Parts on the front plate

Car model: VW MAGOTAN (8"")

1 SD card slot
A slot for inserting or taking out of the SD card with music, movies and photos

2 Microphone
Used for Bluetooth phone conversation

3 Power on/OFF button
Short press to power on when the machine is powered off. Short press to Mute Mode, when the machine is powered on, short press again to quit Mute Mode. Long press the button for 3 seconds to power off when the machine is powered off.

4 Main menu
Press this button to enter main interface.

5 VOL+
Press this button to adjust Volume+

6 VOL-
Press this button to adjust Volume-

7 Remote control receiver
The sensing area of remote controller

8 MAP card slot
A slot for inserting or taking out of the GPS map card

9 Reset
Press this button to reset the player.

10 Disk-out button
Press this button to bounce out disk.

11 Navigate
Press this button to enter GPS map interface.

12 DISC
Press this button to enter DVD play interface.

13 DIM
Short press this button to adjust backlight (level 6); press and hold this button to close the screen. After closing screen, press this button or touch the screen to start display.

14 USB interface
It can connect memory card stored with music, movies or photos, for appreciation and reference.

15 Disk-out slot
A slot for inserting or taking out of disks
The operation manual is for reference only. Detailed images and functions please comply with the actual objects. They are subject to change without prior notice.
Safety Precaution

Warning

When it is updating, please do not power off or the unit will be burned. The disk entrance shall be kept clean and any dust that is found shall be wiped off immediately; The disk with dust shall be wiped off with clean cloth before it is placed into the player, otherwise, dust brought into the player with the disk will have impact on the transmission mechanism after a long time's use, resulting in slow entry, or no entry or exit of the disk.

Notes for Installation

Notes for installation

The player only adapts to 12V-14V DC power negative-pole grounding system, so confirm if your car is applicable for this kind of negative-pole electrical grounding system prior to installation.

Prior to installation of the player, please take off the power source at negative pole (−), and the chance to damage your machine due to short circuit can be reduced in doing so.

Wires shall be connected in accordance with colors in the guide to installation, for wrong connection may cause stagnancy of the machine or damage electrical system of the car.

The lead wire of a speaker (−) shall be connected to (−) its terminal, and it is prohibited being connected to chassis of the vehicle or the speakers.

Do not block the ventilation hole or heat radiation plate so as to prevent from fire as a result of over heating inside the machine.

After installation is completed and used for the first time (including replacing the battery of the car), press the RES key on the panel with a small tool so that the system is in the default setting state.

### Basic operation

#### Main menu

1. Radio mode (optional)
2. DISC mode
3. TV mode
4. Android mode (optional, Detailed description place refer to "Android Operating System Operation Instruction Manual". Without Android function, the key is for GPS function)
5. Bluetooth mode

#### Enter various modes

* Click 1 - 10 keys to enter their respective modes.

#### Universal setting

* Click 11 [ ] icon in any interface other than GPS interface to show menu of universal setting as in the following figure.

---

#### Universal Setting

2. Display setting key 7. Key sound setting 12. Steering wheel setting
5. Version information key 10. Rear view setting

#### Normal setting

* Click 1 Normal setting key to set language, key sound, music navigation, backlight mode, rear view, manual brake check, steering wheel setting and touch screen calibration respectively.

#### Display setting

* Click 2 Display setting key to set display mode, tone, brightness and contrast respectively.

#### Sound setting

* Click 3 Sound setting key to set sound effect mode, equal loudness, treble, bass and balance for four speakers in the car respectively.

#### Time setting

* Click 4 Time setting key to adjust time and date respectively.

