an ISO level or set it back to Auto. Higher ISO numbers are better for taking pictures in low light conditions.

Resolution

Select a photo or video resolution to use for capturing.

Widescreen (photo mode only)

When this check box is selected (default), photo resolutions available for selection are in 5:3 ratio and you can use the entire Viewfinder screen to frame your subject. When not selected, photo resolutions available for selection are in standard 4:3 ratio.

Quality (photo mode only)

Select the quality level to use for capturing photos.

Self-timer (photo mode only)

If you need to take a self-portrait or group photo, you can set the self-timer to either 2 or 10 seconds.

Geo-tag photos (photo mode only)

Select this check box when you want to store GPS location in your captured photos.

Encoding type (video mode only)

Choose the type of compression to use when capturing video.

Recording length (video mode only)

Set the maximum duration or file size for capturing video.

Record with audio (video mode only)

111

Select or clear the check box, depending on whether you want to record audio when capturing videos.

Metering mode

Set how the camera measures the amount of light to calculate the best exposure:

- Spot metering mode allows the camera to measure light around the focus point.
- Center area mode allows the camera to measure light in the center.
- Average mode allows the camera to measure light in the whole image.

Review duration

Set the time for a captured photo or video to be displayed on the Review screen before the camera changes back to the Viewfinder screen.

Flicker adjustment

When taking indoor shots under fluorescent lighting, keep this setting on Auto or change it to the proper frequency (50Hz or 60Hz) of the power in your country to reduce flicker.

Auto Focus

This option enables or disables centered auto focus. Auto focus is enabled by default.

Face detection (photo mode only)

This option allows the camera to recognize faces and automatically adjust the focus. Face detection will be turned off if you disable Auto Focus.

Shutter sound

Select or clear this check box, depending on whether you want the camera to play a shutter sound when you press the shutter release.

Time stamp (photo mode only)

Select this check box when you want the date and time to be added on captured photos.

Grid (photo mode only)

Select this check box when you want to display a grid on the Viewfinder screen so you can easily frame and center your subject before taking the photo.

Reset to default

Tap to change the camera back to default settings.

Photos

About the Photos application

Using the Photos application, you can view photos and watch videos that you've taken with your phone's camera, downloaded, or copied onto your storage card. You can also take a look at your photos and your friends' photos that are on your social networks (Facebook and Flickr only).

For photos that are in your storage card, you can do basic editing such as rotate and crop. You can also easily make a photo as your contact picture or wallpaper and share photos to your friends.

Selecting an album

To open the Photos application, press HOME, tap [ ], and then tap Photos.

The Photos application opens in the Albums screen where your photos and videos are organized by albums for easy viewing.

The following are preset albums:

- Camera shots lets you view photos and videos that are stored in the camera's folder.
- Photos and videos that you set as your favorites will be grouped under My favorites.
- All photos lets you view all photos that are stored in all the folders on the storage card.
- All videos lets you view all videos that are stored in all the folders on the storage card.
- All downloads lets you view photos and videos that you downloaded.

Folders in your storage card that contain photos and videos will also be treated as albums and will be listed below the preset albums. The actual folder names will be used as the album names.

Simply tap an album to view the photos and/or videos in that album.

If there are photos or videos under the root path of your storage card (that are not contained in folders), they will be grouped under the Other album.

After selecting an album from the Photos application's Albums screen, you can browse through the photos and videos of that album either in filmstrip or grid view. Tap a photo or video to view it in full screen.

Browsing in filmstrip or grid view

By default, photos and videos are presented in a horizontal filmstrip. Slide your finger left or right across the filmstrip to go through the photos and videos.

From the filmstrip view, press MENU and then tap Grid view to browse photos and videos by thumbnails. Slide your finger up or down to scroll through the thumbnails.

To change back to displaying photos and videos in a filmstrip, press MENU and then tap Filmstrip view.

Q
- Whether you're in filmstrip or grid view, you can press and hold a photo or video to open a selection menu and choose what to do with the photo or video.
- If you want to select another album, tap ▦ to return to the Photos application's Albums screen.

Viewing a photo in landscape orientation

Turn your phone sideways to the left to view the picture in landscape mode. The picture orientation automatically adjusts to how you hold the phone.

Zooming in or out on a photo

There are two ways you can zoom in or out of a photo:

- Tap the screen twice quickly to zoom in, then tap the screen twice quickly again to zoom out.
- You can also use pinch zooming. Press your thumb and index finger on the screen and then spread your fingers apart to zoom in. Pinch your fingers together to zoom out.

Zooming in   Zooming out

Watching video

The screen automatically switches to landscape mode when you play a video. Use the onscreen controls to play, pause, or stop the video.

The video is displayed in full screen size. You can tap ▣ to make it best fit on the screen based on the video size. Tap the button again to change back to full screen size.

Viewing photos in your social networks

Using the Photos application, you can view your photos and your friends' photos that are in your social networks (Facebook and Flickr only).

Viewing photos on Facebook

You need to be logged in to your Facebook account to view Facebook photos.

1. Press HOME, tap ▦, and then tap Photos.
2. Tap the Facebook tab.
3. Tap your account name or your friend's account on the list to view the pictures in the account.

You can view photos in your online albums the same way as how you view photos in your storage card.

Viewing photos on Flickr

You need to be logged in to your Flickr account to view Flickr photos.

1. Press HOME, tap , and then tap Photos.

2. Tap the Flickr tab.

   You may be asked to give authorization for the application to connect to the Flickr website. If this happens, you need to give authorization to access your Flickr account.

3. Tap your account name or your friend's account on the list to view the photos in the account.

You can view photos in your online albums the same way as how you view photos in your storage card.

16.5 Working with photos

Whether you're browsing photos in filmstrip or grid view in the Photos application, you can press and hold on a photo to open a selection menu and choose what to do with it. You can choose to delete the photo, rotate or crop it, and more.

Rotating and saving a photo

1. Press HOME, tap , and then tap Photos.

2. From the Photos application's Albums screen, tap an album.

3. Choose whether to browse photos and videos in the album in filmstrip or grid view. See "Browsing in filmstrip or grid view" for details.

