Notes on the AC Power Cord

AC Power Cord must meet the requirement of countries where you use this projector. Please confirm your AC plug type with the graphics below and ensure that the proper AC Power Cord is used.

![AC Power Cord types]

Introduction

Projector Features
The projector offers the following features:
- Single chip LCD technology
- High performance LED lamp (with 50,000 hrs life)
Operation of Your Small LED Projector

SVGA (800 x 600 pixels or 640 x 480 pixels)
compression compatibility for VGA, SVGA, XGA and SXGA*

Compatibility with PAL, SECAM
Input HDMI/AV/YUV/16-bit/48-bit/RGB/COMPOSITE/SCART/Component/TV(analog)

User-friendly, multi-language on-screen display
keystone correction

Important safeguards
Please read all these instructions regarding your LED projector and retain them for future reference. Follow all warnings and instructions marked on the LED projector.

1. Read instructions
All the safety and operating instructions should be read before the appliance is operated.

2. Retain instructions
The safety and operating instructions should be retained for future reference.

3. Warnings
All warnings on the appliance and in the operating instructions should be adhered to.

4. Instructions
All operating instructions must be followed.

5. Cleaning
Unplug this projector from the wall outlet before cleaning it. Do not use liquid aerosol cleaners. Use a damp soft cloth for cleaning.

6. Attachments and equipment
Never add any attachments and/or equipment without the approval of the manufacturer as such additions may result in the risk of fire, electric shock or other personal injury.

7. Water and moisture
Do not use this projector near water or in contact with water.

8. Accessories
Do not place this projector on an unstable cart, stand, tripod, bracket or table. Use only with a cart, stand, tripod, bracket, or table.

9. Power sources
This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power, please consult your appliance dealer or local power company.

10. Power-cord protection
Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them. Pay particular attention to cords at plugs, convenience receptacles, and points where they exit from the appliance. Do not put the power cord under a carpet.

11. Overloading
Do not overload wall outlets and extension cords as this can result in a fire or electric shock.

12. Objects and liquids
Never push objects of any kind through openings of this projector as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

13. Servicing
Do not attempt to service this projector yourself. Refer all servicing to qualified service personnel.

14. Damage requiring service
Unplug this projector from the wall outlet and refer servicing to qualified service personnel under the following conditions:
(a) If the power-supply cord or plug is damaged.
(b) If liquid has been spilled, or objects have fallen into the projector.
(c) If the projector does not operate normally after you follow the operating instructions.

Adjust only those controls that are covered by the operating instructions. An improper adjustment of other controls may result in damage to the projector and will often require extensive work by a qualified technician to restore the projector to its normal operation.

(d) If the projector has been exposed to rain or water.
(e) If the projector has been dropped or the cabinet has been damaged.
(f) If the projector exhibits a distinct change in performance - this indicates a need for service.

16. Replacement parts
When replacement parts are required, be sure that the service technician has used replacement parts specified by the manufacturer or parts having the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.

17. Safety check
Upon completion of any service or repair to this projector, ask the service technician to perform safety checks determining that the projector is in a safe operating condition. An appliance and cart combination should be moved with care. Quick stops, excessive force and uneven surfaces may cause the appliance and cart combination to overturn.

18. Ventilation
Slots and openings in the cabinet are provided for ventilation, ensuring reliable operation of the projector and to protect it from overheating.

Do not block these openings or allow them to be blocked by placing the projector on a bed, sofa, rug, or bookcase. Ensure that there is adequate ventilation and that the manufacturer’s instructions have been adhered to.

WARNING:
Unplug immediately if there is something wrong with your projector.
Do not operate if smoke, strange noise or odor comes out of your projector. It might cause fire or electric shock. In this case, unplug immediately and contact your dealer.

Never remove the cabinet. This projector contains high voltage circuitry. An inadvertent contact may result in an electric shock. Except as specifically explained in the Owner’s Guide, do not attempt to service this product yourself. Please contact your dealer when you want to fix, adjust or inspect the projector.

Do not modify this equipment. It can lead to fire or electric shock.
If you break or drop the cabinet, Do not keep using this equipment if you break or drop it. Unplug the projector and contact your dealer for inspection. It may lead to fire if you keep using the equipment.

Do not face the projector lens to the sun. It can lead to fire.

