Please note the following in using:

1,For the machines in a file or play when power consumption of large game is larger, the temperature of the machine is very high, so please don't long time continuous use machines, avoid the temperature is too high and appear crash etc anomaly.

2, if Tablet PC don't use for a long time, please charge the machine with full of storage
around once a week, in order to prevent the machine from starting again ,with long-term no using;

3, USB line and charger must use the original for the company; otherwise it may appear the phenomenon of finding not U plate and can't filling into electricity.

4, please charge under the following circumstances:

A, the battery ICONS shows no electricity.

B, system automatic shutdown or can't boot.

5, If the performance of machine need to upgrade, please go to the CHUWI official website to download the latest firmware and upgrade tools, according to the specifications "firmware upgrade" methods operation.

Machines in use process, TFT LCD screen sometimes appear about 0.2 MM in diameter, black, white highlights (red dot or is green dots). This is an active matrix TFT LCD screen in a normal phenomenon, not machine or display has broken down. The main reason is appear window TFT LCD screen shows sharply, the image with color, fine pictures required the screen with up to hundreds of thousands of pixels, its pixel is 1,200 (X) X 234 (Y) = 280800 a (28 million pixels). Each pixel close or overlap will appear this phenomenon, so Toshiba, Panasonic, Hitachi, sharp, etc, three companies usually provisions about 0.2 MM in diameter within the window LCD screen for qualified products.
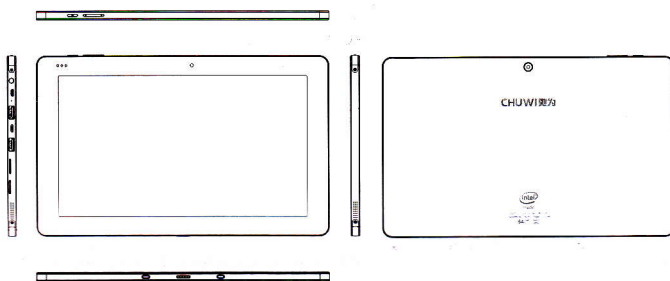

Wish using happy!
