Clearing the list of previously stored pages:
1. Press HOMEN and then press the "-" button.
2. Press MENU, and then press the "-" button.
3. On the Home screen, press MENU, and then tap Clear Memory.
4. Tap the page that you want to clear.
5. Press HOME, and then press the "-" button.
6. Press MENU, and then tap the "-" button.
7. On the More Options screen, select the page you want to view, and then tap the"-" button.

Clearing the list of most visited pages:
1. Press HOMEN, and then press the "-" button.
2. Press MENU, and then press the "-" button.
3. On the Home screen, press MENU, and then tap the "-" button.
4. On the bookmarks screen, press MENU, and then tap Clear History.

Thumbnails, List, or Edit change the view for example. If you are in Thumbnails view and you want to view bookmarks in a grid, press MENU > List, and then press MENU > Grid.

Setting/'instructor options:
Customize the code learned in your training software for display, privacy, and security options when using the instructor.
1. Press HOME, and then press the "-" button.
2. Press MENU, and then tap Home > Learn.

1.4 Using your phone as a modem (data-connection)

This allows you to connect your phone to a computer at any time, using your phone's data connection. For information on setting up and using the data connection, see "Data connection" earlier in this chapter.

To enable your phone's data connection in your phone, tap "Settings" in the Data connections section of the phone.

1. Tap the phone's Sim card icon to enable the phone's Sim card.
2. Tap the phone's data connection icon to enable the phone's data connection.
3. Tap the phone's data connection icon to disable the phone's data connection.
14. Bluetooth

14.1 Using Bluetooth

Bluetooth is a wireless technology that allows devices to exchange information over a distance of about 10 meters without requiring a physical connection.

To turn on Bluetooth:

1. Press HOME + MENU, and then tap Settings > Wireless & networks.

2. Select Bluetooth, then turn it on.

3. When the Bluetooth icon is on and available, tap it to turn on Bluetooth.

4. Tap the name of the device to connect it to your phone.

5. Enter the passcode on your phone if prompted and then tap OK.

Changing the passcode

You can change the passcode on your phone to another device.

1. Press HOME + MENU, and then tap Settings > Wireless & networks.

2. Tap Bluetooth settings > Security > Change passcode.

3. Enter the new passcode, then tap OK.

14.2 Connecting to a Bluetooth device

You can use Bluetooth to connect your phone to other devices, such as headphones, headsets, or car kits.

1. Press HOME + MENU, and then tap Settings > Wireless & networks > Bluetooth settings.

2. Tap Bluetooth, and then turn it on.

3. Tap Search, and then select the device you want to connect to.

4. Tap Connect, and then enter the passcode if prompted.

5. When the devices are connected, press and hold the device to disconnect.

14.3 Unpairing from a Bluetooth device

You can use Bluetooth to connect your phone to another device, such as headphones, headsets, or car kits.

1. Press HOME + MENU, and then tap Settings > Wireless & networks > Bluetooth settings.

2. Tap Bluetooth, and then turn it on.

3. Tap Search, and then select the device you want to unpair from.

4. Tap Unpair, and then enter the passcode if prompted.

5. When the devices are unpaired, press and hold the device to reconnect.

14.4 Enabling and disabling Bluetooth

You can use Bluetooth to connect your phone to other devices, such as headphones, headsets, or car kits.

1. Press HOME + MENU, and then tap Settings > Wireless & networks > Bluetooth settings.

2. Tap Bluetooth, and then turn it on or off.

3. When the Bluetooth icon is on or off, tap it to turn it on or off.

4. Tap Search, and then select the device you want to connect to.

5. Tap Connect, and then enter the passcode if prompted.

6. When the devices are connected, press and hold the device to disconnect.

14.5 Bluetooth settings

You can use Bluetooth to connect your phone to other devices, such as headphones, headsets, or car kits.

