3 FAQs and Solutions
If you have any questions about the phone, please find the solutions from the table below.

<table>
<thead>
<tr>
<th>FAQs</th>
<th>Causes</th>
<th>Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Poor reception</td>
<td>When you use your phone at poor reception areas, for example, near high rise buildings or base rooms, the radio wave cannot be transmitted effectively.</td>
<td>Avoid this as far as you can.</td>
</tr>
<tr>
<td></td>
<td>When you use your phone at network traffic congestion, such as working time and off-duty time, the congestion can result in poor reception.</td>
<td>Avoid this as far as you can.</td>
</tr>
<tr>
<td></td>
<td>This is related to the distance to base station in question.</td>
<td>You may ask the network service provider to provide service coverage maps.</td>
</tr>
<tr>
<td></td>
<td>The trunk line of network is in bad condition. It is a regional problem. In some areas, the call lines are in bad condition.</td>
<td>Hang off the call and dial again. Choose another better line.</td>
</tr>
</tbody>
</table>

Shorter standby time
The standby time is relevant to network settings.
Replace the batteries when no signals are received, your phone will continue searching for base stations, thus consuming a large amount of battery power and reducing standby time.

In poor reception areas, turn off your phone temporarily.

When no signals are received, your phone will continue searching for base stations, thus consuming a large amount of battery power and reducing standby time.
Use your phone at strong signal areas or Turn off the phone temporarily.
