Setting Up Your Google Account

Upon first boot-up of your device, configure your language and you're on your way.

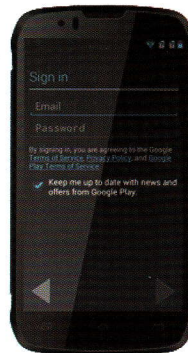

After the setting up the basics, you will automatically be prompted to set-up your Google account.

1. If you have an existing account and would like to set it up, choose Yes.

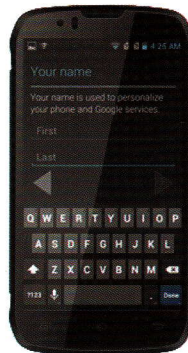

If you do not have an existing account and/or would like to make a new one, choose No.

Setting Up Your Google Account

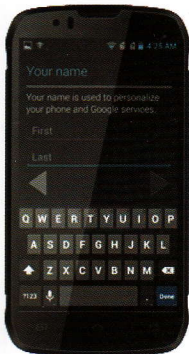

2. If you choose Yes, you will be asked to enter your e-mail address and password so you may sign-in your account.

After doing so, click on the arrow pointing to the right to proceed to the next step.

You will be asked to enter your full name to which your account and device will be associated with. After doing so, click on the arrow pointing to the right to proceed to the next step.

Setting Up Your Google Account

3. If you choose No, you will still have to enter your full name to which your account will be associated with. This also enables you to personalize your device and the Google services you subscribe to.

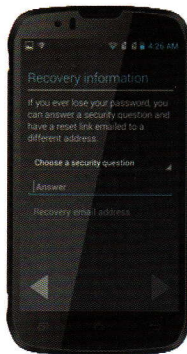

You will then be asked for the username you would like to have for your Google Account, which will also be used for your Gmail Account. After doing so, click on the arrow pointing to the right to proceed to the next step.

Setting Up Your Google Account

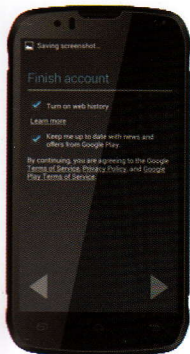

Once you have chosen your username, you will now need to create a password for your account, which should contain a minimum of 8 characters

After creating your password, you will be asked to set up your Recovery Information.

You will need to set a security question and an answer. This security question, when answered, will enable a reset link to be sent to your e-mail address, should you forget your password in the future.

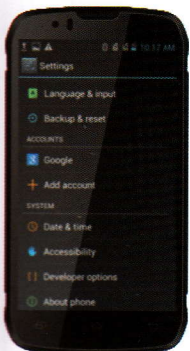

Setting Up Your Google Account

After setting your recovery information, you can now finish setting up your account

You will be asked to go through the option of subscribing to other Google services such as Google +, Google Play, etc. which you may skip and go back to by selecting Not Now.

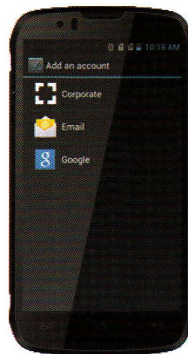

You may also choose to skip this step and set this up at a later time.

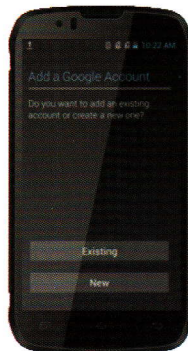

1. Go to Settings

2. Under the Account tab, tap + Add Account.

Setting Up Your Google Account

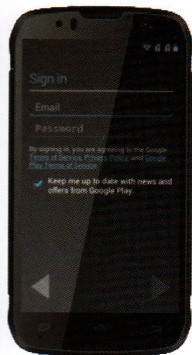

3. On the Add an Account page, select Google.

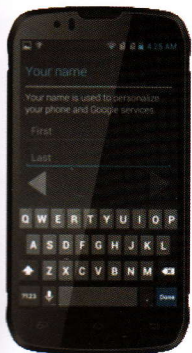

4. You will be asked whether you would like to set up an existing account or create a new account. Should you have an available Gmail account, choose Existing.

Should you opt to create a new one, choose New.

Setting Up Your Google Account

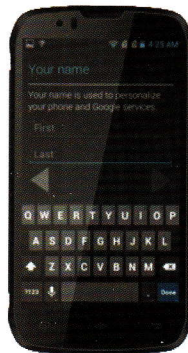

5. If you choose Existing, you will be asked to enter your e-mail address and password so you may sign-in your account.

You will be asked to enter your full name to which your account and device will be associated with.

After doing so, click on the arrow pointing to the right to proceed to the next step.

Setting Up Your Google Account

6. If you choose New, you will have to do the previous step.

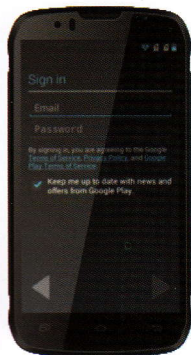

Enter your full name to which your account will be associated with. This also enables you to personalize your device and the Google services you subscribe to.

Choose a username for your Google Account, which will also be used for your Gmail Account.

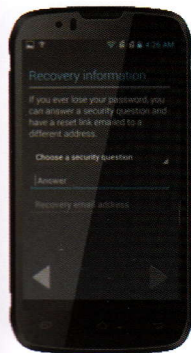

After doing so, click on the arrow pointing to the right to proceed to the next step.

Setting Up Your Google Account

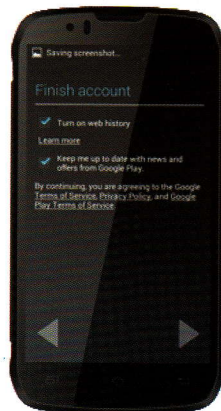

Create a password for your account. This should contain a minimum of 8 characters.

After doing so, click on the arrow pointing to the right to proceed to the next step.

Set a security question and an answer for your Recovery Information. This question, when answered, will enable a reset link to be sent to your e-mail address, should you forget your password in the future.

Setting Up Your Google Account

7. You can now finish setting up your account. After doing so, click on the arrow pointing to the right to proceed to the next step.

You will be asked to go through the option of subscribing to other Google services such as Google +, Google Play, etc. which you may skip and go back to by selecting Not Now.

Downloading Games & Apps

1. Tap the capacitive on-screen home button [4].
2. Tap the  icon on your home screen to go through all your current apps.
3. Look for "Play Store" or "Cloud Store" to view apps and games available for download.
4. Once you have chosen which app you will like to purchase, it will indicate FREE or the price, depending on its value. Tap on the app to view more information on it.
5. If you would like to proceed to downloading the app, tap the Install button and wait for it to finish downloading.
6. Once the app completes, you may now enjoy using the apps and playing the games you have downloaded.
