User Guidance

● Multi-function key

Power on/off: hold 1 sec to turn on and 2 secs to turn off

Answer/Hang up: click once

Replay/reject: click twice

Switch: hold 1 second during phone call to switch between the earphones and smartphone as earpiece.

Reconnection: Hold 1 second when cut off to reconnect the Bluetooth earphones to a previously paired device.

● Volume keys

Volume-up: press once to increase volume by 1 level (a warning tone will be heard on the highest level). Long press to play next song.

Volume-down: press once to decrease volume by 1 level (a warning tone will be heard on the lowest level, too). Long press to play the previous song.

● LED Notification Light

Startup: on for 1 sec and then blink 2 times

Power-off: on for 1 sec and then off

Pairing: blink at a high frequency

Connected: blink 2 times and then once per 5 seconds

Charging: keep on

● Charging

This product must be charged with the originally attached charger or any charger with regular brand. Micro USB cable is employed to connect the earphones to charger or PC.

● Brief Pairing

Turn on the Bluetooth function on your mobile phone and then long-press the start-up key of the Bluetooth earphones 5 seconds until the LED notification light starts blinking. When your phone finds a device named U5, choose it, wait a few seconds for the connection, and finally you can start using the earphones. If the Bluetooth version on your phone is older than V2.1, you will be required to fill in a password for pairing, which should be "0000".

The Axgio U5 can work with 2 mobile phones at the same time. To pair them with a second phone, you should turn off the Bluetooth of the first phone as well as the earphones themselves. Then pair the earphones with the second phone following the way as introduced above. At last turn on the first phone's Bluetooth and let it connect to the earphones again. And you'll find your phone connected with two devices simultaneously.

● Smartphone Earphone App

Smartphone Earphone is an App where you can control the use of you're the Axgio U5 earphones. It also contains a feature to help track your running data with your smartphone.
