1. Safety guide

If your mobile phone is lost or stolen, please contact the telecommunication authorities or a sales agent immediately to have a hold on the phone and the SIM card. This will prevent economic loss caused by unauthorized calls made from your mobile phone.

When you contact the telecommunications authorities or a sales agent, they will need to know the IMEI number of your mobile phone (remove battery to expose number located on the label on back of phone). Please copy this number and keep in a safe place for future use.

In order to avoid the misuse of your mobile phone please take the following preventative measures:

- Set the PIN number of your mobile phone's SIM card and change this number immediately if it becomes known to a third party.
- Please keep the phone out of sight when leaving it in a vehicle. It is best to carry the phone with you, or lock it in the trunk.
- Set call barring.

1.3 Safety warnings and notices

Before using your mobile phone, read and understand the following notices carefully to ensure you will use it safely and properly.

1.3.1 General attention

Only the battery and battery charger specified by our company should be used in your phone. Other products might result in battery leakage, overheating, fire or explosion.

- To avoid your phone malfunctioning, or catching fire, please do not violently impact, jolt or throw your phone.

- Please do not place the battery, mobile phone, or charger in a microwave oven or high-pressure equipment. Otherwise it could lead to unexpected accidents such as damage to the circuitry or fire hazard.

- Please do not subject your phone near flammable or explosive gases, otherwise it could cause malfunction of your phone.

- Please do not subject your phone to high temperatures, high humidity or dusty places; otherwise this may lead to the malfunction of your phone.

- Keep your phone out of the reach of small children. Your phone is not a toy. Children could hurt themselves.

- To avoid your phone falling and malfunctioning or being damaged, please do not place it on uneven or unstable surfaces.

1.3.2 Notices when using your phone

- Turn off your mobile phone where the phone is not allowed, such as, on the airplane or in hospitals. Using the mobile phone to place calls may impact the normal operation of electronic devices and medical instruments. Follow relevant regulations when using your mobile phone in those places.

- Please do not use your mobile phone near the weak signal of your mobile phone will not be turned on automatically during flight.

- Please do not use your mobile phone near the weak signal of high precision electronic devices. RF interference might cause malfunctioning of such electronic devices and other problems. Special tips must be paid near the following equipment: hearing aids, pace makers and other medical electronic devices, fire detectors, automatic doors and other automatic installations. To find out the effect of mobile phones on a pacemaker or other pieces of electronic medical equipment please contact the manufacturers or local sales agents of the equipment.

- Please do not use the LCD board and cause leakage of the liquid crystal. There is a risk of blindness if the liquid crystal substance gets into the eyes. If this occurs rinse eyes immediately with clear water (under no circumstances rub your eyes) and go immediately to a hospital for treatment.

- Do not allow the LCD to impact or use the screen to strike things, as this will damage the LCD board and cause leakage of the liquid crystal.

- Please do not use your mobile phone on the automatic control installations.

- Please do not use your mobile phone near the weak signal of electronic devices and medical instruments. Follow relevant regulations when using your mobile phone in those places.

- Please do not use your mobile phone near the weak signal of high precision electronic devices. RF interference might cause malfunctioning of such electronic devices and other problems. Special tips must be paid near the following equipment: hearing aids, pace makers and other medical electronic devices, fire detectors, automatic doors and other automatic installations. To find out the effect of mobile phones on a pacemaker or other pieces of electronic medical equipment please contact the manufacturers or local sales agents of the equipment.

- Please do not use the LCD board and cause leakage of the liquid crystal. There is a risk of blindness if the liquid crystal substance gets into the eyes. If this occurs rinse eyes immediately with clear water (under no circumstances rub your eyes) and go immediately to a hospital for treatment.

- Do not allow the LCD to impact or use the screen to strike things, as this will damage the LCD board and cause leakage of the liquid crystal.

- Please do not use your mobile phone on the automatic control installations.

- Please do not use your mobile phone near the weak signal of electronic devices and medical instruments. Follow relevant regulations when using your mobile phone in those places.