#### Return to main menu:

* Click 14 [ ] icon to return to main menu mode.
Basic operation

Normal setting

1. Language setting
2. Key sound setting
3. Music navigation setting
4. Backlight mode setting
5. Rear view setting
6. Steering wheel setting
7. Touch screen calibration
8. Manual brake check setting

Steering wheel setting

Setting and use of steering wheel:
If your car is controlled with a steering wheel, operate as per the following procedure:
1. Turn off the power, find the steering wheel cable (Cautions: some cars have three wires, and others have two) and ground wire, and connect the ground wire in the steering wheel to the ground wire among three wires of the steering wheel led out from the main engine. If the steering wheel of the car has three wires, connect the other two key wires to the remaining two key wires in the steering wheel led out from the main engine; if the steering wheel has two wires, connect the remaining key wire to any of the two key wires led out from the main engine.
2. Check the wiring for the steering wheel and turn on the power after confirming all wires are connected correctly, and click setting key on the right and upper of the screen to enter the setting menu.
3. Click steering wheel setting key on the menu to pop up the steering wheel setting menu;
4. After the steering wheel setting menu is popped up, press test key and you can see sampling value for A and B displayed in the information box, this is the default value for the steering wheel sampled by the main engine;
5. Then click "Cancel" key under it and clear all keys. Remember to click this key each time to clear all previous settings before changing the setting;
6. Learn to click and use keys. Click the function key and "PRESS KEY" will be prompted in the information column, prompting the user of the keys on the steering wheel required for definition. After pressing keys on the steering wheel, value for the key you press will be displayed in the information column, indicating that the key has been sampled by the main engine. And you can learn to use the next key, till all keys are learned.
7. After learning, you should press "Completion" key to keep keys you learn and enable steering wheel function. If you don't press "Completion" key after learning, all keys you learn before will be invalid;
8. After learning, if you do not want it, press "Cancel" key to cancel it and disable steering wheel function;
9. In the course of learning, if your think sampling value for some keys are too similar, and wrong codes are easy to occur, exchange the two key wires, that is to say, exchange the two key wires led out from the main engine. If the steering wheel has one key wire, connect it to the other key wire led out of the main engine and return to step 1 for learning again;
10. There may be several keys for the steering wheel, and you can learn function of the keys as per the function for keys on the menu. Do not mind whether there are the keys in the menu for steering wheel or not, for they do not influence your normal use. You need just to learn the keys on the steering wheel.
11. After learning the keys on the steering wheel, you can enter the setting menu and click "Cancel" key to disable steering wheel function. After it is disabled, your steering wheel will not work. If you need to enable steering wheel function, return to step 1 to learn settings again.

Display setting

1. Click the display mode as shown in the right figure to choose from the following four modes:
   - Customize
   - Standard
   - Bright
   - Soft

2. Click Tone, Contrast and Brightness as shown in the right figure to customize Tone, contrast and brightness of the display screen.

Sound setting

1. Click Sound effect mode key as shown in the right figure to choose from the following five sound effects:
   - Standard
   - Rock
   - Roll
   - Pop
   - Jazz
   - Classic

2. Click Equal Loudness key as shown in the right figure to customize the "Enabled" or "Disabled" states for equal loudness.

3. Click leftward or rightward direction keys for Treble and Bass to customize treble and bass.
4. Click leftward, rightward, upward or downward keys of the car as shown in the right figure to customize front, rear, left and right speakers.

Time setting

1. Click key and key for time adjustment to set time and minute respectively.
2. Click key for time adjustment to set display time as 12H or 24H.
3. Click key and key for date adjustment as shown in the right figure to adjust year, month and day of the date.
4. After adjustment is completed, click Apply key to pop up time setting menu.

Version information

1. Click [Version information] key to display version information of the software.
Radio Operation Mode

Radio mode

1. Return to main menu
2. Single sound channel/stereo sound switch
3. Auto searching/Scan and browse
4. Status and time display area
5. Band
6. Far/near distance switch
7. Universal setting
8. Automatic searching -
9. AF (RDS) (optional)
10. Mute
11. Volume +/ -
12. PTY (RDS) (optional)
13. TA (RDS) (optional)
14. Automatic searching +
15. Favorite radio stations

Automatic searching
- Click ⑤ Automatic searching key, the player will search for radio stations automatically and store them in 1-6 keys of each wave band.

