PRODUCT DIAGRAM

LOADING BATTERY

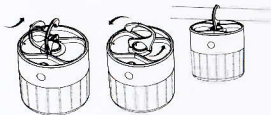

- 1  Spin the battery cover according to the "OPEN" arrow direction.
- 2  Remove the cover.
- 3  Load three C batteries.
- 4  Spin the the battery cover according to the "LOCK" direction until the cover locks.

Note: If the batteries are loaded correctly, the LED light will flash 3 times.
Please take out the batteries if you do not plan to use this product for a long time.

INSTALLATION

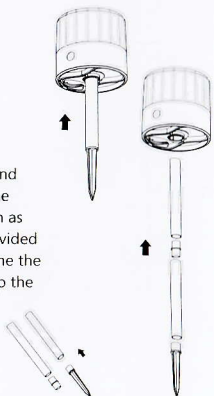

1. Indoor use:

Place the light on the flat places such as the table and book shelf, or use the hook to hang it in places such as the cabinet.

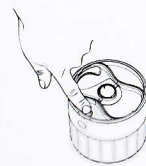

2. Outdoor use:

Insert the pole(s) to the light, and thrust the ground insert into the ground for outdoor places such as the lawn. There are 2 poles provided in the package. You can combine the 2 poles as a longer pole to keep the light at a higher height.

LIGHT MODE SELECTION

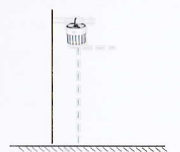

This product offers 3 modes:

- Off
- Motion detection
- Always on

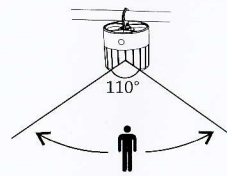

Press the button to choose the mode you desire.

Note: The light will not be turned on automatically in a bright environment (> 9 lux). In a low-light environment, the light is turned on automatically when a movement is detected, and will be turned off a short time after no movement is detected. There is a red LED indicator flickering when the product is set on the motion detection mode.

SENSOR RANGE

The optimal height to install this product:
1.6-6.6 feet (0.5-2 meters)

Radius:
26 feet (8.0 meters)

SPECIFICATIONS

Light	LED
Power	0.5 W
Luminous power	43 lm
Color	White
Waterproof	Supported
Power supply	3 x C alkaline batteries (not included)
Motion sensor detection range	~26 feet
Motion sensor detection angle	~110 degrees
Mode	Off / Motion detection / Always on
Motion and light detection mechanism	The light will not be turned on automatically in a bright environment (> 9 lux). In a low-light environment, the light is turned on automatically when a movement is detected, and will be turned off a short time after no movement is detected.
