How to charge the headset

Before using your new wireless headset, please charge it via the micro USB charging cable included in the package. Charging through a computer USB port is Preferred. If you need to use an AC-DC adaptor/charger to charge the speaker, please use 5V, 1A USB wall charger. Plug in the micro USB pin into the charging port on the side of the headset and the other end of the cable into any standard USB port. (Such as a computer USB charger)The red LED indicator light will be turned on when it is charging. After the speaker being fully charged, the red LED light will be turned into blue.If the heaset is out of battery, the speaker will "beep" once every 2 minutes to remind for a recharge.

1> Make sure the headset is fully charged. Press and hold the ⏻ button for 5s, utill the LED indicator flashing between red & blue.

2> Turn on the Bluetooth function of your smart devices/PC.Search available Bluetooth devices on your smart devices/PC.Please select the one called "SM808A"in the list.

3> After the speaker being paired successfully,you will hear a "brief message tone". The red & blue LED will stop flashing. There is no password need for connection. If your device asking for a pin to connect, please type "0000"

## How to Pair two Bluetooth devices simultaneously

1> After paired with the first Bluetooth device, please turn off the Bluetooth function of the first Bluetooth device. The LED indicator of the Bluetooth headset will flash between red & blue.

2> Pairing with the second Bluetooth device.

3> Turn on the first Bluetooth device and reconnect it with the Bluetooth headset.
1> Put the right headset into ear.

2> Rotate the right headset up and across the ear.

3> Lock the right headset to your confortable position.

4> Put the left earbud across your ear. Tight the cord on the back to your confortable position.

Tips to keep the best quality sound at outdoors/gym

1> Keep the music device at or above waist level on your right side the same side as the headphone antenna. Your body is 80% water. Water blocks low power radio signal like Bluetooth. In the absence of nearby ceiling for signal bounce, your body can block the signal between the music device and the headphones. When outdoors or in gyms the use of armbands or wrist-worn music players are recommended. Having your music player in your pants pocket below waist level may produce varied results as your body can get between the music device & headphones.

2> For smartphone/pad, the straight line Bluetooth range is around 30fts. But for laptop/desktop, the Bluetooth range will drop significantly depending on the Bluetooth driver on the computer.

Note:

1, Fully charge the headset before your first use.

2, Selecting the right size eartips. Only with the perfect size eartips will you enjoy snug fit & optimum sound quality

3, This Bluetooth headset has no waterproof function, please keep it away from water & moisture to make sure it can use normally.

4, Please use original charging cable, do not arbitrarily change or connect to external power supply.

5, Avoid excessive volume levels and prolonged periods of listening. Do not use around road traffic.

6, Keep your Bluetooth devices as close as possible to the headset to avoid your body or other objects block the signal.