- Please do not use your mobile phone near the weak signal of high precision electronic devices. RF interference might cause malfunctioning of such electronic devices and other problems. Special tips must be paid near the following equipment: hearing aids, pace makers and other medical electronic devices, fire detectors, automatic doors and other automatic installations. To find out the effect of mobile phones on a pacemaker or other pieces of electronic medical equipment please contact the manufacturers or local sales agents of the equipment.

- Please do not use the LCD board and cause leakage of the liquid crystal. There is a risk of blindness if the liquid crystal substance gets into the eyes. If this occurs rinse eyes immediately with clear water (under no circumstances rub your eyes) and go immediately to a hospital for treatment.

- Do not allow the LCD to impact or use the screen to strike things, as this will damage the LCD board and cause leakage of the liquid crystal.

- Please do not use your mobile phone on the automatic control installations.

- Please do not use your mobile phone near the weak signal of electronic devices and medical instruments. Follow relevant regulations when using your mobile phone in those places.

- Please do not use your mobile phone near the weak signal of high precision electronic devices. RF interference might cause malfunctioning of such electronic devices and other problems. Special tips must be paid near the following equipment: hearing aids, pace makers and other medical electronic devices, fire detectors, automatic doors and other automatic installations. To find out the effect of mobile phones on a pacemaker or other pieces of electronic medical equipment please contact the manufacturers or local sales agents of the equipment.

- Please do not use the LCD board and cause leakage of the liquid crystal. There is a risk of blindness if the liquid crystal substance gets into the eyes. If this occurs rinse eyes immediately with clear water (under no circumstances rub your eyes) and go immediately to a hospital for treatment.

- Do not allow the LCD to impact or use the screen to strike things, as this will damage the LCD board and cause leakage of the liquid crystal.
1.3.3 a new eyes with clear water and go to the hospital for treatment.

Avoid letting the phone come close contact with magnetic objects such as magnetic cards as the radiation waves of the mobile phone may erase the information stored on floppy disks, pay cards and credit cards.

Please view small objects, such as thumbtacks far away from the receiver when the receiver is in use it becomes magnetic and may attract these small metal objects and thus these may cause injury or damage the mobile phone.

Avoid having the mobile phone come into contact with water or other liquids. If liquids enter the phone, this could cause a short circuit, battery leakage or other malfunction.

1.3.3 Notices when using the battery

The battery has a limited service life. The remaining life gets shorter as the times of charging increase. If the battery becomes feeble even after the charging, this indicates the service life is over and you have to use a new battery.

Do not dispose of old batteries into a fire, as this will cause the battery to leak, overheat, crack and catch fire.

Please do not throw batteries into a fire, as this will cause the battery to catch fire and explode.

When installing the battery, do not use force or pressure, as this will cause the battery to leak, overheat, crack and catch fire.

Please do not use wires, needles or other metal objects to short-circuit the battery. Also, do not put the battery near necklaces or other metal objects, as this will cause the battery to leak, overheat, crack and catch fire.

Please do not solder the contact points of the battery, as this will cause the battery to leak, overheat, crack and catch fire.

If the liquid in the batteries goes into the eyes, there is a risk of blindness. If this occurs do not rub the eyes, but immediately rinse them with clear water and go to the hospital for treatment.

Please do not disassemble or modify the battery, as this will cause the battery to leak, overheat, crack and catch fire.

Please do not use or place the batteries near high temperature places such as near a fire or heating vessel, as this will cause the battery to leak, overheat, crack and catch fire.

If the battery overheats, changes color, or becomes distorted during use, charging, or storage, please stop using and replace it with a new battery.

Please do not continuously charge for more than 24 hours.

1.3.4 Connecting the charger to the phone

If the battery level indicator flashes on the screen. Even if the phone has been turned off, the charging image still appears, indicating that the battery is being charged. If the phone is overcharged when the current is insufficient, it may take longer time for the charging indicator to appear on the screen after the charging begins.

