CAUTION: Please do not watch the video while driving to avoid traffic accidents!

Disclaimer

To ensure your safety and normal use of this item, it is highly recommended that the unit is installed by a professional installer or an authorized dealer. Do not dismantle or repair the unit by yourself to avoid damage or accident.

To the sake of your safety and avoiding violating traffic rules, do not view the video or operate this device while driving.

Do not place the item where it would be subject to moist or water splashing, so as to avoid electric shock, system damage or overheating.

This machine is only a assistant tool and you could not be distracted, careless or even lose the judge ability. All accident caused by above situation will have nothing to do with our company.

All photos in this manual are only for reference, we are not responsible for the wrong understanding on them.

Please contact after-sales department of the manufacturer if this product does not work.

Precautions for installation

Please do not install or repair this device by yourself for it may make you confront electrical shock or other dangers. You are recommended to entrust all these to authorized staff.

⚠️ Warning: Following installation positions and ways are prohibited

Do not connect the machine to accumulator directly.
Do not link power line of the model with other electric appliances.
Forbidding installing the product on these places, for example, board in front of driver's seat, gear shift lever, and the place where may block and influence driver's
sight and operation.
Prohibit installing the dvd player on the expend area of the safety airbag, please refer to the car's manual to acquaint yourself with the airbag's extension area.

⚠️ Note: If need drill or make other refit, please consult the nearest dealer.

Before drilling hole on dashboard or panel, do not destroy fuel line, brake cable, electrical components, telecommunication line and power cable.

Keep screws away from any lead with electricity while using them otherwise it is possible to destroy electric wire, insulating cuticle so that short circuit or other damage occurs.

To ensure right installation, please use standard parts and install the device according to specified methods. Otherwise, it may cause internal components' looseness or damage.

It is very dangerous if the lead of GPS antenna twines around steering column or shifter lever. Make sure the installation will not hamper the driving.

Guarantee all leads not hooked by the car door and seat's skate machine to avoid short circuit.

So as to prevent from electromagnetic interference, keep away other wires or leads from this product's FM/AM antenna and lead. Or else, the electromagnetic interference increases, which gives rise to inaccurate positioning or display.

Confirm if vehicle's other facilities connection are correct or not after car navigation system's installation.

Check the accumulator voltage before setup. This machine is used on 12V storage battery and negative earthed vehicle.

Dismantle battery storage negative lead before installing the car dvd to avoid system short circuit.