4. Press and hold on the photo that you want to rotate.

5. In the menu that opens, tap Rotate, and then select either Rotate left or Rotate right.

You can also rotate a photo while you're viewing it in full screen. Press MENU, tap Rotate, and then select either Rotate left or Rotate right.

Cropping a photo

1. Press HOME, tap , and then tap Photos.

2. From the Photos application's Albums screen, tap an album.

3. Choose whether to browse photos and videos in the album in filmstrip or grid view. See "Browsing in filmstrip or grid view" for details.

4. Press and hold on the photo that you want to crop.

5. In the menu that opens, tap Crop. A crop box then appears on the photo.

6. To adjust the crop box size, press and hold the edge of the box. When directional arrows appear, drag your finger inward or outward to resize the crop box.

7. To move the crop box to the part of the photo that you want to crop, drag the crop box to the desired position.

---

8. Tap Save to apply the changes to the picture.

The cropped picture is saved in the storage card as a copy. The original picture remains unedited.

You can also crop a photo while you're viewing it in full screen. Press MENU, tap More > Crop, and follow the same cropping steps as above.

Sharing

Using the Photos application, you can send photos and videos via email or MMS. You can share photos on your social networks (such as Facebook, Flickr, Picasa, and Twitter) and share videos on YouTube. You can also send them to another phone or your computer using Bluetooth.

Sending photos or videos by email

You can send several photos, videos, or both in an email message. They are added as file attachments in your email.

1. Press HOME, tap , and then tap Photos.

2. Tap the album where the photos or videos you want to share are in.

3. Tap and then on the Share options menu, tap Gmail or Mail.

4. Select the photos or videos you want to share and then tap Next.

5. Compose your message and then tap Send.

If you selected Mail and you have multiple email accounts, the default email account will be used.

Sending a photo or video by MMS

Although you can send several photos or videos in a multimedia message, it may be better to just send one at a time, especially if the files are big in size.

1. Press HOME, tap , and then tap Photos.

2. Tap the album where the photo or video you want to share is in.

3. Tap and then on the Share options menu, tap Messages.

4. Tap the photo or video you want to send.

5. The photo or video is automatically added into the MMS message.

6. Compose your message and then tap Send.

Sending photos or videos using Bluetooth

You can select several photos, videos, or both and send them to someone's phone or your computer using Bluetooth.

1. Press HOME, tap , and then tap Photos.

2. Tap the album where the photos or videos you want to share are in.

3. Tap and then on the Share options menu, tap Bluetooth.

4. Select the photos or videos you want to share and then tap Next.

5. In the next few steps, you'll be asked to turn on Bluetooth on your phone and

connect to the receiving Bluetooth device so the files can be sent. Follow the steps in "Sending information from your phone to another device" in the Bluetooth section.

Sharing photos on Facebook

You need to be logged in to your Facebook account to be able to upload pictures.

1. Press HOME, tap , and then tap Photos.

2. Tap the album where the photos you want to share are in.

3. Tap and then on the Share options menu, tap Facebook for HTC Sense.

4. Select the pictures you want to share and then tap Next.

5. Select which album to upload and to set privacy settings for the uploaded pictures. Tap Done.

Sharing photos on Flickr

You need to be logged in to your Flickr account to be able to upload pictures.

1. Press HOME, tap , and then tap Photos.

2. Tap the album where the photos you want to share are in.

3. Tap and then on the Share options menu, tap Flickr.

4. Select the pictures you want to share and then tap Next.

5. Select which album to upload and to set privacy settings for the uploaded pictures. Tap Done.

Sharing photos on Picasa

You need to be signed in to a Google Account to be able to upload pictures to the Picasa™ photo organizing service.

1. Press HOME, tap , and then tap Photos.

2. Tap the album where the photos you want to share are in.

3. Tap and then on the Share options menu, tap Picasa.

4. Select the pictures you want to share and then tap Next.

5. Select the online album where you want to upload the pictures, or tap to create a new album.

6. Tap Upload. You can view the photos online at http://picasaweb.google.com.

Sharing videos on YouTube

You can share your videos by uploading them to YouTube™. Before you do this, you must create a YouTube account and sign in to that account on your phone.

1. Press HOME, tap , and then tap Photos.

2. Tap the album where the videos you want to share are in.

3. Tap and then on the Share options menu, tap YouTube.

4. Select the videos you want to share and then tap Next.

5. Enter the prompted information, such as description and tags, and select a privacy option.

6. Tap Upload.

17.Music

17.1 About the Music application

Enjoy listening to songs and music on your phone using the Music application. You need to copy music files to your storage card first to use the Music application to listen to music. To find out how to copy files, see "Copying files to and from the storage card" in the Basics chapter.

17.2 Playing music

To open the Music application, press HOME, tap , and then tap Music.

The Music application opens in the Playback screen. Use the onscreen controls to control music playback, select a song to play, repeat songs, and more. On the Playback screen, you can also swipe your finger from right to left or left to right to go to the next or previous music album.

1	Tap to turn shuffle on or off. (Shuffle is off when button is gray.)
2	Press and drag your finger across the progress bar to jump to any part of the song.
3	Tap to go to the Library.
4	Tap to go to the previous song in the Now playing list.
5	Tap to play, pause, or resume playing the song.
6	Tap to go to the next song in the Now playing list.
7	Tap to toggle between showing the Now playing list and Playback screen.
8	Tap to cycle through the repeat modes: Repeat all songs, Repeat current song, and Don't repeat.

When you are playing music and the screen turns off, you can control the music playback right from the Lock screen when you "wake up" the phone by pressing POWER. If you do not see the playback controls on the Lock screen, tap anywhere on the screen to display the playback controls.

💡 ▪ Press the VOLUME UP or VOLUME DOWN button to adjust the playback volume.
   ▪ If you are using the wired headset to listen to music, press the center button to toggle between playing and pausing playback. Press the previous or next buttons to go to the previous or next song.

120

Browsing music in the Library

Tap at the bottom-left corner of the Music application's Playback screen or Now playing list to go to the Library.

In the Library, your music is organized into different categories such as Albums, Artists, Genres, Composers, and more. Select a category by tapping one of the category tabs at the bottom of the screen.

When you tap a song in a category to play it, the Now playing list is updated with the song list from your selected category.

Creating a playlist

Personalize your music experience by creating music playlists. Make a playlist containing just your favorite songs or create one to match your mood for the day. You can make as many playlists as you like.