Browse/radio station
- Press ⑤ Scan key to browse radio stations preset in 1-6 keys of each wave band, and each radio station plays for 10 seconds.

Far/near distance switch
- Click ⑤ [LOC] key to set far or near distance search modes of the player. If near distance radio mode is set, the player only receives local radio stations with strong signals; and if far distance mode is set, the player will receive local and remote radio stations.

Stereo/single sound channel switch
- Click ⑤ or single channel radio mode.

RDS (optional functions)
- Press ⑤ and ⑥ keys to choose from different radio stations upwards or downwards, press and hold ⑤ and ⑥ keys, the player will search for radio stations upwards and downwards. After receiving a radio station, the player will stop at the frequency position of the radio station.

Favorite radios
- After the player receives a favorite radio, press one of 1-6 number keys for 2 seconds to store the radio into the number key. Click 1-6 number keys to play the radio stored in the key, as shown in ⑤.

Return to Main Menu
- Click ⑤ icon to return to main menu.

Universal Setting
- Click ⑤ icon to pop up the universal setting menu. For details, refer to part of universal setting at page 9.
**DVD SD MMC USB Operation Mode**

**DVD/SD/MMC/USB operation mode**

After a disk is placed into the player, the player will enter DVD mode automatically. In case there's a disk in the player, click DVD icon in the main menu to enter DVD mode.

1. Disk entry/exit key
2. Play/pause key
3. Stop key
4. Page up/down key
5. Menu play key
6. Caption key
7. Sound channel key
8. Zoom in/out key
9. Volume +
10. Volume -
11. Repeat playing key
12. Fast forward key
13. Fast backward key
14. Next program
15. Previous program
16. Return to main menu
17. Universal setting menu
18. Status and time display area
19. Pattern key
20. Random key
21. DVD setting key
22. Title key
23. Display key
24. Search key
25. OK key
26. Upward key
27. Rightward key
28. Leftward key
29. Downward key
30. Mute key

**Disk entry/exit key**

* Click ① [△] key to complete disk entry and exit operations.

**In the state of playing**

* Click ② [ ■ ] key to pause playing and click it again to resume normal playing.

---

**Stop playing**

* In the state of playing, click ③ [ ■ ] key to stop playing and click ④ [ □ ] key to play again.

**Page up/down key**

* Click ⑤ P1 key to enter page 2, click ⑥ key to display P2, click P2 to enter Page 3, click ⑨ key to display P3, click P3 to enter page 1.

**Menu play**

* Click ⑦ [Menu] key to enter menu playing mode. [The disk shall be VCD2.0 or DVD supporting menu playing]

**Caption key**

* Click ⑧ [Caption] key to choose from various captions accompanied with DVD.

**Sound channel function operation**

* Click ⑨ [Sound channel] key to switch among left sound channel, right sound channel, mixed sound channel, stereo and language (shall be supported by the disk) freely.

**Zoom in/out key**

* Click ⑩ [Zoom in/out] key to magnify screen displayed in DVD. Refer to directions for remote controller.

**Volume control**

* Click ⑪ [ + ] volume key to increase volume, and click ⑫ [ - ] volume key to decrease volume.

**Repeat playing**

* Click ⑬ [ Repeat] key to set repeat playing mode and the sequence for repeated clicking is as follows:

  Remarks: The default is repeated playing of the whole disk.

