1. **Brief Introduction**

Thanks for selecting the color screen GSM/GPRS digital mobile phone. Through reading the manual, you can fully know how to use the mobile phone, appreciate its complete function and simple operating method.

The color screen mobile phone is designed aiming at GSM/GPRS network environment; the phone is Tri SIM card, Tri Standby. However, when one SIM card is calling, the other card can't be called. Besides basic call functions, it also provides many kinds of practical functions, such as phone book, profile, SMS, MP3, video player, taking pictures, video recording and recording, E-book, Game, GPRS internet access, Bluetooth, alarm clock, calculator, world clock, STK, time and date, auto power-on and shut-down, keypad lock, and etc. so that convenient for your work and leisure activities. In addition, it adopts personalized human-computer interface design; its complete function can meet your different requirements.

The color screen mobile phone accords with GSM/GPRS criterion, has obtained the certification of competent authority.

The company reserves the rights to revise the contents of the manual without prior notice.

1.2. **Safety Notice**

If your phone is lost or stolen, please immediately inform the telecom department or commission agents of forbidding the use of
SIM card, so that avoid the economic loss caused by false calling of others.

- When you contact with telecom department or commission agents, they need to know your phone IMEI number (printed on the label on the back of the phone and can be found after taking down the battery). Please copy the number and keep it safe for future use.

In order to use the phone more safely, please adopt preventive measures, for example: set up the PIN code of SIM card, PIN code can prevent your SIM card from being used by others without permission. When leaving the car, please don’t place the phone in a place easy to be seen, you had better to carry with you or lock in the suitcase.

1.3. Safety Alert and Cautions

Before using the phone, please read these cautions carefully so that make sure to use the phone correctly.

1.3.1. General Cautions

- On the plane, in the hospital and other places that forbidden to use the mobile phone, please turn off the phone; otherwise it may affect the normal operation of electronic equipments and medical instruments. Please comply with the relevant regulations if using the phone in these places.

- Please strictly comply with the laws and regulations about the phone use in the driving place. If you use the phone while you are driving, please comply with the following rules: concentrate on driving, pay attention to the road conditions; if the phone has hands-free function, please make a phone call hands free; if the driving conditions are not good, please stop the car, and then dial or receive a call.

- When approaching the places that storing fuel, chemicals or explosives, and etc., please comply with the laws, regulations and the relevant signs.

- Please place the phone, battery and charger in the place out of children’s reach, for fear that the children use them as tools and cause personal injury.

- Your phone only can use the batteries, chargers and other accessories specified by the company for fear that the phone is damaged. If using other batteries and chargers, it may cause liquid leaking, overheat, explosion, fire breakout and other failures of batteries.

- Please don’t use the phone close to weak signal or high precision electronic equipments. Wireless wave interference may cause the mis-operation of these electronic equipments.

- The phone has the function of timely auto power-on, please check the auto power-on and shutdown settings of the phone, so that confirm that the phone will not power on automatically during the flight.

- Please don’t strike, shake or sling the phone violently for fear that the phone is failed or fire breakout.

- Please don’t place the battery, the phone and the charger in the micro-wave oven or high-voltage equipment; otherwise may cause circuit damage or fire breakout and other accidents.

- Please don’t use the phone in the places with inflammable and explosive gas; otherwise may cause phone failure or fire hazard.

- Please don’t place the phone in the places with high temperature, high humidity or a large amount of dust; otherwise it may cause phone failure.

- Please don’t place the phone in the uneven or unstable phone,
prevent the phone from falling off and then cause failure or damage.

- Please only use the original antenna or the antenna being approved by the company. Unapproved and modified antenna or the antenna with additional accessories may damage the phone. Please don’t touch the antenna during a call. Touching the antenna may affect the call quality and make the phone power higher than the required power in normal use. In addition, using the unapproved antenna may violate the regulations in your country.

1.3.2. Cautions of Using the Phone

- Don’t take down or modify the phone; otherwise it may cause the damage, creepage and circuit failure of the phone.
- Please don’t knock the LCD by force or use the LCB to knock other things; otherwise may cause the damage of liquid crystal plate and the leaking of liquid crystal. If liquid crystal enters the eyes, it may cause abolepsia. At this time, please rinse the eyes immediately with clean water (don’t rub the eyes), and see a doctor immediately.
- In very rare cases, if the phone is used in some types of vehicles, it may have bad effect on the electronic equipments in the vehicle. At this time, please don’t use the phone for fear of losing the safety guarantee.
- If your vehicle is equipped with the air bag, please don’t place the phone above the air bag or the area that can be touched after the air bag is swelled, for fear that the phone is applied very strong external force and cause serious damage on the vehicle owner when the air bag is swelled.
- Please don’t touch the keystoke using needles, pen nibs and other sharp objects; otherwise it may damage the phone or cause mis-operation.

