**TROUBLE AND SOLUTION**

1. No Picture after providing power
   - May be the power supply voltage abnormal, please check the power supply voltage and pole whether exactitude.
   - Please check all the connecting cable and monitors whether be connected correctly or not.
2. The picture level direction have flowing interference ripples
   - May be caused by the power supply AC ripples, it need filter the wave of the power supply.
   - Check the monitor and peripheral equipments used.
3. The picture background color changes continuously
   - The fluorescent lamp's electromagnetic field cause color roll. This is proper phenomenon of the cameras.
   - Reduce the fluorescent lamp numbers or increase the distance between the camera and the fluorescent lamps can improve it.
   - Use power supply external sync. camera can solve it.
4. The picture smear too mass
   - The power supply's voltage unstable
   - Connecting cables not connect correctly or have high impedance.

**INTRODUCTION**

Congratulations on your purchase of this product. This User Guide suits product:
The most attractive characteristics are small and easy hidden, suits the elevator and corridor. In addition, it owns the characters of high definition and stability, strong anti-jamming, rich and real color. Fixing and using this model are convenient too. It is very good for you to apply to your CCTV system.
