Attached accessories

- Manual • Mount • USB cable • AV cable • Reverse trigger cable
- USB Car Charger (Include the adaptor which can 12V/24V transfers to 6V)

Operate

Two power options:

(A) Use Built-in Li-Ion battery

DVR can be activated after it has been placed on the vehicle by pressing the ON/OFF power switch (5) for 2 seconds and turn off by pressing it again.

Charging: Connect with USB cable or car charger, the indicator will display red and convert to no light when it is full

Note: As the battery capacity is little and the power supply time is short, it mainly save the recording file and time after the car stops, please don't use built-in Li-Ion battery for power supply in common.

(B) Connect with USB car charger

DVR will record automatically when the car started, turn off and save the last file after the car stops.

Note: Please use the attached USB car charger to power the DVR.

Separate camera installation and use

1. Connect TV-IN for separate camera to separate camera insert slot of main device
2. The separate camera can be installed anywhere inside the car
3. Reverse function use

Put the separate camera at the end of the car, one end 2.0 DC jack of Reverse trigger cable connect with Reverse trigger Slot, the other end red cable connect positive pole of reversing light of the end of the car and black jack connect the negative pole (it is installed by specialized person). When the driver reverse, the screen display switch to the separate camera automatically and see the condition of the end of the car for reversing.

Video Mode