- If the antenna is damaged, please don’t use the phone; otherwise it may cause the personal injury.
- Don’t make the phone approach to the magcard and other magnetic objects too closely; radiation wave of the phone may clean out the information stored in the floppy disks, stored value cards and credit cards.
- Please place the drawing pin and other small metal objects in the place that far from the headphone of the phone. The loudhailer is magnetic when it is working and will attract these small metal objects so that may cause personal injury or damage the phone.
- Avoid phone damping, prevent water and other liquid from entering the phone, and then cause short circuit, creepage or other failures of the phone.
- Please use the phone in the place that far from fixed telephone, TV, radio and office automation equipments, for fear that it may affect the using effects of these equipments and the phone.

1.3.3. Cautions of Using the Battery

- Please don’t take down or modify the battery; otherwise it may cause liquid leaking, overheat, explosion or fire breakout of battery.
- Don’t throw the old battery into general life rubbish. Treat the battery according to the regulated indication in the place that definitely regulates the waste battery treatment.
- Please don’t throw the battery into the fire, otherwise it may cause the fire breakout or explosion of the battery.
- When installing the battery, don’t apply pressure forcefully; otherwise it may cause liquid leaking, overheat, explosion or fire breakout of the battery.
- Please don’t make the battery short circuit using the electrical
wire, needle and other metal objects; don’t place the battery, necklace and other metal objects together; otherwise it may cause liquid leaking, overheat, explosion or fire breakout of the battery.

- Please don’t solder the battery contact; otherwise it may cause liquid leaking, overheat, explosion or fire breakout of the battery.

- If battery liquid enter the eyes, it may cause epilepsy; at this time, please don’t rub the eyes using the hand, please rinse the eyes with clean water, and then see a doctor immediately.

- Please don’t use or place the battery near the fire or oven and other high temperature places; otherwise it may cause liquid leaking, overheat, explosion or fire breakout of the battery.

- If the battery is increasing the temperature abnormally, color change, distortion and other phenomena during the using, charging or storing process, please stop using it and then change new battery.

- If leaking liquid of the battery contacts with the skin and clothing, it may cause skin burn, please rinse it with clean water immediately, and see a doctor if necessary.

- If the battery is leaking liquid or giving out strange odor, please take the battery away from open fire immediately, avoid fire breakout or explosion.

- Please don’t make the battery damp, otherwise it may cause overheat, smoking or corrosion of the battery.

- Please don’t use or place the battery under direct sunlight and other high temperature places, otherwise it may cause liquid leaking or overheat, reduce the performance and shorten the service life.

- Please don’t charge the battery continuously for more than 24 hours.

- Please place the battery in the cool and ventilated place away from direct sunlight.

- Service life of the battery is limited. Service time of the battery is gradually shortened after the frequent charging. If many times of charging is failed, it means that battery life is drained, please replace the new battery of designated type.

1.3.4. Cautions of Using the Charger

- Please don’t take down or modify the charger; otherwise it may cause personal injury, electric shock, fire breakout or charger damage.

- Please use 220V alternating current. Using other voltage may cause creepage, fire breakout and damage the phone and the charger.

- Short circuit of the charger is forbidden; otherwise it may cause electric shock, smoking and charger damage.

- Please don’t use the charger when the power cord is damaged; otherwise it may cause fire breakout or electric shock.

- Please clean the dirt that accumulates in the power socket in time.

- Please don’t place the water container, and etc. near the charger, for fear of water splashing and then cause short circuit, creepage or other failures.

- If the charger contacts water or other liquid, please cut off power supply immediately, so that prevent short circuit, fire breakout, electric shock or charger failure.

- Don’t use the charger in the bathroom and other high humidity places; otherwise may cause electric shock, fire breakout or charger damage.

- Please don’t contact the charger, electrical wire and power socket with wet hands; otherwise it may cause electric shock.

- Don’t place heavy object on the power cord or reconstruct the
electrical wire; otherwise may cause electric shock or fire breakout.

