The Mobile Phone Watch's functions and menus are intuitive and will be simple to use for anyone that is familiar with general cellphone operation.

Its features include music, video player (MP3 & AVI) and touch-sensitive screen for navigation that also allows handwritten input via a stylus that is stored in the watch strap.

The following information will help you to get the best from your mobile phone watch and provides information on security features and network settings, so please keep it for reference.

1. Getting Started:

If you need to install a SIM card:

Your Mobile phone can support 8 SIM cards. It only supports 5 SIM cards if it is used as a cordless phone.

Quick Start:

1. Press the power button for 1 second to turn off the Mobile Watch.
2. Connect the USB cable to the Mobile Watch and to a computer or power adapter.
3. The battery can be recharged using the USB cable supplied with the Mobile Watch.

2. SIM card installation:

Keep the back to open and take off the back (in line in box).

3. Charging the battery:

Connect the USB cable to the computer's USB port or a USB power adapter and the other end of the USB cable to the Mobile Watch.
5. General Use

5.1 Basic

5.2 Switching on

Press and hold down the button if nothing is displayed to power on or off.

The radio please select then Start in watch mode.

To go max power mode, press the power button with your finger or the index.

4. Connecting to a network:

After removing your SIM card and switch on the phone auto will immediately search for the network. You can then dial or send SMS and access the phone's other functions.

Illustration:

- Place the USB connector located at the end of the year
- You can either connect the USB connector to USB 2.0 port of your computer or
- Charge your phone without using the cable and charge your wires without removing 2.
5.3 Making a Call
You can make calls in three ways:

1. Click on the telephone icon in the bottom center of the display to bring up a keypad screen and directly input the number you wish to call.
2. Open the phonebook and select a contact. Then click on the telephone icon to call this person.
3. Press the top right hand side button to view your recent call logs. From this list you can select and call these numbers again.

6. Phone Book
The phonebook can store 500 phone numbers and each entry can have up to three telephone numbers. From this menu you can add or edit new entries, search your phone book, copy phone book entries between your phone and SIM card's memory and assign custom pictures or ringtones to different people.

7. Messages
From this menu, you can send text messages, multimedia messages, email or check your voicemail. Please see the separate section on inputting text for instructions on how to write and edit text in messages.

8. Call History
From this menu, you can choose whether you want to view recent calls, missed calls, received calls and also see how long your calls have been.
9. Settings
This menu contains the options for setting up your mobile phone watch, including stylus calibration, time and date, speed dialing, languages, caller id and caller barring, network and security settings.

10. Multimedia
From here you can use the media player functions to play MP3 music files or MP4 video files.

10.1. Video - click on the red circle to start recording video. See the options menu in the function to adjust other settings.

10.2. Audio Player - The audio player will play files that are stored in your mobile phone watch's internal memory in the 'my music' folder. The controls for play/pause are displayed usually on the screen and can be adjusted using the stylus. Alternatively, the top left button can toggle play/pause.

11. File Manager
Use this function to organise images, music, video, other media or data files that are stored in your mobile phone watch's memory.

13. User Profiles
Select and edit the different settings for each profile here. Then you can easily change to the most appropriate setting for where you are or what you are doing. You can adjust ringtones, volume, and alerts.

14. Organiser
From this menu you can select the calendar, to do list, alarm and world clock functions.

15. Services
WAP internet access is available from this menu. You may need to contact your network provider for information on the correct network settings to use.

19. Connecting to a PC via USB

When you connect your mobile phone watch to a PC's USB port, a menu will open that gives you three options:

19.1 Mass Storage – this enables you to transfer data to and from your mobile phone watch, including images, videos and music or other audio files. When you select this option, the mobile phone watch’s internal memory will appear in 'My Computer' as a remote drive. You can cut, copy and paste files to this.

19.2 COM Port – this enables your mobile phone watch to be used as a modem. Please follow the instructions that appear on your PC's screen to set up and use this function.
20. Battery life indicator
Your mobile watch displays its battery status on the top-right of the screen. When the battery is low, the screen will show "electricity low" and you can choose an alarm to sound to let you know when charging is required.
- When charging, the screen will show an animation to let you know how charging is progressing.
- When the battery is full it will say "finish charging".
From a full charge:
- Standby time: approximately 120-150 hours
- Talk time: approximately 120-240 minutes
- Note: the actual standby and talk time are affected by whether you are using the other functions too, the local network and SIM card and the settings you choose.

