1. Normal Function Introduction

1.1 Dial Phone Number

When the network supplier's signs appear on the screen, you can call or answer the telephone. The information bar on the upper left corner of the screen shows the network signal strength. (there are five information bars means that the strongest signal) Call quality is impacted more by the barrier, and so your handset is moved in a small area, as will be able to effectively improve the call quality.

1.1.1 Dial Domestic Phone Number

Input telephone numbers with the numeric key and then press dial key to begin calling. If you need to change the telephone numbers, please press the right soft key to delete characters. The screen will display the called animation while dialing. After the other side picks up, the screen will show the called status information, and if you open the tone, there will be a tone (be subjected to network support).

After the call ends, press the hang up key to hang up.

Zone number + Phone number + Dialing Key

1.1.2 Dial Fixed Extension Phone Number:

Some fixed extension cannot be directly called; you need to first get through the telephone exchange and then dial the extension. When you input the phone number, insert the symbol "P" between the telephone exchange number and the extension number, the phone will complete all your dial-up, automatically dial the extension. The method of inputting "P" is to long press * key (here symbol "P" is displayed on the screen).

Zone number + Telephone exchange number + P + Extension number + Dial key

In standby status, input zone number (if you want to dial long distance call) and telephone number, then press "dial" key; if you want to dial the extension number, please input: the telephone exchange number + P + extension number + P + phone number; if you want to dial long distance call, and the exchange number + W + extension number, and it will auto dial the extension number. Long press "**" key, you can input "P", short press "*" two times, and you can input "W", "P" indicate pause 3 seconds then auto dial extension number, W indicate that you must press dial key to confirm the extension number.

Note: press the right soft key to delete the last input letter; long press to delete all.

1.1.3 Dial International Call Number:

To make an international call, you cannot long press * key until the prefix symbol "+" of the international long-distance telephone number is displayed. This will allow you to dial any national telephone call even if you do not know the prefix of the local international telephone number (for example, it is 00 for China).

Input the prefix and then input the country code and the whole phone number you want to call. Country code complies with the usual practice, Germany 49, Britain 44, Sweden 46 and so on.

"0" ahead of the city code should be removed when dialing, as is the same as to call a usual international telephone.

For example, to call a hotline from other countries, you should dial:

+86 21 114

+ Country code + Whole phone number + Dial key

1.1.4 Dial phone in call list

The numbers you dialed out and received are all saved in a list in your phone, recent dialed and received number showed in the first. Every number is classified by dialed, received and missed; the phone provides all number items for you to view all
number records. When the number list storage is full, the old number will be deleted automatically. If you want to view the list, you must do the key operations as below:
View dialed number, press dial key.
All the number stored in the number list can be dial out by pressing the dial key.
The number list shown, you can press confirm to view the details, entering the option, press save you can directly save the number into phonebook.
1.1.5 Emergency Call
If you stand within the network coverage (to check the indication bar about the network signal intensity on the upper left corner of the screen), you should be able to call for the emergency service (even in the absence of SIM card, you can call for emergency). If your network suppliers don’t have provided roaming services in the region, the screen will show "Only for EMERGENCY", indicating you can only do such a call.
1.1.5.1 Answering call
Under normal mode, when there are calls via press answer key to answer. If any key answering is set to open, can press any key and answer a call. If a headphone has inserted, you can also use the headphone button for the call.
1.1.5.2 Call Record
Your phone can store recent call record and all call time since you use the phone.
1.1.5.3 Menu in Calling