- Please pull out the charger plug from power socket before cleaning and maintenance.
- Seize the charger when pulling the plug, pulling the power cord will damage the electrical wire, cause electric shock or fire breakout.
- Don't charge in the following places: direct sunlight and other high temperature places; wet and ashy place or the place with large vibration (will cause failure); near TV, radio and other home applications (will affect the image and sound effects).

1.3.5. Cleaning and Maintenance

- Please don’t use the phone, the battery and the charger in the bathroom and other high humidity places, and prevent them from rain.
- Please clean the phone, the battery and the charger using soft and dry cloth.
- Please don’t wipe the phone using alcohol, thinner or benzene and other chemical reagents.
- The socket with dirt may cause poor contact and power-off, so that can’t be charged, please clean it regularly.

**2.2. Install SIM Card and Memory Card**

**2.2.1. SIM card**

Before using the phone, you must insert valid SIM (Subscriber Identity Module) card in the phone. SIM card is provided by network supplier.

All the information related to network connection are recorded in the chip of SIM card, also the names, telephone...
numbers and SMS that storing in the phone book of SIM card. You can take out SIM card from your phone, and use it in any GSM mobile phone (new mobile phone can read SIM card automatically).

In order to avoid losing or damaging the information saves in SIM card, please don't touch the metal contact surface, and place SIM card in the place that away from electricity and magnetic force. Once SIM card is damaged, you can't use the phone normally.

Prompt: Please make sure to power off the phone before taking out SIM card. It is absolutely forbidden to insert or take out SIM card with external power supply; otherwise it may damage SIM card and the phone.

2.2.2. Insertion and Taking out SIM Card

Metal contact surface of SIM card is easily scratched. You must take out SIM care carefully before the assembly.

■ Power off the phone, remove the rear cover, battery or other external power supply.

■ according to the prompt shown on the card slot of SIM card, press the card slot of SIM card using the finger, and then move at the direction of OPEN, open the card slot cover of SIM card, make one end with metal card and metal surface face downward, place the SIM card in the card slot, close the card slot of SIM card, press the card slot of SIM card using the finger, and then moves at the direction of LOCK.

■ When taking out SIM card, directly pull it outward and then can take out SIM card.

Prompt: If not special explanation, the explanation in the text is described according to the conditions of inserting three SIM cards; if you only insert one SIM card, then some menus may not be shown.

2.2.3. Memory Card

■ Take out the rear cover and battery, according to the prompt shown on the card slot of memory card, press the card slot of memory card using the finger, and then move at the direction of OPEN, open the card slot cover of memory card, make one end with metal card and metal surface face downward, place the memory card in the card slot, close the card slot of memory card, press the card slot of memory card using the finger, and then moves at the direction of LOCK, the other memory card is also inserted in this way.

Prompt: If the memory card is failed, please check whether it is correctly placed and good contact of metal point.

2.3. Battery

2.3.1. Install the Battery

■ Take out rear cover of the phone.

■ Make one end of battery with metal surface aim at the battery connector.

■ Then gently press the battery downward using the finger, and then press the other end to install the battery.

Prompt: Please operate correctly so that avoid damaging the battery connector.
2.3.2. Charging

Insert the charger in the charging interface at the side end of the phone.

After inserting the charging plug, battery strength icon stripe at the top right corner of the screen is scrolling, which means that the charging is processing; when the stripe is full of the whole icon and stop scrolling, which means that the battery charging is completed; after the charging is completed, press the button at both sides of the charger, and then pull out the plug.

When electric quantity is not enough, warning message will be sent; and electric quantity shows empty. When electric quantity is too low, the phone will power off automatically. Please don’t make the battery in the status of not enough electric quantity for a long time; otherwise it may damage the battery quality and service life. Please don’t charge the battery for a long time.

Prompt: In order to ensure normal operation of the phone, please make sure to use the designated charger.

2.4. Security Password

- PIN

PIN (Personal Identification Number) is used to prevent your SIM card from being used illegally. PIN is usually provided with SIM card together. If you input wrong PIN for continuous three times, please input PUK to unlock it. Please contact with network operations company for more details.

- PIN2

You need to input PIN2 when entering some functions (such as call charge); if you input wrong PIN2 for continuous three times, you need to input PUK2 to unlock it. Please contact with network operations company for more details.

- PUK

When changing the locked PIN, you need to input PUK (Personal Unlock Key). PUK is provided with SIM card together. If it is not provided, please contact with your service provider. If you input wrong PUK for continuous ten times, the SIM card can’t be used again. Please contact with your service provider to buy new card. You can’t change PUK. If you lose the code, please contact with your service provider.