When the battery level indicator does not flash and indicates the battery is full, this indicates the charging has been completed. If the phone is off during charging, the charging is completed, but this is normal. If the phone is still charging when the charger is removed, this is an abnormal situation.

Please do not disconnect the charger from AC power socket, and from the mobile phone.

Charging Your Phone

The battery level indicator flashes on the screen.

When the battery life is over and you have to use a new battery.

Do not dispose of old batteries into a fire, as this will cause the battery to leak, overheat, crack and catch fire.

Please do not throw batteries into a fire, as this will cause the battery to catch fire and explode.

When installing the battery, do not use force or pressure, as this will cause the battery to leak, overheat, crack and catch fire.

Please do not use wires, needles or other metal objects to short-circuit the battery. Also, do not put the battery near necklaces or other metal objects, as this will cause the battery to leak, overheat, crack and catch fire.

Please do not solder the contact points of the battery, as this will cause the battery to leak, overheat, crack and catch fire.

If the liquid in the batteries goes into the eyes, there is a risk of blindness. If this occurs do not rub the eyes, but immediately rinse them with clear water and go to the hospital for treatment.

Please do not disassemble or modify the battery, as this will cause the battery to leak, overheat, crack and catch fire.

Please do not use or place the batteries near high temperature places such as near a fire or heating vessel, as this will cause the battery to leak, overheat, crack and catch fire.

If the battery overheats, changes color, or becomes distorted during use, charging, or storage, please stop using and replace it with a new battery.

Notes:

- Always use the charger supplied by your phone manufacturer.
- Charging the phone must be placed in well-ventilated environment of +5°C ~ +40°C. Always use the charger supplied by your phone manufacturer. An unauthorized charger might cause danger and invalidate the warranty. We advise you not to use it.
- The charging time is 1.5 to 2.5 hours when the battery is empty.
- The standby time and call duration provided by the manufacturer are based on ideal operating environment. In practice, the battery's operating time varies depending on the network conditions and the applications you use. If the battery is overused during charging, it is best not to remove the battery while charging.
- If you have not disconnected the charger from your phone and the power supply, you will continue to charge the battery before charging.
- If you have not disconnected the charger from your phone and the power supply, you will continue to charge the battery before charging.
- We advise you not to use it, as it lowers your phone life after about 8 hours when the battery temperature decreases substantially.
performance and shortens your phone life.

Notices when using your charger

- Please use AC 220 volts. The use of any other voltage will cause battery leakage, fire and cause damage to the mobile phone and charger.
- It is forbidden to short circuit the charger, as this will cause electrical shock, smoking and damage to the charger.
- Please do not use the charger if the power cord is damaged, as this will cause fire or electrical shock.
- Please immediately clean any dust gathered on the electrical outlet.
- Please do not place vessels with water near the charger in order to avoid water splashing onto the charger and causing an electrical shortage, leakage or other malfunction.
- If the charger comes in contact with water or other liquid the power must immediately be switched off to avoid an electrical short or shock, fire or malfunction of the charger.
- Please do not disassemble or modify the charger, as this will lead to bodily harm, electrical shock, fire or damage to the charger.
- Please do not use the charger in the bathroom or other excessively moist areas, as this will cause electrical shock, fire or damage to the charger.
- Please do not touch the charger with wet hands, as this will cause electrical shock.
- Do not modify or place heavy objects on the power cord, as this will cause electrical shock or fire.
- Before cleaning or carrying out maintenance please unplug the charger from the electrical outlet.
- When unplugging charger, do not pull on the cord, but rather hold on to the body of the charger, as pulling on the cord will damage the cord and lead to electrical shock or fire.

1.3.5 Cleaning and maintenance

- The mobile phone, battery, and charger are not water resistant. Please do not use them in the bathroom or other excessively moist areas and likewise avoid allowing them to get wet in the rain.
- Use a soft, dry cloth to clean the mobile phone, battery and charger.
- Please do not use alcohol, thinner, benzene or other solvents to wipe the mobile phone.
- A dirty outlet will cause poor electrical contact, lose of power and even inability to recharge. Please clean regularly.

