15. Front camera  
16. LCD display  
17. Built-in speakers

Note: When you see blurry projected images, use the focus knob to adjust the focal length.

4. Connection and Usage

4.1 Audio Connection

Connect a set of earpieces or speakers to the audio jack via a standard 3.5mm audio cable.

![Audio Connection Diagram]

Note: No speakers ship with this product.
4.2 microUSB Connection and Data Storage

To use microUSB, connect the projector to a computer via the microUSB cable when the projector is on, and a notification will appear in the upper left corner of the computer's screen.

- Verify that a connection has been set up successfully, and slide down on the screen.

![Image of a computer screen with a notification]

Click , and then click "Connect USB storage". Double-click "My Computer", and you can see a drive for the projector. Open this drive to perform file operations, for example, copying or deleting files;

- Use the safe removal function when you want to end the micro USB connection.

Unplugging the microUSB cable may cause damage to the system.

Note: The software of this product occupies about 1GB of the computer's memory.

4.3 TF Card Slot

As marked by the number 14 in Figure 3.1, the TF card slot supports standard TF cards. The maximum capacity of a TF card installed in this slot is 32GB.

5. Button Functions

Figure 3.1 shows the buttons, whose functions are as follows:

1. Volume down: Press this button to turn down the volume.
2. Volume up: Press this button to turn up the volume.

3. Projector toggle: Use this button to toggle between three display states: both projector and LCD on, projector on and LCD off, and projector off and LCD on. The default state is projector off and LCD on.

4. Home: Short-press this button to return to the Home screen. Long-press this button to invoke the process menu, where you can end unwanted processes.

5. Return: Short-press this button to return back to parent directory.

6. Focus knob: If you see blurry projected images, adjust the focus knob back and forth until the images become clear.

7. Power: When the projector is off, press this button for 2 seconds to turn it on. When the projector is on, short-press this button to turn off the screen and put the projector on standby, or press this button for 2 seconds to choose between three operations shown in the figure below. When the projector is on standby, short-press this button to wake it up.

6. Desktop and Wallpaper

6.1 Desktop

Long-press the Power button, and the following screen appears.
- Tap Bluetooth to search for Bluetooth devices. All detected Bluetooth devices will be automatically listed.
- Select the matching Bluetooth device.

7.2 Device Settings and Information

Sound Settings

Tap "Sound" to change the volume and set other sound options.

Display Settings

Tap "Display" to set brightness, wallpapers, sleep options, font sizes, and accelerometer calibration.

Storage

Tap "Storage" to view the usage status of the internal and external storage.

Battery

Tap "Battery" to check the remaining battery power and usage statistics.

Apps

7.3 Personal Settings
8. Product Functions

8.1 Video Playback

This product ships with the OWL player.

Video files on the TF card are automatically scanned for. Tap a video file to play it. You can play video files in up to 4 windows simultaneously.

* When you use the projector, the LCD does not need to be on. In this case, you can slide up and down the rightmost portion of the LCD to turn the volume up and down, and you can slide left and right the lowermost portion of the LCD to fast-forward and rewind.

Music Playback

Tap "Songs", and then tap the song you want to play.

Cameras

Note: When you reset to the factory defaults, all user data will be lost. Back up necessary data in advance.
Tap the right place to turn on cameras. Tap \( \text{\includegraphics[width=0.1\textwidth]{camera_icon.png}} \) to toggle between the front camera and the rear camera. Tap the right icon in \( \text{\includegraphics[width=0.1\textwidth]{front_camera_icon.png}} \) to choose between photo-taking and video recording. After the files are saved, they will be displayed in \( \text{\includegraphics[width=0.1\textwidth]{picture_icon.png}} \). Tap a file to view or play it.

Pictures

Tap "Gallery" to enter. Choose an album, and tap a picture or video you want to view or play.

8.2 Web Browser

- Tap "Browser" on the desktop. To visit a web address, enter the address in the address bar.
- You can press and drag a webpage to facilitate browsing.
- When you use the browser to compile an email, use plain text for the email body.

Voice Search

Tap the microphone icon, and speak into the microphone jack. The system will automatically recognize your words and search for relevant web pages.