22. Connecting to the Bluetooth headset
- From the "Setting" menu, select "Bluetooth".
- Activate Bluetooth on your mobile phone watch from this menu.
- Select "Inquiry Audio Device". It will now begin searching for the Bluetooth headset.
- Hold down the "Function" button on the Bluetooth headset's control unit until the red and blue indicator lights flash. When they are flashing, release the button.
- The mobile watch will display the headset as "Naris". Select this to start pairing.
- When you are prompted for a pass code, enter 0000.
- When the pairing is successful, the blue light will flash at two second intervals.
- You can now make and receive calls using the Bluetooth headset.
22.1 Listening to music via the Bluetooth headset

This function needs a compatible headset.

1. Activate Bluetooth on your phone and pair with your headset according to the instructions in the relevant section.
2. Select the mobile phone watch's audio player function.
3. From the 'Choice' list select 'Choice options'; then 'Choice setting'; then 'Choice Bluetooth' and then 'Choice on'. This will then stream the music from the audio player to your Bluetooth headset.

23. Text Input

This mobile supports direct stylus input. This can be used in editing the phonebook, text messages, memos, file management and in other functions.

When you are inputting text, click 'A to switch to capitals.
Click ▲ or ▼ to show or hide the virtual keypad.
Click 0 to switch between normal input mode and symbols mode.
Click ▼ to input a space.
Click ← to delete the character before.
Click ↓ to go to the next line.

25. Safety Notice

Please do not use your phone when driving. Please use hand-free accessories if it is absolutely necessary to make a call.

Remember it is illegal in some countries to make any calls when driving.

When flying, please make sure that you obey the airline's policy on mobile phones and switch it off if requested.

Please ensure that your phone is switched off at petrol stations, especially when refueling your vehicle.

Please check and abide by local policies regarding phone use in places such as hospitals where use may cause interference or danger.

This mobile phone watch can only be maintained by professionals. Attempting to repair or modify it will void the guarantee.

Only use the accessories and battery supplied, or replacements approved by the supplier.

Note: As with any mobile phone, your network supplier may not support all of the features. Certain networks may even not support the 112 International Emergency Call number.

Please contact your network supplier for more information.

26. Care of your mobile phone watch

- Only use the original battery or a supplier approved replacement.
- Power off before removing the battery
- Avoid putting the battery near anything made of metal (such as keys) as these may cause it to short circuit.
- Do not dispose of the battery in fire.
- Do not disassemble or attempt to repair the mobile phone watch, its battery or accessories. If damaged or if faults occur these should be taken to a professional repair centre.
- When not in use, store the battery in cool and dry places only, away from sources of heat (over 55°).
- Stop using at once if you notice the battery emitting any unusual odours.
- Stop using it when there are any cracks, distortion, leakage or any other visible damage to the battery.
- Do not clean mobile phone watch, battery or accessories with water or any liquid cleanser or immerse them in water. If cleaning is necessary, wipe with a dry soft cloth only.
- Charge the battery fully before storage if it is not going to be used for a long time.
• When the battery reaches the end of its life, recycle it in an appropriate recycling scheme.
• Keep the mobile phone and accessories out of the reach of children.
• Keep away from rain, moisture and all other liquids.
• Do not use or store in dusty or sandy conditions.
• High temperatures will shorten the life of the electronic components and also damage the battery and certain plastic parts.
• Do not throw, hit or shake your mobile phone watch.

27. Security:
• If your phone watch is lost or stolen, please notify your service provider as soon as possible to block the use of the phone and SIM card to avoid excessive unauthorized call costs.
• To prevent unauthorized use of your phone, please take safety measures, such as:
  • Setting the SIM card PIN number.
  • Setting the phone PIN.

27.1 Passwords
Your mobile and SIM card have password functions which can protect your mobile and SIM card from unauthorized use. These can be changed by selecting "settings - safety settings - change keywords". The default passcode (referred to as "keyword") is 1234.

27.2 PIN
This can protect your SIM card from unauthorized use.
The PIN is supplied with the SIM card by the network supplier. Please see this for more information.
NOTE: If the PIN is input incorrectly 3 times, the SIM card will be locked. It will then be necessary to use a PUK code to unlock it. The PUK is issued by your network supplier and you will need to contact them to obtain this.