Use correct voltage. If you use incorrect voltage, it can lead to fire.
Do not place the projector on uneven surface.
Do not place the projector on unstable surfaces only. Please do not place equipment on unstable surfaces.
Do not look into the lens when it is operating. It may hurt your eyes. Never let children look into the lens when it is on.
Do not turn off the main power abruptly or unplug the projector during operation.
It can lead to lamp breakage, fire, electric shock or other trouble. It is best to wait for the fan to turn off before turning main power off.
Do not touch Air outlet grille and Bottom plate which becomes hot.
Do not touch them or other equipment in front of Air outlet grille. The heated Air outlet grille and Bottom plate may cause injury or damage to other equipment. Also, do not set the projector on the desk which is easily affected by heat.

Clean the air-filter once a month.
Clean the air-filter frequently. If the filter or ventilation slots become clogged with dirt or dust, the temperature inside of the projector may rise and cause some troubles, such as damage of Inside parts, and shortening the life of panel.
Do not look into the air outlet grille when projector is operating.

Heat, dust etc. may blow out of it and hurt your eyes.

Place of installation
For safety's sake, refrain from setting the projector at any place subjected to high temperature and high humidity. Please maintain an operating temperature, humidity, and altitude as specified below.

- Operating temperature: between +41°F (+5°C) and +95°F (+35°C)
- Operating humidity: between 30% and 90%
- Never put any heat-producing device under the projector so that the projector does not overheat.
- Do not attach the projector to a place that is unstable or subject to vibration.
- Do not install the projector near any equipment that produces a strong magnetic field. Also refrain from installing near the projector any cable carrying a large current.
- Place the projector on a solid, vibration-free surface: otherwise it may fall, causing serious injury to a child or adult, and serious damage to the product.
- Do not stand the projector: it may fall, causing serious injury and damage to the projector.
- Slanting the projector more than 10° (right and left) or 15° (front and rear) may cause trouble or explosion of the lamp.
- Do not place the projector near an air-conditioning unit or heater to avoid hot air to the exhaust and ventilation hole of the projector.

Button operation
Illustration of remote control

1. POWER button
   - Press this button to switch on the TV when at standby mode or enter standby mode.

2. MUTE button
   - Press this button to mute or restore sound.

3. IMAGE button
   - Press this button to select the zoom mode.

4. OK button
   - Press this button to return to the previously viewed program.

5. CH± buttons
   - Press these buttons to select channels in ascending or descending order.

6. VOL+ / VOL- buttons
   - Press these buttons to adjust the volume level up or down.

7. CALL button
   - Press this button to display the settings on the screen (e.g., Channel number for TV input).

8. CHANNEL SELECTION buttons
   - No use, you can press number keys to select TV channel directly.

9. MODE button
   - Press this button to switch among TV broadcast, AV input and other sources.

10. OK button
    - Press this button to select picture display direction, such as Normal / Reverse etc.

Signal connection diagram

Using the remote control

Battery installation
Use two AA-size batteries.
1. Remove the back cover of the remote control by pushing the battery compartment door in the direction of the arrow.
2. Load the batteries making sure that they are positioned correctly (+ to +, - to -).
3. Replace the back cover.

Important:
- Do not combine a new battery with an old one.
- Load batteries in the correct position.
- Do not heat, take apart, or throw batteries into fire.
- Do not try to recharge batteries. Do not use rechargeable batteries.
- If the solution of batteries comes in contact with your skin or clothes, rinse with water. If the solution comes in contact with your eyes, rinse them with water and then consult your doctor.

Operation area
The range for operation is about 10 m (33 feet) when the remote control points to the projector. The distance to the screen back to the projector must be less than 5.5 m (18 feet).

Important:
Avoid the direct sunlight or fluorescent light to the remote control sensor. Also keep the distance of more than 2 m between the remote control sensor and fluorescent lamp on the remote control may not work correctly.

Front projection, ceiling mount
For ceiling mount, you need the ceiling mount kit. Ask a specialist for installation. For more details, consult your dealer.

CAUTION:
- Placing the projector on a carpet reduces ventilation from the fan at the bottom and might cause problems. Place a hard board or similar item under the projector to facilitate ventilation of the unit.
- Please the projector more than 1.8m (63 inch) from the wall to prevent blocking the intake, exhaust slots and ventilation of this projector because hot air comes out of it.
- Do not place the projector under the following circumstances, which may cause fire or electric shock.
  - In a dusty or humid place
  - While the projector is lying sideways or upside down
  - Near a heater
  - In a kitchen or oily, smoky or damp place
  - In direct sunlight
Preparin the projector for operation

Getting ready for projection
1. Connect the power cord provided to the projector.
2. Connect the power cord to the wall power outlet.
3. Remove the lens cap.

