Product Introduction:
VHT4G support 3 functions
1. Hotel Wired to Wireless (VHT4G): It is a truly plug and play wireless router. Stay for a business trip or traveling, you just need to plug the network cable that provided by the hotel room into VHT4G Ethernet port, and then plug VHT4G into an electrical outlet, then the whole room is already a Wi-Fi wireless coverage. At this point, you can take out your cell phone, Pad or any other devices that can support Wi-Fi wireless Internet access to share wireless Internet access anywhere in the room, all without any settings.

2. 3G/4G wireless router (VHT4G): automatically connect to ISP’s 3G/4G WIFI data network by an external 3G/4G network card, that creates a “hotspot” 3G/4G to WIFI for customers, so that more than one person enjoy the simple, convenient WiFi network at the same time.

3. Charger (VHT4G): 2.1A charger function, low noise, automatically fit for most smart phones, tablet PCs

Remark:
1. The default work mode of VHT4G is WiFi Repeater mode, when it is connected to an 3G/4G network card, it will be switched to 3G/4G router mode automatically without any settings to run 3G/4G WiFi network.

2. When you want to restore the factory default setting, please press RESET button on the product for 5 seconds, after green light blink a few, it will reset automatically (it will take about 30 seconds).
Chapter 1 Quick Setting Guide of WiFi Router mode

1. VHT4G is a plug and play wireless router, you just need to plug the network cable that provided by the hotel room into VHT4G Ethernet port, and then plug VHT4G into an electrical outlet, then you can surf the wireless network, without any settings, if the user need to set the SSID and password of VHT4G, please set it as following steps:

   ➤ Wireless connect VHT4G by laptops, smart mobiles, IPAD and other wireless devices.

   ➤ The default WiFi SSID (WiFi name) is: VONETS_the last six characters of product MAC address.

   ➤ The default WiFi password is 12345678

2. Open the IE browser, enter http://vonets.cfg virtual domain name setting(VDNS) .

   Remark:
   Enter domain name, then Enter, the login page will appear, the default admin and password is admin.

3. WiFi setting
   ➤ After entering the webpage, click the WiFi settings in leff @lumn, as shown:

   ➤ WiFi Settings->Basic Settings-> WiFi repeater(SSID): Enter the wireless name you want to change, point applications button after confirmation.

   ➤ WiFi Settings-> WiFi Security->Key: Enter the password you want to change, point applications button after confirmation.

Note: after you change it successful, restart the device(VHT4G) for parameters to take affect.

Chapter 2 Quick Setting Guide of 3G Router mode

1. VHT4G is connected to 3G network card and power adapter, VHT4G will be switched to 3G router mode automatically, users no need any setting and can have run 3G/4G WiFi network. See the following picture:

   Remark:
   1. When the green light is blinking, it means the product is doing 3G dial-up connection.
   2. When the green light is always on, it means the dial-up connection is successful, user can connect it by wireless devices.
   3. When users connect it by wireless devices, please pay attention to:
      ➤ The default WiFi SSID (WiFi name) is: VONETS_the last six characters of product MAC address.
      ➤ The default WiFi password is 12345678
      ➤ If the user has changed the wireless SSID and wireless password, using the changed parameters.