#### 2.1.2 Icons

In the standby mode, the following icons may appear in standby screen:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Network Signal" /></td>
<td>Indicate the intensity of network signals.</td>
</tr>
<tr>
<td><img src="image" alt="Missed Call" /></td>
<td>Show missed calls.</td>
</tr>
<tr>
<td><img src="image" alt="Location" /></td>
<td>Location by satellite.</td>
</tr>
</tbody>
</table>
Receive a new message.

An application is being downloaded.

The downloading is over.

The alarm clock has been set and activated.

A call is in progress.

The phone is playing a song.

Show battery level.

Enable USB.

The access is blocked.

Get connected to the wireless network.

Turn on the Bluetooth.

No SIM card is installed in the phone.

GPRS data connection is on.

2.2 Key explanations

<table>
<thead>
<tr>
<th>Key</th>
<th>Explanations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Return key</td>
<td>1. Return to the previous menu.</td>
</tr>
<tr>
<td>Menu key</td>
<td>2. Show options of current menu.</td>
</tr>
<tr>
<td>Home key</td>
<td>3. At any status, press the key to return to the standby screen.</td>
</tr>
<tr>
<td>Power key</td>
<td>4. Hold down this key to turn your phone off and on.</td>
</tr>
<tr>
<td></td>
<td>5. Generally, press this key to lock the mobile phone.</td>
</tr>
<tr>
<td>Side volume keys</td>
<td>6. During the conversation, press the two keys to adjust the volume.</td>
</tr>
<tr>
<td></td>
<td>7. While playing an audio file, press the two keys to adjust the volume.</td>
</tr>
</tbody>
</table>

Note: In this guide, the phrase “press the key” refers to pressing and thereafter releasing a key. “Hold down a key” refers to pressing a key and keeping it depressed for 2 seconds or longer.

The descriptions and functions of keys depend on the model of your phone.

2.3 Using the touchscreen

Your phone provides many touch keys in the Main screen. To use these keys correctly, calibrate the touch screen in advance (see...
Warning: "Calibrator"). Meanwhile please follow the instructions:

1. Do not touch the screen with wet hands.
2. Do not touch the screen with great forces.
3. Do not touch the screen with metallic or conductive objects.

2.4 Connecting to the network

2.4.1 Inserting and removing the SIM card

- Turn off the phone; remove the battery and unplug other external power supplies. Insert the SIM card into the SIM holder as shown in the picture.
- When you need to remove the SIM card, turn off the phone, remove the battery and then remove the SIM card from the holder.

Warning: Do not turn off your phone before removing the SIM card. Never insert or remove the SIM card when an external power supply is connected, as this may cause damage to the SIM card.

2.4.2 Turning your phone on and off

To turn on the phone, hold down the POWER key on the top; to turn off the phone, hold down the POWER key.

Notes: If you have turned on your phone without inserting the SIM card, the phone will prompt you to install the SIM card. With the SIM card already inserted, your phone automatically verifies the availability of the SIM Card.

Then, the screen shows the following:

- Enter PIN1: if you have set the SIM card password. Enter phone password — if you have set your phone password

Search for network — the phone searches for the appropriate network.

2.4.3 Unlocking the SIM card

The PIN 1 (personal identification number) secures your SIM card from being misused by others. If you have selected this function, you must enter the PIN1 code each time you turn on the phone so that you may unlock the SIM card and then make or answer calls. You can deactivate SIM card protection (see "Safety settings"). In this case, the misuse of your SIM card cannot be prevented.

1. Press the Hang Up key to turn on your phone;
2. Enter your PIN1 code. Clear the incorrect digits by pressing the right soft key, and press OK for confirmation. e.g. if your PIN1 is 1234, please enter:

1 2 3 4

3. If you enter incorrect numbers for three times in succession, your SIM card will be locked and your phone will ask you to enter PUK1 number. If you do not know the PUK1 code, do not try. Instead, contact your network service provider. See "Safety settings".