1. Press HOME, tap , and then tap Music.

2. Tap at the bottom-left corner of the screen to go to the Library.

3. In the Library, tap or slide your finger on the bottom row to go to the Playlists category.

4. Tap Add playlist.

5. Enter a playlist name, and then tap Add songs to playlist.

6. Tap or slide your finger on the bottom row to change among the different categories. If you go to the Songs category, you can see a complete list of songs on your storage card.

7. Select the check boxes of songs you want to add to the playlist and then tap Add.

8. Tap Save.

Playing the songs in a playlist

1. In the Library, tap or slide your finger on the bottom row to go to the Playlists category.

2. Tap a playlist to open it.

3. Tap the first song or any song in the playlist.

121

When you tap a song in the list to play it, the Now playing list is updated with the list from your playlist.

Managing playlists

After creating a playlist, you can add more songs to it, rearrange their order, and more.

Adding more songs to a playlist

1. In the Library, tap or slide your finger on the bottom row to go to the Playlists category.
2. Tap a playlist to open it.
3. Press MENU and then tap Add songs.
4. Go to the Songs category or any other category.
5. Select the songs you want to add to the playlist and then tap Add.

💡 While playing back a song, press MENU and then tap Add to playlist to add the current song to a playlist.

Rearranging songs in a playlist

1. In the Library, tap or slide your finger on the bottom row to go to the Playlists category.
2. Tap a playlist to open it.
3. Press MENU and then tap Change order.
4. Press and hold ☰ at the end of the song title you want to move. When the row is highlighted, drag it to its new position, then release.
5. Tap Done.

Deleting songs from a playlist

1. In the Library, tap or slide your finger on the bottom row to go to the Playlists category.
2. Tap a playlist to open it.
3. Press MENU and then tap Remove songs.
4. Select the songs you want to delete and then tap Remove.

Deleting playlists

1. In the Library, tap or slide your finger on the bottom row to go to the Playlists category.
2. Press MENU and then tap Delete playlists.
3. Select the playlists to delete and then tap Delete.

17.5 Setting a song as ringtone

You can select a song from the Music application's Library and set it as your phone ringtone or a ringtone for a certain contact.

1. Press HOME, tap ▦, and then tap Music.
2. Tap ▦ at the bottom-left corner of the screen to go to the Library.
3. In the Library, select the song that you want to use as ringtone and then play it back.
4. On the Playback screen, press MENU and then tap Set as ringtone.

5. In the Set as ringtone options menu, tap Phone ringtone or Contact ringtone.

If you select Contact ringtone, you need to select the contacts you want to associate the song with in the next screen.

Checking if the song was added as a ringtone

1. On the Home screen, press MENU and then tap Settings.
2. On the Settings screen, tap Sound & display > Phone ringtone. The song should be in the ringtone list and selected.

Sending music using Bluetooth

You can select a song from the Music application's Library and send it to someone's phone or your computer using Bluetooth.

1. Press HOME, tap ▦, and then tap Music.
2. Tap ▦ at the bottom-left corner of the screen to go to the Library.
3. In the Library, select the song that you want to use as ringtone and then play it back.
4. On the Playback screen, press MENU and then tap Share > Bluetooth.
5. In the next few steps, you'll be asked to turn on Bluetooth on your phone and connect to the receiving Bluetooth device so the music can be sent. Follow the steps in "Sending information from your phone to another device" in the Bluetooth chapter.

About the Music widget

You can use the Music widget to play music right from your Home screen. To find out how you can add this widget to your Home screen, see "Personalizing your Home screen with widgets" in the Personalizing chapter.

18.Maps and location

18.1 Using Google Maps (available by country)

Google Maps lets you track your current location, view real-time traffic situations, and receive detailed directions to your destination. It also provides a search tool where you can locate places of interest on a vector or aerial map, or view locations at street level.

> - You need an active mobile data or Wi-Fi connection to use Google Maps.
> - The Google Maps application does not cover every country or city.

Viewing locations

Turning on location services

Before you open Google Maps and find your location or search for places of interest, you must enable location sources.

1. Press HOME > MENU and then tap Settings > Location.
2. Select Use wireless networks, Use GPS satellites, or both.

> Selecting Use GPS satellites lets you locate places of interest at street level. However, this requires a clear view of the sky and more battery power.

Finding your location

1. Press HOME, and then tap [icon] > Maps.
2. On the Google Maps screen, press MENU and then tap My Location. Your location is shown on the map as a blinking blue dot.

Moving on the map

Swipe your finger on the screen or the optical trackball to view other areas of the map.

Zooming in or out of a map

Tap [icon] to zoom in; tap [icon] to zoom out.

Getting an address and additional information for a location

Touch & hold a location on the map. A balloon opens over the location, with the address and a thumbnail from street view (if available). Tap the balloon to see more information or to get directions to that location.

Looking at a location in Street View

124

Street View mode (available only in selected areas) provides a street-level view of the location.

1. Do one of the following:
   - Touch and hold a location on the map, and then tap the balloon that appears.
   - Search for the place you want to view. See "Searching for a location" in this chapter for details. When you find the place, tap its balloon.
2. On the location details screen, tap Street view.
3. To navigate in Street View, do any of the following:
   - Swipe your finger on the screen or the optical trackball to pan up or down or to look in other directions.
   - Tap the displayed arrows to move up and down the street.
   - Press MENU to select from other navigation options.

> While viewing a Street View of a location, press MENU and then tap Compass mode to turn Compass mode on. Tilt, pan, or turn your phone to view the area around the selected location.

Clearing the map

After you get directions or search on a map (as described in the other parts of this section), you can clear away the various markers such activities draw on the map.

When viewing a map, press MENU and then touch More > Clear map.

Viewing map layers

Initially, Google Maps opens with a street map. You can view additional map layers, such as satellite images, traffic information, your Google Latitude friends' locations, and Wikipedia information on locations. You can also view maps that you and other people have created in Google Maps on the web.

> - Multiple layers can be viewed at the same time.
> - Not all locations have information to support all Map layers or all zoom levels. To learn more about layers, visit Google Maps on the web: http://maps.google.com/

1. While viewing a map, press MENU, and then tap Layers.
2. Select any of the following.
   - **Traffic** (available only in selected areas). Real-time traffic conditions are displayed over roads as color-coded lines. Each color represents how fast the traffic is moving.

