### 1.2.2 Battery

This Tablet PC has a built-in li-polymer battery (4000 mA), please pay attention to the following instructions while charging the battery.

1. The charge voltage for this TABLET PC is 5.0V, please confirm it to avoid damage to your Tablet PC or the other dangerous.

2. The Tablet PC will turn off automatically when the battery power gets extremely low, then please charge the battery. It can be charged when the TABLET PC is turned on/off.

3. The battery icon in the task bar will display charging mode when the battery is being charged in turn on mode.

4. The indicator lights red when the battery is in charge;
   The indicator will turn off when the battery is fully charged in power off mode.

5. Please unplug the power cable and charger after charging.
   **Charge time**: It takes 4 hours to fully charged with standard charger in turn off mode, and takes more time in turn on mode.
   **Battery life**: It can last 3-4 hours before charging. (It depends on the applications you are using and the settings of your Tablet PC).

### 1.2.3 SD Card

This Tablet PC support up to 16GB SD card, it is recommend to have a SD card since some applications need its support.

You can install APK applications (such as games etc.) through SD card:
1. Copy the APK file you want to install to SD card.
2. Turn on the Tablet PC and insert the SD card to SD card slot.
3. Enter the installation (path: /mnt/sdcard), select the APK you want to install.
and install it follow the prompts. 

Tips: Do not remove the SD card while it is being accessed to avoid damage to the SD card. Please uninstall the SD card in “settings//storage//SD card” before remove it.

1.2.4 Connecting to your computer

You can manage the files in SD card (add/delete files etc.) through USB connection,

1. Connect the Tablet PC to your computer by USB cable.
2. Place the cursor in the upper of the screen, press and hold down the left mouse button to drag the cursor down, then the notice bar will appear. There are two options in this menu: “USB connected”, “USB debugging connected”

3. Click “USB connected” and then Click “Turn on USB storage”, select “Yes” in popup prompt, then you can manage the files in SD card or copy files to SD card.
You can install various APK applications, such as games etc., through USB connection.
1. Connect your Tablet PC to the computer by USB cable.
2. Double-click the APK application you want to install(make sure the corresponding drives have been installed to the computer).
3. You can unplug the USB cable after the android icon disappearing, then the installation is completed.
2. Main screen operation and setup

2.1 Main screen

Basic operations in a main screen are shown as below, you can scroll up/down within the main screen to browse all the applications. There are five pages in main screen, you can press on the screen and drag left/right to switch pages or press the “..” icon in the lower left corner of the screen to switch, each page will bring different functions depending on the classification. For example, the Media page will bring music, video etc.

You can create shortcut on the desktop for frequently used applications. To create a shortcut:
Press and hold an icon and drag it to an appropriate position, then the icon can be used as a shortcut.
You can delete the unneeded shortcut on main screen by drag the icon to recycle bin, it will not affect the application usage. The recycle bin icon is changed from screen switch button after pressing the shortcut icon.
Figure 2.3 Delete shortcut
2.2 Notice bar and taskbar icons
