INSTRUCTIONS

WELCOME
Thanks for using our digital car AV product series
To properly use this product, please read this manual carefully, and keep it for future reference

WARNING

1. Please keep the disc slot clean, wipe it off when there is some dirty. Please wipe off the dirty on the disc before slot into the unit. If the dirty goes into the unit with disc, it will lead the unit to slow slot or can not read disc. In fact, that is not quality problem. Please get professional staff to clean it.

2. Long time working at high volume will influence the life of the unit. To protect it, please turn down the volume when long time use

3. This unit is assembled by precise parts, Please do not try to open it or change any parts inside the unit.

4. Please do not touch LCD display by hard object to protect it from scratch.

5. To avoid any accident, driver should not watch the display when driving, If needed, please park the car before operation

6. This unit is designed for 12V negative grounding system, please do not connect it directly to 24V or higher power sources.

7. If any malfunctions which you can not find a solution, please refer to the chapter of “TROUBLE SHOOTING” or press “RESET” button to resume to initial settings

Note: We are keeping improving this product, if any improvement, please forgive us not to notice in advance.
Precaution before installation

1. Professional staff is required to install this unit.

2. If you try to install it by yourself, please follow the installation instruction and wiring diagram. Improper installation may burn the unit.

3. Before installation, please switch off the engine and take the key out. Otherwise, it may cause the battery leakage or short circuit.

4. Be sure not to damage the wires or electrical parts inside the car when installation, otherwise, it may cause fires.

5. Please bind up the joint of wires well to avoid short circuit or burning the unit.

2. For different discs, the setting options may be different.
3. If the selected language is not burnt in the disc, the unit will work in default language.
4. For details, please read the next pages carefully. Press SETUP button on remote control, the display will show the dialogue boxes as next pages.
Instructions
**INSTRUCTIONS**

**Note:**
1. After input the password, press enter to confirm. It will open the childlock.
2. Move the cursor to Rating option, and select your desired rating level.
3. You can only choose rating when childlock is unlocked.

---

**Note:**
Press SETUP button on remote control when DVD playback to display the above menu, use arrow keys to select desired item, press ENTER to confirm. Press SETUP again to exit.
15. Program playback

When disc or USB/SD plackback, you can set the playback sequence by program playback function. The operation is as follows:

Press PROG button on remote control, the display will show the following dialogue box:

```
PROGRAM
1  5  9  13
2  6  10 14
3  7  11 15
4  8  12 16
```

Input the track number you desire to be programmed, for example, if you want to program 10th track as first played track, select the 1__, and input 10, then move the cursor to 2__ to program in the same way, select PLAY cursor on display by remote control and press Enter to confirm program playback.

If you want to cancel the program playback, press GROG to enter the program playback interface, and select CLEAR, press Enter to confirm, then press PLAY button to play sequently.

Note: This function can be only worked by remote control.
BLUETOOTH OPERATION & SETUP

1. Bluetooth function features

1) Driver can answer or make a call freely on touch screen.

2) Driver can control the volume output by volume button.

3) Driver can make a dialogue freely by the built-in microphone, no need to hold the handset, it can make the driver pay more attentions to steering wheel and avoid the radiation of the handset.

4) It can realize the synchronization between the DVD and your handset, you can transmit the audio signal stored in your handset to the DVD by bluetooth.

2. How to pair DVD with bluetooth handset

1) First of all, open the bluetooth function of your mobile phone, and start to search the bluetooth device nearby, there will be a notice once the DVD bluetooth is searched. Confirm to make the connection. Your mobile phone will remind you to input the password (Password of the DVD is “0000”). Enter the password, and confirm to make the connection. Once “CONNECT” shows on the DVD, it means the connection succeed. (you may need to try more than once if it can not connect successfully)

2) In any mode, if the DVD and handset keep connecting, when there is a call, the DVD will auto switch to bluetooth interface, and will return to last mode after the call.
TV OPERATION

1. Auto Scan
   Press the AMS on the remote control or SEEK on display. If any TV station is searched, it will auto stored in sequence.

2. Skip TV channel
   1) Turn the tuning knob on front panel or press $\uparrow$ and $\downarrow$ keys to select next/last channel
   2) Press number button on the remote control to select your desired channel. For example, Press 10+, then press number 3 and 9, then it will skip to channel 39th.

3. Manual Scan
   Touch $\uparrow\downarrow\leftarrow\rightarrow$ key on remote control to search in forward/backward direction. If any station searched, it will stop to play it.

4. TV system
   1) For different countries or areas, the TV system is different. Before you start to use TV function, please check local TV system.
   2) Press the SYS and AUDIO button on the remote control to switch the TV system to match your local TV system.

5. Black screen
   The display will go black if there is no signal input.
### GPS OPERATION INTRODUCTION