   - **Satellite**. Google Maps uses the same satellite data as Google Earth™. Satellite images are not real-time. Google Earth acquires the best imagery available, most

125

of which is approximately one to three years old.

- **Latitude**. When you have joined Latitude, you can view your friends' locations as a layer on the map. For information, see "Finding your friends with Latitude (available by country)" in this chapter.
- To select more layers such as transit lines or maps that you have created on Google Maps on the web, tap More layers.
- To clear layers and view only the street map, tap Clear map.

Searching for a location

1. While viewing a map, press SEARCH.
2. Enter the place you want to search in the search box. You can enter an address, city, or type of business or establishment (for example, museums in london).

As you enter information, a list of all the places which you have searched or seen before appears on the screen. You can also tap an address on the menu to show its location on the map.

3. Tap ⬛. The search results are displayed on the map.

1 Tap to show the search results as a list.
2 Tap to go to the previous or next search item on the map if there are multiple search results.

4. Tap the balloon to show the Address, Details (if available), and Reviews (if available) for the search item.

126

Getting directions

Use Google Maps to get detailed directions to your destination.

1. While viewing a map, press MENU and then tap Directions.
2. Enter the starting point in the first text box, then enter your destination in the second text box. By default, your current location is entered in the Starting point box.
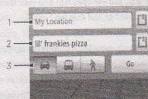

1 Starting point.
2 Destination.
3 Choose how you want to get to your destination

You can also tap ▦ to open the location source menu and select a starting point and destination address.

3. Tap the icon for car, public transit, or walking directions.
4. Tap Go. The directions to your destination appear in a list. Tap a direction instruction on the list to show the map.
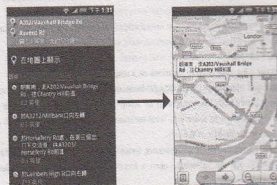

When you are finished viewing or following the directions, press MENU and then tap More > Clear map to reset the map. Your destination is automatically saved in the Google Maps history.

Finding your friends with Google Latitude (available by country)

Google Latitude™ user location service lets you and your friends share locations and status messages with each other. It also lets you send instant messages and emails, make phone calls, and get directions to your friends' locations.

Your location is not shared automatically. You must join Latitude, and then invite your friends to view your location or accept their invitations.

Joining Latitude

127

1. While viewing a map, press MENU and then tap Join Latitude.
2. Read the privacy policy. If you agree with it, tap Agree & share.

After you join Latitude, you can start sharing your locations with your friends. Only friends that you have explicitly invited or accepted can see your location.

Opening Latitude

After you join Latitude, you can open it to find your friends and view their updates. When viewing a map, press MENU, and then tap Latitude.

Inviting friends to share their locations

1. While viewing a map, press MENU, and then tap Latitude.
2. In Latitude, press MENU, and then tap Add friends.
3. Choose how to add friends:
   - Select from Contacts. Select any number of friends from your Contacts.
   - Add via email address. Enter an email address.
4. Tap Add friends.
5. If prompted, tap Yes.

If your friends already use Latitude, they receive an email request and a notification on Latitude. If they have not yet joined Latitude, they receive an email request inviting them to sign in to Latitude with their Google Account.

Responding to an invitation

When you get a sharing request from a friend, you can:
   - Accept and share back. You and your friend can see each other's locations.
   - Accept, but hide my location. You can see your friend's location, but they can't see yours.
   - Don't accept. No location information is shared between you and your friend.

Viewing your friends' locations

You can view your friends' locations on a map or in a list.

When you open Maps, your friends' locations are shown. Each friend is represented by their picture (from Contacts) with an arrow pointing to their approximate location. If a friend has chosen to share city-level locations, their picture does not have an arrow and appears in the middle of the city.

To see a friend's profile and connect, touch the photo. Your friend's name appears in a balloon. Touch the balloon to open a screen with details about your friend and many connection options.

When you open Latitude you see a list of your Latitude friends, with a summary of their last known locations, status, and so on. Touch a friend in the list to open a screen with details about the friend and many connection options.

Connecting with and managing friends

Tap a friend's contact details balloon in map view or tap a friend in list view to open the friend's profile. In the profile screen, you can communicate with your friend and set privacy options.

Show on map

Shows the friend's location on the map.

Chat using Google Talk

Opens a Google Talk chat window with that friend.

Send email

Opens Gmail with a message addressed to the friend.

Get directions

Gets directions to the friend's location.

Sharing options

Select from the following:
   - Best available location. Share your precise location information.
   - Share only city level location. Share only the city you are in, not the street-level location. Your friend can see your photo icon in the middle of the city you are in. To share more precise location again, tap Best available location.
   - Hide from this friend. Stop sharing your location with this friend, in a list or on a map.

Remove this friend

Remove the friend from your list and stop sharing locations with him or her altogether.

Changing privacy settings

You have control over how and when you can be found by your friends. Only the last location sent to Latitude is stored with your Google Account. If you turn off Latitude or are hiding, no location is stored.

1. In Google Maps, press MENU, and then tap Latitude.
2. Tap your own name, and then tap Edit privacy settings.
3. Set the following options to your preferences:

Detect your location

Let Latitude detect and update your location as you move. The update frequency is determined by several factors, such as how recently your location has changed.

Set your location

Choose from several options to manually select your location.

Hide your location

Hide your location from all your friends.

Turn off Latitude

Disable Latitude and stop sharing your location or status. You can always join Latitude again.

19. More apps

19.1 Watching videos on YouTube

YouTube is an online video streaming service that allows you to view videos that have been uploaded by YouTube members.

Press HOME, and then tap [ ] > YouTube. YouTube presents the videos grouped into categories, such as Most viewed, Most discussed, Most recent, and Top rated.

- You do not need a YouTube account to browse and view videos. However, to use all the features of YouTube (such as sharing a video), you must create a YouTube account from your computer and sign in to that account from your phone.
- You must have an active Wi-Fi or data connection to access YouTube.

