About this Guide

The content in this document is for information purpose and is subject to change without prior notice. We made every effort to ensure that this User Guide is accurate and complete.

However, no liability is assumed for any errors and omissions that may have occurred.

The manufacturer reserves the right to change the technical specifications without prior notice.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Prohibition of co-location

This device and its antenna(s) must not be co-located or operated in conjunction with any other antenna or transmitter.

Important note

Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body. To maintain compliance with FCC exposure compliance requirements, please follow the operating instructions as documented in this manual.

WEEE Notice

Disposal of Waste Electrical and Electronic Equipment and/or Battery by users in private households in the European Union

This symbol on the product or on the packaging indicates that this product should not be disposed of as a household waste. Please check local regulations for correct disposal of electronic products.

CE Regulatory Notice

Notes on Installation

1. This product shall be installed near the back-mirror, at the center of windshield, if possible, for optimal viewing.
2. Make sure that the lens is within the wiping range of the windscreen wiper to ensure a clear view even when it rains.
3. Do not touch the lens with your fingers. Finger grease may be left on the lens and will result in unclear videos or snapshots. Clean the lens on a regular basis.
4. Do not install the device on a tinted window. Doing so may damage the tint film.
5. Make sure that the installation position is not hindered by the tinted window.

Battery warning

- Always charge using the provided system. Improper handling of the battery may result in explosion.
- Never dismantle or pierce the battery or allow the battery to short-circuit.
- Keep the battery out of reach of children.
- Batteries may explode if exposed to naked fire. Never dispose of batteries in a fire.
- Disposed of used batteries observing local regulations. Never replace the battery on your own; have the dealer do it for you.

Caution

- Due to local laws and vehicles safety considerations, do not operate the device while driving.
- Set up time and date accurately before you use this device.
- Please use SuperCar software in condition that Google Map is function normally.
- The firmware.function in the device is for reference only, please follow the actual road condition.
- The results of GPS positioning are only for reference, and should not affect the actual driving situation. The system also cannot ensure the positioning accuracy.
- GPS positioning accuracy may differ depending on weather and location such as high buildings, tunnels, undergrounds, or forests. GPS satellite signals cannot pass through solid materials (except glass). Tinted window will also affect the performance of the GPS satellite reception.
- GPS reception performance on each device may differ. The system cannot determine the accuracy of the positioning results from different devices.
- The values displayed in this system, such as speed, position, and the distance warning to the speed camera set points, may be inaccurate due to the influence of surrounding environment. They are for your reference only.
- This device requires the installation of the GPS module and vehicle connector in order to use the satellite status, Time Sync., speed-detection photo prompt, user-defined speed detection spot management, user-defined speed limit prompt, lane deviation detection, driver fatigue alert etc.
- The system is used only for non-commercial use, within the maximum limits permitted by applicable law. Our company does not accept any responsibility for any data loss during the operation.
- Wi-Fi Signals are unable to pass through the building. The upper limit of signal transmission is 10m.
- Wi-Fi Operation Channels List: Ch1~Ch11.
- The product employs wireless data communication which may interfere, or be interfered by, a near-by device.
- Never use this device in the vicinity of a microwave oven or at places where there is radio interference.
- Radio wave reception may be worsened in specific environments.
- Please be advised that if another device is also using the same 2.4GHz band as this product, the processing speed of both devices may slow down.
- This product gets warm when in use; this is normal.
- Improper use or operation of the product may result in damage of the product or its accessories and void the warranty.
- The radio frequency (RF) generated by this RF electronic device may cause adverse effects on other electronic devices and result in malfunctioning. Wireless transmitters and circuitry may also interfere with other electronic devices. Therefore, do observe the following precautions:
  - Aircraft: Never use a radio transmitter when you are in an airplane. Please switch off the Wi-Fi function of the device.
  - Vehicle: The radio frequency transmitted by this device may affect the electronic system in a motorized vehicle. Please consult the manufacturer or dealer of your vehicle on the possible effect.
  - Pacemaker: In order to prevent any potential interference to a pacemaker, anyone who uses a pacemaker should be advised, that, when using this device, a minimum distance of 15cm (6 inch) should be kept between the device and the pacemaker; and never put this device in a chest pocket. In case of any doubt of interference, switch off the device immediately.
  - Medical Device: If you use a personal medical device, consult the device manufacturer or your physician to confirm if your device is sufficiently shielded from the RF transmission of this device.
  - Medical Facilities: Hospitals and medical institutes may use facilities that are sensitive to an external RF energy. Observe such instructions when the medical care personnel or any posted sign requests you to switch off any device that may interfere the radio frequency.
  - Explosion sites or any location with a posted sign: In order to prevent interfering with an explosion activity, observe all the signage and instructions in the Explosion Area or in a zone with a “Switch Off 2-way Radios” sign by switching off devices that may interfere with the radio frequency.