Warning:
- Do not look directly into the lens when projector is "ON".
- The lens cap is for protecting the lens. If you leave the power on with the cap on, the cap may be warped.

Please remove the lens cap when you turn the power on.
- Use the appropriate power cord for your country.
- A three-pin grounding type power plug is used with the projector. Do not remove the grounding pin on the power plug. If you are unable to insert the plug into the outlet, contact your electrician to replace your A/C outlet.
- Do not place any objects on the power cord, and keep the power cord away from heat sources to avoid breaking the power cord. A broken power cord can cause fire or electric shock.
- Do not revise or alter the power cord otherwise it may cause fire or electric shock. Contact your dealer if the cord is broken.

Caution:
- Plug in firmly and unplug by holding the plug, not by pulling the cable out.
- Do not plug in or out with wet hands. It may cause an electric shock.

To operate projector power ON
1. plug in the power cord, the POWER indicator lights up green.
2. Turn the projector on by pressing the POWER button. The power lamp will be red.

To operate projector power off
- Press the POWER button. The message "POWER DOWN? YES or NO " appears.
- To exit from this mode, choose NO (Some buttons on the remote control do not work for exit from this mode.)
- Press the POWER button again. The light source lamp will be turned off.

Keystone correction
When the projector is turned on, the projected images become brighter gradually. Owing to the different angle of the positions of the projector, image keystone distortion may occur. In case of keystone distortion, the image can be projected regularly by adjusting the keystone correction knob. (±15 degree adjusting angel) (Note: When turning the keystone correction knob, please turn it gently, and never use too much effort, or else unwanted damage should occur.)

- Focusing
The focus length will change with the change of the distance between the projector and the screen, so that the image will blur. Now you can turn the lens gently with your hand, to correct the focal length so as to obtain distinct images.

- Screen mode
When playing DVD discs containing data of letterboxed image, press the 16:9 button. Exit the Widescreen mode, by pressing the 16:9 button again.

Caution:
- When you have finished using this equipment, unplug the power cable from the wall outlet, for safety purposes.

Adjusting Projection Image Size
Refer to the graphic and table below to determine the screen size and projection distance.

</tr>
</tbody>
</table>

Note:
- Position the projector in a horizontal position; other positions can cause heat build-up and damage to the projector.
- Keep a space of 30 cm or more between the sides of the projector.
- Do not use the projector in a smoky environment. Smoke residue may buildup on critical parts and damage the projector or its performance.
- Consult with your dealer for special installation such as suspending from a ceiling.

System function operation

Menu and Operations
Press "MENU" key to enter OSD menu. The OSD menu has 7 sub-menus
1. Input (select input source)
2. PICTURE MENU
3. SOUND MENU
4. FUNCTION MENU
5. OSD MENU and CHANNEL MENU
6. PC MENU

Pressing Mode key on the remote to Enter INPUT source, you can select TV, SCART, YPBPY (HD), PC-RGB, HDMI, AV, S-VIDEO, by pressing "<"/>" key. enter the input source by pressing "<"/>" key. (see picture 6)

The selected item will change to highlight colour.
- "<"/>" key: to move the cursor left or right to select sub-menu
- "<"/>" key: enter sub-menu
- "MENU" key on projector on remote: exit from main menu

Input source

(Picture 6)
See below picture
This TV set allows you to adjust any setting by selecting from the menu screen
1. PICTURE MENU
This first item of the menu is the PICTURE menu.
You can adjust picture effect here, such as PICTURE MODE, CONTRAST, BRIGHTNESS, HUE, SATURATION, SHARPNESS, COLOR TEMP, and SCALE.
Press ▲▼ buttons to move, use ▶ to adjust, press MENU to exit.

Note:
1) PICTURE MODE: USER, STANDARD, MOVIE, VIVID;
2) SOUND MENU
The second item of the menu is the SOUND MENU.
You can adjust the sound here.
Press ▲▼ buttons to move, use ▶ to adjust, press MENU to exit.

Note:
1) MUTE: OFF/ON (disable or enable the sound)
2) PICTURE SWAP: NORMAL, DOWN, LEFT, RIGHT;
3) CHANNEL MENU
CHANNEL MENU, only used in TV source.
You can complete channel search and settings here.
Press ▲▼ buttons to move, use ▶ to adjust, press MENU to exit.