Watching videos

1. Press HOME, and then tap [ ] > YouTube.
2. On the YouTube screen, scroll through the list of videos, and then tap a video to watch it. The screen automatically switches to landscape view when you play a video.
3. While watching a video, you can:
   - Tap the screen to display the playback controls. When the playback controls are displayed, you can pause, skip forward or backward, or drag the slider to the point in the video you want to watch.
   - Press MENU to rank, comment on, share, flag as inappropriate, and interact with the video in other ways.
4. Press BACK to stop playback, and return to the videos list.

Searching for videos

1. Press HOME, and then tap [ ] > YouTube.
2. On the YouTube screen, press SEARCH.
3. Enter a search keyword, and then tap .
4. The number of search results appears below the status bar. Scroll through the results and tap a video to watch it.

Clearing the search history

1. Press HOME, and then tap [ ] > YouTube.
2. Press MENU and then tap Settings.
3. Tap Clear search history, and then tap OK when prompted.

Sharing a video link

You can share a video by sending its link to your contacts.

1. Press HOME, and then tap [ ] > YouTube.
2. On the YouTube screen, tap a video to watch from the available categories.
3. While watching a video, press MENU, and then tap Share.
4. Select how you want to share the video link.

Capturing a video and sharing it on YouTube

You need to be signed in to your Google Account to upload your video to YouTube.

1. Press HOME, and then tap [ ] > YouTube.
2. Tap [ ].
3. Press the optical trackball to start capturing video. When you are done capturing, press the optical trackball again. Tap Done.
4. Enter a title, description, and tags for your video.
5. Set the privacy level.
6. Tap Upload.

19.2 Viewing documents, presentations, and spreadsheets

Quickoffice lets you view Microsoft Office Word, Microsoft Office Excel, and Microsoft PowerPoint files on your phone. Quickoffice supports viewing of Microsoft Office 2003 and 2007 Word (.doc), Excel (.xls), PowerPoint (.ppt) and text (.txt) files.

Make sure you have copied the files to the phone's storage card before you open Quickoffice. See "Copying files to and from the storage card" in the Basics chapter to learn how to copy files to the storage card.

1. Press HOME, and then tap [ ] > Quickoffice.
2. On the Open file screen, tap the file you want to open.

In the Open file screen, press MENU and then tap Sort to let you sort the list by Name or Date.

3. Slide your finger on the screen to pan or go through the pages of the file.
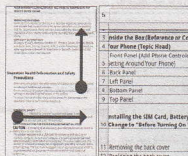

4. While viewing a file, you can:
   - Pinch the screen to zoom in or out or use the zoom controls on the screen to zoom in or out.
   - For Excel files, press MENU, and then tap Worksheet to view other worksheets on the file.
   - For Word and PowerPoint files, tap a URL link to open the web page in the web browser.

- When you open Word documents, Quickoffice reformats the text to make it the width of the screen. Double-tap the screen to switch to normal view so you can view the page layout.

Quickoffice does not reflow text in tables.

- When you view PowerPoint files, after you zoom in on a slide, you can double-tap the screen to zoom out automatically and fit the slide to the width of the screen.

19.3 Keeping track of your stocks

Use Stocks to get the latest stock updates for stock quotes and market indices you follow.

| 1 List of your stock quotes and stock market indices. Tap an item to view its intraday chart and other details. |
| --- |
| 2 Tap to update the stock information. |
| 3 Tap to add a stock quote or stock market index. |
| 4 Shows the time the information was last updated. |

Adding a stock quote or stock market index

1. Press HOME, and then tap [icon] > Stocks.

2. On the Stocks screen, tap [icon] at the bottom-right corner of the screen.

If there are no stock quotes or indices onscreen, tap Tap here to add a stock or index at the top of the screen.

3. Enter the stock quote or stock market index on the text field, and then tap .

4. On the results list, tap the stock quote or stock market index you want to add.

Changing the stock list order

1. Press HOME, and then tap [icon] > Stocks.

2. Press MENU, and then tap Rearrange.

3. Press and hold [icon] at the end of the item you want to move. When the row is highlighted in green, drag it to its new position, and then release.

132

4. Tap Done.

Deleting stock quotes and indices

1. Press HOME, and then tap [icon] > Stocks.

2. Press MENU, and then tap Delete.

3. Select the items you want to delete and then tap Delete.

Setting stock information update frequency

1. Press HOME, and then tap [icon] > Stocks.

2. Press MENU, and then tap Settings.

3. Select the Auto-sync data check box.

Downloading stock information automatically may incur additional fees from your mobile operator.

4. Tap Set download frequency, and then select frequency to check for updates.

Manually updating stock information

1. Press HOME, and then tap [icon] > Stocks.

2. Press MENU, and then tap Update.

Adding the Stocks widget

1. Press HOME, and then tap [icon] > Widget > Stocks.

2. Choose the widget style, and then tap Select.

3. Drag the widget to a blank space on the Home screen, and then release.

19.4 Listening to the radio

FM Radio lets you listen to FM radio stations on your phone.

You need to connect a headset first to the audio jack of your phone to use FM Radio. FM Radio uses the stereo headset as the FM radio antenna.

| 1 FM radio frequency |
| 2 Drag to tune in to a frequency on the FM band. |
| 3 Tap to fine tune the radio frequency by -0.1 MHz. |
| 4 View the All presets list. |
| 5 Tap to search the FM band for the previous FM station. |
| 6 Tap to search the FM band for the next FM station. |
| 7 Tap to change the name of the current station you are tuned into. |
| 8 Tap to fine tune the radio frequency by +0.1 MHz. |
| 9 Radio signal strength |
| 10 Turn off or on FM radio. |

Listening to an FM station

1. Press HOME, and then tap ▣ > FM Radio.

2. The first time you open FM Radio, it automatically scans for available FM stations, saves them as presets, and plays the first FM station found.

    💡 ▪ To repeat scanning and saving of FM stations, press MENU, and then tap Scan & Save.

    ▪ Press BACK to stop the auto-scan.

3. On the FM Radio screen, you can:

    ▪ Tap ▣ and then select a station you want to listen to.

    ▪ Tap ◀◀ to go to the previous available FM station, or ▶▶ to go to the next available FM station.

    ▪ Press the VOLUME UP and VOLUME DOWN buttons on the side of the phone to adjust the volume.

    ▪ Press MENU to set more FM Radio options.