1 Introduction

Thank you for purchasing this advanced Car Recorder. This device is specifically designed for real-time video and audio recording when driving.

1.1 Features
- Full HD recording videos (1920x1080@30fps or 1280x720@60fps)
- 2.7” LCD color touch screen
- Wide angle lens
- Multifunction traffic safety reminder
- Automatic Emergency recording for collision detection
- Supports SDHC up to 32GB

1.2 Package Contents
The package contains the following items. In case there is any missing or damaged item, contact your dealer immediately.

Car Recorder  Bracket  Quick start guide

CD-ROM  Car charger  Car adapter

2 Getting Started

2.1 Inserting the Memory Card
Insert memory card with the gold section facing upward and the screen of the device facing upward too, as illustrated. Push the memory card in until a click sound is heard, indicating the card is in position.

To remove the memory card
Push to eject the memory card out of the slot.

Note:
1. Do not remove or insert the memory card when the device is turned on. This may damage the memory card.
2. Please use a Class 6 or higher rating Micro SD card, max up to 32GB.
3. Please format the micro SD cards before the initial use.
4. When removing the memory card, be careful that the card may spring out and get lost. The memory slot has this spring-out feature for easy removal of the card.

2.2 Installing in Vehicles

2.2.1 Mount to Windshield
1. Push the bracket into bracket slot on top of device, until a click sound is heard.

2. With the suction-cup laying flat, position the suction-cup on the windshield.

3. Hold the base firmly on the windshield and press down the clamp to mount the car holder to the windshield. Make sure the base is securely locked in place.
2.2.2 Adjust the device position

1. Loosen the knob to swivel the device vertically.

2. Loosen the knob to swivel the device horizontally up to 360°.

3. Then tighten the knob to make sure the device is securely locked in place.

2.3 Connecting to Power

Use only the attached power connector for activating the device and charging the built-in battery.

1. Connect one end of power connector to USB/Power connector port on the device.

2. Plug the other end of the car adapter to the cigarette lighter socket of your vehicle. Once the vehicle engine is started, the device automatically turns on.

Note:
This product shall be installed near the back-mirror, at the center of windshield, if possible, for optimal viewing.
2.5 Powering the Device On / Off

2.5.1 Auto Power On/Off
Once the vehicle engine is started, the device automatically turns on. If the Automatic Record function is enabled, the recording will automatically start right after the device turns on. Please refer to Set Automatic Record (2.6.1).

2.5.2 Manual Power On/Off and Reset

2.5.2.1 Manual Power On
Push the power switch and make sure that the power switch locks on the memory card slot.

2.5.2.2 Power Off
Push the power switch and make sure that the memory slot is released and the device starts power off sequence. Do not power on the device when it is in the power-off sequence, or the recorded file may become corrupt.

2.5.2.3 Reset the device
In case the device fails to function normally due to unknown causes, push the power switch and verify the memory card is in the removable state; wait for 7 seconds and push the power switch again to restart the device.
2.6 Initial Settings

Before using the device, we recommend you to enable the Automatic Record function and set up the correct Date and Time.

2.6.1 Set Automatic Record

Default setting of Automatic Record is Enabled. The device will automatically start recording when powered on. In case Automatic Record is disabled, enable it by the following steps:

1. Touch \[ ![image](image1.png) \] to enter Main Menu.
2. Touch \[ ![image](image2.png) \] to switchover to Record Main Menu.
3. Touch \[ ![image](image3.png) \] / \[ ![image](image4.png) \] to select for entering Automatic Record function menu; touch again to select ON.
4. Touch \[ ![image](image5.png) \] to return to Record screen.

2.6.2 Set the Date / Time

To set the correct date and time, do the following:

1. Touch \[ ![image](image6.png) \] to enter Main Menu.
2. In \[ ![image](image7.png) \] System main menu, touch \[ ![image](image8.png) \] / \[ ![image](image9.png) \] to select \[ ![image](image10.png) \] for Set Timezone menu, touch \[ ![image](image11.png) \] to set the current time zone; then touch \[ ![image](image12.png) \] again to complete setting.

3. Select \[ ![image](image13.png) \] to enter Date / Time menu. Touch \[ ![image](image14.png) \] \[ ![image](image15.png) \] to select value; touch \[ ![image](image16.png) \] \[ ![image](image17.png) \] to select previous or next field; confirm by touching \[ ![image](image18.png) \] to complete setting.