- PUK2

When changing the locked PIN2, you need to input PUK2. If you input wrong PUK2 for continuous ten times, you can’t change the functions that need PIN2. Please contact with your service provider to buy new card. You can’t change PUK 2. If you lose the code, please contact with your service provider.
3. Quick User Guide

The phone has not only the basic functions of mobile phone, but also support rich, practical and rapid feature functions, can be briefly introduced as follows:

- **Multi-SIM**: The phone is Tri SIM card, Tri Standby.
- **Flashlight**: The phone has built-in flashlight which can be switched on by long pressing the OK key, and switched off by pressing the Red key.
- **Phone book**: Each phone book record stores in the phone book can accord with three telephone numbers at most, the phone can store 500 records at most; can send SMS and MMS in the phone book, copy phone book record between SIM card and the phone.
- **Profile**: Custom the ringtone (include ringtone setting, volume adjustment, incoming call prompt, SMS prompt, alarm clock prompt, key tone, low voltage warning tone, power-on and power-off tone) according to different events or environment.
- **Call log**: The phone will automatically store the information of call log for you to check; support to call the telephone number in the call log; support to save the telephone number in the call log to phone book and set as rejected call; support the function of sending SMS, MMS, and etc. to the phone numbers in the call log.
- **Media**: Your phone provides all kinds of entertainment services, include player, camera, game and other functions.
- **Camera**: The phone supports photo taking and video recording. You can customize the photo taking and video recording, and switch between preset and post video cameras.
- **Network services**: The phone supports WAP services. Using WAP browser to access and enjoy wireless network, obtain rich information.
- **Personal assistant**: The phone supports various partial functions. Supports Bluetooth, alarm clock, calculator, calendar and schedule, world clock and other functions.
- **System settings**: You can customize the phone according to the needs, include display settings, phone settings, call settings and other functions.
- **Input method**: The phone supports various input modes, which is convenient for you to input English, letters, numbers, Chinese characters, symbols, and etc.

3.1. Dial a Call

In the standby mode, numbers will be shown after pressing the keyboard screen, input the numbers you want to dial, and then press Dial key to dial a call.

- **Switch**: Hold a call, switch again to call normally.
- **Phone book**: During a call, you can enter the phone book and conduct the relevant operations.
- **SMS**: During a call, you can enter SMS and conduct the relevant operations. During a call, you can’t send and download MMS.
- **Call log**: Enter the call log interface.
- **Begin to record**: Enter Record during a call, the file is stored in Record menu.
- **Send sound**: when connecting to Bluetooth earphone successfully, you can switch the call sound to the
3.2. Reject a Call
You can press Hang up key to reject an incoming call.

3.3. Receive a Call
When an incoming call arrives, the phone will give out the corresponding prompt (such as vibration, ring, and etc.); if network support, the phone screen will show the name and telephone number of the caller; at this time, you can press Dial key to receive an incoming call.

3.4. End a Call
After finishing a call, you can press Hang up key to end a call.

3.5. Emergency Services
You can directly dial a emergency service call without SIM card.
Different network uses different emergency numbers, please consult your network operations company for more details.

3.6. Extension Speed Dial
After inputting telephone number, if you want to input branch number, please press and hold "*", input your extension number after the display screen shows “P”. After getting through the call, it will directly dial the extension.

3.7. Dialed Calls/Missed Calls/Received Calls/Rejected Calls
You can enter call log to check the relevant details of dialed calls, missed calls, received calls and rejected calls.
Prompt: The record of incoming call from blacklist number will be saved in Rejected Calls.

3.8. Call Forward
After call forward function is started, according to different forward conditions settings (Call Forward Unconditionally, Forward Busy, Forward No Answer, Forward Can Not Reach), you can select to switch the incoming call to voice inbox or other telephone numbers.

3.9. Call Waiting
After call waiting function is started, when you are calling, the other call can be put through.

3.10. Call Barring
After call barring function is started, according to different restricted conditions setting (all the dialed calls, all the incoming calls, incoming calls when roaming, outgoing international calls, outgoing international calls when roaming), you can restrict the call under the corresponding conditions (need to apply to network operator for business).

3.11. Power off the Phone
In the standby mode, press and hold Hang Up key to power off the phone.
4. Function Menu

4.1. Contacts

This function could help you browse the phone book, store, edit and delete the names and phone numbers in the phone and SIM card. To facilitate the management of the records, this phone sets the group function, collecting the similar items into a group. The storage capacity of the SIM card varies and the maximum storage capacity of this phone is 500.

