your APP.

# Getting to know your mobile

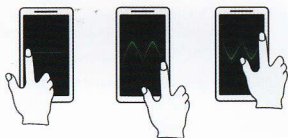

\* Please use the earphone included in the package.

## Gesture recognition

The DOOGEE mobile incorporates gestures recognition that allows not only to wake the phone without having to press any button at all, but also allows you to call in specific functions of your phone. For example, write and C on your turned off screen and activate the phone's camera directly.

Draw a "C" to open the cam

## Intelligent Gestures

### Smart answer

Put the phone to your ear to answer call.

### Answer by swing

When you receive a call answer just by swinging the phone horizontally.

### Smart switch

Put the phone next to your ear to switch from hands free mode to headset mode.

### Silence

If in a meeting, and you do not want to pick up a call, just put the phone, screen down on the table, and the phone will hang it up for you.

## **[EN] Safety Information**

**Please read this safety information carefully so that you can use your phone in complete safety**

1. **Children** : Be very careful with children and your phone. A mobile phone contains a number of detachable parts. Exercise great care when children are in close proximity to the phone. The phone contains small parts that could be swallowed or cause choking. If your phone is equipped with a camera or lighting device, do not use it too near children or animals.
2. **Hearing** : Prolonged listening at full power using a lightweight headset or headphones can damage your hearing. Reduce the volume to the lowest possible level when listening to music or conversations. Avoid high volumes over extended periods.
3. **Driving** : Exercise care when driving. Driving requires maximum attention at all times in order to minimise the risk of accidents. Using a mobile phone can distract the user and result in an accident. You must fully comply with the local regulations and laws in force regarding the use of cell phones whilst driving. You are not allowed to use the phone whilst driving. A hands-free kit should not be regarded as an alternative solution. **Flying** : Turn your phone off when flying. Remember to turn your phone off when you are in a plane (GSM + Bluetooth) as it may cause interference.
4. **Hospitals** : Turn your phone off near any medical devices. It is extremely dangerous to leave a phone switched on near medical devices as it may cause interference. You must observe any instructions or warnings in hospitals and treatment centres. Remember to turn your phone off in service stations. Do not use your device in a petrol station near fuel. It is dangerous to use your phone inside a professional garage.
5. **Electronic implants and pacemakers** : Users who wear a pacemaker or who are fitted with an electronic implant must hold the phone on the opposite side to their implant as a precaution when making a call. If you notice that your phone is causing interference with a pacemaker, switch it off immediately and contact the manufacturer of the pacemaker for advice on what action to take.
