T Series IPC Quick Guide

Step 1: Hardware connection of the IP camera and PC/NVR

![Diagram of hardware connection](image1)

Figure 1.1

Note: Hardware interfaces of IPC may be difference depending on the actual model. Pictures are for reference only.

Step 2: Install the CMS software (UC)

![Diagram of CMS software](image2)

Figure 2.1

![Language selection screen](image3)

Figure 2.2
Default name: admin  Password: 123456

Step 3: Setup the camera IP

Go to: Config Management – Begin to search – setup the ip and gateway of the IP Cam
Auto gain: Will get the DNS and gateway of the local network.

Figure 3.2
Set up difference IP for each camera

Change setting

Figure 3.5
Step 4: Add to Channel

Go to “Video View”—Select a channel—Double click on the camera Device Name

![Figure 4.1](image1.png)

Step 5: Detailed setting

Method 1:

![Figure 5.1](image2.png)

Method 2:

Log in the camera via the browser

![Figure 5.2](image3.png)
When your first time to use this camera, you have to install a plug-in tool, and restart the browser. 

**Figure 5.3**

Default name: admin  
Password: 123456

Go to “Config” and set up the camera. 

**Figure 5.5**
Step 6: The cloud service and P2P application

The Device Could ID would be auto activated when the camera connected to the Internet for the first time. (Make sure that the DNS was set up correct and the camera could be link to the Internet)
Remote view the camera via [http://P2PID.seetong.com/](http://P2PID.seetong.com/)

You can manage all the cameras and remote access form all over the world via our cloud service: [http://www.seetong.com/](http://www.seetong.com/)

You can login to a single camera or register an account to manage different cameras.
You can also add a remote camera via CMS software (UC)

**Figure 6.5**

**Step 7: Mobile surveillance**

You can search the latest version “Seetong” and “TSee” apps on google play store / Apple store.

**App 1: The “Seetong” (New)**

![Seetong App](image)

You can login an account or a single camera. (Just like Figure 6.3):

![Login Screen](image)

**Figure 7.1**
Add a new camera:

You can find the P2P ID such as "Step 6" and manage your camera of the account via www.seetong.com.
App 2: The “Tsee” (old)

Two model to add an IP camera: “Normal” / “Server” (recommended)