Under the standby interface, press the right soft key to enter the interface of the phone book. When the record of the phone book is not empty, press the left soft key for the following operation:

Note: Take the records in SIM card 1 for example.

4.1.1. New

Create new phone book records to SIM card or the mobile phone.

4.1.2. Contacts search

Search the phone number by inputting the first character of each name.

4.1.3. Write message

Send SMS or MMS to this record.

4.1.4. Dial up

You can dial this record directly or use IP dial.

4.1.5. Send vcard

You can send vcard by SMS or Bluetooth.

4.1.6. Delete

Delete this record.

4.1.7. Mark

You can mark this record or mark all records.

4.1.8. Copy

Copy to phone
Copy all to phone
Copy all to SIM 1
Copy all to SIM 2
Copy all to SIM 3
Copy to memory card

4.1.9. Others

- Speed dial setting
Set this record into shortcut dial. After setting, under the standby interface, long press the number key you’ve set to call this record.
Note: Under standby interface, long press number key 1 will enter the voice mailbox of SIM card 1.
Under standby interface, long press number key 2 will enter the voice mailbox of SIM card 2.
Under standby interface, long press number key 3 will enter the voice mailbox of SIM card 3.

- **Own Number**
  Could set the number of this phone in SIM1, SIM2 and SIM3.
- **Memory query**
  Could enquire the capacity of SIM1, SIM2 and the phone.
- **Single line/Double line**
  Could set the numbers display style in single line or double line.

4.2. **Message**

4.2.1. **Write messages**

- **SMS**
  You could write new message by using this function. When you input the message to be sent, press the left soft key to send to a particular person and a special group, add symbol, add the templates, contact person information and save, etc.
  --Send: Enter the interface to input the number, or press the left soft key to enter the phone book and choose the number to send.
  --Group message: You could input the phone number, or press the left soft key to choose the group or choose the records from the Call History to send.

  --Add symbol: Enter the symbol interface and add the symbols to the message.
  --Insert the templates: Enter the templates interface and you could insert the template to the message.
  --Add the information of the contact person: Enter the Phone Book interface and you could insert the phone book information to the message.
  --Save: Save this message to the drafts.

- **MMS**
  You could edit the picture message, add pictures or rings with this function.
  Select the “Picture Message” and enter, now you could edit the receiver, forwarder and confidential receiver, edit the title, content, send, preview, save and set the timing send.
  --Send: Send the edited picture message.
  --Receiver: Edit the receiver of the picture message, or enter the phone book to choose the number, or choose Group, or delete or modify the receiver.
  --Forwarder: Edit the forwarder of the picture message, or enter the phone book to choose the number, or choose Group, or delete or modify the receiver.
  --Confidential receiver: Edit the confidential receiver of the picture message, or enter the phone book to choose the number, or choose Group, or delete or modify the receiver.
  --Edit title: Edit the theme of the picture message.
  --Edit content: Enter the menu of the Edit Content, press the left soft key to insert new page or picture, edit the words, insert the sound, the playing time of the current page, delete the picture, sound or the current page, last page, next page.
  --Preview: Preview the edited picture message.
4.2.2. Inbox

Store the message and picture message you’ve received. The message and picture message could be differentiated by different icons. The icon after the message list means whether this message is stored in SIM1, SIM2 or SIM3.

Choose one message and press the left soft key, you could Reply the message or picture message, Forward, Reply the phone, Delete, find the Message Details or Delete All.

--Open: Read the message.
--Reply message: Reply the message.
--Reply picture message: Reply the picture message.
--Forward: Forward the selected message to others.
--Reply the phone: Call the receiver.
--Delete: Delete this message.
--Message details: View the details of the message.
--Delete all: Delete all the messages in the inbox (including the message and picture message)

Choose one picture message and press the left soft key, you could Play, view Details, Delete, Reply Picture Message, Reply Message, Reply Phone, Save Picture, Save Music and Delete All.

--Play: Play this picture message.
--Details: View the time, size, theme, sender, receiver, forwarder and priority of the picture message.

--Delete: Delete this picture message.
--Reply picture message: Reply the picture message.
--Reply message: Reply the message.
--Forward: Forward this picture message to the others.
--Reply the phone: Call the receiver.
--Save picture: How to save the picture in the picture message, you could view in “My file”.
--Save music: How to save the music in the picture message, you could view in “My file”.
--Delete all: Delete all the messages in the inbox (including the message and picture message)

4.2.3. Outbox

Store the message and picture message you’ve sent in failure. The message and picture message could be differentiated by different icons. The icon after the message list means whether this message is stored in SIM1, SIM2 or SIM3.

