Or connect the ACC power from the left

Statement: The software updates sporadically since we continuously devote to product quality improvements. When operation for the product(s) your purchased differs from that described in this manual, please follow your product(s).

2.1 Charge the battery

It comes with a built-in polymer rechargeable battery and is designed to use only manufacture-specified original batteries and accessories. When the battery is low, please charge it timely.

Charge by Charger

Plug one terminal of the charger into the power adapter socket, and the other to the power jack of the device to charge it.

2.2 Use the storage card

Insert the storage card

The storage card slot is on the panel side, just insert the TF Flash card with its gold contacts facing down and push it in until it clicks into place.

Browse files in the storage card

To browse the files in the storage card, do one of the following:

- run "File Manager" to view files in the storage card
- you can also install and run any other third party file browser applications

Remove the storage card

Simply push the storage card in to eject it from its slot.

To avoid data loss or damage, please stop using files/ programs in the storage card before remove the T-Flash card, and then tap **Settings> Storage> Unmount shared storage** to remove it safely.

[Note]:

1. Make sure the location and direction of the storage card is correct when inserting, otherwise it is easy to cause damage/destroy to the storage card.
2. To avoid incompatibility or unrecognized of the storage card, major brands of storage card are recommended.

2.3 Hot plug of storage card

Please do not hot plug the storage card when using or browsing its files.

For example, when you are running the Music/Video Player/ Gallery, the storage card may damage if you push out the storage card directly and the running program will stop automatically to protect the device. As for details of inserting/removing storage card, see 2.2 *Use the storage card*.

2.4 Memory space

The device contains 2 memory spaces: local storage & extended storage card. Local storage appears as "Local" and extended storage card as "EXTSD" in the device. The capacity of built-in flash varies from 8GB and 16GB because of different model of the PE11 series. The built-in flash capacity of your device depends on the model you purchased. PE11 series support extended storage card of capacity maximum 32GB.

2.5 Power on/off

Power on: press down the Power Button and hold for a while to turn on the device when the battery is full enough

Power off: press down the Power Button to prompt a check box, select **OK** to turn off the device

Screen Lock: press down the Power Button to shutdown the screen to save battery life. Press down the Power Button again to activate the locked Home Screen. After unlocking, the device will resume the screen before locking the screen.

2.6 Connect to wireless networks

To connect to a wireless network, you should follow:

1. tap **Settings** on the Home screen;
2. tap **Wi-Fi**;
3. select **ON**;
4. the network names and security settings of detected Wi-Fi networks are displayed in the Wi-Fi networks section;
5. tap a Wi-Fi network to connect. If you selected an open network, you will be automatically connected to the network. If you selected a network that is secured with WEP, enter the key and then tap **Connect**. Depending on the network type and its security settings, you may also need to enter more information or choose a security certificate.
6. after successful connection, the Wi-Fi connected icon will appear on the status bar.

2.7 Bluetooth headset

Bluetooth headset with Bluetooth mobile phone connection, particularly convenient for incoming and outgoing calls. Before using this function, please turn Bluetooth on. Long press the Bluetooth headset 6-8 seconds, the indicating lamp on the headset in the red and blue flashing alternately, searching through mobile phone Bluetooth, name: GPS518. password 0000 pairs can be completed using the. After use, placed in the right headphone adsorption and charge.

3. Home Screen

The Home screen is your starting point to access all the features on your device. It displays application icons, widgets, shortcuts, and other features. You can customize the Home screen with different wallpaper & widgets and display items you want. See the *Personalizing* chapter. When you sign in, the Home screen opens.

Sleep mode

Sleep mode suspends your device to a low power state while the display is off in order to save battery power. You will still be able to receive messages and calls while the device is in Sleep mode.

[Note]: If the device in sleep mode more than 30 minutes, the device will automatically turn off to save electricity.

Switch to sleep mode

Simply press down the Power Button; and the device will automatically shutdown the display screen when there is no operation on the screen for a period of time.

Wake up from sleep mode

To wake up your device manually, press the Power Button. You will then see that the device has locked the screen.

Unlocking the screen

Press the bar on the lock screen and then slide your finger upwards to unlock the screen.

Browse Home Screen

You can go to the extended Home screen by sliding your finger horizontally across the screen to go to the left or right side of the Home screen. Tap the icon  to view all applications on your device.

3.1 Status and notifications

Status and Notification Icons may appear

The status bar presents media volume, networks condition, battery condition, time and so on. When an application is running, corresponding notification icon will appear in the notification area. Icons you may often see are listed as follows:

Status icons and its meanings		Notification icons its meanings	
	Tap to go to the Home screen		New Gmail/Google Mail message
	Back		New Email message
	Recently viewed		Music player is ongoing
	Menu icon		SD card is mounted
	Notification		USB Connected
	Connected to a Wi-Fi network and display the signal strength		Airplane mode
	Battery is charging		FM is on