  - Single program repeating
  - Whole disk repeating
  - Close repeating

**Fast forward/backward control**

* Click ⑭ [ ▶ ] and ⑮ [ ◄ ] keys for fast forward or backward playing respectively. Click ⑮ [◄] key continuously to enter fast forward ×2 / fast forward ×4 / fast forward ×8 / fast forward ×20 playing. In the state of fast forward or fast backward state, press ⑲ [ ▬ ] key directly to resume to normal playing state.
### DVD SD MMC USB Operation Mode

#### Program selection setting
- Click [ ] or [ ] key to select next program or previous program respectively.

#### Return to main menu
- Click [ ] icon to return to main menu.

#### Universal setting
- Click [ ] icon to pop up a universal setting menu. For details, see part of universal setting at page 9.

#### Pattern key
- Click [ ] key to choose from NTSC/PAL pattern/Automatic systems.

#### Random key
- Click [ ] key to play programs in DVD in a random manner.

#### DVD setting key
- Click [ ] key to set DVD mode.

#### Title key
- Click [ ] key to display list of titles in DVD.

#### Display key
- Click [ ] key to display DVD playing time, programs and remaining time.

#### Search key
- Click [ ] key to search for programs in DVD.

#### Confirm key
- Click [ ] key to choose the state you want and click [ ] key to confirm.

#### Speaker state display
- Click speaker [ ] as shown in [ ] and it will be changed into the state [ ] as shown in the figure, viz. Mute, and click again to return to the state with sound.

### Volume control
- Click ① [ + ] and ② [ - ] keys respectively to control increase or decrease of volume. Volume is divided into 40 grades. If volume is set above grade 30, turn off power (or ACC car key) and restart, volume of the player will be memorized in the set volume position; if volume is set below grade 30, volume of the player will be memorized in grade 15 after restarting.

### Random
- Click ③ [Random] key to play audio and video contents in IPOD randomly.

### Close
- Click ④ [Close] key to close IPOD connection state and IPOD starts charging immediately.

### Repeat
- Click ⑤ [Repeat] key to repeat playing current program or repeat playing all programs in a cycling way.

### Menu playing
- Click ⑥ [menu] key to enter menu playing mode.

### Program selection setting
- Click ⑦ [ ] key or ⑧ [ ] key to select next program or previous program.

### In the state of playing
- Click ⑨ [ ] key to pause playing and click it again to resume normal playing.

### In the state of playing
- In the state of playing, click ⑩ [ ] key to select upwards and click ⑪ [ ] key to select downwards.
Bluetooth Operation Mode

Bluetooth mode

1. Dial/receive key
2. Refuse/hang-up key
3. Backspace key
4. Bluetooth/mobile phone receiving switch key
5. Phone dialing
6. Phonebook
7. Music playing
8. Bluetooth setting
9. Number dialing key
10. Dialing display box
11. Return to main menu
12. Status and time display area
13. Universal setting

Bluetooth matching and connection

Turn on the power of the player and Bluetooth function will be enabled automatically.
- For the first matching, search for matching Bluetooth equipment with a mobile phone. Select OK. Input universal code “0000” and confirm and the mobile phone will display “Matching is successful”. Select connection and confirm.
- After mobile phone has been matched and connected with the player, it will be connected automatically for next startup.

Remarks: Operation for different kinds of mobile phones is different. Refer to operation manual of mobile phone for details.

Dial/receive phone

- Press number key to display the phone number on the Status and time display window. If the number is pressed by mistake, press [C] key to clear it. Clear [C] key again to dial the phone number and press [ ] key to hang up.
- For receiving an incoming call, as a call comes in, number of incoming call will be displayed on the status display bar. Click [ ] key to receive the incoming call and press [ ] key to refuse the call.

Return to the main menu

- Click icon [ ] to return to the main menu.

Universal setting

- Click [ ] icon to enter the universal setting menu. Refer to part of universal setting at page 9 for operation of universal setting.

