</tr>
</tbody>
</table>

Tip: You can tap and hold the status indication bar to view the current day.

Note: The device software is under upgrading, the status indicator may be different with your device; please refer to the actual device software.

1.6 Text Entering
When edit text, you could use existing method of entering and Android keyboard to edit English, numbers, and symbols etc., such as editing message, searching key words etc.

Tip: The display format would be different according to different status and keyboard of the entering, please refer the actual one

1.6.1 Switch on the Entering Method
Open the text editing interface
Click in the editing area, then the editing menu would appear.
According to the input method, input method you want to use the midpoint of the input method menu, you can choose the Android keyboard or install third-party input method.
1.6.2 Android Keyboard Input
Switch the input method into Android keyboard (see switch input method)
Remark:
1. You can click the number sign key to switch to numbers and symbols input mode.
2. Click to switch letter case.

2. Function Operations

2.1 General

2.1.1 Steering Wheel
Users could set the steering wheel according to hint.
Note: Steering wheel interface is special for cars with buttons, but some cars' steering button are not able for study but by "can", such as Ford MONDEO

Applications>Setting
> General Settings
> Steering wheel Settings

![Steering Wheel Interface](image)

a. First to click “Start”
b. Click the buttons as you want.
c. Click the corresponding button on the wheel, if the study displays successful, there will be a change on the corresponding color on the main screen.
d. Repeat step 1 and 2 till you complete all the buttons' setting on the steering wheel.
e. Click “END” to ensure that the steering wheel setting is completed. If you want the steering wheel button to re-learn, press the [CLEAR] Repeat a, b, c, three steps

2.1.2 Screen Calibration (For resistive screen only)
Applications>Settings
> General Settings
> Touch screen calibration

Enter the calibration screen to calibrate the screen interface, please click as close as possible to the cross until a successful calibration, then exit the calibration screen.

2.1.3 Navigation application
Select appropriate map application, then it can be associated with the navigation button on the physical and navigation icon on the main screen.

Applications>Settings
> General Settings
> Navigation options
> For example: GO

2.1.4 factory settings
When the system is unable to work or there is problems after user used the system, it can be restored to the factory settings. Once it's restored to factory settings, all the third-party software would be deleted, and the current system settings would be lost. For navigation software, just need to install corresponding APK. Please operate carefully.

Applications>Settings
> General Settings
> factory settings

2.2 Navigation

2.2.1 Navigation Software Installation
1. Copy the application program with suffix name “APK” to SD card or U disk. There are two installation methods:
   ① Click into the document management interface to find SD card or U disk directory and select “APK” and click install directly.
2. After successful installation required to choose you need to use the navigation application program, association panel on navigation physical keys NAVI and interface of the main navigation application icon (see 2.2.4 navigation options).

2.3 Radio
2.3.1 RADIO
Press the RADIO button on panel or click the icon on the main menu to enter the radio interface, the specific functions and operations are as follows:
Radio Interface
The functions of Icons in the radio interface are described below:

<table>
<thead>