Adding station names

1. Press HOME, and then tap ▣ > FM Radio.

2. Tune in to the desired FM station, and then tap ⊞.

3. Enter a station name for the selected FM station, and then tap Save.

Minimizing or turning off FM Radio

Do one of the following:

▪ Press BACK to minimize and keep FM Radio running in the background so you can listen to the radio while going to another screen.

▪ On the FM Radio screen, tap ⊙ on the upper-right corner of the FM Radio screen to turn off FM Radio.

Voice Recorder is useful for quickly recording thoughts. You can also record your voice and set it as a ringtone.

✳ You need to have a microSD card installed on your phone to use Voice Recorder.

Recording your voice

1. Press HOME, and then tap ▣ > Voice Recorder.

2. Hold the device's microphone near your mouth.

3. Tap ▣ to start recording a voice clip. Tap ▣ to stop recording.

4. Tap ▶ to play back the voice recording.

5. To quickly share the voice recording through Bluetooth, email, or message, tap ▣.

Sharing a voice clip

1. Press HOME, and then tap ▣ > Voice Recorder.

2. On the Voice Recorder screen, tap ▣.

3. On the All recording screen, press and hold the voice recording you want to share, and then tap Share on the options menu.

4. On the Share options menu, select how you want to share the voice recording.

    To learn how to send files through Bluetooth, see the Bluetooth chapter.

Setting a voice clip as a ringtone

1. Press HOME, and then tap ▣ > Voice Recorder.

2. On the Voice Recorder screen, tap ▣.

3. On the All recording screen, press and hold the voice recording you want to set as a ringtone, and then tap Set as ringtone on the options menu.

Renaming a voice clip

1. Press HOME, and then tap ▣ > Voice Recorder.

2. On the Voice Recorder screen, tap ▣.

3. On the All recording screen, press and hold the voice recording you want to rename, and then tap Rename on the options menu.

4. Enter the name, and then tap Save.

19.6 Finding and installing apps from Android Market (available by country)

Android Market™ is the place to go to find new apps for your phone. Choose from a variety of free and paid apps ranging from productivity apps, entertainment, to games. When you find an app you want, you can easily download and install it on your phone with just a few taps of your finger.

To access Android Market, you must first connect to the Internet using your phone's Wi-Fi or data connection and sign in to your Google Account.

1 Tap to search Android Market for apps to install on your phone.

2 Tap to display the available apps or games on Android Market, or display the apps that you have already downloaded and installed from Android Market.

3 Featured apps list. Tap an app to read a description about the app and user reviews.

Paid apps are currently only available in certain countries.

Finding and installing an application

When you install apps from Android Market and use them on your phone, they may require access to your personal information (such as your location, contact data, and more) or access to certain functions or settings of your phone. Download and install only apps that you trust.

1. Press HOME, and then tap [ ] > Market.

2. When you open Android Market for the first time, the Terms of Service window will appear. Tap Accept to continue.

3. To find an app in Android Market, you can:

   ▪ Browse through featured apps. Scroll through the list of featured apps when you open Android Market.

   ▪ Browse apps by categories. First, tap Apps or Games, and then tap a category. Under a category, you can filter the apps by Top paid, Top free or Just in.

   Paid apps are currently only available in certain countries.

136

   ▪ Search for an app. Tap on the Android Market home screen, enter the name or type of app you're looking for, and then tap to the right of the search box.

4. Tap an app to read a description about the app and user reviews.

5. Tap Install (for free applications) or Buy (for paid applications).

   You need a Google Checkout account to purchase items on Android Market. See "Creating a Google Checkout account" to set up a Google Checkout account if you do not have one.

6. The subsequent screen notifies you whether the app will require access to your personal information or access to certain functions or settings of your phone. If you agree to the conditions, tap OK to begin downloading and installing the app.

   If you selected a paid application, after tapping OK, you're redirected to the Google Checkout screen to pay for the application before it's downloaded to your phone.

   Read it carefully! Be especially cautious with applications that have access to many functions or a significant amount of your data. Once you tap OK on this screen, you are responsible for the results of using this item on your phone.

   After installing an app, tap [ ] on the upper-left side of the screen to return to Android Market home. You can also press MENU, and then tap Home.

Creating a Google Checkout account

You must have a Google Checkout account associated with your Google Account to purchase items from Android Market.

Do one of the following:

   ▪ On your computer, go to http://checkout.google.com to create a Google Checkout account.

   ▪ The first time you use your phone to buy an item from Android Market, you're prompted to enter your billing information to set up a Google Checkout account.

   When you've used Google Checkout once to purchase an application from Android Market, the phone remembers your password, so you don't need to enter it the next time. For this reason, you should secure your phone to prevent others from using it without your permission. See the Security chapter to learn how to secure your phone.

Requesting a refund for an application

If you are not satisfied with an application, you can ask for a refund within 24 hours of the purchase. Your credit card is not charged and the application is uninstalled from your phone.

If you change your mind, you can install the application again, but you can't request a refund a second time.

1. Press HOME, and then tap [ ] > Market > Downloads.

2. Tap the application to uninstall for a refund. The details screen for the application opens.

3. Tap Uninstall & refund. Your application is uninstalled and the charge is cancelled.

4. Choose the reason for removing the application, and then tap OK.

Opening an installed application

137

Do one of the following:

1. On the status bar, check if you see the 🔽 icon. If you see the 🔽 icon, open the Notifications Panel, and then tap the app to open it. See "Opening the Notifications panel" in the Basics chapter to learn how to open the Notifications Panel.

2. Press HOME, and then tap [icon] > Market > Downloads. On the Downloads screen, tap the app to open it.

3. Press HOME, and then tap [icon]. On the All programs screen, locate the app, and then tap it.

Uninstalling an application

You can uninstall any application that you have downloaded and installed from Android Market.

1. Press HOME, and then tap [icon] > Market > Downloads.
2. On the Downloads screen, tap the application you want to uninstall, and then tap Uninstall.
3. When prompted, tap OK to remove the application on your phone.
4. Choose the reason for removing the application, and then tap OK.

Getting help

If you ever need help or have questions about Android Market, press MENU, and then tap Help. The web browser will take you to the Android Market Help web page.

20.Security

20.1 Protecting your SIM card with a PIN

You can protect your SIM card from unauthorized use by assigning a PIN (personal identification number).

