

Mobile Power Product Manual

Product description:

- 1.20000 mA high-capacity power
- 2 aluminum thin body, only thick 14MM
- 3.Multi-voltage output mode, support for notebook, tablet, mobile phone and other digital devices flashes corresponding to
- 4.Multiple intelligent security protection: overcurrent, overvoltage, overload and short circuit protection indicator
- 5.LED remaining power intelligent display

Specifications

Types of batteries: lithium ion polymer

Capacity: 20,000 mA

Input: DC14-16V 20000 Haoan

Output: DC12V-16/19V 60W

USB 5V/2A (Max)

Size: 185 * 125 * 14mm

Weight: 527 +-5G

How to charge mobile power

- 1.Connect the adapter to the accessories of mobile DC input, connected to a power source
2. Charging, mobile power LED power indicator (when charging power is the number the power position of the LED flashes)
- 3 full power, mobile power full-bright LED power

The remaining charge indicator

Charge status:

adapter or use

1.LED lights full brightness 81% -100%
cable and

2.LED lights 4 61% -80%

3.LED lights 3 41% -60%
USB output

4.LED lights 2 21% -40%

5.LED lights a 1% -20%
open the mobile

Note: If the mobile power supply is operating
improperly short-circuit protection, in an unbootable
state. To the mobile power charging is activated.

To the laptop charging

1 Make sure the input voltage of the notebook,

mobile power switch to the appropriate voltage

output stalls

2. Choose the right notebook input port adapter,

DC wiring

3.DC line connected connected mobile power

4 long press the power button for two seconds to
open the mobile power, you can charge the device

5 Device fully charged Disconnect..

Charge their cell phones

1 Use your device original USB data cable,

the product accessories to connect the USB

applicable equipment

2 USB charging cable into the the mobile power

port, connection of mobile power equipment

3. long-press the power button 2 seconds to

power can charge the device

4 Disconnect device is fully charged..

Note: mobile power no-load automatic shutdown,
mobile power

within 20 minutes after the power is turned on

to connect the

device will automatically shut down
