Phone

The battery

Travel charger (charger)

Use Instructions

⚠ Only use approved software. Pirated or illegal software may cause damage or malfunction manufacturer is no warranty.

📖 The items supplied with the phone may be different, depending on the software and accessories in your area can be used or provided by the ISP.

You can buy other accessories to the local dealer.

Accessories can provide the best support for mobile phones.

Other than accessories. Accessories may be not compatible with your phone.

### Install the SIM or USIM card and battery

When you order a mobile phone service, will receive a Subscriber Identity Module (SIM) card, which contains detailed information of your order, such as a personal identification number (PIN) and optional services. If you

wish to use UMTS or HSDPA services, you can purchase a Universal Subscriber Identity Module (USIM) card.

To install the SIM or USIM card and battery:

1 If the phone is switched on, long press [⏻], and then select Shut Down → OK to turn off the phone.

2 Remove the battery cover.

⚠ Remove the battery cover, careful not to hurt the nails.

3 SIM or USIM card inserted in the phone, its gold contacts facing down.

4 Insert the battery.

5 Replace the battery cover.

### Battery charge

Before using your phone for the first time, you must charge the battery.

Only the use of the mobile phone charger and data cable. Failure to do so may cause the battery to explode or damage your machine.

⚠ The battery power is low, the phone will issue a warning tone and display a low battery information. The battery icon will appear blank. If the battery is too low, the phone will automatically shut down. Need to continue to charge the battery before using the phone.

### Travel Charger charging

1 Plug the small end of the travel charger into the multifunction jack

⚠ Travel Charger Improper connection may cause serious damage to the phone. Will not warranty any damage due to misuse.

2 The large end of the travel charger plugs into a standard electrical outlet.

📖 Can use your phone while it is charging, but it will extend the time the battery is fully charged.

When the phone is charging, the touch screen may be unstable due to power failure. In this case, disconnect the travel charger from the phone.

Phone become warm during charging. This is normal and will not affect the phone's lifespan or performance.

3 When the battery is fully charged (the battery icon is no longer moving), disconnect the travel charger connected to the phone, and then unplug it from the electrical outlet.

⚠ Do not remove the battery before removing the

travel charger. Doing so will damage the phone.

⚠ Wish to save power when the phone is not in use, unplug the travel charger.

Travel charger no power switch, so you must unplug it from the outlet travel charger to stop charging. Use the travel charger should remain close to the socket.

### Insert the memory card

Wish to store more multimedia files, you must insert a memory card. Phone microSD, MicroSDHC. Storage card capacity up to 32 GB (depending on memory card manufacturer and type).

1 Remove the battery cover and battery.

2 memory card into the phone to the gold contacts facing down.

3. Memory card to promote the memory card slot until it locks into place.

4 Replace the battery and the battery cover.

Take out the memory card

Remove the memory card before you uninstall the memory card for safe remove.

1 In standby mode, open the application list, then select Settings → SD card and phone memory → Unmount SD card → OK.

2 Remove the battery cover and battery.

3 Push the card gently until it disengages from the phone.

4 Remove the memory card from the memory card slot

5 Replace the battery and the battery cover.

⚠ Do not remove the memory card when the phone is sending or access information, otherwise it may cause data loss or damage to the phone and memory card.

### Formatting a memory card

In standby mode, open the application list, and then select Settings → SD card & phone storage → Unmount SD card → Format SD card → Format SD card → OK → Delete all.

⚠ Before formatting the memory card, remember to back up all important data to your phone. The Manufacturer Warranty service does not include data loss due to user actions.
