Safety Information
Please read the following terms and conditions carefully:

Operation Safety
In the case of potential risks, please do not use your mobile phone.

Transportation Safety
Please observe all traffic laws and regulations.
Please try to drive vehicles with both hands.
Please consider traffic safety as your priority while you are driving.

Medical Safety
Please observe the relevant restrictions and provisions at a hospital.
Switch off your mobile phone in the vicinity of medical devices.

Airport Safety
Please observe all the airport and aviation safety regulations.
During flight, please do not use your mobile phone.

Chemical Warning
Please do not use this device near fuels or chemical products.

**Temperature Warning**
Do not use your mobile phone in the case of an extreme temperature.

**Emergency Call**
Make sure that the device is in the network service zone, and telephone functions have been enabled. Enter the emergency number on the main screen, then press the Call button to make your emergency calls.

**Accessories and Batteries**
KENXINDA batteries and accessories only

**Information Backup**
Please backup or keep a copy of handwritten record for all important information saved in the device.

**Battery Safety and Preventive Actions**
-- To improve performance and extend service life of batteries, you are recommended to fully charge the battery before using your device.
-- The optimal performance of a new battery is generally after two or three complete charging cycles.

**Cautions**
- Remember: long-term overcharging of a battery will affect the battery life.
- During charging, keep the mobile phone away from children.
- Try to protect your charger from contacting or approaching liquid environments. If a charger is in contact with water or any other liquid, please pull it off from the socket to prevent overheating. Charger malfunction may result in short circuit or fire risk.

Warning: Please handle batteries with care. Do not discard obsolete batteries at anywhere. Please observe local environmental laws and regulations, and follow the corresponding instructions for waste disposal.

Repair Service

Your device is a product with good design and process, please use your device with care. The following advice will help you use the warranty service effectively.

1. Please open the device according to the instructions in this Manual. Never try any other ways.
2. Clean lenses (for example, camera lens, distance sensors and light sensors) with a clean and dry soft cloth.
3. While changing the antenna, only compatible or approved antenna can be used. Unauthorized antenna, modification or accessories may damage the device and violate relevant regulations for radio devices.
4. Backup necessary data (for example, address lists and calendar memo) from time to time.
5. Regularly restore the settings of the device to achieve the best performance.

These suggestions are equally applicable to your device, battery, charger and accessories. If any device is unable to work normally, please send it to the nearest authorized repair center for repair.