Note:

1. If Time Sync. is on, device clock will be calibrated via satellite clock signal based on Set Timezone. Please refer to Time Sync. (4.2)
2. If satellite positioning is not successful, device clock will run based on user defined time.
3. Please be aware that touching \[ ![image](image19.png) \] during the recording process will stop the recording process and enter into main menu. Please make sure the recording can be stopped before operating menu selections.
2.7 Application
The camera allows you to connect to the mobile devices via the App. When using for the first time, install the Life Cam App for your mobile device.

2.7.1 Application installation

1. Search from Android Market or App Store for Life Cam application.
2. Install the App.

APP Layout and Features may be changed subject to different software versions. Please refer to Android Market or APP Store for update.

2.7.2 Wi-Fi connecting
1. Touch \[\] to enter Main Menu.
2. Touch \[\] to switch over to System Main Menu.
3. Touch \[\] / \[\] to select \[\] for entering Wi-Fi function menu; wait for screen to display device ID and Wi-Fi password.
4. Using Wi-Fi function of a mobile device, search for device ID from the list and select and enter Wi-Fi Password.

For iOS Users:
Using the mobile device [Settings] → [Wi-Fi] → [Select device ID no.: X5XXXXXX] → [Enter the password] → [Connecting]

For Android Users:
Using the mobile device [Settings] → [Wi-Fi] → [Select device ID no.: X5XXXXXX] → [Enter the password] → [Connecting]

Display of "Wi-Fi connection ready!" on the device screen indicates that the device has linked up with your mobile device.

5. Execute the Life Cam App.
6. To disconnect Wi-Fi link, just exit Life Cam Application.

Note:
1. Make sure the Wi-Fi function of the equipment is activated and the mobile device is receiving Wi-Fi signal before executing the Life Cam App, or the App will be exited.
2. The mobile device shall be within a maximum of a 10m distance from the equipment without any buildings in between.
3. When the Wi-Fi function of the equipment is activated for 3 minutes without connecting with your mobile device, or the connection is disconnected, the equipment will automatically stop the Wi-Fi function and you will need to re-activate the Wi-Fi function.
4. We suggest that you should set the correct date and time for your mobile device before using the equipment, so that the recorded video will be consistent with the date and time settings of the mobile device.
5. When linking up with a mobile device, touch-control of device screen is no longer effective. Perform operations via the Life Cam Application. For operating the device again, you need to exit the Life Cam Application first.
6. The language of the Life Cam App will be consistent with that of your mobile device, it shall be the default language if it is not the built-in one.
3 Using the Car Recorder

3.1 Recording Videos

3.1.1 Record videos while driving

When the vehicle engine starts up and the Automatic Record function is enabled, the device automatically turns on and starts recording.

Recording will automatically stop when the engine is switched off, or touch [ ] to stop recording manually.

Note:
On some cars, the recording will continue when the engine is switched off. If this happens, please manually turn off the cigarette lighter or remove the car adapter from the cigarette lighter.

3.1.2 LDWS (Lane Departure Warning Systems)

When LDWS is enabled after satellite positioning, device will give a voice alert and display an alarm screen if vehicle speed reaches or exceeds 50 km/h (31 mile/h) and the vehicle deviates from the original lane.

To set the LDWS (Lane Departure Warning Systems), do the following:

1. Touch [ ] to enter Main Menu.
2. Touch [ ] to switchover to Driving Safety Main Menu.
3. Touch [ ] to select for entering LDWS function menu, then touch [ ] again to enable the function (on).
4. Touch [ ] to return to record screen.
5. After enabling LDWS, screen displays LDWS calibration diagram [ ]. If satellite positioning is on, device will give a voice alert and an alarm screen if vehicle speed reaches or exceeds 50 km/h (31 mile/h) and the vehicle deviates from the original lane.

Note:
LDWS is only applicable when satellite positioning is in ready state. Make sure satellite positioning of your device is ready if you want to activate this function.
3.1.3 Driver Fatigue Alert

When **Driver Fatigue Alert** is enabled, a voice alert and a warning screen will be activated 1 hour after the device is powered on, with a repetition at every subsequent 30 minutes.

To set the driver fatigue alert, do the following:

1. Touch to enter main menu.

2. Touch to switch over to **Driving Safety** Main Menu.

3. Touch to select for entering **Driver Fatigue Alert** menu, touch again to activate (on).

4. Touch to return to record screen.

3.1.4 Record all other types of videos

1. Touch to start recording.

2. Touch again, to halt the recording.

**Note:**

1. It can be configured to save a video file for every 3 or 5 minutes of recording. Please refer to **Video Duration** (4.2).

2. The device saves the recording in the memory card. If the memory card capacity is full, the oldest file in the memory card is overwritten.