1. Press HOME + MENU, and then tap Settings > Wireless & networks > Bluetooth settings.

2. Tap Bluetooth, and then turn it on.

3. Tap Search, and then select the device you want to connect to.

4. Tap Connect, and then enter the passcode if prompted.

5. When the devices are connected, press and hold the device to disconnect.

6. Tap Search, and then select the device you want to connect to.

7. Tap Connect, and then enter the passcode if prompted.

8. When the devices are connected, press and hold the device to disconnect.
17. Music
17.1 Choosing the Music application
Music lets you listen to and manage music on your phone using the Music application. You need to make sure that a song or playlist is ready to be played when you access the Music application, so you won't need to worry about asking the app to find the song while it's playing.

17.2 Playing music
Start the Music application from the home screen. You will then see a screen that displays all of your music. To play a song, select it and press the play button on the screen. You can also shuffle songs using the shuffle button, which is located in the bottom right corner of the screen. When you're done listening to a song, press the stop button to stop the music.
10. More apps

41. YouTube

YouTube is an online video sharing service that allows you to view videos that have been uploaded by YouTube users. To use YouTube on your computer:

1. Open YouTube (www.youtube.com).

Searching videos:

1. Press HOME, then tap YouTube.

2. Tap the search icon to search through the list of videos, and then tap a video to watch it.

3. While watching a video, use:
   - Tap the screen to display the play-head controls. When the playback controls are displayed, you can pause, play, fast forward, or backward, as long as the video is in the playback state. When you want to watch:
   - From HOME, tap, or, in HOME, tap on the video icon, and select Watch the video.

Setting the video quality:

1. Press HOME, then tap YouTube.

2. Press HOME once more, tap Settings.

Sharing a video:

1. Select Share Video by tapping it. Fill in your contact.

2. On the YouTube screen, tap a video to watch from the available categories.

3. While watching a video, press MENU, and then tap Share.
Finding and installing apps from Android Market

(available by country)

Android Market lets you find and install apps for your phone. Choose from a wide variety of free and paid apps ranging from productivity apps, entertainment, to games.

To access Android Market, open the Market app on your phone's home screen.

Finding and installing an app

1. Tap Menu, then tap Market. The Market app is installed on your phone if you have already downloaded and installed it from the Android Market.
2. Tap the app to read a description of the app and install it.

Finding and installing an application

When you install apps from Android Market and use them on your phone, they may require access to some personal information such as your location, contact data, and access to certain functions or settings of your phone. Download and install only apps that you trust.

1. Press HOME, and then tap Market.
2. When you open Android Market for the first time, the Terms of Service window will open. Tap Accept to continue.
3. To find an app, tap Market, then tap the search box to find the app you need.

Troubleshooting an app category, you can select the apps by Tap next, Tap Next on your phone.

- Tap apps on memory only data storage on a computer.
- Tap apps on a computer, turn off the Android Market to speed up, turn off the computer, and then tap the right side of the screen box.
- Tap apps on a network device, turn off the app and start over.
- Tap an app in a separate box at the app and start over.
- Tap applications that are installed online. Tap the application to download it online.
- Tap applications that are installed offline. Tap the application box to download it online.

This application is only data storage on a computer.

Troubleshooting an app category, you can select the apps by Tap next, Tap Next on your phone.

- Tap apps on memory only data storage on a computer.
- Tap apps on a computer, turn off the Android Market to speed up, turn off the computer, and then tap the right side of the screen box.
- Tap apps on a network device, turn off the app and start over.
- Tap an app in a separate box at the app and start over.
- Tap applications that are installed online. Tap the application box to download it online.
- Tap applications that are installed offline. Tap the application box to download it online.

After installing an app, tap the app on the app's left side of the screen to return to Android Market home. You can also press HOME, and then tap Device.

Creating a Google Checkout account

You must have a Google Checkout account associated with your Google Account in order to use Android Market.

Do any of the following:
1. On your computer, go to http:// checkout.google.com to create a Google Checkout account.
2. The first time you use your phone to buy or sell through Android Market, you'll be prompted to enter your billing information in the app's Google Checkout account.

When you submit your Google Checkout account information, you'll be asked to confirm your identity by completing your credit card information. Once your identity is confirmed, you can use your Google Checkout account to make purchases through Android Market.