8.3 Online Media

- Check that Wi-Fi is enabled and a connection has been set up.
- Tap "Online Media", and a list will appear to show commonly used online media apps.

Choose the online media app you like, and search for the videos you want to watch.

- Note: Network media resources may not be up to date. Therefore, the latest movies may not be found.
8.4 Office Use

Choose WPS Office from the apps. With WPS Office, you can view and edit Word, Excel, PowerPoint and PDF files.

8.5 Apps

- Tap in the upper right corner of the desktop to enter the Apps screen.
- Here, you can find all factory-installed and user-installed apps.
- Click the icon of an app with the left button of the mouse to run this app.
- Click the right button of the mouse to exit the app.
- Click and hold on the icon of an app to create a shortcut to this app on the Home screen.

9. Installing, Uninstalling, and Running Apps

9.1 Installing Apps

- Use third-party software to install apps.
- You can use the built-in Marketplace or Wandoujia to install apps online. Alternatively, you can use the built-in browser to download apps and install them.
- Note: If you want to install apps from sources other than Marketplace, tap Settings -> Security, and check Unknown Sources. Otherwise, such apps cannot be installed.
- Note: You need to create an account before you can download apps from Marketplace.

9.2 Uninstalling Apps

- Tap Settings -> Apps. Locate the app you want to uninstall, and tap "Uninstall".
9.3 Running Apps

- When an app has been installed, a dialog box appears providing two options: "Run" or "Done". Tap "Run" to run the app.
- If you want to run the app later, tap  , locate the icon of the app, and tap it.

Long-press the icon of an app to pull it onto the Home screen.

10. OTG Apps

OTG is the abbreviation for On-The-Go. It is mainly used for the connections between various different devices or mobile devices for data exchange.

- To use OTG, please make sure this projector is in normal working condition.

11. Email

- Tap the " " icon -> "Email". Set up an email account by following instructions.
- After successfully setting the Email account, tap "Apps" -> "Email". Enter the inbox, use the function menu to compose an email. You can also edit the account settings.
- Tap "Enter" to perform such operations as replying, forwarding, opening attachments etc.

Note: for other operation instructions, refer to the operations on the Android operating system.

12. Battery Charging

This product has a built-in high-capacity, rechargeable Lithium polymer battery. When the battery is low, connect the adaptor to charge it. It will take about 5 hours to fully charge the battery.

When battery charging is going on, three blue indicators flash one by one. When the battery is about 30% charged, one indicator will stay on. When the battery is fully charged, all indicators will stay on.

If the user forcibly power on the product when the battery is low, the projected screen may be in the wrong color or flicker. At this time, the battery need to be promptly charged or the product needs to be promptly connected to the power adaptor.

Note: The built-in battery must not be disassembled. Charge the battery with the power adaptor configured for this product.

13. Troubleshooting

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The projector cannot be powered on.</td>
<td>The power cable is not connected.</td>
<td>Insert the plug of the power adaptor into the AC outlet. Insert the other end into the DC jack of the projector.</td>
</tr>
<tr>
<td>Images are blurry.</td>
<td>The projector lens is not correctly focused.</td>
<td>Adjust the focus length with the focus knob.</td>
</tr>
<tr>
<td>No image</td>
<td>Data on the USB device or TF card cannot be read.</td>
<td>Re-plug the USB device or TF card.</td>
</tr>
<tr>
<td>The whole machine cannot be operated.</td>
<td>The system has stopped responding.</td>
<td>Long-press the Power button for 10-15s to reset the projector.</td>
</tr>
<tr>
<td>Networking failure</td>
<td>No Wi-Fi settings/No Wi-Fi signal/poor Wi-Fi signal</td>
<td>Set the Wi-Fi networking function following the operation instructions, or move the projector where there are strong Wi-Fi signals.</td>
</tr>
<tr>
<td>Office files and video files cannot be opened.</td>
<td>No software supporting the files is installed.</td>
<td>The user may download and install the relevant software from Wandoujia or Android Marketplace.</td>
</tr>
<tr>
<td>The screen is in the wrong color or flickers.</td>
<td>The battery is low.</td>
<td>Charge the battery with the power adaptor.</td>
</tr>