Note: your network service provider sets a standard PIN1 code (4 to 8 digits) for your SIM card. You should immediately change this number. See "Safety settings".

2.4.4 Unlocking your phone

To prevent unauthorized use, you can set phone protection. If you have selected this function, you must draw unlocking pattern each time you turn on your phone, to unlock the phone and then make or answer calls. You may clear the unlocking pattern (see "Safety settings"). In this case, the unauthorized use of your phone cannot be prevented.

If you forget your phone password, you must contact the retailer or local authorized service center to unlock your phone.

2.4.5 Connecting to the network

Once your SIM card is unlocked, your phone searches for available network automatically (the screen will show the name of network service provider appears at the center of screen).

Note: Making an emergency call. Note: If "only for emergency calls" appears on the screen, it indicates that you are beyond the network.
couvere (service area), and that you can still make emergency calls depending on the signal intensity.

2.4.6 Making a call
When the logo of network service provider appears on the screen, you can make or answer a call. The bars at the upper left corner of screen indicate the intensity of network signal. Conversation quality is significantly affected by obstacles, thus moving within a small area while making or answering a call can improve the conversation quality.

2.4.7 Making a domestic call
In the Dial screen, enter a number, and press the Dial key to make a call. To change the number, delete the digits you have entered. During dialing, the animation appears on the screen. After the call is picked up, the screen will show call status information. If the connection alert tone has been set, your phone will ring the alert tone (network dependent).

To end a call, press the Hang Up key.

2.4.8 Making an international call
To make an international call, hold down the 0 key on the Dialing screen until the international prefix "+" for appears. This allows you to dial an international number without knowing its international fix (e.g. 00 for China). Following the entry of international prefix, enter the country code and complete phone number. For the country codes, follow the general conventions, for example, 49 for Germany, 44 for UK, and 46 for Sweden.

Like making an international call via a fixed telephone, omit the "0" at the head of a city code. For example, to call our hotline from another country, you can dial:

```
+86 21 114 114
```

2.4.9 Making a call from the list
All calls dialed and received are stored within a list in your phone. Those dialed and received recently are exhibited at the top of the list (see "Call Register"). All the numbers are sorted by Dialed Calls, Received Calls and Missed Calls. Your phone also provides options for you to view all calls. When the call Register is full, the old numbers will be deleted automatically. To view the list, do the following:

- To view the dialed calls, press the Dial key
- You can dial any number from the list by pressing the Dial key.
- When the call list appears, press OK to see details, or go to Options -> Save to place the number into your Phonebook.

2.4.10 Making an emergency call
If you are beyond the network coverage (see network-signal-intensity bars at the upper left corner of the screen), you can still make emergency calls. If your network service provider does not provide roaming service to the area, the screen will show "only for emergency calls", alerting you that you can only make such calls. If you are within the network coverage, you can also make emergency calls even without the SIM card.

2.4.11 Call menu
The Call menu is only visible during an active call, and features such as Call Waiting, Call Diverting, and Multiple-party Call are network dependent. Contact your network service provider. The call options include:

- Mute
  Do not send local voice.
- Handsfree
  Switch on the loudspeaker to amplify the voice.
- Hold
  Put the current call on hold or retrieve the call on hold.
- End a call.
  End the current call.
- More
  "Start voice recording"
  "Start voice recording."
  "Turn on Bluetooth"
  "The Bluetooth device, if any, can be used."
  "New call"
  "Make another new call."

- To view the dialed calls, press the Dial key
- You can dial any number from the list by pressing the Dial key.
- When the call list appears, press OK to see details, or go to Options -> Save to place the number into your Phonebook.
3 Functional Menu
(※The following features depends on specific models)

3.1 File Management
The file management is composed of sdcard and sdcard 2, while sdcard is the memory of the phone, sdcard 2 is the external SD card. In the file management, files can be searched, deleted or edited in each card and new files can be created.