Registering a credit card for an app

1. You must be satisfied with all the requirements, you can not be sold within 24 hours of the system. Your credit card is not charged and the app is uninstalled from your phone.
2. If you change your mind, you can install the application again, but you can't support a refund a second time.

1. Press HOME, and then tap Market.
2. Tap the application to install it for a credit. The credit option for the application option is...
### 23.3 Optimizing your phone's battery life

When you're on the go, it's never easy to change your phone's battery as often as you would like. Follow these tips to extend the life of your battery:

- Turn off automatic features such as Bluetooth, Wi-Fi, and data connection when you're not using them. See the Battery & Location chapter for details.
- Use only O2 networks. See "Using the O2 network of your mobile operator" in this chapter for details.
- Do not use GPS and turn off your location services. See the Battery & Location chapter for details.
- Leave the screen darker. See "Making the screen brightness adjustable" in this chapter for details.
- Turn off all screen vibrations. See "Making screen vibrations on or off" in this chapter for details.
- Use power-saving settings such as Internet browsing. Battery use increases a lot of power.
- Avoid making any long phone calls or using the camera for extended periods of time.
- Consider carrying a spare battery for those times when you can't charge your battery for an extended period.
- Reduce power usage by dimming your screen. Consider reducing your battery usage by adjusting your screen brightness to a lower level.

Using the O2 network of your mobile operator

Install and use the O2 network of your operator if you are not using a 3G connection to access the Internet. Downloading in your mobile's O2 network consumes less battery power.

1. Press O2 Menu > Settings, and then tap Settings > Wireless & networks.
2. Tap the airplane icon, and then tap Use Wi-Fi only (or Network only).
3. Tap OK to save.

Checking the power usage of applications

1. Press O2 Menu > Settings, and then tap Settings.
2. Tap Battery, and then tap Phone usage > Battery usage.

23.4 Managing memory

Checking how much memory is available on your phone

1. Press O2 Menu > Settings, and then tap Settings.
2. Tap Memory & SD card, and then tap SD card & phone storage. The total available memory is displayed in the bottom of memory storage section.

Checking the available storage and data

1. Press O2 Menu > Settings, and then tap Settings.
2. Tap Memory & SD card, and then tap SD card & phone storage. The total and available storage and data is displayed in the top of memory storage section.

Checking application cache and data

1. Press O2 Menu > Settings, and then tap Settings.
2. Tap Memory & SD card, and then tap Applications > Manage applications.
3. On the Manage applications screen, tap the application whose cache and/or data you want to delete.
4. Press Menu button up and then to delete.
33. Backup, update, and reset

23.1 Backing up phone data

Your phone features an automatic backup system that backs up some user-specified bookmarks, contacts, messages, and settings to the microSD card. The phone automatically backs up the data whenever it's charged.

The phone backs up the following data:
- ID and call history
- Messages and settings
- User-specified bookmarks
- Keyboard dictionary
- Settings:
  - Windscreen & network
  - Sound & display
  - Location
  - Applications
- Date & time
- Language & keyboard (only for specific settings)

To perform a complete run-through your phone to back up your data, see "Restoring the settings and Englishodynamic.

The following steps are in turn, as they correspond to the SD card in your phone:

1. Press the "Settings button, and then tap Settings.
2. Scroll down the settings, and then tap Settings > Back up phone.
3. Make sure that the first step is set to check box, and then continue.

Restoring backed-up data to your phone:

After you've backed up your phone's data, you can now restore it by following these steps:

1. Press the "Settings button, and then tap Settings > Back up phone.
2. Make sure that the first step is set to check box, and then continue.

1. After you've backed up your phone's data, you can now restore it by following these steps:
2. Press the "Settings button, and then tap Settings > Back up phone.
3. Make sure that the first step is set to check box, and then continue.
4. After you've backed up your phone's data, you can now restore it by following these steps:
5. Press the "Settings button, and then tap Settings > Back up phone.
6. Make sure that the first step is set to check box, and then continue.
7. After you've backed up your phone's data, you can now restore it by following these steps:
8. Press the "Settings button, and then tap Settings > Back up phone.
9. Make sure that the first step is set to check box, and then continue.