Phonebook

1. Phonebook
2. Dialed phone
3. Received phone
4. Un-received phone
5. Bluetooth/mobile phone receiving switch
6. Page up
7. Refuse/hang-up
8. Dial/receive key
9. Page down

Search of phonebook/received/dialed/un-received phones

- Upload phone numbers in accordance with Bluetooth protocol supported by the mobile phone.
- Click [Dailled phone] key to search for latest dialed phone numbers, max. 10 numbers. After selecting the phone number, press [ ] key to dial the number.
- Click [Received phone] key to search for latest received phone numbers, max. 10 numbers. After selecting the phone number, press [ ] key to dial the number.
- Click [Un-received phone] key to search for latest un-received phone numbers, max. 10 numbers. After selecting the phone number, press [ ] key to dial the number.

Note: Upload way of phonebook is set in accordance with different mobile phones. Please upload to the player with universal Bluetooth in the phonebook of the mobile phone.

Music playing

- Bluetooth of the player supports A2DP stereo Bluetooth music playing communication protocol and supports active control function. If the Bluetooth connecting the player supports A2DP communication protocol, just click [ ] key in the standby state. The player will control music playing of the mobile phone. Click [ ] key to select previous program. Click [ ] key to stop playing.

Bluetooth setting

- Click [Reset] key to clear data stored via Bluetooth, press [Connection] to connect Bluetooth, click [Disconnect] key to disconnect the connected Bluetooth.
- Click [ ] key to decrease volume of Bluetooth and click [ ] key to increase volume of Bluetooth.
**AUX Operation Mode**

**AUX mode**

1. Volume-
2. Volume+
3. Mute/sound

**Volume control**
- Click 1 [+] and 2 [-] keys respectively to control increase or decrease of volume. Volume is divided into 40 grades. If volume is set above grade 30, turn off power (or ACC car key) and restart, volume of the player will be memorized in the set volume position; if volume is set below grade 30, volume of the player will be memorized in grade 15 after restarting.

**Speaker state display**
- Click speaker [4] as shown in 3, it will be changed into the state of [5] as shown in the figure, viz. mute and click again to return to the state with sound.
Precautions for the use of remote controller

Place remote control transmitter on the remote controller at the IR of remote control receiver on the main engine for a series of operations.

Replacement of battery of remote controller
1). Hold cord 1 in the middle and pull out the battery base.

2) Put the side of the battery with mark (+) upwards and place in button-type battery.

3) Insert the batter base into the remote controller till it is put in place with a "click" sound.

Notes:
1. After it is used for a period of time, replace the lithium battery when remote control distance is shortened or it does not work.
2. The battery shall be put in a place out of reach of children. In case it is swallowed, send to the doctor immediately.
3. For installation of the battery, make sure the polarity of the battery shall be correct. Please do not hold the battery with metal pincers, which may result in short circuit.

1. Android Interface

After starting up, click the Android icon on the main interface to enter Android interface. It automatically update the time of system after GPS positioning.

Return to main interface: Press off picture in picture switch, picture in picture interface 1X / 2X, close the menu. After long pressing menu button, operation can be carried out. You can voluntarily add application shortcut to interface.

Click the button in the middle of the right side to enter program interface.

2. Web Surfing

Click the icon on the right side to directly enter Google web surfing. Users can access to Internet by the connection of the browser.

Or choose the third party software UC Browser to access to web surfing:

3. Button Instruction

Hidden button on top left corner
Long press the top left corner area for three seconds to enable the homepage interface to return to homepage

Hidden button on bottom right corner
Long press the bottom right corner area for three seconds to return to the previous menu

The following picture is the status bar, including the following buttons:

Main menu return button
Previous page return button
Menu button
The icon will appear after connecting to WiFi

Status bar
The top of the screen is status bar, which display media sound switch, network status, time and so on.

Time display
Wireless network status icon

Pressing the menu button, shortcut menu will be poppped on the bottom of the screen. The menu items include: add, wallpaper, search, notice and setting. It shows as the following:
4. Shortcut with Small Tool

Shortcut
If you want to add a shortcut to the main screen, please press menu → add → shortcut, and choose shortcut to add to the main screen. Click the shortcut icon on the main screen to carry out corresponding shortcut operation.