3.2 Sending an Email
You can send an Email to anyone who has an Email address. Entering the procedure and set an account, you can click the account so that you come into the account already created, you can also activate, compile and create an account and then delete the operating. The email can be sent and received just like in a computer. This procedure requires the network support.

3.3 Dialing
When dialing, you can have a quick access to the call records, contacts and digit dial keyboard (used for manual dialing) by the menu key on the screen.

3.4 3G video call
Click a number portrait in the phonebook, and you can do these things instantly: dial, send a message and make a video call. During the video call, you can select applications such as adjusting it to mute mode, switching to robot portrait, turning off the voice and intercepting photos to SD card.
3.5 Calculator

Your phone provides a calculator with 4 basic functions for the convenience of your calculating.

Press this button [button], and you delete the input and output in bitwise.

Notice: this calculator is of limited accuracy and sometimes it causes error, please forgive us for the inconvenience.

3.6 Browser

The browser allows you to surf on the net and browse the page just like on the computer. You can create on the phone a bookmark and synchronize it with computer. You can have a quick access to your favorite sites on the main screen.

You could view web pages in longitudinal or transverse mode. The page rotates according to the rotation of the phone and automatically adjusts to fit the page.

3.7 Voice Recorder

The recorder could be used to record audio files.

To start voice recording: Tap [button]

To end voice recording: Tap [button]

To play back voice recording: Tap [button]

The audio files are automatically stored on your phone. Click the Menu key, and you can operate and set the recorded voice. The file can be in document management and various players can be selected to play the voices.

3.8 Calendar

Calendar allows you to view your schedules and events at any time. You may view schedules one by one or several ones at the same time.

Select to show calendar by day, week or month. If "by week (or month)", the calendar will be shown by week (or month). This application is convenient for you to view schedule or add events.
3.9 Settings

Reach the menu and customize your phone settings. SIM card management: SIM card can be managed and made settings.
WLAN: WLAN can be turned on and off and made some settings.
Bluetooth: Bluetooth can be turned on and off and settings are made.
The information flow usage: It makes you in full awareness of the usage of the information.
More: Click more and you will set up flight mode and VPN and more.
Audio profiles: General, silent, meeting-and outdoor optional. In the meanwhile, customized setting-up of some scene modes are allowed.
Select a mode and enter the customized setting-up, operational are vibration, volume, ring tones, notifications and key beep, etc.
Display: Customized setting-up of the phone luminance, wallpaper, the screen and screen time-out and font size is allowed.
Storage: The internal memory of the storage card and of the phone is shown.
Battery: The usage detail of the battery is shown.
Applications: View, manage and delete the applications on your phone.
Account and synchronization: Set the synchronization of your phone account with your phone.
Location service: Set the service during the locating.

3.10 Clock

WLAN: WLAN can be turned on and off and made some settings.
Bluetooth: Bluetooth can be turned on and off and settings are made.
The information flow usage: It makes you in full awareness of the usage of the information.
More: Click more and you will set up flight mode and VPN and more.
Audio profiles: General, silent, meeting-and outdoor optional. In the meanwhile, customized setting-up of some scene modes are allowed.
Select a mode and enter the customized setting-up, operational are vibration, volume, ring tones, notifications and key beep, etc.
Display: Customized setting-up of the phone luminance, wallpaper, the screen and screen time-out and font size is allowed.
Storage: The internal memory of the storage card and of the phone is shown.
Battery: The usage detail of the battery is shown.
Applications: View, manage and delete the applications on your phone.
Account and synchronization: Set the synchronization of your phone account with your phone.
Location service: Set the service during the locating.
Alarms
Your phone provides many groups of alarm clocks. Select one of them to edit and customize alarm clock.

3.11 Radio
Wear your earpieces of radio before searching for channels.
Glossary:
Channel list: Display the list of FM radio channels. You can select to play one of them. (The list can contain 20 channels maximum)
Search: Select this option to automatically search for channels and generate the list of channels.
Loudspeaker: Press the button to use the radio loudspeaker.
▶ and ▼: Tap to move to another channel.
▶ and ◀: Tap to broadcast and pause.