🔍 The default SIM PIN is provided by your mobile operator.

1. Press HOME > MENU, then tap Settings.
2. Scroll down the screen, tap Security > Set up SIM card lock, and then select the Lock SIM card check box.
3. Enter the default SIM card PIN, and then tap OK. To change the SIM card PIN, tap Change SIM PIN.

💡 Emergency calls can be placed at any time, without requiring a PIN. See "Making an emergency call" in the Phone calls chapter for more details.

Restoring a SIM card that has been locked out

If you enter the wrong PIN more times than the maximum number of attempts allowed, your SIM card will become "PUK-locked." You need a PUK code to restore access to the phone. This code may have been provided by your mobile operator when you received your SIM card.

1. On the phone dialer screen, enter the PUK code, and then tap Next.
2. Enter the new PIN you want to use, and then tap Next.
3. Enter the new PIN again, and then tap Next.

20.2 Protecting your phone with a screen lock

You can further secure your phone by requiring a screen unlock pattern every time your phone is turned on or every time it wakes up from sleep mode (screen is off).

1. Press HOME > MENU, and then tap Settings.
2. Scroll down the screen, and then tap Security > Set unlock pattern.
3. Read the information on the screen, and then tap Next.
4. Study the example pattern on the screen, and then tap Next.
5. Draw the screen unlock pattern by connecting at least four dots in a vertical, horizontal and/or diagonal direction. Lift your finger from the screen when finished.
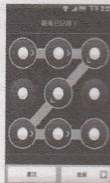

🔍 You must slide your finger on the screen to create the pattern and not tap individual dots.

6. The phone records the pattern. Tap Continue.
7. When prompted, draw the screen unlock pattern again, and then tap Confirm.

💡 Clear the Use visible pattern check box if you do not want the unlock pattern to display on the screen when you unlock it.

To change your unlock screen pattern, press HOME > MENU, and then tap Settings > Security > Change unlock pattern.

When you fail to draw the correct unlock pattern on the screen after five attempts, you will be prompted to wait for 30 seconds before you can try again. If you forgot your screen unlock pattern, tap Forgot pattern. You will be prompted to sign in using your Google Account name and password, and create a new screen unlock pattern before the Home screen displays.

You need to be connected to a data or Wi-Fi connection to be able to sign in to your Google Account.

140

21. Settings

21.1 Settings on your phone

Control and customize phone settings on the Settings screen.

To open the Settings screen, press HOME > MENU, and then tap Settings.

Personalize

Select a scene, set the Home screen or Lock screen wallpaper to use, and set the default ring tone to use for incoming calls. You can also rename or delete a custom scene by pressing and holding a custom scene in Scenes.

Wireless & networks

Configure your phone's wireless connections, such as Wi-Fi and Bluetooth, enable the Airplane mode, or set the options for mobile networks, roaming, Virtual Private Networks, and more.

Call

Set up call services such as voice mail, call forwarding, call waiting, and caller ID.

Sound & display

Set the phone and notification ring tones, automatic screen orientation, and set the screen brightness and screen timeout.

Accounts & sync

Log in or out from your social network accounts, Google Account, and Exchange ActiveSync account. You can also manage synchronization and other settings for your accounts. See the Accounts and sync chapter for details.

Location

Select the sources to use when determining your location.

Search

Select items to include when you do a search on your phone and set Google search options.

Privacy

Select whether to allow or block Google from using your location when suggesting results and for other Google services. You can also enable or disable the automatic backup feature of the phone and reset the phone. See the Backup, Update and Reset chapter for more details.

Connect to PC

Set the default USB connection type when you connect your phone to your computer. Select Ask me to always display the connection type dialog box when the device is connected.

See "Connecting your phone to a computer" in the Basics chapter for details.

Security

Set the screen unlock pattern, enable the SIM card lock, or manage the phone's credential storage. See the Security chapter for details.

Applications

Manage applications and installation of new programs.

SD card & phone storage

Check the available storage card and phone memory.

141

Date & time

Set the date and time, time zone, and date or time format. To turn off auto time synchronization and be able to manually change time zone settings, see "Setting the time zone, date, and time" in the Clock and Weather chapter.

Language & keyboard

Set the operating system language and region. You can also set onscreen keyboard options.

Accessibility

Enable or disable preset or downloaded accessibility plugins that respond to user interaction such as receiving sound feedback when a new browser window is opened.

Text-to-speech

If you have installed a text-to-speech (voice data) application, use this option to configure the text-to-speech settings.

About phone

Set the system software update method and view the phone status such as the network type, signal strength, battery power level, and network name. You can also check the battery use of individual applications or view the legal information and software version of your phone. See "Checking information about your phone" in this chapter for details.

21.2 Changing display settings

Adjusting the screen brightness manually

1. Press HOME > MENU, and then tap Settings > Sound & display.
2. Scroll down the screen, and then tap Brightness.
3. Clear the Automatic brightness check box.
4. Drag the brightness slider to the left to decrease or to the right to increase the screen brightness. Tap OK.

Adjusting the time before the screen turns off

After a period of inactivity, the phone screen turns off to conserve battery power. You can set the idle time before the screen turns off.

1. Press HOME > MENU, then tap Settings > Sound & display.
2. Scroll down the screen, and then tap Screen timeout.
3. Tap the time before the screen turns off.

💡 To quickly turn off the screen, press the POWER button.

Preventing automatic screen rotation

By default, the screen orientation automatically adjusts depending on how you hold the phone.

🔍 Not all application screens support automatic rotation.

1. Press HOME > MENU, then tap Settings > Sound & display.
2. Scroll down the screen, and then clear the Orientation check box.

Recalibrating the G-sensor

Recalibrate the screen if you feel that the screen orientation does not respond properly to the way you hold the phone.

1. Press HOME > MENU, then tap Settings > Sound & display.
2. Scroll down the screen, and then tap G-Sensor calibration.
3. Place the phone on a flat and level surface, and then tap Calibrate.
4. After the recalibration process, tap OK.

Keeping the screen on while charging the phone

You can keep the phone screen from turning off while you are charging the phone.

1. Press HOME > MENU, then tap Settings.
2. Scroll down the screen, and then tap Applications > Development.
3. Select the Stay awake check box.

