14. Place the SIM card in the slot provided in the rear.
15. The battery is installed above the label "Manufactured by". The battery is removed by sliding it down.
16. This product complies with the following standards.
17. Place the SIM card in the slot provided in the rear.
18. The battery is installed above the label "Manufactured by". The battery is removed by sliding it down.
19. This product complies with the following standards.
1. Place the switch in "CHG" position. Align the terminal of the charger and the battery pack's terminal. Charge the battery pack.  
2. Place the switch in "R" position. Connect the battery pack to your device to use it.  
3. For best results, keep the battery pack in the charger for at least 3 hours.  
4. If you do not use the battery for an extended period of time, disconnect it from the charger and store it in a cool, dry place.  
5. Avoid exposure to high temperatures and direct sunlight.  
6. Clean the battery pack with a soft, dry cloth. Do not use chemicals or solvents.  
7. Do not disassemble or modify the battery pack.
15. Camera

15.1 Camera basics

Make your hands free by using your phone's camera to grab a shot of your life and memories without ever taking your phone out of your pocket.

1. To use your phone's camera, open the Camera application.
2. Tap on the camera icon to switch between front and rear cameras.
3. Use the front camera for selfies or video calls.
4. Use the rear camera for general photography.
5. To capture a photo, press the shutter button.
6. To record a video, hold down the shutter button.
7. Once you have captured an image or video, it will be saved to your phone's gallery.

Adding the Camera widget to your home screen

1. Open the Settings application.
2. Tap on 'Display' and then select 'Widgets'.
3. Scroll through the available widgets and find the Camera widget.
4. Tap on the Camera widget to add it to your home screen.
5. Once added, the Camera icon will appear on your home screen for quick access.

Tips for better photos

1. Use natural lighting to avoid overexposure.
2. Focus on the subject and keep the background blurred.
3. Use the grid lines to frame your subject properly.
4. Experiment with different camera modes for various effects.
5. Keep your phone steady to avoid blur.

Be creative and have fun with your phone's camera features!
