2) During playback, press \( \text{SEARCH} \) to start seek operation;

3) During playback, press \( \text{AUDIO} \) to switch audio track or audio L/R channel;

4) During playback, press \( \text{SUBTITLE} \) to switch the subtitle track;

5) During playback, press \( \text{INFO} \) to show the file information;

6) During playback, press \( \text{FWD} \) to start the trick play controller;

---

Chapter 4
Media Center Menu

Media center Menu allows you to enter the file browser menu, file copy menu and setup menu. Press the on the remote controller to enter this menu,

**MOVIE**
Press this button to enter the file browser menu, which located at music tab.

**MUSIC**
Press this button to enter the file browser menu, which located at music tab.

**PHOTO**
Press this button to enter the file browser menu, which located at photo tab.

**FILE COPY**
Press this button to enter the file copy menu.

**SETUP**
Press this button to enter the setup menu.
Chapter 5

Setup Menu

The Setup Menu allows you to configure audio, video, network, photo and system settings.

Select Setup from the Media Center menu or on the remote controller to enter the menu,

Changing Audio Settings

Press and on the remote controller to select the Audio tab from the menu bar.

Night Mode

Select to toggle Night Mode on and off. This function reduces the maximum dynamic audio range.

Press and to enable or disable the function. Press to confirm.

Digital Output

Select to set Digital output type.

Press or to select from HDMI and SPDIF RAW or LPCM. S/PDIF (Sony/Phillips Digital Interface Format) carries digital audio signals between the player and other component devices, such as a home theater setup with surround sound.

The HDMI (High Definition Multimedia Interface) is a compact audio/video connector interface for transmitting uncompressed digital streams. It represents a digital alternative to consumer analog standards such as Radio Frequency (RF) coaxial cable, composite video, S-Video, SCART, component video, D-Terminal, and VGA.

RAW data is the original bit stream and will provide a better audio output.
LPCM is the default setting, and provides 2 channels audio output.

Changing Video Settings

Press and on the remote controller to select the Video tab from the menu bar.

Aspect Ratio

Select to set aspect ratio

Press and to select from Pan Scan 4:3, Letter Box 4:3, or 16:9. Press to confirm.

Pan Scan 4:3: Display a wide picture on the entire screen and cuts off the redundant portions. Select when a standard 4:3 TV is connected.

Letter Box 4:3: Display a wide picture with two black borders on the top and bottom of 4:3 screens Select when a standard 4:3 TV is connected.

16:9: Compress the image to convert the whole image. Select when a 16:9 TV is connected.

1080P 24HZ

Select to open 1080P 24HZ

On: If the Content is 24fps mode, player will change to 1080P/24Hz mode automatically before playback start.
Off: Do nothing.

Changing Network Settings

Press and on the remote controller to select the **Network** tab from the menu

Wired Lan Setup

Select to set the Network Setting. Before using the Network functions, please check following items:

Connect the player to Network first
1) Please enable NetBIOS of TCP/IP on computer.
2) Please turn off your PC’s firewall.

Please share the folders which you wish to browse in your PC

Press and to select DHCP (AUTO) or FIXED IP (MANUAL).

Press to confirm.
**DHCP DNS (AUTO)**
Set the DNS server IP address by auto

Press ENTER to confirm.

**FIX IP (MANUAL)**

Using Fixed IP, it is required to enter followings. IP address, Subnet Mask, Default Gateway. For further assistance to above settings, please contact the network administrator.

Press ENTER to confirm.
### Wireless Setup

Before configuring the WLAN settings, please check the following:

- Make sure the WLAN USB Adapter is connected to the USB HOST port.
- Make sure there is a wireless router or an AP (Access Point) on the network, or your PC is equipped with a wireless network adapter/card;
- Make sure your player is in the effective range of the WLAN.

#### Select a Profile Name

Select a Profile Name and press **Enter** to the next step.

Press the **Play** button to direct connect. Press the **Return** button to return.

#### Get Connection Mode

There are two connection modes: **Infrastructure (AP)** mode and **Peer to Peer (Ad Hoc)** mode.

