

Introduction

Please read this manual thoroughly and follow the procedures to prevent any damage to keyboard mouse pad with 3-Port USB 2.0 Hub and/or to the connected devices.

Thank you for purchasing the Hype Mousepad Combo with 3 Port USB 2.0 hub. The Mousepad Combo provides for downstream USB ports that are compatible with both USB 1.1 devices as well as USB 2.0 devices.

This means that the hub is backwards compatible with all current USB 1.1 devices and also works with the next generation of high speed USB 2.0 devices. This may include such peripherals as scanners, printers, mass-storage devices, and high-resolution cameras. The hub is self-powered, which allows the cascading of devices with additional hubs, so that up to 127 USB devices can be connected to a single port. For additional information, please refer to the "Technical Specifications" section.

Features

- Compliant with Universal Serial Bus specification 2.0 (data rate 1.5/12/480Mbps)
- Backward-compatible with Universal Serial Bus Specification 1.1 (data rate 1.5/12Mbps)
- Compatible with Windows® 98SE, Me, 2000, XP and Vista and 7
- Approved by USB Implementers Forum (USB-IF)
- Supports Plug-and-Play specifications
- Supports "hot swapping" of USB devices
- Per-port over-current detection and protection
- Three 480Mbps downstream ports
- Fully compatible with USB 1.1 and USB 2.0 devices

Package Contents

- (1) Keyboard mouse pad with hub
- (2) User Manual

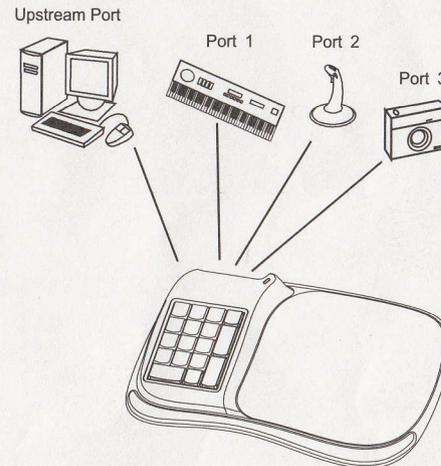

Technical Specifications

Upstream Ports:	(1)
Downstream Ports:	(3)
Per-Port Voltage:	DC+5V
Per-Port Current:	500mA (max.)
Power Mode:	Self-powered
Operation Temperature:	10°C~60°C
Storage Temperature:	0°C~90°C

Hardware Installation

1. Plug the USB connector into the downstream port of your computer, or downstream port of another hub.
Important Note: The Hub must be connected to a USB2.0-compliant host in order to function in high-speed mode (480Mbps data rate).

- If connected to a USB 1.1-compliant host, the Hub will operate only in low or full-speed mode (1.5/12Mbps).
2. Windows will now detect your Hub and install the necessary driver support. (The Windows "Install New Hardware Wizard" may prompt you to provide your Windows Installation CD to complete the driver installation process).
3. Plug the USB device, or an additional hub, into any of the downstream ports of the Hub.

Information

FCC Conformity

The hub Complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CE Conformity

The hub is in conformity with Generic Emissions Standard EN550022 1998 and with Generic Immunity Standard EN550024 1998, EN61000-3-2, and EN61000-3-3.