3.1.5 Emergency Recording

1. During video recording, touch to enter emergency recording mode, the "Emergency" message will be shown immediately on the lower left corner of the screen, and the recorded file will be protected.

2. Touch again, to halt the recording.

**Note:**

1. If the **Collision Detection** function is enabled and a collision is detected, the device will automatically trigger the emergency recording. Please refer to **Collision Detection** (4.2).

2. The emergency recording file is created as a new file, which will be protected to avoid being overwritten by normal cycling recording. 4G memory card can save up to 5 emergency video files, and 8G (or above) memory card can save up to 10 emergency video files. The alert message of "**Emergency files are full**" will pop up on the screen when the emergency recording files are full, and the oldest emergency file will be automatically deleted when a new emergency recording file is created.
3.1.6 The Recording Screen

- **Recording Icon**: Indicates the recording status.
- **Date / Time**: Indicates the current recording date and time.
- **Menu**: Touch to enter the main menu.
- **Taking Snapshot**: While recording, touch to take a photo.
- **Recording Duration**: Indicates the video current duration.
- **Satellite positioning icon**: The icon appears on the screen when satellite positioning of the device is ready.
- **Battery**: Indicates the remaining battery power.
- **4 GRID FUNCTION CHART in the LCD screen**: Touch to enter the 4 GRID FUNCTION CHART in the LCD screen. Please refer to 4 GRID FUNCTION CHART in the LCD screen (3.1.8).

11 | ![Emergency Recording](image) | Emergency Recording | During video recording, touch to enter emergency recording mode. Please refer to Emergency Recording (3.1.5). |

3.1.7 Taking Snapshot

You can also use this device to take snapshots of the current scene.

1. Press in recording mode to take a snapshot.
2. A snapshot is taken when this icon appears at center of screen.
3.1.8 4 GRID FUNCTION CHART in the LCD screen

Please touch when you are recording, then you can see the 4 GRID FUNCTION CHART in the LCD screen.
Touch any point of the screen to return to Record Screen.

Note:
Driving Speed, Driving Direction and Distance warning to the speed camera set points are only applicable when satellite positioning of the device is ready; otherwise, they will be displayed in gray scale only.

3.2 Playing Videos and Viewing Pictures

3.2.1 Playing Videos and Emergency Recording

Playback video record files as follows:

1. Touch to enter main menu.
2. Touch to switch over to File / Position menu.
3. Touch to enter Video / Emergency function menu.
4. Touch to browse for required video file, touch selected preview of video to enter Playback Mode.
5. Touch repetitively to return to Record Screen.
3.2.2 Viewing Pictures

View pictures as follows:

1. Touch  to enter Main Menu.

2. Touch  to switch over to File / Position main menu.

3. Touch  to enter Picture function menu.

4. Touch  to browse for required picture files, touch selected preview of picture to enter Picture Playback Mode.

5. Touch  repetitively to return Record Screen.

3.2.4 Deleting Files
To delete file(s), do the following:

1. Touch 📈 to enter Main Menu.
2. Touch 🎥 to switch over to File / Position main menu.
3. Touch 🎥 to enter Video/Picture/Emergency menu.
4. Touch ⬅️ ➤️ to browse for required video or picture file; touch selected preview image to enter Video/Picture Playback Mode.
5. Touch 🎥 to enter File Deletion menu, select 🌟 to delete one file or all files; touch ✗ to confirm or cancel the selection.
6. Touch 🎥 repetitively to return to Record Screen.

Note:
Deleted files cannot be recovered. Ensure the files have backup before deletion.
4 Adjusting the Settings

4.1 Using the Menu
You can customize the general settings via the on-screen display (OSD) menus.

- Touch □ in the record mode will stop the record and enter into Main Menu.
- Touch △ to □ to switch over main menus.
- Touch □ □ to browse for function items in the respective main menu; touch a function icon to enter setting screen.
- On completion of setting a required function item, device will return automatically to the main menu of the selected function.
- Touch □ to return to Record Screen.

4.2 Menu Items
Refer to the below table for details of main menu and function list.

5 Installing the Software

1. Place the attached CD ROM into the CD player.

2. If the CD does not execute automatically, please use Windows File Manager to execute the Install_CD.exe file in the CD.

   The following screen will be shown up.

   ![Screenshot of the CD menu](image)

   QuickTime
   PDF Reader
   User Manual
   SuperCar
   Exit

3. Press the [Menu] item to start the installation process according to the instructions on-screen.

Note:
1. To display the route on Google Maps, please make sure the internet is connected before starting the video playback.
2. Video files (MOV / TS) and GPS/G-Sensor files (NMEA) must be stored in the same folder before starting the playback.
3. The SuperCar software is only applicable to a Windows operating system.