Press the **Return** button to return, and the **Enter** button for next step.

Press the **UP / DOWN** button to select items.
Infrastructure (AP)

Infrastructure mode is used to connect computers with wireless network adapters, also known as wireless clients, which connect to an existing wired network with the help of wireless router or access point.

Get SSID Name
System will search for an existing SSID (Service Set Identifier) auto. And select the access point you wish to access from the SSID list.

Note: In the Security list, WEP (Wired Equivalent Privacy) and WPA (Wi-Fi Protected Access) means the network is encrypted, i.e. an encryption key is needed to access the network. NONE means it is an open system network.

Select Open System if the network is not encrypted. Otherwise, select Shared Key (WEP) or WPA Key to enter the encryption key.

Select SSID the system will get the IP address automatically. The test will take for a while, please be patient to wait. If the test is ok, the network information will be displayed.
Peer to Peer (Ad Hoc)

Peer to Peer mode, which is also called Ad Hoc mode or computer-to-computer mode, is used to connect wireless clients directly together, without the need for a wireless router or access point.

Ad Hoc Setup

Set the **Wireless SSID**, **Wireless Security**, and **Host IP** for the Ad Hoc connection.

Press **ENTER** button to enter. Press **RETURN** to return.

**Note:** Both the player and your PC need to use the Ad Hoc mode, share a common SSID, and be put into the same IP range

Select **PLAY** button to confirm and the next step.

If the test is ok, the network information will be displayed.
### Changing System Settings

Press **↓** and **→** on the remote controller to select the **System** tab from the menu.

---

### Menu Language

Select to choose the OSD (On Screen Display) language.

Press **↑** and **↓** to select the language. Press **ENTER** to confirm.

### Text Encoding

Select to choose the text encoding language.

Press **↑** and **↓** to select the text encoding language. Press **ENTER** to confirm.

### System Upgrade

Select to Upgrade SW from HDD.

Press **↑** and **↓** to select. Press **ENTER** to confirm. Otherwise, select **Cancel** to return.
**Time**
Select to set the system time.

Press ▲ and ▼ to select from Manual and Auto (via TV).
Press ENTER to confirm.

**BD/DVD Auto-Play**
Select to toggle the Auto Play function on or off.

Auto Play begins playing a DVD immediately when you insert it into the DVD drive.
Press ▲ and ▼ to enable or disable this function.

**HDD Format**
Select to HDD Format.

Press ▲ and ▼ button on the remote controller to select Cancel or CONFIRM from the menu.

**MISC**
Press ▲ and ▼ on the remote controller to select the MISC tab from the menu.
Resume playback

Select to set slide show time.

Press and to select. Press to confirm.

Press and to select the interval that you require.

Press to confirm.

Transition Effect

Select to set the transition effect of photos.

Press and to select the transition of photo you require Press to confirm.

Cross Fade – fade in and fade out
Left to Right- from left to right

Chapter 6

File Browser Menu

The Browser menu allows you to browse and play music, photo and movie files stored on a HDD or an external USB device and Card reader, Network, UPNP, DVD disc, etc. To enter the menu, select Browser from the Guide menu.

Press \( \uparrow \) and \( \downarrow \) to select the device on which the media is stored. Choose from USB, Card, HDD, NET, UPNP, DVD disc, Playlist, and press the \( \text{ENTER} \) to confirm.

Browsing All

Use the \( \leftarrow \) or \( \rightarrow \) to select the All tab.

All directories and supported contents will be displayed. Press \( \uparrow \) and \( \downarrow \) to select the directory or file you wish to browse, and press \( \text{ENTER} \) to confirm.

Browsing Music

Use the \( \leftarrow \) or \( \rightarrow \) navigation arrows to select the Music tab.
Press \(\text{up arrow}\) and \(\text{down arrow}\) to select the folder containing your audio files. A thumbnail strip appears at the bottom of the screen, shows song information. Press \(\text{left arrow}\) and \(\text{right arrow}\) to select the file that you want, to play and press \(\text{enter}\).

