Bluetooth companion

there are two ways to connect the smart watch and smart device via bluetooth. switch on bluetooth on smart device, then:

- 1.1): Click "Connect" on the button of the table, it will show "connect" device by BT dialer when connect with a new device, click ok then search new device.
- 1.2): Click Bluetooth companion (the icon have apple and Android logo on it), then search new device, can also search the watch from smart device.
2. Choose the device you want to connect by clicking "pair". The two devices will connect. if the smart phone doesn't be deleted from "my device" list, they will connected automatically again when you click "Connect" on the button of the table.
3. Smart phone in-coming and out-coming calls] can be synced after connecting. For Android device, it will ask you to visit phone book and sync date & time when connect successful, please choose.

- yes organizer->file manager->phone). It can control BT music, Remote capture, Apps and SMS notification etc.
5. Enter into "BT Notification" on smart device, choose "Accessibility" settings to switch "BT Notification" then choose all the options you want to notify. Restart Bluetooth smart device. Then the "BT Notification" can work.

Tips: For BT music, the music should be saved in music folder in the smart device ,otherwise the BT music will not work.

Click "Pedometer"  icon to enter Pedometer interface(see 1.1), you can check the current steps and calories consumption (see 1.2)
