Phone settings

Time and date

Set time: Directly input the time or press **[Up /Down Key]** to set it.

Set date: Directly input the date or press **[Up /Down Key]** to set it.

2.2 Select language

You can select the language you want.

Power on/off

You can set the phone to switch on/off at a scheduled time. For the setting method, please refer to "Alarm".

Caution:

Power on PWD doesn't have the limitation of not being able to be set if you are wrongly inputting. Please remember to be careful about the Power on PWD, otherwise, the phone won't be switched on normally once password forgotten.

Guardlock

Guardlock (MSD) is nicknamed as Mobile Phone Dog. When others illegally use your phone, information like CELLID of the phone will be collected and sent to preset mobile phone;

moreover, the function will prevent others to use the phone after certain times or certain power-on times.

This function is defaulted to be off. To activate it, please modify the password. Then you need to enter the password if you want to activate, deactivate, or modify the password to process operation, and the password has 6 digits. To activate it, you have to enter a preset mobile phone number (The mobile phone number set to receive the message if the phone is stolen) apart from the password.

After activated, the phone stores the IMSI number for original SIM card, which is sole and unique, if you insert another SIM card, there will be a prompt, asking you to input the guardlock password. If you wrongly enter the password for three times in succession, the phone will default it as illegal and display a relevant prompt, then collect and send information like CELLID, LAC, MCC, MNC, MCN to preset mobile phone number. While receiving this message, legal user can report it to the police, who can inquire the illegal usage situation (Including the used location, call history, etc) from network operator via the piece of information.

The message will be kept sending to the preset mobile phone till it is successfully received. If the stolen phone is on over 24 hours or re-switch on, the phone will resend a message to your preset phone number. When the message has been successfully sent up to 15 times, any illegally used SIM card won't work in the stolen phone, which will automatically switched off.

Caution:

Please report to the police timely if the phone is stolen, but this doesn't mean that the lost phone will be definitely traced back. Therefore, please take care of your personal property.

If the phone defaults the SIM card inserted is illegal, then guardlock function can not be activated, and relevant setting can not work. If another SIM card is inserted, enter correct password, message count will be sent from zero, meanwhile, there will be a prompt, asking you whether to bind this SIM card. Select binding, then the phone will renew the IMSI number and default the SIM card as the designated one.

❖ **Activated:** Before activating this function, please set the password first, if password

hasn't been set, the phone will hint "Change password first", then please enter **[Change password]** to finish the password setting and back to activate this function. While activating it, guardlock password and notified mobile phone number (The number to receive the information of the SIM card illegally used in the stolen phone) are required. After these, guardlock function will work.

❖ **Off:** To deactivate guardlock function, you should input correct Guardlock password.

❖ **Change password:** Modify guardlock password.

Warning:

Please use this function carefully. The phone won't be used if password forgotten.

Restore settings

Reset all parameter values into default status. Please enter the privacy preserving password (Initial password is 1234) to resume factory setting.