3.12 Google Search
You can locally search for the information you need.

3.13 Contacts
The "contacts" lets you easily call your colleagues or friends, or send emails or short messages to them. You may add contacts directly from your phone, or synchronize "contacts" with any application on your computer. You may open "contacts" directly from the Main screen, or open it via the "Dialing" application.
Add a contact:
To add a contact, directly enter the name and phone number, or import the name and phone number from the SIM card. (The number of contacts you can add is limited by the memory of your phone.)

Search for contacts:
To search for a contact, press the Search key in search screen, and a search box will pop up. In the search box, enter the key words, such as first name, second name and company name. While you are entering the key word, the matching contacts immediately appear.

Edit a contact:
To edit details of a contact, select "Edit a contact".
Delete a contact:
To delete the current contact, select "Delete a contact". From the menu, you can also synchronize with or share an account or import or export a contact.

3.14 Gallery
Gallery is a picture manager that typically exhibits miniatures, supports the features of "save picture", "set pictures as desktop" and "share picture".

3.15 Camera
Your phone provides the camera and video recorder features. Wherever you go, you can take high-resolution photos and videos. It also supports advanced camera features such as image stabilization, face embellishment, panorama shooting, high dynamic range and zero delay shutter, which can also be customized.

3.16 Messaging
Messaging lets you send text and multimedia messages to any contact that has an SMS device. The multimedia messages include photos, video clips (for iPhone 3GS or other new style phones), contacts information, and voice memos. What’s more, you can send messages to several contacts at the same time.
Note: Perhaps Messaging is not available in all countries and regions. Probably you need pay for using Messaging. For more information, consult your network operator. As long as you are within the network, you can use "Messaging". As long as you can make a call, you can send messages. You probably have to pay for sending or receiving messages, depending on your network operator. Send a message. Tap it, enter the number and name of the contact or select the contact from Contacts. Tap the text box above. Enter the information and then tap "Send". After selecting the number, you can select such options as Call, Add subject, Attach, Insert facial expression, and more. Tap Settings to set ringtone, Delivery reports, and maximum quantity of messages.

3.17 Notification Menu
Slide and pull down menu on the main interface, you can see the message notice and choose whether to turn on or off WIFI. In the data connection, the current SIM is available to make data connection of GPRS. Slide it around you can see the options of profile for your convenience.

3.18 Download Content
You can download through the browser things and pictures you want and list them in the Download Content menu.

3.19 Music
Music is used for enjoying the stored audio files. Select Music, you can see the menus of "List of played songs", "Songs", "Specialists" and "Artists".
To pause playing a song
To resume playing a song
To skip to the next song or reading material
Return to the previous song or reading material

Touch and hold or . The longer you hold, the more songs you skipped.

Drag the progress bar.

3.2 Call Records
Come into the call records, you can view missed calls, received calls and outgoing calls. The calling time is viewed in each record and features such as calling, sending messages and adding to new contacts can be set. Deleting call records and setting up speed dial can be done in the menu.

3.21 Widget
The widget is on the right of applications in Main Menu, holding down this widget, you can drag it anywhere you want in the main screen. It is convenient for you to enter that procedure.

3.22 Selecting Wallpaper Source
Hold down the main screen, the options of selecting wallpaper source will appear, then you can set up wallpapers you like.
3.23 Local search
You can find some merchants and service facilities near a location, which you can find through GPS navigation.

3.24 Note
Add note, convenient you to check, delete and sort at any time.

3.25 Flashlight
Enter flashlight app, click the turn on button, can open to light, user-friendly.

3.26 Documents To Go
Convenient you see, edit & create Microsoft Word, Excel and PowerPoint file and review Adobe PDF and Attached.
3.27 MoboPlayer
A smart view play that support various format video, you can easily play stored video files.

3.28 Google Latitude
Google Latitude is an exceptionally powerful application for phones. The application allows you and your friends share current locations with each other. Of course, you can decide whether your location is shared. By Google Latitude, you can keep in close touch with your friends, via your phone or computer.