**Note:** While listening to audio files, you can browse the photos at the same time.

**Browsing Photos**

Use the left and right navigation arrows to select the **Photos** tab.

Press \(\text{up arrow}\) and \(\text{down arrow}\) to select the folder containing your photo files. Enter the folder press \(\text{left arrow}\) and \(\text{right arrow}\) to select the photo you want to view and press \(\text{enter}\). The photo will be full screen played.

Use the yellow \(\text{yellow key}\) to enter the thumbnail browser mode, press \(\text{enter}\) to start full screen play.

**Note:**

1. When the photo is displayed in full screen mode, the slide show starts automatically.

2. Press \(\text{previous key}\) or \(\text{next key}\) to switch to the previous and next picture.

3. While browsing a photo, you can press \(\text{left arrow}\) or \(\text{right arrow}\) to rotate a photo in any angle.

4. Besides rotating a photo, you can press \(\text{zoom key}\) to zoom in/out that photo, three zoom levels are available.

**Browsing Movies**

Use the left and right navigation arrows to select the **Movies** tab.
Press ▼ and ▲ to select the folders. Press ▼ and ▲ to select the movie you want to view and press ENTER. The movie will be played in full screen mode.

1) During playback, press ZOOM to zoom video, there is six zoom modes;

2) During playback, press SEARCH to do seek operation;

3) During playback, press AUDIO to switch audio track or audio L/R channel;

4) During playback, press SUBTITLE to popup the subtitle adjust menu.

5) During playback, press INFO to show the file information;

6) During playback, press to do the trick play controller;

---

**Browsing Network**

You can playback the multimedia files which shared on the local area network (Ethernet or WLAN).

Before viewing the following, please make sure that you have read “Changing Network Settings” and made the right settings.

When selecting NET in the Browser menu, there are two ways to locate the multimedia files shared on your local network. One way is to browse through workgroup; the other way is to browse through ‘My Shortcuts’.

1. **Browsing through Workgroup**

You can choose the workgroup which your PC belongs to from the workgroup list, find your PC name, and press the ENTER button to confirm.

Then select the shared multimedia file that you want to browse.
**Note:**
1. While browsing high definition video files (resolution up to 720p / 1080i / 1080p) via Ethernet or WLAN, the video might be buffering. It is normal due to the limit of network speed or signal strength.

2. Due to different network conditions, sometimes the workgroup might not be accessed or shown in the list. And then you need to use ‘My Shortcuts’ to browse shared files.

3. Use the network stream the media file, some of 1080P files may not play very smooth.

**Browsing through ‘My_Shortcuts’**

You can also set ‘Specific File Server IP’ and access it from ‘My_Shortcuts’ in the menu.

Press the BLUE color key button and a tools menu will appear.

<table>
<thead>
<tr>
<th>Network Browser</th>

Press OK into copy status. You will see the copy proceeding.

When copy succeed, the system will display “File Copy Completed!”; if failed, the system will display “File Copy failed!”

When the File Copy completed! You can select “OK” to browser files, or select “No” return.
System Upgrade

How to get the new firmware
To get the latest firmware, pls. visit our website:

Normal upgrade mode

1) Get the downloaded upgrade file named install.img.

2) Copy the install.img to the USB root directory. Insert the USB disk, then power on the player.

3) After boot up, press to enter the setup page.

4) Use the and to select the System tab.

5) Use and to select the System upgrade

6) Press to start the upgrade process. This page will be showed

   Please do not turn off the power!

   ![Upgrade progress bar]

   It will take about 5 minutes for updating, please keep POWER on during the whole updating process.

7) After the update is finished, the player will restart automatically.

Special upgrade mode

If the player failed to upgrade to new version in normal mode, such as power lost during the upgrade. You can use the following way to recover it.
1) Get the downloaded upgrade file named install.img.
2) Copy the install.img to the USB root directory. Insert the USB disk, then power on the player;
3) Press the two front panel key at the same time, NEXT and PREV;
4) Power on the box (release the key in 5 minutes);
5) if succeed, you will see this upgrade page;

6) Wait the update finished.