Widget
If you want to add a widget to the main screen, please press menu → add → widget, and choose a widget to add to the main screen. The widget can be added is shown as following:

5. Wireless Internet Connection

Wireless internet connection
1. Insert the matched USB card into the USB port and do the following operation after confirming the light of the module turns to green;
2. Press the Menu button and select "Settings" in the pop-up menu;
3. Select "wireless & networks" in the setting menu;
4. Select the check box behind Wi-Fi option to open Wi-Fi as shown below;
5. After the success of the network connection, Wi-Fi wireless connection icon will appear in the status bar at the top of the desktop.

6. Application Settings

Unknown source
Allow installation of applications from non-electronic markets after selected.
Manage applications
To manage and remove installed applications, press the menu button → setting → applications → manage applications.
Running services
To view and control the services currently running, press the menu button → setting → applications → running services.
Development
To set development options of applications, press the menu button → setting → applications → development.

7. SD card
Take out the SD card to check the available storage space.

8. Date and Time
To set date, time, time zone, signal timing and format, press the menu button → setting → date and time.

9. Language and Keyboard
Set language area (language and area), text input and automatic correction options.
10. Touch Screen Calibration

To calibrate the touch screen, press the touch screen calibration icon. Follow the prompts to do touch screen calibration. Appropriate prompt will appear for returning to the setting list after the calibration is completed.

Troubleshooting

11. Touch Screen

Touch screen senses the track of finger trajectory, so can do the following operation:
Note: Do not place objects on the surface of the touch screen because that may scratch or crush it.
Click: Select an icon to do a single click to select icon or option needed.
Long press: Select an icon and long press it to drag it to the desktop display.
Drag: Drag in the desktop to switch among three interfaces.
In the process of using the touch screen, stylus can be used to instead finger.

12. Restore Defaults

To restore the device to original factory settings and clear all information, press the menu button → setting → privacy right → restore factory settings.
Warning: After selecting to reset the device, Google account, data and settings of system and application and downloaded applications will be deleted. Please cautiously use this function.

13. Storage Card Use

Insert a memory card:
Insert the memory into card slot and use your fingers to press the card in until hearing the sound of "click".

Go over files in the storage card:
Run the "ES file browser" program to go over the content in the card.

Remove the storage card:
When needing to remove the TF card, please stop the file to record in the card, and then select "setting → SD card → uninstall SD card before pulling it out.

Note:
1. The card should be inserted into correct position, otherwise it will be damaged.
2. Storage card of major brands is recommended to be used to avoid that the card is not compatible.

The hot plugging of the storage card:
Please do not do the hot plugging to the card while using or going over the files in the storage card. If pulling out the storage card directly while going over or using the files in the storage card in the software such as My Video, My music and My Album, the card may be damaged and the device may automatically exit the program for self-protection. Please see "Storage Card Use" for reference of the plugging of the storage card.

Storage space:
There are two available storage spaces in the device: internal storage of the device and the storage card. The displayed removable disk of the internal storage of the device is "ResidentFlash3"; the displayed folder name of the storage card is "SDMMC". The available space in the ResidentFlash3 for the user is about 1.6 GB, while the storage card depends on the specific capacity and the maximum storage card the device can support is 32GB.

File copy:
In the file browser, the displayed folder name of the internal storage of the device is "LocalDisk"; the displayed folder name of the storage card is "sdcard". To copy files between the internal storage of the device and the storage card, please read the following operation for reference:
If you need to copy files from the storage card to the internal storage of the device:
1. Access to file browser, click the storage card icon to enter sdcard folder;
2. Select the SCSI folder to open it to see the files in the external removable disk;
3. Selecting the files to copy and long press the icon, an operation list as following will popup;
4. Click copy to copy the selected files;
5. Click the internal storage icon of the device to switch to LocalDisk;
6. Long press the blank area and an operation list as following will popup;
7. Select paste to paste the file to the current directory.