Switching animation effects on or off

You can turn off the animation or enable only some animations when switching between screens.

1. Press HOME > MENU, and then tap Settings > Sound & display.
2. Scroll down the screen, and then tap Animation.
3. On the options menu, select the animation setting you want.

21.3 Changing sound settings

Setting a sound profile

Switch to vibrate or silent mode, or use the normal phone sound settings.

1. Press HOME > MENU, and then tap Settings > Sound & display > Sound Profile.
2. In the Choose a Profile options menu, tap the sound profile you want to use.

Enabling or disabling touch tones

You can choose to play a sound when you are selecting items onscreen.

1. Press HOME > MENU, and then tap Settings > Sound & display.
2. Scroll down the screen, and then select or clear the Audible selection check box.

Choosing the notification sound

You can select the sound to play when your phone receives new notifications.

1. Press HOME > MENU, and then tap Settings > Sound & display > Notification sound.
2. Select your preferred notification sound in the list, and then tap OK.

21.4 Changing the phone language

When you turn your phone on for the first time, you are prompted to select the language you would like to use. You can also change the language on the fly whenever you like. Changing the language adjusts the keyboard layout, date and time formatting, and more. The languages available to choose from may depend on the version of phone you have.

1. Press HOME > MENU, and then tap Settings > Language & keyboard > Select locale.
2. Tap the language and corresponding region you want to use.
3. Press HOME to return to the Home screen. You may need to wait briefly as the new language is applied to your phone.

21.5 Optimizing your phone's battery life

When you're on the go, it's not always easy to charge your phone's battery as often as you'd like. Follow these tips to extend the time between charges:

Turn off wireless functions such as Bluetooth, Wi-Fi, and data connection when you're not using them. See the Internet and Bluetooth chapters for details.

- Use only GSM networks. See "Using the GSM network of your mobile operator" in this chapter for details
- Do not use GPS satellites to determine your GPS location. See the Maps & Location chapter for details.
- Lower the screen brightness. See "Adjusting the screen brightness manually" in this chapter for details
- Switch off screen animations. See "Switching animation effects on or off" in this chapter for details
- Cut down on activities such as Internet browsing. Wireless data consumes a lot of power.
- Avoid making very long phone calls or using the camera for extended periods of time.
- Consider carrying a spare battery for times when you can't charge your battery for an extended period.
- Batteries gradually lose storage capacity over time. Consider replacing your battery after eight months to a year, or if you notice that the battery life is decreasing.

Using the GSM network of your mobile operator

Switch to using the GSM network of your mobile operator if you are not using a data connection to connect to the Internet. Connecting to your mobile operator's GSM network consumes less battery power.

1. Press HOME > MENU, and then tap Settings > Wireless & networks.
2. Scroll down the screen, and then tap Mobile networks > Network mode.
3. Tap GSM only.

Checking the power usage of applications

1. Press HOME > MENU, and then tap Settings.
2. Scroll down the screen, and then tap About phone > Battery > Battery use.

21.6 Managing memory

Checking how much phone memory is available for use

1. Press HOME > MENU, and then tap Settings.
2. Scroll down the screen, and then tap SD card & phone storage. The available phone memory is displayed in the Internal phone storage section.

Checking the available storage card space

1. Press HOME > MENU, and then tap Settings.
2. Scroll down the screen, and then tap SD card & phone storage. The total and available storage card space is displayed in the SD card section.

Clearing application cache and data

1. Press HOME > MENU, and then tap Settings.
2. Scroll down the screen, and then tap Applications > Manage applications.

3. On the Manage applications screen, tap the application whose cache and/or data you want to delete.

> ⚘ Press MENU to bring up sort and filter options.

4. In the Application info screen, tap Clear data and/or Clear cache.

Uninstalling third-party applications

You cannot uninstall applications that are preinstalled on the phone.

1. Press HOME > MENU, and then tap Settings.
2. Scroll down the screen, and then tap Applications > Manage applications.
3. Press MENU, and then tap Filter > Downloaded.
4. On the Manage applications screen, tap the application you want to uninstall.
5. On the Application info screen, tap Uninstall.

Freeing up more phone memory or storage card space

If your phone is running low on memory, try the following:

- In your web browser, clear all temporary Internet files and history information. See the Internet chapter for more information.
- Uninstall downloaded programs from Android Market you no longer use. See "Finding and Installing Apps from Android Market " in the More apps chapter for details.

21.7 Checking information about your phone

1. Press HOME > MENU, and then tap Settings.
2. Scroll down the screen, and then tap About phone.
3. Select one of the following:

System software updates

Enable or disable the automatic check feature for software updates for your phone. You can also tap Check now to manually check for software updates.

Network

Check information about your mobile operator and its service status.

Phone identity

Check information about your phone and the SIM card you are using.

Battery

Check information about the battery such as its current battery level, status, and what programs are using the battery.

Hardware information

Check the Wi-Fi MAC and Bluetooth addresses.

Software information

Check the version and other information about the Android platform being used by the phone. You can also check the version of the web browser.

22.Backup, update and reset

22.1 Backing up phone data

Your phone features an automatic backup system that backs up your web browser bookmarks, messages, dictionary, and settings, to the microSD card. The phone automatically backs up the data whenever a change occurs.

The phone backs up the following data:

- SMS and MMS messages
- Messages application settings
- Web browser (the Internet application) bookmarks
- Keyboard dictionary
- Settings
  - Wireless & networks
  - Sound & display
  - Location
  - Applications
  - Date & time
  - Language & keyboard - Only Locale setting

You need a microSD card installed on your phone to back up phone data. See "Inserting the storage card" in the Basics chapter to learn how to install a microSD card to your phone.

Checking if automatic backup is enabled

1. Press HOME > MENU, and then tap Settings.
2. Scroll down the screen, and then tap Privacy > Back up my data.
3. Make sure that the Back up my data check box is selected.

Restoring backed up data to your phone

After you do a factory reset or update your phone, you will be asked if you want to restore the backed up data after you turn on your phone.

Make sure that the microSD card where you backed up the data is installed on the phone.

1. After you do a factory reset or update your phone system software, wait for the phone to restart.
2. When there is a valid back up file in the microSD card, the Restore my data and settings dialog box will appear. When you see this dialog box, tap OK.
