Tips for use

1. Please refer to the operation Manual and put the charging machine in charging area. All you have to do is put it in the charging area, it will start charging regardless of the place and direction. Try to put it near the charging centre as close as possible.
2. When the charge is almost finished but not yet, it will stop charging, this is normal.
3. When the product which is under charging condition is mixed with television and radio noise ,please keep the product away from television and radio for more than 1 M.
4. It will affects wireless changing if the charging device is covered with thick protecting sleeves , you'd better take it off when charging.

Do not lay the magnetic card, magnetic record media and precise machine too close to the product!!

If you put the non-connection charging pad close to magnetic card and magnetic record medias, the product may have influence on the magnetic and make those recorded data disappear, and hand watch or other precise machine may break down, so do not put them close to the product.

Product advantages

- Once you put this QI-marked charging machine in the charging area ,it will start to charge persistently.
