5. Your device will now give you a passkey. Enter this key onto the keyboard, and press Enter to complete the pairing (also on the keyboard).

Now the keyboard is connected with your iPad successfully.

**Connect with computer**

Before you connect the Bluetooth Keyboard, please make sure there is Bluetooth function in your computer. Software available like Widcomm (Recommended), IVT or the Microsoft built-in software...

1. Turn the keyboard ON, and press the pairing button. The blue light is flashing, now the keyboard is in pairing mode.

**A: Match on Widcomm (recommended)**

1. Double click the icon on the main window pops up; select Bluetooth --- Add Bluetooth facility. Click Next button in the Setup Guild window.

2. When the system finds the Keyboard, select it and click Next.

3. Input the stochastic Match Code in Bluetooth keyboard, and press Enter.

---

**Basic Use**

- **Connection:**
  - Connect with computer
  - Connect with iPad

- **Pairing:**
  - Pairing with keyboard
  - Pairing with secure code

- **Security:**
  - Bluetooth security code
  - Secure code exchange

---

**Troubleshooting:**

- If you encounter any issues, refer to the documentation provided with your device.
4. Now you can use your keyboard at ease.

Tips:
If no signal received after 10 minutes, the keyboard will change to the power safe model. If you want to make it into use, just click the "Enter" key. After the connection between the keyboard and dongle, if you drag off the Dongle or turn off the Computer, the keyboard will shut down, click the "Enter" key of the keyboard will wake it up.

B. Match on Microsoft built-in software
1. Make sure that the Bluetooth Function has been activated. Double click the Bluetooth Icon on the Task Bar or in the Control Panel, open the "Bluetooth Management" window, click "Add", tick off "acility is ready for searching", click "Next"
2. Wait till the keyboard is found, select keyboard and click "Next".

3. Select Choose a pass key for me, click Next.

4. Input the pass key and press Enter in bluetooth keyboard, click Next, the system will finish the installation of the new facility automatically.

Add Bluetooth Device Wizard

Select the Bluetooth device that you want to add.

Add Bluetooth Device Wizard

Do you need a passkey to add your device?

To answer this question, refer to the "Bluetooth" section of the documentation that came with your device. If the documentation specifies a passkey, use that one.

- Choose a passkey for me
- Use the passkey found in the documentation:
- Let me choose my own passkey:
- Don't use a passkey

You should always use a passkey, unless your device does not support one. We recommend using a passkey that is 8 to 16 digits long. The longer the passkey, the more secure it will be.

Add Bluetooth Device Wizard

Windows is exchanging passkeys.

When instructed below, enter the passkey using your Bluetooth device.

For more information about entering a passkey, see the documentation that came with your device.

- Connecting...
- Please enter the passkey on your Bluetooth device now.
  Passkey:
  03895462

Installing Bluetooth device...

Note: You might need to press ENTER after typing the passkey on a Bluetooth keyboard.

Add Bluetooth Device Wizard

Completing the Add Bluetooth Device Wizard

The Bluetooth device was successfully connected to your computer. Your computer and the device can communicate wherever they are near each other.

To close this wizard, click Finish.

< Back Finish Cancel
C. Match on IVT Software
1. Make sure that the Bluetooth function is active. Double click the Bluetooth Icon, open the Management window, select Search for Bluetooth facilities or click the Round Ball in the middle of the window.

2. Click the Bluetooth Keyboard found, click the right button for Refresh Service.
3. Select the Bluetooth Keyboard again, click the right button for Connect-Bluetooth Input Service, input the stochastic pass key, the system will auto install the HID facility. After that you can use your Bluetooth Keyboard at ease.

FAQ:
If unable to connect the Bluetooth Keyboard to the computer, or the Keyboard work unconventionally, please try the steps below:
1. Before you use your Bluetooth Keyboard, please make sure you have done the Bluetooth Donglee installation procedure, and the Bluetooth facility is turned on.
2. Make sure that the Computer is connected to the Bluetooth Keyboard. If they are matched to each other before, then under the Standby State, just click the "enter" key of the keyboard.
3. Make sure that the keyboard is within the effective range---10M.
4. Make sure that there's no change of the Bluetooth facility. If anything changed, please kind rematch.
5. If your Bluetooth facility is connected to other Bluetooth products, please kindly confirm that the speed of the Bluetooth facility is enough.
6. Please kindly check the batteries. If they are short of power, replace them for new ones.