3.29 Map
The Map application provides the street maps, pictures, mixed views, and street views of many countries and regions in the world. You can get real-time traffic conditions, as well as detailed directions of driving, public transit, or walking. To get the direction of driving, find the starting point, and then enter the destination. The maps, directions and location-based information are provided by relevant data services. These data services may vary from time to time, and be not available in some regions, thus the provided maps, directions and location-based information may be invalid, incorrect or incomplete.

If the location service is closed when you open the "Map", the system may ask you to enable the service. But you can use the "map" without enabling the location service.
3.30 Navigation
By virtue of GPS signal receiver, your current location is shown on the electronic map. If you have set the destination, the system will tell you the route. This saves your time.
Signals from GPS satellites can be received only when you are using your phone outdoors or at the window through which you can see the sky.
How to use the feature: In the Main screen, select “Settings”, click “Location and Safety”, tick “Use GPS satellites”, and then reach the navigation menu. Note that it may take 10 minutes or more for your phone to determine your current location for the first time.

3.31 Voice Search
Support voice search, through voice search website on google.

3.32 View Player
A view play software, can detect mobile video and auto generate play list, you can easily play stored video files.

3.33 Wireless Input Device
Open Bluetooth, add new device, pair to other wireless input device, then can use.
3.34 Mobile Broadcasts

Mobile Broadcasts can support your location active warning. Can set cell broadcast language and channel. Display emergency alarm like extreme threat, grave threat, notification, cell broadcast service for network provider. Please contact your network provider.

3.35 Google Talk

Google Talk is a downloadable chat application developed by Google. Check out what Google Talk can do:

3.36 Schedule

Add schedule, can write schedule notice and set deadline data. Review schedule and finish schedule more convenient.

4 Text Input

Enter text via the keypad. Examples of text include contact details, emails, short messages, and websites. The keypad provides the functions of spelling prediction, spelling correction and learning while using.

The smart keypad may give you prompts of correct spelling, depending on which application you are using.

Enter text:
1. Tap the text box (memo, or new contact) to call the keypad.
2. Tap the keys on keypad.

At the initial stage, you can tap keys using either of your index fingers. Once you get familiar with the keypad, you can try tapping keys using both of your thumbs.

While tapping a key, the corresponding letter will appear above your thumb or another finger. If you are tapping a wrong key, you may slide to the correct one. Only when your tapping finger leaves a key, can the corresponding letter be entered in the text box.

To delete a character

To enter an upper-case letter

To enter a digit
To enter a symbol

Quickly enter a space
To toggle input methods

5 SD Card Introduction

Your mobile phone supports SD card to expand the memory. Install the SD card according to the indication.

As one of storages for your phone, SD card has been set as the default storage at factory. You can directly use it without making any settings.

Use as flash disk: if "Phone——Data Wire——PC" is well connected, the PC will prompt "New hardware is found", and "MT65xx" will appear in the dialog box, see the figure below.

Android Phone requires to be installed" will appear in the dialog box, see the figure below.

After checking and confirmation, reconnect "Phone - Data Wire - PC", and pull down notification menu in the standby interface:

Check the relevant menus in the phone are opened or closed, selecting one by one as follows:

Main Menu - Settings - Application - Development - USB debugging. Uncheck "USB debugging".
Select "used as USB storage device", and the following screen pops up:

Select "USB storage device", and such dialogue box pops up:

You can synchronize files on the computer with those on the phone according to your needs or you can manage files on the storage card. Select "MTP storage" to support the phone to function as a U-disk. If your computer is not supported by WIN7, you need to install MTP drive (you can directly update window player to the latest wmp11 which comes with MTP drive). Follow the prompts appearing in the phone to operate, so that data uploading and downloading with U disk can be achieved. Select "Camera PTP", you can export photos on the phone to the computer.

Note: Your mobile phone supports the plug-in feature. Without turning off your phone, however, it does not support inserting or remove T card. Generally, it is not recommended to remove and install the SD card.