4. OSD MENU
The fifth item of the menu is the OSD menu.
Press ▲▼ buttons to move, use ▶ to adjust, press MENU to exit.

Note:
1) OSD LANGUAGE which can be selected by different software: English; Chinese; Italian; German; French; Portuguese; Spanish; Russian etc.
2) PICTURE SWAP: NORMAL, DOWN, LEFT, RIGHT.

In TV MODE, there is only one item that is different with other source.

5. CHANNEL MENU
CHANNEL MENU, only used in TV source.
You can complete channel search and settings here.
Press ▲▼ buttons to move, use ▶ to adjust, press MENU to exit.

Operator Analog TV
1. Connect the TV cable.
2. Press "mode" to enter into TV input source, then press "OK".

3. Then press "menu" key on the remote to enter into "Channel" menu.

4. Choose correct source system, then choose the subtitle "Auto search" to the next subtitle.
   Select TV sound system. There are 6 sound systems can be selected: AUTO/BG/DK/UL/L.
   For example:
   PAL: China, UK
   PAL-B/G: Australia, Germany, Spain, Switzerland, Italy, Austria
   SECAM-L: France
   PAL-DK: Poland
   Attention: You must switch to TV signal source first, then select TV and sound system, and then select "Auto search". If you don't select correct TV sound system, there will appear noises or no picture no sound.

Note:
1). COLOR, SYS: AUTO, PAL, SECAM, AUTO is recommended
2). SOUND: SYS: I, DK, L, LL, AUTO, BG;
3). AUTO Search:
   Search all the channels automatically

4) MANUAL PROGRAM:
   Search the channels manually
   Channel: select the start channel of the manual search
   Search: press ↓ to begin to search
   Fine: fine tune the current program
   Store: store the program

5) PROGRAM

6. PC MENU
   You can adjust picture here, such as H-position, V-position, clock, phase, auto adjust
User's maintenance

The projector needs proper maintenance. You should keep the lens clean as dust, dirt or spots will project on the screen and diminish image quality. If any other parts need replacing, contact your dealer or qualified service personnel.

Cleaning the Lens

Use a standard lens-cleaning brush or a piece of lens tissue dampened with lens cleaning fluid. The lens surface is fragile. Use only recommended, nonabrasive lens cleaning materials. Do not touch the lens with your fingers.

Cleaning the Projector Housing

Gently wipe with a soft cloth. If dirt and stains are not easily removed, use a soft cloth dampened with water, or water and neutral detergent, and wipe dry with a soft, dry cloth.

Warning

Never open any of the covers on the projector. Dangerous electrical voltages inside the projector can cause severe injury. Do not attempt to service this product yourself. Refer all servicing to qualified service personnel.

Turn off the projector and remove the AC power cord from the power outlet before beginning maintenance work.

Make sure the lens is cool before cleaning.

Do not use detergents or chemicals other than those noted above. Do not use benzene or thinners.

Do not use chemical sprays.

Use a soft cloth or lens paper only.

Simple repair and solution

The New small LED projector is a high-tech product integrating optical, mechanical, and electronic components, with CPU and several protection circuits installed. In case of violating the operation procedure or improper setting, the protection circuit of it will start to work. Then some abnormal symptoms will occur to the It However, as long as you make the correct setting or follow the operation procedure, the failures may be resolved.

</tbody>
</table>

Screen size exceeds screen size specifications.
Brightness and contrast are not adjusted correctly.
The projector is not at a right angle to the screen.

Screen size is within 50" to 150".
Adjust brightness, contrast.
Adjust the angle of the projector to make a right angle to the screen.

When you see the stationary image for a long time, it may remain on the screen if you change the image. It is not a breakdown. The blurred image will disappear in a few minutes.

Red, blue or green dots are viewed on the test of image.
The image is blurred.

The cable for connection with other equipment is not plugged securely into the terminal.
The projector is installed too close to other equipment.

Turn up the volume.
Check connections.

The image is distorted on the screen and noise is heard.

This mark is displayed when an invalid operation is executed (for example, when the COMPUTER or VIDEO button is pressed while the menu is displayed). This is not failure.

Remote control does not work.

The batteries in the remote control used up.

Change new batteries.
Install the battery correctly.
Remove the object.
Close the remote control to projector (max distance: 7m)

If all above method can not solve the problem, please contact us at the dealers immediately. Do not open the machine by yourself.
