- SIM1 network account: Set the SIM1 network port.
- SIM2 network account: Set the SIM2 network port.
- SIM3 network account: Set the SIM3 network port.
- Download image: After enabling this function, the image will only be displayed after being downloaded.
- Play background sound: After enabling this function, you can play background music.
- Accept push: If enabling this function, you can receive Push messages.
- 전시: Do not arbitrarily change the settings, or you may not normally visit the website.

Installing Storage card

(1) Hold on [End Key] for about three seconds to switch off the phone.
(2) Remove the battery cover.
(3) Follow the arrow direction of "OPEN" on the T-Card slot cover, open card slot cover, put the T-Card into the slot vertically, make sure that the gold contacts of the card face upwards, until the card fixes itself in the card slot.

WAP settings

- Clear cache: In order to avoid congestion and improve the web browsing speed, please clear the cache regularly.
- SIM1 network account: Set the SIM1 network port.

Settings

Call settings

- Multi-SIM
- Standby mode: You can select the standby mode for SIM card.
- Main SIM settings: There are several types as per below:
  - Call: You may choose SIM card type to be used according to your need, and you may also choose to have prompt choice while using call functions.
  - Speed dial: If enabling this function, you can speed dial the phone number via the preset SIM card.
  - Set SIM name: You can name the Card as you want.

Network selection

- Auto select: The phone can automatically search and register available networks.
- Manual select: In this function, the phone will search for the network, and list all searched networks, then you need to choose the one needed to register.

Call divert

Based on the set diverting conditions, incoming calls will be forwarded into voice.
The message will be kept senting to the preset mobile phone number. If the stolen phone is over 24 hours or re-switch on, the phone will resend a message to your preset phone number. If the phone hasn't been successfully sent up to 15 times, any illegally used SIM card won't work in the stolen phone, which will automatically switched off.

Caution: Please report to the police timely if the phone is stolen, but this doesn't mean that the lost phone will be definitely traced back. Therefore, please take care of your personal property.

If the phone defaults the SIM card inserted is illegal, then guardlock function can not be activated, and relevant setting can not work. If another SIM card is inserted, enter correct password, message count will be sent from zero, meanwhile, there will be a prompt, asking you to bind this SIM card. If you activate, then the phone will renew the IMSI number and default the SIM card as the designated one.

Activated: Before activating this function, please set the password first, if password hasn't been set, the phone will hint "Change password first", then please enter (Change password) to finish the password setting and back to activate this function. While activating, guardlock password and notified mobile phone number (The number to receive the information of the SIM card illegally used in the stolen phone) are required. After these, guardlock function will work.

Off: To deactivate guardlock function, you should input correct Guardlock password.

Change password: Modify guardlock password.

Warning: Please use this function carefully, the phone won't be kept if password forgotten.

Restore settings
Reset all parameter values into default status. Please enter the privacy preserving password (Initial password is 1234) to resume factory setting.