27.3 PIN 2
PIN 2—this is a 4—8 digit number supplied with SIM card. It is required to set up the call cost and fixed dial functions. Please contact your supplier to confirm if your SIM card supports these functions. If you input the PIN2 incorrectly twice, PIN2 will be locked. If this occurs, please contact your network for details on how to unlock it.
1. Introduction

The Bluetooth Headset allows you to make and receive calls while on the move or in the office. You can connect the headset to a compatible phone that supports Bluetooth wireless technology. Read the user guide carefully before using the headset. Read also the user guide for your phone, which provides important safety and maintenance information. Keep the headset and user guide in a location accessible to users.

Bluetooth wireless technology

Bluetooth wireless technology allows you to connect compatible communication devices without cables. A Bluetooth connection does not require that the phone and the headset be in line of sight, but both devices should be within 10 meters (30 feet) of each other. Connections can be subject to interference from obstructions such as walls or other electronic devices.

The headset is compliant with the Bluetooth Specification 2.0-EDR supporting the following profiles: Headset Profile 1.1 and Hands-Free Profile 1.5. Check with the manufacturer of other devices to determine their compatibility with this device. There may be restrictions on using Bluetooth technology in some location. Check with your local authorities or service provider.

2. Get started

2.1 Overview

The headset contains the following parts:

- Indicator light
- Headset microphone
- Charger connector
- Microphone
- Earclip

Before you can start using the headset, you must charge the device and pair the headset with your compatible phone.

Note: Parts of the headset are magnetic. Metallic material may be attracted to the headset. Do not place credit cards or other magnetic storage media near the headset, because information stored on them may be erased.

2.2 Check the phone number of any charger before using it with this device.

Warning: Use only batteries and chargers approved for use with this particular enhancement. The use of any other types may violate any approval or warranty and may be dangerous.

For availability of approved enhancements, please check with your dealer. If you disconnect the power cord of any enhancement, grasp and pull the plug, not the cord.

2.3 Charge the battery

This device has an internal, nonremovable, rechargeable battery. Do not attempt to remove the battery from the device, as you may damage the device.

1. Connect the charger to the headset.
2. Connect the charger to a wall outlet. The red indicator light is blinking at the bottom of the charger. The red indicator light is not charging if charging does not start, disconnect the charger, plug it in again, and try Charging the battery. Fully may take up to 2 hours.
3. When the battery is fully charged, the red indicator light turns off.
And the blue indicator light turns on. Disconnect the charger from
the wall outlet and the headset.

The fully charged battery has power for up to 3 hours. The
30 minutes of talk time or up to 100 hours. Standby times
may vary with different mobile phones, products that use a Bluetooth
connection, usage setting and environments.

- Switch the headset on or off.
  To switch on, press and hold the power key. The headset beeps,
  and the red indicator light is displayed. When the headset is con-
  nected to a paired phone and is ready for use, the blue indicator
  light flashes slowly.
  To switch off, press and hold the power key. The headset beeps,
  and the blue indicator light is flashing twice.

- Pair the headset with a compatible phone
  1. Switch on your phone and the headset.
  2. Activate the Bluetooth feature on the phone, and set the phone
     to search for Bluetooth devices. See the user guide of your
     phone for instructions.
  3. Select the headset from the list of found devices.

4. Enter the code 0000 to pair and connect the headset to
your phone. In some phones you may need to make the con-
nection separately after pairing. See the user guide of your phone
for details.

- If the pairing is successful, the headset beeps and appears in
the phone menu where you can view the currently paired Blu-
tooth devices.

- Disconnect the headset from the phone.
  To disconnect the headset from your phone, press the button
  to disconnect the headset from the Bluetooth menu of your phone.

- Troubleshooting

  If you cannot connect the headset to your phone, do as follows:
  - Ensure that the headset is charged, switched on, and paired
    with and connected to your phone.
  - Ensure that the Bluetooth feature is activated on your phone.
  - Check that the headset is within 10 meters (33 feet) of your
    phone and that there are no obstructions between the head-
    set and the phone such as walls or other electronic devices.
  - To unpair the headset, go to settings, and select Bluetooth.
    Go to settings, and select Bluetooth pairing and then the
    headset. Note that the headset may not be displayed in the
    Bluetooth menu of your phone or paired as it may be another
    device or another headset.