File delete:
Select the file you want to delete, long press the icon and select delete after the operation list popup. A delete confirmation dialog box will popup as following: Click OK to delete the file.

Files installation:
To install software in the file browser, you only need to click the installation file, the extension name of which is .apk. The installation prompts will popup. Select installation to install the software to the device.

Photo gallery
Click photo gallery icon to enter the photo gallery to browse pictures:

Click the above icons to implement corresponding operation.

Music
Click music icon to enter and select songs to play.

Press menu button in My Music interface and the following shortcut menu will popup:

Music playing:
Press volume plus or minus buttons to adjust the volume. There are pause, play, fast forward and fast backward buttons for easy operation:

In the file browser, returning to the previous page new folder file search switching to storage card sdcard and switching to internal storage of the device LocalDisk can be implemented.

15. Application Software Management
Installation
To install third-party software, open the ES browser select the file needed to install, the extension name of which is .apk:
Click installation to install the software:

After installation, you can immediately open the software and also can click the software to open on the subdirectory interface after completion.

16. Typical Applications Introduction

Navigation software
Can support Google Map

GOOGLE MAP
17. Solution of System Halt

In meeting the problem of system halt or blurred screen while entering into Android interface, long press RST button of the machine for five seconds or shutdown it for five seconds. After completion of electric discharge of the system, it will return to normal.
DVB-T module
User Manual

[Image of a DVB-T display interface]
Welcome to the wonderful world of mobile TV using mobile TV features, you can signal coverage within the scope of mobile TV signals from the suppliers to provide the best television programs, real-time understanding of external information, in the process of moving access to the spirit of joy;

When you want to use mobile TV features, the manual will provide you with useful information;

Please read carefully the "Guide" instructions and instructions and use only the original accessories, can not be expected to avoid the damage. If you do not follow the correct procedure to use the system or connect incompatible accessories, such acts would lead to automatic failure warranty, and you may even endanger the safety of others. In response, the Company assumes no responsibility;

TV screen depends on the clarity of television signals in the strong or weak, no programme for the fuzzy images or images to transfer to open or use an external antenna, if it still cannot receive, please contact the local TV signal providers and distributors;

not to the module on the temperature is too high or too wet;

function due to the increase or change and improve the performance of the manual version, without notice;

the "Guide" in the picture for reference purposes only, are subject;

I reserved to the "Guide" the ultimate power of interpretation.
1. Introduce

This DVB-T module is fully compliant with the international DVB standard and thus transmits digital images, sounds and information guides directly to your TV through the terrestrial broadcasting. Now you can comfortably see and receive digitally transmitted music, news, movie and sports terrestrial broadcasts in your office or at your home. In the Channel Search section, both the automatic channel search method and the manual Search mode are provided. The Menu is very modern and supports different languages. All functions can be carried out using the TSP, touch screen panel, and some of the functions can also be carried out using the front panel. The slim module is easy to use and adaptable for future advances. Please be aware that new software may change the functions of the slim module.

1.1 Features

- Auto/Manual search
- Supports multinational Language
- Channel manager
- Auto save channel
- Supports high speed mobility
- Strong to noise/good sensitivity
- Compliant with full DVB-T standards
- Audio output supports Stereo Audio R/L, I2S
- supports EPG, TeleText, Subtitle
- Video output supports ITU656/601, CVBS
- PND, PMP, MP3/4, Mobile TV, Hand-held applications

2. Search channel

If your slim module is connected to the aerial and television, you can automatically search channels without entering any other information. It is because no channel storage search, you can set up search mode and the country.

Remark:

a) Press the button to enter the main menu interface, four icons screen, that were Installation.

System, Channel list and Preferences, press the or button to choose the icon, to be elected the icon was to enlarge highlighted (Figure 2.2 show).