Choose one message and press the left soft key, you could Open, Send, Forward, Reply phone, Delete or Delete all.

--Open: Read the message.
--Send: Send this message.
--Forward: Forward this message to the others.
--Reply the phone: Call the others.
--Delete: Delete this message.
--Delete all: Delete all the messages in the inbox (including the message and picture message)

Choose one picture message and press the left soft key, you could Send, Play, Edit, Delete or Delete all.

--Send: Send this picture message.
--Play: Play this picture message.

5. Text Input

The device provides several text input modes so that you can write text or input data in your “contacts”, edit “contacts” record, search English names and write SMS and to-do list.

In “text input” mode, if you want to change the input way, you can press “#” key. The selected input way will appear on the top left of the screen.

Letter (Capital, Normal)

Enter into edit page, press “#” and switch the input mode to “mEng”, then press the keys on keypad, selected letters will appear on the screen.

Number

Enter into “edit” mode, press “#” and switch the input mode to “123”, then press the keys, number will appear on the screen. The key 0-9 separately represents the figure from 0-9. You can press corresponding key to get desired number. Press right selection key can delete the number you input.

Punctuation

Enter into the “edit” mode, press key “*”, the punctuations will appear. You can scroll the direction key so that the cursor can select desired punctuation. Press left selection key can select the desired punctuation.

6. Care and Maintenance

Maintenance of battery

- Your device is powered by a rechargeable battery. It is necessary to have the battery charged when it is going to wear out. The full performance of a new battery is achieved only when it is fully wore out.
- Unplug the charger from the electrical plug and the device when not in use. Do not leave fully charged battery connected to a charger over a week, since overcharging may shorten its lifetime.
- Temperature tends to affect the limit of battery to be charged. Therefore, it is necessary for the battery to be cooled or warmed before it is charged. If the temperature of battery exceeds 40°C, the battery cannot be charged.
- Use the battery only for its intended purpose and avoid short-circuiting. Accidental short-circuiting can occur when a metallic object causes direct connection of the positive(+) and negative(-) terminals of the battery.
- Do not use damaged battery.
- Leave the battery in hot or cold places will reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily, even when the battery is fully charged.
- Do not dispose of batteries in a fire as they may explode. Dispose of batteries according to local regulations.

Care of maintenance of your device

The suggestions below will help you protect your warranty coverage.
- Keep the device and accessories out of the reach of small children.
- Keep the device dry. All types of liquids or moisture will corrode
electronic circuits.

- Do not store the device in hot areas. High temperatures can shorten the life of electronic devices and warp or melt certain plastics.
- Do not attempt to open the device other than as instructed in this guide. Non-professional handling may damage the device.
- Do not use harsh chemicals or strong detergents to clean the device.
- Use only the supplied or an approved replacement attachments, for the unauthorized ones could invalidate the warranty of maintenance.

7. Additional Safety Information

Remember to follow any special regulations in force and use the device only in its normal operation positions.

Traffic Safety
- Unless there is an emergency, otherwise do not use the device when you are driving a vehicle without safety wireless equipment. Please park the vehicle in a safe place before you use the device in order to guarantee that you pay all attention to drive. Observe related regulations.
- In case there is no adequate protection, certain electronic systems of the vehicle may be affected by the electric wave of the device.
- You are suggested to use the device only in vehicles with antenna.
- Only qualified personnel should install the device in a vehicle.

Aircraft Safety
Switch off your device before boarding an aircraft. The use of wireless teledevices in an aircraft may be dangerous to the operation of the aircraft, disrupt the wireless telephone network, and may be illegal. The GSM service will be unavailable. Using your device while flying in aircraft is prohibited.

Environment Safety
- Remember to follow any special regulations in force in any area, and always switch off your device when its use is prohibited or when it may cause interference or danger.
- Operation of any radio transmitting equipment, including wireless phones, may interfere with the functionality of inadequately protected medical devices. Consult a physician or the manufacture of the medical device to determine if you have any questions.
- Your device may interfere with some hearing aids, pacemakers
and other medical devices. Please obey the suggestions provided by physicians or medical device manufacturers.

- You are suggested to switch off the device in any area with potentially explosive atmosphere, such as gas station, chemical factories etc.
- Observe restrictions on the use of radio equipment.
